STEEL REINFORCING BARS

Dependability of materials used is a prime requisite to the success of construction.

For twenty years Gunn, Carle & Co. has been able to guarantee STEEL REINFORCING installation service, without error—without complaint.

We shall be pleased to consult you, without obligation, regarding the construction problems in the field of Iron and Steel on jobs of any size.

Gunn, Carle & Co.

444 Market St., S. F.

Send For a Sample Copy
Of The NEW
Daily Pacific Builder

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California, featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction, bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies business opportunities, building permits, building contracts, mechanics' liens, acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

The new DAILY PACIFIC BUILDER will afford a service that serves—both in Quality and Quantity. You, as a member of the construction fraternity, should not be without it.

Subscription price \$1.50 per month, or \$15.00 a year, payable in advance.

Send for free sample copy today.

EMPLOYEE AS A PARTNER

Profit sharing as an important phase of industrial relations was practiced in France as early as 1842. Thirty years later the first English plan was organized, and shortly afterward attempts at profit sharing were made in the United States. From the plans now in effect in the United States, Canada and England, the Policyholders Service Bureau of the Metropolitan Life Insurance Company has drawn from the best practices of more than eighty companies and has incorporated them into a report entitled "Sharing Profits with Employees."

In this report the term profit sharing is used in its limited meaning as an agreement between an employer and his employee under which the latter receives a share, fixed in advance, of the profits of the firm. This excludes bonuses given at the discretion of the employer at a prearranged scale, sales bonuses, and production bonuses.

The discussion of this practice, which has been found helpful by many companies in building up employee morale, centers on four general types of plan: sharing profits with all eligible employees; sharing profits with employee stockholders; sharing profits with employee participating in a savings plan; and profit sharing for executives. Each of these types is reviewed in detail.

A limited number of copies of this survey are available to interested executives, and may be secured from the Policyholders Service Bureau, Metropolitan Life Insurance Company, One Madison Ave., New York City.

TOILET PARTITIONS BOOKLET IS ISSUED

The Division of Simplified Practice of the Bureau of Standards, Department of Commerce, has just announced the release of the printed booklet on Simplified Practice Recommendation No. 101—Metal Partitions for Toilets and Showers.

An examination of this booklet, copies of which may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C., for 10 cents each, reveals the establishment by the industry of center-to-center dimensions for toilets, dressing room and shower enclosures, together with a simplified list of stock sizes for partitions, fronts, doors, posts and hardware. Dimensions which fulfill the requirements for typical enclosures, door clearances, the style of fronts and the height off floor of partitions, doors and backs and a list of sizes, gauges and finish of panel-sheet steel for doors and partitions are also included in this recommendation.

Woodman! Spare that tree. From Reno, Nevada, came word that truck loads of Christmas trees were hauled away from Reno stores and dumped in canyons and ditches, due to the owners failing to find a market. Selected trees were offered for \$3 to \$6 last week failed to find buyers at 50 cents on Christmas Eve.

VIOLATES ARCHITECTS' LAW AND PAYS PENALTY

In Judge O'Brien's Court (San Francisco) December 24, I. D. Northcutt was convicted of violation of the Act to Regulate the Practice of Architecture in the State of California. He was convicted on a warrant sworn by Frank A. Johnson, who charged that Northcutt had been operating as an architect for the Greater City Lumber Company.

The State Board of Architectural Examiners pressed the charge before the court under the Amended Act Regulating the Practice of Architecture, which act came into effect August 14 of this year.

The defendant was sentenced to pay a fine of \$100 or serve a term of 20 days in jail.

NOTICE

Due to the merger of Daily Pacific Builder with Larsen's Advance Construction Reports, former daily service of Building & Engineering News, this issue appears in condensed form.

Commencing with the January 13th issue, however, Building & Engineering News will again appear with the regular features.

HOW MUCH ART IN "MODERN" ART?

The desire for "something different" is laudable. It means progress—if kept within bounds. We have lately had a surfeit of so-called modern art—in design, in furniture, in typography—that was decidedly different. But was not art. It violated every vital principle of harmony, symmetry, rhythm, contrast, balance, emphasis and proportion.

A refreshing exception is a circular now before us, published by the Pacific Portland Cement Company. It features a remarkable specimen of concrete construction—the new factory of the Continental Can Company, Oakland, Calif. Architects, Francisco and Jacobus, Los Angeles; Contractors, Scofield-Twaits Company, San Francisco.

The circular represents the true type of modern art. Its artistic and factual points of emphasis co-incide. The eye naturally, easily and readily absorbs the main point, viz.: that with specially prepared forms and the use of Old Mission Plastic Waterproof Portland Cement no further surface finish was needed when the forms were stripped. This marks a new step in the art of concrete practice.

FEDERAL FOREST ROAD FUNDS ARE ALLOCATED

The apportionment of \$4,500,000 of Federal forest highway funds as authorized by Congress for the construction of forest roads in and adjacent to the National Forests in the fiscal year 1931 has been approved by Secretary of Agriculture Hyde.

Representatives of the U. S. Forest Service, State Highway Commissions, and U. S. Bureau of Public Roads will start immediately to make plans for expending the amounts apportioned to the various States and Territories upon road projects upon which construction can be undertaken in the next fiscal year, which begins with July 1.

The forest highway fund is apportioned under the Federal Highway Act, which provides that 50 per cent of the authorized amount be apportioned according to the percentage of the National Forest area in any State to the total area of the National Forests in all the States, and the remainder according to the percentage of the value of National Forest land in any one State to the total of the Government land in all the National Forests.

The authorization is apportioned among the States and Territories for the next fiscal year, to include \$459,334 for Alaska; \$283,882 for Arizona; \$676,451 for California; \$94,196 for Nevada; \$631,987 for Oregon and \$331,368 for Washington.

FABRICATED STRUCTURAL STEEL ORDERS IN NOVEMBER

New orders of fabricated structural steel in November, as reported to the Department of Commerce by the principal manufacturers, were 59 per cent of capacity, based on total orders of 179,448 tons reported by fabricators with a capacity of 303,290 tons per month, as against October orders of 91 per cent of capacity and 63 per cent a year ago. Shipments of fabricated structural steel in November represented 74 per cent of the capacity of firms reporting this item as against 93 per cent in October and 71 per cent a year ago.

OIL BURNER MEETING

National Oil Burner Show will be held at the Hotel Stevens, Chicago, during the seventh annual convention of the American Oil Burner Association, April 7 to 12, inclusive, it is announced by Harry F. Tapp, executive secretary, in charge of arrangements for the exposition. Fifty-seven manufacturers had engaged space up to December 12.

STEEL BOILERS

New orders for 1239 steel boilers were placed during the month of November, 1929, as reported to the U. S. Department of Commerce by 80 manufacturers comprising most of the leading firms in the industry, as compared with 1712 boilers in October and 1660 in November, 1928.

SKYSCRAPER CONTRIBUTES TO ADVANCEMENT OF CIVILIZATION

"There are a group of critics who have objected to the tall building from the beginning and have condemned it as the source of most evils of our city life, and it is only recently that an endeavor has been made to lay the real facts before the public which will make it possible to arrive at an intelligent conclusion.

"It may be interesting to know that the first attack was chiefly directed against, so the critics stated, 'the strange and unsightly character of these tradition breaking monstrosities which dared to reach the dizzy height of 12 or 16 stories, against the way they disfigured the streets' and against the possibility of a catastrophe involved in the collapsing of one of these monsters on a crowded street.' These amount to nothing more than a prejudice against the new. Next came the criticism that these tall buildings shut out the light and air and thus harmful to the health of the public. Later on the traffic conditions have become almost intolerable in our cities and again the skyscraper was blamed. The congestion argument has become the chief objection of those with conscientious scruples against the tall building.

"In the matter of light and air it will be admitted by all that this applies only to a few lower floors and that as we reach the upper floors of a modern skyscraper, we attain the maximum of sunlight and air and also a cheerful outlook. The higher the floor the more permanent are such benefits. Also the more modern buildings have such arrangement of windows as to further assure an abundance of sunlight. Also the modern skyscraper makes possible the provision for artificial illumination and ventilation and atmospheric control so as to ever excel the natural light and air and thus afford the possibility of having the atmosphere of a roomy condacks right in the heart of New York City.

Possible Collapse Forgotten

"The possibility of the collapse of one of these buildings upon a crowded street was at one time held up as a serious objection to the permission of building them. After the experience of two generations this fear has been all but forgotten. Engineers have been able to convince the public of their ability to design and erect these structures with absolute safety.

"We still hear of the fire hazard and the danger to life of the occupants due to their inability to reach the ground in safety. All of our modern skyscrapers are built of fire-resisting material and the trend in the furnishing of the offices is towards the non-burning kind. Of course, we still have much of the contents that will burn and should a fire start it is necessary to confine it and either let it burn out or have it extinguished. The advances made in fire-resisting construction and fire-fighting equipment have reduced this menace to a minimum so that today the fire hazard is much less in the modern skyscraper than in most other types of buildings. There are three distinct agencies which work towards guarding against fire loss. First, the City Building Department is charged with enforcing the street regulations of the Building Code; second, the City Fire Department is charged with inspection of the various features with which they are concerned, not only during the construction but also periodically after occupancy and it is truly to the interest of the members of this department to see that all equipment is in working order and that no violation of the rules is allowed; third, the Fire Underwriters are interested in reducing the fire loss and in penalizing the owners by charging extra premiums which has a powerful influence to keep the requirements of the highest class lived up to.

Skyscrapers are economic necessities in modern urban life, according to Geo. E. J. Pistor of the Hay Foundry and Iron Works and director of the American Institute of Steel Construction, in a speech delivered December 29 before a gathering of steel constructors of the New York district at the Engineering Societies Building, New York. The skyscraper, said Mr. Pistor, has been praised as a distinguishing contribution to architectural art, but it should also be appraised for its contribution to the advancement of American civilization. The address was illustrated by a moving picture showing the method of rolling and fabrication of structural steel shapes and the erection of the Bank of Manhattan Building on Wall Street, New York. Mr. Pistor's remarks are published herewith.—Editor.

Cites S. F. Structure

"The other forces of nature which we have to contend with in considering the safety and design of a tall building are hurricanes and earthquakes. From the experience gained by the San Francisco earthquake of 1906 and the Japanese earthquake of 1926, as well as the various Florida hurricanes, it seems to indicate that the safest place for the human to be in case of such catastrophe is on one of the upper floors of a modern, fire-proof, steel framed office building. Professor Esley Willis, President of the American Seismographic Society said, 'the safest building in San Francisco in time of a possible earthquake is the great American Telephone & Telegraph skyscraper,' the tallest building on the Pacific Coast.

"While the building code prescribes that the frame work shall be designed to withstand a wind pressure of 30 pounds per square foot, which would correspond to 120 miles per hour, the highest wind velocity recorded in New York City occurred on February 22, 1912, when the U. S. Weather Department recorded a 96 mile per hour gale. This corresponds to 22 pounds pressure per square foot. A wind of 120 miles per hour is considered an absolute impossibility at the distance New York is from the equator. The public may rest easy regarding their safety from any collapse of a modern tall building due to the elements.

"Just a few words regarding the congestion problem. This problem is not new and was present in our various cities long before we had any buildings over three or four stories high. As far back as the time of Julius Caesar, ancient Rome had this problem to contend with and many of the traffic regulations which we think modern were resorted to at that time. Thus, history tells us that Rome had traffic policemen, taxi stands, one-way streets, also regulations that specified, due to the narrowness of the streets, merchants had to make their deliveries at night.

"In our own country this problem existed with bus and horse car lines and ferryboats fifty years ago. In London where buildings are limited to 100 feet in height above the sidewalk, every means of transportation and traffic is crowded. Where in our cities can you find more aggravated traffic congestion than is found at Aldergate or Ludgate Hill in London? Similarly in Paris and Buenos Aires, where there are no tall buildings, we find the traffic congestion a problem very serious and growing steadily worse. In our own United States the experience of those cities where there are few if any tall buildings seems to indicate that low buildings do not save the community from congestion. Take for instance, Boston—Boston has a very wide spread business area,

it has subways and a greater percentage of street area than most other cities, and yet where can you find a more serious traffic condition even in our tall building cities? Los Angeles is another city of low buildings and wide streets and still it has serious congestion.

"In New York City we find more serious congestion on Fifth Avenue and in the Times Square section than we do in the foot of Manhattan where most of the skyscrapers are. For the greater part of the day the department store sections are by far the more congested and in the evening you find the congestion in the theatre district where there are few if any tall buildings.

68-Story Building for New York

"In the new Empire State Building which will be erected on the site of the old Waldorf-Astoria Hotel, the present plans call for 62 elevators. This building will be 86 stories high, the top reaching some 1100 feet above the sidewalk. This building will have a grounded floor area of 200 feet x 425 feet and the tower which starts at the 30th floor has a floor area of 133 feet x 185 feet. The tendency is for buildings of larger ground area and the ideal space is naturally a full block with frontages on four streets. This sort of area is very difficult to assemble, however it would be a surprise if the up-to-date promoter would not strive to attain such plots. Mergers are the trend of the times, witness the chain stores, the many combinations of large and small companies and corporations and so it can be expected that real estate owners and builders will see the benefits to be derived from putting their interests together to make possible a more profitable operation. It will be found more advantageous for individual owners to combine their smaller plots and form combinations, so as to build on cooperative lines and thereby each individual in turn will derive a more profitable return from his property.

"In line with this statement, is the peculiar but natural trend for industries to centralize and just as the various factors of industry are grouping themselves into organizations, so they are also tending to locate themselves in close proximity of each other. Thus in New York we have the financial center in Wall Street, the garment center on Seventh Avenue, the shopping center on Fifth Avenue, the automobile center around Columbus Circle. This tendency to concentrate the business of certain kinds in specialized areas has been made more possible by the multi-story building.

"In conclusion let me say that in but a few years we shall celebrate the fiftieth anniversary of the invention of rolled steel shapes and the American skyscraper. Though possibly you may think that American architects have attained such skill in using the material at their disposal that today this tall building architecture is universally held up as one of the great contributions to creative art."

MOONLIGHT EFFECT MADE FOR CLEVELAND BUILDING

Something new in outdoor illumination, called "moonlighting" is used in lighting the exterior of the Museum of Fire Arts at Cleveland, Ohio.

The idea is to produce on the face of the building the dimness of real moonlight. This is done by softening the lights and using beams of different intensity so that angles which in real moonlight would appear dimmer than the face of the building, receive less artificial light.

The result is to give depth to the form of the building. The lighting was designed by J. W. Gosling of the General Electric Company.

COST PLUS BUILDER LEARNS NEW LAW KINK

A contractor who builds a building on a cost-plus basis, who does not agree to provide his own labor but merely makes contracts with others on behalf of his principal, cannot put a lien on the property for money he may have advanced for labor and materials. Such an arrangement is a loan arrangement for which there is no lien against the property.

This is the opinion of Superior Judge Yankwich of Los Angeles, who has just handed down a ruling in a novel question of law arising in the action brought by the Stiles Construction Company against the defunct El Sereno Country Club and Mrs. Clotilde Castruccio, owner of the property on which the club was to have been built. The trial of the action was held several weeks ago, after which Judge Yankwich took his decision under submission.

The court in his ruling held that as the contractors had furnished no labor or materials of their own, only money for others, their arrangement was merely a money loan one, therefore, they are not entitled to a lien on the land.

WALBRIDGE IS A. G. C. MANAGER PRO TEM

George B. Walbridge, vice-president of the Walbridge-Adlinger Construction Co., Detroit, Michigan, has accepted the request of a quorum of the executive committee of the Associated General Contractors to step into the breach left by the death of D. A. Garber, and will serve as general manager pro tem for the A. G. C. until the annual convention in New Orleans on January 30, 1930.

As a past president and active member of the A. G. C., Walbridge is in close contact with the program and plans of action of the organization. He represented the general contractors in the formation of the Allied Construction Industries committee which was initiated in 1928 under the auspices of the A. G. C. to correct improper practices and to stabilize conditions in the building industry, and has always been active in the work directed toward straightening out the general credit situation.

LOS ANGELES BUILDING FOR MONTH OF DECEMBER

During the first 18 days of December, 1929, the Los Angeles city building department issued 1524 permits with an estimated valuation of \$2,684,628. For the corresponding period in December a year ago the number of permits issued was 1490 with an estimated valuation of \$3,573,278, while for the first 18 days of November, 1929, the number of permits issued was 1544 with an estimated valuation of \$2,634,650. Los Angeles' building total for the current year up to and including December 18 was \$91,708,329, as compared with \$95,219,725 for the corresponding period last year.

AMERICAN ARCHITECT ADVISES BRITONS AGAINST "SCRAPERS"

An Associated Press dispatch from London says an American architect who builds skyscrapers advised British architects not to erect any in London.

William A. Delano, president of the New York branch of the American Institute of Architects, speaking before the Architecture Club in London, said he felt that Americans "are gradually being crushed by these monsters which have made life about as sterile as it can possibly be for the ordinary man."

"I hope you will not be captivated by this particular phase of our experiment," he said. "Unless you are ready to swallow our civilization whole, it would seem a mistake to copy any part of it."

\$14,000,000 FOR HOSPITAL CONSTRUCTION

The House of Representatives on December 16 passed a bill (H. R. 234) providing \$14,000,000 for immediate construction of new hospitals, domiciliary facilities or dispensaries, or the replacement, extensor, alteration, remodeling, or repair of existing facilities to provide additional hospitalization of World War veterans.

The work shall be done in such manner as the President may determine, and he is authorized to require the architectural, engineering, constructing, or other forces of any of the departments of the Government to do or assist in such work and to employ individuals and agencies not now connected with the Government if, in his opinion, desirable at such compensation as he may consider reasonable.

WESTINGHOUSE ELECTRIC RAISES DIVIDEND

On the strength of the Chairman's report that the earnings of the Company for the current year would be approximately \$10.00 per share, the Board of Directors of the Westinghouse Electric & Manufacturing Company on December 11 declared a quarterly dividend of \$1.25 per share on the Common and Preferred stock, being at the rate of 10% per annum. The dividend on the Preferred stock is payable January 15, and the dividend on the Common stock payable January 31, 1930, both to stockholders of record at the close of business on December 31, 1929.

TIMBER INTERESTS TO CONFER IN SACRAMENTO

Representatives of all timber-growing sections of Northern California are to confer in Sacramento January 10th for the purpose of planning action to fight off the pine beetle and pine rust, which is reported to be devastating pine forests of Southern Oregon.

The meeting is to be held under the auspices of the Sacramento Region Citizens' Council, which has invited timbermen from Klamath Falls and other Oregon pine sections, to meet with California timber interests.

HARVARD ARCHITECTS WIN FRENCH MEDAL

The University medal of the American group of the French Society of Architects was awarded to Harvard University at a luncheon given for Dr. George Harold Edgell, dean of the Harvard Architecture Department in New York, Dec. 26.

The medal is awarded annually to the university which best lives up to the tradition of the Ecole Des Beaux Arts in Paris.

Horace G. Driver, 27, an Australian who has been studying design at New York University, was awarded a medal for the best work as a student in architecture.

CONTRACTOR CONVICTED OF EMPLOYING NON-VOTER

George A. Caldwell, New Orleans contractor engaged in erecting the municipal auditorium, was given his preference of paying a fine of \$100 or serving 60 days in jail by Criminal Judge Charbonnet, who had found him guilty of violating the law against employing any but registered and qualified voters on the municipal auditorium job. Caldwell was convicted some time ago of employing a carpenter who was not a voter. Caldwell's attorneys filed notice of appeal.

STATE PURCHASING AGENT ASSUMES DUTIES

Fred J. Misphey has assumed his duties as State Purchasing Agent following his appointment to that post by Director of Finance A. R. Heron. Misphey, acting head of the purchasing division since the death of W. G. McMillan last July, entered the state service in 1911 as chief clerk for the Capitol grounds superintendent. Later he became assistant purchasing agent, and in 1925 was made Chief Deputy of the division.

SAN JOSE CARPENTERS GO ON FIVE-DAY WEEK SCHEDULE

The five-day week plan for carpenters in San Jose goes into effect February 1, 1930. It is announced by Oscar T. Martin, secretary of the Santa Clara Building Trades' Council. The plan is already in effect among the plumbing, painting, lathing and electricians' crafts.

SEATTLE MATERIAL DEALERS ELECT OFFICERS

D. E. Fryer has been elected president of the Seattle Building Material Dealers' Association. Walter Galbraith was re-elected vice president; Dean Henderson was elected secretary, and Joe McMullen was re-elected treasurer. W. C. Bickford, retiring secretary, was chosen delegate to the Seattle Construction Council.

RAFTSMAN RESIGNS

Charles Manly, for the past six and one-half years a draftsman in the department of public works at Fresno, has resigned, effective January 1, to accept the position of designing engineer with the Irrigation Engineering Company of Fresno.

RENO PROPOSES TO ADAPT NEW PLUMBING LAW

A plumbers' ordinance, similar to one recently passed regulating the installation of electrical work in Reno, will be considered by the Reno, Nevada, city council shortly. The law will provide for the appointment of a plumbing board, will regulate the methods of installing plumbing, and provide for its rigid inspection by a city plumbing inspector. A new building ordinance is also being prepared.

Feather River Power Company of San Francisco has been granted a permit by the State Division of Water Rights for additional storage in its power reservoirs on Milk Ranch Creek and Buck's Creek, tributaries of the North Fork of the Feather River, in Plumas County. The additional diversion authorized totals of 120 cubic feet per second, and the storage to 6000 acre feet per annum. With this additional storage, the company will generate 87,000 horsepower of electrical energy. The total investment in the area then will exceed \$9,000,000.

Mayor Max Kohner of Santa Clara has announced that a committee from the board of city trustees will meet with a committee of three, who are opposed to the district plan of paving, for the purpose of visiting nearby cities for information on the method of assessing paving costs in those localities. Mayor Kohner, City Trustees Enos and City Engineer Sullivan will form the administration committee.

Proposed construction of public works to the amount of \$25,000,000 in twenty-six States of the Nation during 1930—a figure expected to be doubled for the country at large—is reported at Washington, D. C. The total was compiled from reports President Hoover received from Governors of the States as a result of the program of Public construction he urged after conferences with business leaders.

Building News Section

APARTMENTS

Plastering Contract Awarded.

APARTMENTS Cost, \$700,000
SAN FRANCISCO. SW Green and Leavenworth Sts.

Twenty-three-story class A apartment (74) building.
Owner—Bellare Bldg. Inc., Crocker First National Bank Bldg.

Architect—H. C. Baumann, 251 Kearny St.
Structural Engineer—L. H. Nishkian, 595 Market St.

Plastering—Cris Berg, 719 45th Ave.
As previously reported, concrete forms awarded to Mission Concrete Co., 270 Turk St.; excavating to North Beach Auto Hauling Co., 2055 Greenwich St.; painting to D. Zelinsky, 165 Grove St.; structural steel to Judson-Pacific Co., 609 Mission St. Sub-bids are being taken on other portions of the work.

Sub-Figures Being Taken.
APARTMENTS Cost, \$150,000
SAN FRANCISCO. Ellis St., W Larkin Street.

Six-story Class C steel frame and concrete apartment building (40 2-room apts.)
Owner and Builder—J. G. Concannon, % Architect.

Architect—H. C. Baumann, 251 Kearny St., San Francisco.

Sub-Figures Being Taken.
APARTMENTS Cost, \$175,000
SAN FRANCISCO. S Ellis St. E Hyde Street.

Six-story Class C steel frame and concrete apartment building (50 2-room apts.)
Owner and Builder—J. G. Concannon, % Architect.

Architect—H. C. Baumann, 251 Kearny St., San Francisco.

LOS ANGELES, Cal.—Maurice Feigenbaum, Union Bank Bldg., will build five-story and basement class B brick and steel apartment bldg., 60x140-ft., on Oxford St. near 6th St., for himself. Plans being prepared by Architect L. T. Squires, 321 Union League Bldg. Cost, \$125,000.

CHURCHES

VALLEJO, Solano Co., Cal.—Congregation of Second Baptist Church, Rev. W. M. Dixon, pastor, has voted to erect new edifice and parsonage at Capitol and Branciforte streets. Estimated cost, \$7,500.

COMPTON, Los Angeles Co., Cal.—Compton Nazarene Church, Rev. H. C. Powers, pastor, Compton, will award contract for one-story frame and stucco auditorium, 52x41 feet, to church at Willow and Palmer Sts., Compton. Will seat 200 people. Henry F. Starbuck, 1203 E. 70th St., Los Angeles, prepared plans.

FACTORIES & WAREHOUSES

Elevator Contract Awarded.
WAREHOUSE & OFFICES Cost, \$100,000
SAN FRANCISCO. NW 9th and Howard Streets.

Three-story class B concrete warehouse and sales office building, 110x150-ft.
Owner—Investment Properties Co., Alexander Bldg.

Architect—O'Brien Bros. & W. D. Peugh, 815 Montgomery St.
Contractor—Industrial Const. Co., 815 Bryant St.

Lessons—Graybar Electric Co., 680 Folsom Street.

Elevator—Otis Elevator Co., 1 Beach St.
As previously reported, reinforcing steel awarded to Gunn, Carle & Co., 444 Market St.; windows to U. S. Metal Products Co., 330 10th St.; glass to W. F. Fuller & Co., 301 Mission St.

SACRAMENTO, Cal.—Structure occupied by California Poultry Supply & Manufacturing Co. at 1310 Del Paso Ave., North Sacramento, suffered a \$10,000 fire loss December 24.

BERKELEY, Alameda Co., Cal.—Gillmore Oil Co. of Los Angeles, will establish divisional offices in the East Bay district and will spend \$300,000 in initial developments for a distributing plant.

Contract Awarded.
CREAMERY Cost, \$19,250
SAN LUIS OBISPO, San Luis Obispo Co. One-story hollow tile (brick) creamery. Owner—Harmony Valley Creamery Assn. Architect—Not given.
Contractor—Joseph Le Porte, Fresno.

Plans Being Completed.
CANNERY Cost, includ. equip., \$125,000
RICHMOND, Contra Costa Co., al. Outer Harbor. Modern class C sardine cannery (cover area of 40,000 sq. ft.)
Owner—Jos. Crivello, 214 Pacific Street, Monterey.

Plans by owner.
Bids will be taken within 10 days.

STOCKTON, San Joaquin Co., Cal.—City council will spend \$11,572.60 in budget to finance purchase of additional land for municipal airport and to improve by oiling and hangar construction.

Contract Awarded.
CANNERY Total cost, \$300,000
Including equipment
RICHMOND, Contra Costa Co., Cal. Bet. 10th and 14th Sts., N of Ford factory site.

One-story concrete cannery building.
Owner—Filice & Perrelli, Gilroy.
Architect—Wm. Knowles, 1214 Webster St., Oakland.

Contractor—Chas. Stockholm & Son, Russ Bldg., San Francisco.

GARAGES

Contract Awarded.
SERVICE STATIONS Cost, \$20,000
SAN FRANCISCO. NE Fell and Baker Streets.

Two-story concrete super-service station and one-story concrete service station.
Owner—General Petroleum Co., Alaska Commercial Bldg.

Plans by owner.
Contractor—Lindgren & Swinerton, Inc., 225 Bush St.

SANTA CRUZ, Santa Cruz Co., Cal.—See "Ice and Cold Storage Plants," this issue.

A Demonstration of the SKILSAW PORTABLE ELECTRIC HAND SAW

Will solve your cutting problems.
(Four Models, 1/2 to 1 h. p.)

ELECTRIC HAMMERS
ELECTRIC DRILLS
GRINDERS, BUFFERS

PETER H. NELSON

Labor Saving Portable Electric Tools.

D-3355—Heel Protector. Salinas, Calif. Parties want to communicate with San Francisco firm able to manufacture their heel protectors, designed to go on rubber-soled shoes, from a pulp or other paper material.

D-3356—Food Products Representation. Pasadena, Calif. Party wishes to represent a line of well known food products. Works on a strictly commission basis, and will cover any part of the West Coast.

D-3357—Representation. New York, N. Y. Concern is seeking agent on the coast for artificial leather, brighten roll leaf, and bookbinders' supplies.

D-3358—Representation in the East. Rochester, New York. Company will salesman covering the eastern states wants to add one or two lines on an exclusive factory representation basis.

D-3359—Excelsior. Pensacola, Florida. Company is interested in making connections with buyers of excelsior in carload lots.

SAN FRANCISCO.—J. L. Sparling, Dean and Vice President, Bay City, Michigan, is interested in contacting someone who is able to manufacture his line of mill supplies in the San Francisco Bay District.

T. S. Cingan of Seattle, vice-president of the Pacific Coast Steel Company in charge of the Seattle plant, will become vice-president in charge of operations of all the company's plants on the Pacific Coast. Bethlehem Steel Corporation officials announce. Cingan will have headquarters at San Francisco, starting January 1. It was also disclosed that the Pacific Coast Steel Company will be reorganized as the Pacific Steel Corporation, a subsidiary handling all Bethlehem Steel Corporation activities on the West Coast.

Engineering News Section

BRIDGES

SAUSALITO, Marin Co., Calif.—T. A. Tomasin of San Francisco, has been granted an extension of time until June 30 to commence construction of a bridge across Richardson Bay between Sausalito and Belvedere.

STOCKTON, San Joaquin Co., Calif.—Until January 20, 11 A. M., bids will be received by Eugene D. Graham, county clerk, to remove present floor and replace with new flooring on the steel bridge over Middle river on the Borden Highway between Drexler Tract and Victoria Island, five miles west of Hold Station. Cert. check 10% payable to Chairman of Board of Supervisors required with bid. Bond of 50% of contract price required with successful bidder. Plans obtainable from County Surveyor Julius B. Manthey.

STOCKTON, San Joaquin Co., Calif.—Until January 20, 11 A. M., bids will be received by Eugene D. Graham, county clerk, to remove existing floor and construct a new floor system on bridge over Burns Cut-Off (between Rough and Ready and Roberts Islands) on Borden Highway about 4 miles west of Stockton. Cert. check 10% payable to Chairman of Board of Supervisors required with bid. Bond of 50% of contract price required with successful bidder. Plans obtainable from County Surveyor Julius B. Manthey.

STOCKTON, San Joaquin Co., Calif.—L. Ubels, Ripon, at \$1735 awarded contract by county supervisors to construct timber bridge over North Calaveras river on Tully road in Rd. Dist. No. 1.

DREDGING, HARBOR WORK AND EXCAVATIONS

NEWPORT BEACH, Orange Co., Calif.—Until 7:30 P. M., Jan. 13, bids will be received by the city council for constructing improvements at the harbor under the recent bond issue, estimated to cost \$200,000, of which \$150,000 will be expended for dredging an \$50,000 for groynes work. The items are: (1) 400,000 cu. yds. dredging; (2) 275,000 cu. yds. inside dredging; (3) 125,000 cu. yds. bar dredging at outer end of channel; (4) 14,100 tons stone in place in rock groyne; (5) removing of approx. 4000 tons rock revetment. R. L. Patterson, city engineer. Plans may be obtained on deposit of \$10. Cert. check 5%.

IRRIGATION PROJECTS

PHOENIX, Ariz.—The Verde River Irrigation and Power District will make application at once to the Secretary of the Interior for permit to construct a dam on the Verde River for development of the Paradise Valley. Tentative plans call for the construction of a dam that will impound 1,200,000 acre feet of water for the irrigation of 100,000 acres of land. J. D. Bowers is president of the district.

PORTERVILLE, Tulare Co., Calif.—State department of public works engineers are surveying route for proposed canal which is to serve the Porterville district from the Kings river.

OROVILLE, Butte Co., Calif.—A petition seeking organization of the Rio Seco Irrigation District, to serve lands in the Richvale District, has been filed with the county supervisor. A hearing on the petition will be held January 6.

MACHINERY & EQUIPMENT

GRANGE, Orange Co., Calif.—Until 1 P. M., Jan. 7, bids will be received by the city council for furnishing one road grader for the use of the street department, the grader to have 8-ft. blade, weighing approximately 4000 to 4700 lbs. and may be straight wheel or leaning wheel type, equipped with tractor hitch

and offset pole. Cashier's check or bond, 10%. Paul E. Clark, city clerk.

EL CENTRO, Imperial Co., Calif.—The county purchasing agent has been authorized to advertise for bids for a dump truck chassis for road district No. 2 (El Centro District).

FIRE ALARM SYSTEMS

SAN BRUNO, San Mateo Co., Calif.—City trustees contemplate purchase of a Siracone fire siren at a cost of \$975 to be installed on the firehouse tower.

OAKLAND, Cal.—Until January 9, 12 noon, bids will be received by Frank C. Merritt, city clerk, to furnish traffic signals and traffic signal timers to city. Bond of 50% of contract price required of successful bidder. See call for bids under official proposal section in this issue.

RESERVOIRS AND DAMS

SACRAMENTO, Cal.—Engineers of the American River Flood Control District, meeting with the State Reclamation Board, recommended the construction of a dam at Folsom and a 1000 ft. river channel opposite North Sacramento which would provide adequate facilities for controlling floods on the American river. The engineers advise letting the state, federal government or private interests undertake the construction instead of permitting the district to attempt financing the project, the cost of which is \$12,282,000. The reports were submitted by A. M. Barton, chief engineer and E. A. Etcheberry, consulting engineer for the district.

PIPE LINES, WELLS, ETC.

SAN LUIS OBISPO, San Luis Obispo Co., Calif.—Construction will be started at once by the Union Oil Co. on an additional oil pipe line from Coalings to Port San Luis. The line will be approximately 80 miles long and will cost approximately \$1,000,000. It will parallel the present lines of the company to the port terminus at San Luis Obispo.

WATER WORKS

NEWPORT BEACH, Orange Co., Calif.—R. L. Patterson, city engineer, has announced that the city will expend within the next few months, \$5000 for new water mains, fire hydrants, valves, etc.; \$5,000 for the construction of a tank at the main reservoir.

SACRAMENTO, Cal.—Crane Co., Sacramento, at \$2434.50 awarded contract by city to fur. and del. pipe and fittings for city park department.

SACRAMENTO, Cal.—McKesson-Kirk-Geary Co., at \$7060 awarded contract by city to fur. 400 tons of sulphuric acid for use as municipal filtration plant.

SAFETY SHOES

protect the toes from falling objects.

BULLARD-DAVIS, Inc.

SAN FRANCISCO LOS ANGELES
275 8th St. 800 W. 11th St.
Market 2322 WEstmore 4179

SAN BRUNO, San Mateo Co., Calif.—Proceedings have been started by the city trustees for an extension to the San Bruno water service along Tanforan Ave. to provide for buildings now in course of construction.

BURBANK, Los Angeles Co., Calif.—Until 7:30 P. M., Jan. 7, bids will be received by the city manager, W. S. Paterson for furnishing complete one centrifugal pump and motor. Spec. may be obtained from the city manager. F. S. Webster, city clerk.

BURBANK, Los Angeles Co., Calif.—Until 7:30 P. M., Jan. 7, bids will be received by the city council for furnishing and delivering at the city pumping plant, located about one mile south of the city limits, one main line meter with all parts complete. Spec. may be obtained from the city clerk, F. C. Hemmhalch. Cert. check, 10%.

LOS ANGELES, Cal.—Until 10 A. M., Dec. 31, bids will be received by D. P. Nicklin, purchasing agent, Los Angeles water and power bureau, 207 S Broadway, for centrifugally cast, bell and spigot, cast iron water pipe under Adv. 1257, furnished in 16-ft. lengths, as follows:

Item I.—Approx. 60,000 lin. ft. 8-in. dia. cast iron water pipe, thickness of shell not less than .46-in., to be delivered to department's Hewitt St. yard, Los Angeles.

Item II.—Approx. 20,000 lin. ft. 8-in. dia. cast iron water pipe, thickness of shell not less than .46-in., to be delivered to department's Slauson yard, Los Angeles.

Item III.—Approx. 24,000 lin. ft. 8-in. dia. cast iron water pipe, thickness of shell not less than .46-in., to be delivered to department's yard, Vesper and Aetna Sts., Van Nuys.

Item IV.—Approx. 40,000 lin. ft., 6-in. dia. cast iron water pipe, thickness of shell not less than .44-in., to be delivered to department's Hewitt St. yard, Los Angeles.

Item V.—Approx. 20,000 lin. ft., 6-inch dia. cast iron water pipe, thickness of shell not less than .44-in., to be delivered to department's Slauson yard, Los Angeles.

Item VI.—Approx. 8,000 lin. ft., 6-inch dia. cast iron water pipe, thickness of shell not less than .44-in., to be delivered to department's yard, First and Meyer Sts., San Pedro.

Proposals will also be considered on all above items of pipe to be furnished in 12-ft. lengths.

All pipe proposed to be furnished under this specification shall be guaranteed to withstand a water working pressure of 350 lbs. per square inch, and shall be centrifugally cast cast iron pipe or equal. Each length of pipe shall have cast upon it in raised letters that can be easily read the initials of the maker's name, the letters, "L.A.W.W." and the year of manufacture.

The thickness of shell on pipe to be furnished under this specification shall be not less than the dimensions shown for respective items above. Pipe shall be made from first quality iron and the chemical analysis of said iron regardless of other tests shall conform to the following limits in chemical composition: Sulphur .10%; phosphorus .90%; manganese .55% to .35%; silica 1.10% to 1.20%.

EL CENTRO, Imperial Co., Calif.—Until 7:30 P. M., Jan. 8, bids will be received by the city council for furnishing certain pumps, motors and casings to the city, as follows:

Item 1.—One horizontal, split case, ball bearing pump, direct connected through flexible coupling to a horizontal, ball bearing, self starting motor; the whole to be mounted upon a substantial cast iron base and to include a push button starter of proper size with overload and undervoltage protection. The motor shall be three-phase, 60-cycle, 440 volts, 40 deg. rated,

and the pump shall have a capacity of 450 gal. per min. with a total head of 180 ft. The unit shall be designed to be non-overloading at all points.

Item 2.—One horizontal trash or dredging pump, designed to handle a sludge or solution carrying approximately 65% of water and 35% of fine sand and silt, by weight. Pump shall be direct connected to a horizontal, ball bearing, self starting motor; the whole to be mounted upon a substantial cast iron base and to include a push button starter of proper size with overload and undervoltage protection. The motor shall be 2-phase, 50 cycles, 440 volts, 40 deg. rated and the pump shall have a capacity of 1000 gal. per minute against a total head of 54 ft., and shall be equipped with a suction elbow with hardhose plate. The unit shall be designed to be non-overloading at all points.

Item 3.—1200 lin. ft. of 12-lb. industrial T rail with the necessary flanges and bolts for connecting the rails. Per ton, 1000 lin. ft. of 7 1/2-in. I. D. (8-in. O. D.) casing, plain ends, with necessary Bresser or Dayton couplings and 600 lin. ft. 4-in. O. D. casing with necessary screw couplings. Per ft.

Bidders may bid on any or all items. Cert. check or bond 10%. J. C. Neale,

SIERRA MADRE, Los Angeles Co., Cal.—Earl J. Lynde, city engineer, has announced plans for water improvements to be made under the 1928 bond issue of \$180,000, of which about \$40,000 has been expended. Bids will be called next month on about 40,000 ft. of trenching, laying and backfilling of 5-in. to 16-in. welded steel pipe line. The pipe has been purchased. Work outlined by the city engineer is included in the following program:

1. Well No. 1.—Pumping equipment to be changed to meet lowered water level.
2. New mains and surface pipe to canyon properties. This to include the 16-in. force main from Central Ave. plant to the site of the proposed reservoir at Skyline Ave. and the necessary connections to Mira Monte reservoir.
3. 12-in. line from Mira Monte reservoir to Grove St. reservoir.
4. Extension of main on E. Grandview Ave.
5. Main on E. Central from Baldwin to east city limits.
5. Extension of Carter main to Grove St.
7. 5-in. mains on San Gabriel Court, Santa Anita Court and Sierra Place.
8. Automatic measuring and pressure gauges.
9. 6-in. and 8-in. mains on W. Grand View from Sierra Madre to Grove.
10. New booster to be installed on new 16-in. line at central plant.
11. New wier house and gauges at central plant.
12. No-voltage release on big booster at Mira Monte and repairs to pump.
13. Repairs to little booster (new starter box) at present in Mann well. To be moved to Mira Monte.
14. 500 ft. of 16-in. discharge lines from well No. 1 to settling basin, using riveted steel pipe.
15. Miscellaneous replacement of small mains throughout the system.

SAN BRUNO, San Mateo Co., Cal.—E. J. Redman, Patterson Bldg., Fresno, at \$3664.50 submitted low bid to city to extend water services to Sneath Lane. Other bidders were: DeGolyer & Bruce, Oakland; Jas. Currie, Burlingame and A. G. Connor, Redwood City. Taken under advisement.

PLAYGROUNDS & PARKS

HANFORD, Kings Co., Cal.—T. M. Grabow, landscape architect of San Francisco, has completed plans for the development of the Kings County Fair Grounds for a county park. The park will include about 73 acres, and will provide swimming and bathing facilities with a reservoir for irrigation, bowling greens, boat houses, tennis courts, basket ball courts, drives, walks and landscape work. Members of the park commission are: F. J. Bowden, chairman, Hanford; Beecher Church, Guernsey; Harry Lowe, Kings River; Conrad Orton, Stratford, and Lowell Marvin, Lemoore.

CONCORD, Contra Costa Co., Cal.—Town trustees are asking bids for beautification of town park, involving the planting and planting of shade trees, shrubbery and hedges.

SAN FRANCISCO—A plot of ground 100 yards by 300 yards at 19th Ave. and Sloat Blvd. has just been leased from the Spring Valley Water Co. by Joe Edwards, golf professional, formerly with Roos Bros. Edwards proposes to establish a new outdoor golf practice fairway on the site and expects to have it ready shortly after the first of the year.

SEWEKS & STREET WORK

SANTA CRUZ, Santa Cruz Co., Cal.—Thompson Bros., Santa Cruz, at \$6142.35 awarded contract by city council (400-c) to imp. portion of Third St., involv. cem. conc. pave., curbs, walks, driveway approaches; vit. clay pipe sewer laterals, pipe drains, wrought iron water service connections.

SANTA CRUZ, Santa Cruz Co., Cal.—Thompson Bros., Santa Cruz, at \$6142.35 awarded contract by city council (400-c) to imp. portions of Squel Ave. and Front St., involv. cem. conc. pave., curbs, walks, catchbasins; vit. clay pipe lateral sewers.

KERN COUNTY, Cal.—Un- January 22, 2 P. M., bids will be received by State Highway Commission to grade and surface with oil treated crushed gravel or stone, 9.7 miles between San Emigdio and Route 66, for bids under official proposal section in this issue.

REDONDO BEACH, Los Angeles Co., Cal.—City officials and property owners plan to improve streets in Villa Tract which is to be annexed to the city within the next few months if present plans succeed. The street work proposed will total about 6 1/2 miles of 20-ft. streets, paved with asphaltic concrete, costing about \$500,000.

SAN FRANCISCO—Until January 8, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to improve Andover St. bet. Eugenia Ave. and Powhattan Ave. (where not) involv. cem. curbs; conc. pavement, and Gates St. bet. Eugenia Ave. and Powhattan St. (where not), involv. cem. curbs; side sewers; 7-ft. strip of basalt block pave. on conc. base adjacent to center of street and asphalt conc. pave., consisting of 6-in. conc. base with 1 1/2-in. asphalt concrete surface pavement. Est. cost \$800. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

SAN FRANCISCO—Until January 8, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to improve 28th Ave. bet. Moraga and Noriega Sts., and 31st Ave. bet. Julian and Kirkham Sts. (where not) involv. cem. curbs; side sewers; 6-in. conc. base pave. with 1 1/2-in. asphalt concrete surface. Est. cost \$2,800. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

SAN FRANCISCO—Until January 8, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to improve Prospect Ave. bet. Coso Ave. and Esmeralda Ave. (where not) involv. cem. curbs; 6-in. conc. pave. with 1 1/2-in. asphalt conc. surface. Est. cost \$800. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

SANTA ROSA, Sonoma Co., Cal.—J. V. Galbraith at 46c yard awarded contract by supervisors to grade county road bet. Guerneville and Armstrong Woods, involv. 12,000 cu. yds.

OAKLAND, Cal.—Frederickson & Watson Const. Co., 354 Hobart St., Oakland, awarded contract by city to sewer portions of Wood Drive, Estate Drive, Sullard Drive, etc., involving 8-in. vit. pipe sewer, \$1.85 lin. ft.; 8-in. c. i. pipe sewer, includ. conc. piers, \$3.50 lin. ft.; manholes \$75 each; 12-in. lampholes, \$30 each; 8-in. lamphole, \$20 each; 8-in. drop lamphole, \$25 each; drop connection, \$30 each; wye branches, \$1 each.

KERN COUNTY, Calif.—As previously reported, bids will be received January 15 by State Highway Comm. to grade and surface with bituminous macadam, 15.5 miles bet. west boundary and Junction Pumping Station. Project involves: 145,600 cu. yds. rdwy. excav. without class; 480,000 sta. yds. overhaul; 3580 cu. yds. struct. excav.; 9,200 tons crusher run base; 3350 m. gals. water applied to subgrade and crusher run base; 2200 blms. fuel oil; 21,250 tons broken stone (bltm. mac. surf.); 460,925 ton miles haul (broken stone and gravel); 115 tons of emulsified asphalt; 165 cu. yds. class A cem. conc. (struct.); 12,650 lbs. bar reinf. steel (struct.); 2980 lin. ft. 18-in., 586 lin. ft. 24-in., 172 lin. ft. 36-in. and 288 lin. ft. 24-in. metal pipe; 2481 lin. ft. corr. metal pipe (clean and relay); 8.7 m. noise and reset property fences; 22.5 mi. new property fence; 40 gates complete in place; 317 sta. finish rdwy.; 78 monuments. State will fur. corr. metal pipe.

IMPERIAL CO., Cal.—As previously reported, bids will be received January 15 by State Highway Comm. to grade and repair with Port. cement concrete, 2.9 miles bet. Myers Creek Bridge and 3 miles east of Coyote Wells. Project involves: 27,800 cu. yds. rdwy. excav. without class. (Loc. 1); 12,000 cu. yds. rdwy. excav. without class. (Loc. 2); 300,000 sta. yds. overhaul; 760 cu. yds. struct. excav.; 33,000 sq. yds. subgrade for cem. pave.; 6500 cu. yds. class A cem. conc. (pave.); 100 cu. yds. class A cem. crusher run base; 115 tons emulsified asphalt; 165 cu. yds. class A cem. conc. (struct.); 174,300 lbs. bar reinf. steel (pave. and struct.); 300 cu. yds. cushion course; 192 lin. ft. 24-in. and 54 lin. ft. 36-in. corr. metal pipe; 16 lin. ft. corr. metal pipe, clean and relay; 20 cu. yds. remove and dispose of cem. conc. in existing pave. and struc.; 68 cu. yds. dry rubble retaining walls; 155 sta. finish rdwy.; 24 monuments. State will fur. corr. metal pipe.

NAPA, Napa Co., Cal.—Until January 6, 7:30 P. M., bids will be received by H. H. Thompson, city clerk, (53) to const. 6-in. vit. ironstone sewer in Bailey St. from 4th St. extended east and running south 30 ft., etc., including wye branches; br. manhole. Est. cost, \$1200. 1911 Act Cert. check 10% payable to city req. with bid. Plans on file in office of clerk. H. A. Harrold, city engineer.

COLUSA, Colusa Co., Cal.—County Supervisors will expend approximately \$150,000 during year 1930 to finance new roads and road improvements. One of the big units in the program will cover a mile of new highway between Sites and Mills Orchard.

Official Proposals

STATE OF CALIFORNIA
DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS
NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on January 22, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Kern County, between San Emigdio Road and Route Four (VI-Ker-57-C), about nine and seven-tenths (9.7) miles in length, to be graded and surfaced with oil treated crushed gravel or stone.

Los Angeles County, between two and one-half and four miles northerly from La Canada (VII-L.A.-61-A) about one and five-tenths (1.5) miles in length to be graded.

Imperial County, between El Centro and Holtville (VIII-imp.-27-C), about nine (9.0) miles in length, to be graded and paved with Portland cement concrete.

Riverside County, at Winville (VIII-Riv-19-A), about five-tenths (0.5) mile in length, to be paved with Portland cement concrete.

Proposals forms will be issued to only those Contractors who have furnished verified statement of experience and financial condition in accordance with the provisions of Chapter 64, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor who has a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated.

The District Engineer's offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop. A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint investigation be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposals Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS,
C. H. PURCELL,
State Highway Engineer.

Dated December 14, 1929.

NOTICE TO CONTRACTORS
(High School Unit—Hanford Joint Union High School District)

Pursuant to an order of the Board of High School Trustees of the Hanford Joint Union High School District, Hanford, California, duly made and entered in its minutes on the ninth day of December, 1929, notice is hereby given that said Board will receive sealed proposals

Official calls for bids or proposals will be inserted in this section at the rate of \$10 per line, per insertion. It is the experience of architects, engineers and public officials that publishing advertisements in this section has been the means of saving many thousands of dollars on their projects resulting from wide publicity. Constant advertisers in this section include the various departments of the Federal Government, California State Department of Public Works, irrigation districts, school districts and private owners. When bids are desired—competition is wanted. Advertisements in this column bring competition—and competition means the lowest possible bid.

up until 7:00 P. M. of January 13, 1930, at the High School Building, Hanford, California, for furnishing and erecting and completing the proposed additional unit to the present High School building, in accordance with plans and segregated specifications as follows:

A—Carpentry, Concrete Work, Mill-work, Reinforcing Steel, Structural Steel and Miscellaneous Iron, Sheet Metal Work, Glazing, Metal Stall Partitions, Blackboards, Finish Hardware.

B—Painting
C—Composition and Tile Roofing.
D—Electric Wiring, Clocks, etc.
E—Plumbing.
F—Heating.
G—Plastering, Lathing and Ornamental Cast Cement.

Plans and specifications on file with the Secretary of said Board. Copies of same together with form for submitting bids and instructions to bidders, may be obtained at the office of Shields, Fisher & Lake, 1501 Pacific Southwest Building, Fresno, the authorized architects of the said Board.

A certified check or bidder's bond equal to 10 per cent of total amount of bid submitted, must accompany the proposal.

No bids will be considered unless submitted on uniform proposal blank provided for that purpose.

Contractors may bid on any of the above segregated specifications or on any combined group of Specifications and the Board reserves the right to reject any or all bids.

By order of the Board of High School Trustees of the Hanford Joint Union High School District.

G. W. ARMSTEAD,
Clerk of Board of Trustees.
D&K

NOTICE TO BIDDERS
(Traffic Signals and Timers—Oakland)

The Council of the City of Oakland will receive sealed bids on Thursday, January 9, 1930, between the hours of 11:00 A. M. and 12:00 M., for furnishing traffic signals and traffic signal timers to the City of Oakland.

Specifications and blank forms of proposals will be furnished by City Clerk on application. Bond for 50 per cent of contract price for faithful performance of contract to be given by successful bidder. Contract to be entered into within 10 days after award and signals and timers to be delivered within 90 days thereafter.

FRANK C. MERRITT, City Clerk.
D&K

NOTICE TO BIDDERS
(Chairs—Memorial Building—Willows, Calif.)

Notice is hereby given that sealed bids will be received by the Board of Supervisors of Glenn County, Calif., at the office of the county clerk in Willows, Calif., until eleven o'clock A. M., Tuesday January 14, 1930, for the supplying and installing of approximately 750 folding portable chairs in the auditorium of the Willows Memorial Building. Prices

quoted shall be for chairs in groups of twos and threes.

Each bid must be accompanied by a certified check for at least ten per cent of the amount of bid as a guarantee that the party to whom the contract is awarded will enter into the necessary agreement and bond for the faithful performance of said contract, and failing to do so the bid check will be forfeited to the county of Glenn in the manner prescribed by law.

The Board reserves the right to reject any or all bids.

All envelopes containing bids must be marked in plain letters "BID".

Witness my hand and the seal of the Board of Supervisors of Glenn County, California, affixed this 10th day of December, 1929.

(SEAL) W. B. SALE, Clerk.

D&K
NOTICE TO CONTRACTORS
(Specification No. 5956—Mare Island Navy Yard)

SEALED BIDS, indorsed "Bids for a Gasoline Tank, Alterations to Garage, Installation of New Downspouts, Alterations and Repairs to Dormitory and a New Water Trough, U. S. Naval Radio Station, Point Reyes, California, Specification No. 5956," will be received at the office of the Public Works Officer, Navy Yard, Mare Island, California, until 11 o'clock A. M., January 22, 1930, and then and there publicly opened, for providing and installing a gasoline tank, alterations to garage, installation of new downspouts, alterations and repairs to dormitory, and a new water trough, at the U. S. Naval Radio Station, Point Reyes, California.

Specification No. 5956 and accompanying drawings may be obtained on application to the Bureau of Yards and Docks, Navy Department, Washington, D. C., or to the Commandant, Navy Yard, Mare Island, California.

Deposit of a check or postal money order for \$5.00, payable to the Chief of the Bureau of Yards and Docks, is required as security for the safe return of the drawings and specifications.

L. E. GREGORY,
Chief of Bureau.

December 21, 1929.
STATE OF CALIFORNIA
DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS
NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, 502 State Office Building, Sacramento, California, until 2 o'clock P. M., on January 6, 1930, at which time they will be publicly opened and read, for performing work as follows.

Sacramento County about 8 miles north of Sacramento (III-Sac-3-B) moving buildings, appurtenances and utilities and placing over treated crushed gravel or stone surfacing.

Plans may be seen, and forms of proposal bonds, contract and specifications may be obtained at the above address.

No bid will be received unless it is made on a proposal form furnished by the District Engineer. Each bids must be accompanied by cash, or a certified check made payable to the Director of Public Works, for an amount equal to ten (10) per cent of the amount bid, such guaranty to be forfeited should the bidder to whom the contract is awarded fail to enter into the contract.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS,
C. H. PURCELL,

State Highway Engineer.
By C. H. WHITMORE,
District Engineer, Dist. III.

Dated: December 21, 1929.

L. H. GADSBY RETURNS FROM HONEYMOON

L. H. Gadsby, city engineer of Visalia, and his bride, formerly Mlle. Marie Antoinette Dupanier of Bourges, France, returned recently from their honeymoon to Havana, Cuba, where they were married on December 14. They will reside in a new home recently erected at 714 North Willis street, Visalia.

ARCHITECTS' LICENSE FEE RAISED TEN DOLLARS

The California State Board of Architectural Examiners, Southern District, has announced that effective January 1, 1930, the annual license fee for architects will be ten dollars instead of five dollars as heretofore. This is in accordance with the terms of the architects' license law as amended by the state legislature in 1929. It is also announced that in cases where an architect's license is revoked for nonpayment of dues or other causes, there is no reinstatement of such license, but the person will be required to wait six months after revocation, when he may file a new application and be re-examined for state license.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Blue Star" Flats* attract permanent tenants

Like the "Blue Star" homes so successfully marketed by Walter H. Leimert Co., Inc., this distinctive four-family *flat* building features the most complete and modern *gas* equipment.

Gas refrigeration—because of its novelty as well as proved superiority—displayed amazing "pulling-power" in bringing investors and home-seekers to Leimert Park.

The new gas ranges, too, with their heat-controlled ovens and appealing colors, exerted a lure which few women could resist. And men were instantly impressed by the convenience, cleanliness and comfort of gas heat.

In fact, *you* will find, as did the Leimert Company, that nothing adds more to the *salability* of a home, or "*lease-ability*" of an apartment, than up-to-date gas appliances.

*BLUE STAR means "completely equipped with modern gas appliances, laboratory-approved by the American Gas Association".

Your gas company will gladly assist you in planning for gas.

ALAMEDA COUNTY BUILDERS ELECT OFFICERS

William Makin, plastering contractor, was re-elected president of the Builders' Exchange of Alameda County at the annual meeting of that body last Monday evening.

Bert Dennis was elected first vice-president; Sam D. North, second vice-president, and Herbert Beckwith, treasurer.

C. C. Morehead was re-elected secretary.

The following is a complete result of the balloting in the election of directors, the first twelve named being elected: William Makin, 112 votes; Henry J. Christensen, 101; Jas. H. Pedgrift, 93; J. H. Fitzmaurice, 87; John M. Bartlett, 86; Herbert Beckwith, 82; Sam D. North, 81; Frank M. Clausen, 80; Joe Turgeon, 79; Bert Dennis, 78; Fred Westlund, 75; Sam J. Bertelsen, 72; Thos. Furlong, 63; Frank Miller, 60; Chas. D. Hughes, 57; Al. M. Poulsen, 53; Geo. Lester, 53; A. Jorgensen, 35; Peter Knudsen, 34; Wm. McGrath, 33; Thos. Hogan, 23; O. L. Peterson, 23.

Following the election of directors the members celebrated the usual Christmas Jinks in the main auditorium of the Builders' Exchange Building where a program of entertainment was a feature of the evening.

SKILSAW MARKETING NEW MODEL "R" SAW

Skilsaw, Inc., announce the new Model "R" Skilsaw which is now in production and immediate delivery can be made. For speed power and capacity this model of Skilsaw, according to Peter H. Nelson, local distributor, 1222 Mission St., San Francisco, the saw is unequaled by any portable electric saw on the market. It is said to be the fastest cutting tool of its kind, considering weight and cutting capacity. The cutting capacity of 4 1/2 inches, instantly adjustable to both depth and bevel cuttings with an improved swivel foot and degree bevel gauge. These new models are carried in stock by Nelson, the local distributor.

The First Church of Christ Scientist, at Fillmore, Calif., designed by Architect H. Roy Kelley of Los Angeles, received honorable mention in the 1929 national competition conducted by the Christian Herald. First prize of \$1000 went to the First Presbyterian Church of New Rochelle, N. Y., designed by Architect John Russell Pope of New York City. Second prize of \$300 was awarded First Presbyterian Church of Clinton, Ia., designed by Coolidge & Hodgdon of Chicago, and third prize of \$200 was given to First Christian Church, Watsonville, Calif., designed by W. H. Weeks of San Francisco. Prizes were divided equally between churches and architects.

SPECIAL ARTICLES ON THE MECHANICS LIEN LAW

Building and Engineering News has secured the services of Mr. Harry C. Westover, an attorney of Santa Ana and an authority on the California Mechanics' Lien Law, to write a series of articles concerning mechanics' liens. Mr. Westover will start his series of articles at what he considers the beginning of a subject and will carry through to a logical conclusion.

During the past several years Mr. Westover has been giving courses up on the lien law and the articles which he will prepare will follow in the same procedure as the course is usually given.

The course is divided into several large divisions—the first being the rights of lien claimants or those who are entitled to file liens; the second being the rights of property owners, which of course, includes the "Notice of Responsibility"; the third topic being the lien, which includes the preparing and the filing of the lien, and the last subdivision being the protection given by such a lien.

For the benefit of our readers it will be of interest to know something about Mr. Westover, the writer of these articles.

Mr. Westover was born in Williams-town, Kentucky, in 1894 and most of his education was received in the schools of Arizona. He graduated from the law school of the University of Arizona in 1918. During the World War he served as a second lieutenant and after the signing of the Armistice, went to Yuma, Arizona, where he opened a law office and continued in practice for three years, following which he went to Santa Ana, Calif., where he has since been located.

Subsequent to his move to Santa Ana he became interested in the lumber business and became a part owner and manager of a lumber yard. He remained in the lumber business for about three years, ultimately selling out for the purpose of going back into the practice of law.

While being engaged in the lumber business he discovered that so few lawyers knew anything about the lien law and the rights of lien claimants that he decided to specialize in that field, inasmuch as he has some experience in the lumber business and knew the problems of the building industry from first-hand experience.

At the present time, Mr. Westover represents the Orange County Builders' Exchange and about one-half the lumber yards throughout Orange County as well as many other firms engaged in the construction industry in the Pacific Southwest.

Mr. Westover's first article appears in another section of this issue.

S. F. CLOSES YEAR 1929 WITH BUILDING TOTAL OF \$33,682,025

San Francisco closed the year 1929 with a total of 7,120 building permits issued for improvements involving an expenditure of \$32,682,025, the lowest annual total, both in the number of permits granted and money expended, since the year 1921 when the permits registered 6,313 for improvements valued at \$22,244,672.

During the year 1928, according to figures compiled by John B. Leonard, superintendent of the Municipal Bureau of Building Inspection, 8,056 permits were granted for work costing \$37,766,363.

During December, 1929, Leonard reports the issuance of 465 permits for improvements involving an expenditure of \$1,617,691 as compared with 509 permits for the corresponding period in 1928 when the expenditure registered \$1,606,700.

December, 1929, Report

The following is a classified listing of the December, 1929, activities:

Class	No. of Permits	Est. Cost
A	3	\$ 620,000
B	3	71,000
C	6	152,500
Frames	65	305,435
Alterations	388	468,756

Total 465 \$1,617,691

Total for Year 1929

Following is the segregated report on the construction activities for the year 1929:

Class	No. of Permits	Est. Cost

CONTRACTOR DOING WORK ON FEE BASIS HAS NO LIEN FOR MONEY ADVANCED FOR LABOR

A lien claim cannot be enforced under a fee contract for money advanced to pay for labor and materials, even though the contractor is obligated by the terms of his agreement to make such advances, it has been ruled by Judge Leon R. Yankwich in the superior court of Los Angeles county. Money so advanced, in the opinion of the court, is in the nature of a loan and does not come within the provisions of the California mechanics' lien law.

This ruling was made in the case of Stiles Construction Company against the defunct El Sereno Country Club and Mrs. Clotilde Castruccio, owner of the land on which the club building was erected. The company sued for \$8729.66, including amounts due on their fee and money advanced on payrolls. Mrs. Castruccio resisted the claim for lien on the ground that the debt was not a proper obligation for a lien.

The court awarded judgment for the plaintiffs against the El Sereno Country Club in the amount asked, but gave judgment to Mrs. Castruccio, denying the claim for lien against her property.

Court's Memorandum of Decision

Following is the memorandum by Judge Yankwich in the case:

R. J. Glasco and G. L. Hannaman, co-partners doing business under the fictitious firm name and style of Stiles Construction Company, plaintiffs, vs. El Sereno Country Club, Inc., a corporation, and Clotilde Castruccio, et al, defendants. No. 241894, Department 31, Superior Court of Los Angeles County, California. Memorandum of decision:

The nature of the case and of the conclusion reached is such as to call for a statement of the ground of decision.

The court is satisfied that the premises were to be used as a golf club and that, consequently, if the plaintiff is entitled to a lien, the entire premises are necessary for the convenient use and occupation of the structure. In arriving at this conclusion, we must take into consideration the circumstances surrounding the transaction. So doing, it is evident that the El Sereno Country Club was designed as a golf club. Consequently the grounds (the entire 120 acres) were a part of the scheme of improvement.

The court is also satisfied that while notice of non-responsibility, prepared by the defendant Clotilde G. Castruccio, was duly posted in a conspicuous place, and a verified copy thereof duly recorded, it was insufficient because it did not contain the name of the purchaser of the property under the contract, as required by the 1925 amendment to section 1132 of the Code of Civil Procedure.

Notwithstanding these conclusions, the court is satisfied that the plaintiffs are not entitled to a lien against the premises. By their contract with the El Sereno Country Club, the plaintiffs agreed to do the work on a cost plus contract basis. For their work they were to be paid eight thousand (\$8000) dollars, payable on monthly installments of five hundred (\$500) dollars each.

Provisions of Contract

The improvements were to cost one hundred and fifty thousand (\$150,000) dollars. If the contractor were able to effect a saving under the estimated cost, they were to receive ten per cent (10%) of such saving in addition to the fee.

The agreement provided:

"All contracts and orders placed by us, payrolls and other obligations, shall be in your name by Stiles Construction Co., Agents, and it is understood that we assume no liability under or by reason of such obligations."

The contractor also had the right to advance money for labor.

The contract provided:

"We shall advance all moneys necessary to pay the labor cost in the construction of said building, and shall furnish on or before the 5th day of each month an itemized statement of the payroll and other labor cost in connection with the construction of said building for the preceding month, together with receipts or vouchers showing payment by us of the amount we billed you with. These receipts or vouchers shall be in the form required by you, and shall be approved by your superintendent of construction and otherwise audited as required by you. Payment will be made by you on the 16th day of the month following the month for which the bill is rendered by us. It is expressly understood that the labor cost is a part of construction and included within the amount of money to be spent in any month."

Claim For Lien Is Personal

The claim is for eight thousand, seven hundred and twenty-nine and 66-100 (\$8729.66) dollars, partly on commission due and partly on moneys paid out for labor. It is evident that the amounts received by plaintiffs exceed the commission. If they are not entitled to a lien for moneys paid out for labor, the claim of lien must fail.

It is the rule that the claim for lien is personal. Only he who undertakes to furnish labor or materials is entitled to make it. He who merely furnishes money to another is not entitled to a lien, even though the money loaned is for the specific purpose of paying for labor and materials:

Godefroy v. Caldwell, 2 Cal. 489.

Cadenasso v. Antonelle, 127 Cal. 382; Sweet v. Fresno Hotel Co., 174 Cal. 789;

Burr v. Peppers Cotton Lumber Co., 91 Cal. App. 268.

The ground for these rulings is this: The right to a lien is a personal one. By the terms of the constitutional provision under which the lien law was enacted, the right to lien is limited strictly to those who furnish labor or materials. Money advanced or loaned is not labor or material and the right does not extend to persons furnishing money with which the work or materials are paid for. A contractor, therefore, who makes, in the name and on the credit of the owner of a building, a contract with another to do certain work and pays him therefor, has no lien for such work.

Holds Money Advanced Is Loan

In this case, the plaintiffs were not liable under the contracts for labor

and materials. These were in the name of the El Sereno Country Club. For them, they assumed no obligations. They were not obligated to furnish the labor or materials. And even assuming that they undertook to advance money for labor, the undertaking was for the current month only. They were not bound to continue such advances if those for the preceding month had not been repaid by the 16th of the following month. If, after that they continued the advances, they were mere volunteers, loaning money to the club, for which they are not entitled to a lien.

The lien law, enacted pursuant to constitutional mandate, was intended to benefit materialmen and laborers who improved another's property. As the property benefited by it, the owner thereof was made vicariously liable, for a debt which, in the language of the poet, "he never did contract and cannot answer."

At the present time, in its application, it results in many injustices to the property owner. Courts should not, therefore, saddle a property owner with a lien unless the law clearly gives such a lien. The contract here does not obligate the contractor to furnish labor or materials, other than his labor of superintendence.

Assuming that there was an absolute obligation on his part to advance money for labor, the arrangement called for a loan and is not subject to a lien.

Judgment will be for plaintiffs against the defendant El Sereno Country Club only, as prayed for in the complaint. Judgment will be for the defendant, Clotilde Castruccio, denying claim of lien on property.

Dated this 21st day of December, 1929.

LEON R. YANKWICH,
Judge of the Superior Court.

PAINT TESTED FOR POWER OF WEATHER RESISTANCE

Greater weathering power is shown so far by white-lead paint, as compared with other white paints, in current tests by the Bureau of Standards of the Department of Commerce, according to announcement in the Bureau's Technical News Bulletin. The announcement follows in full text:

A comparison of outdoor and accelerated (combined light-spray only) exposures of the same white paints is giving some interesting information. The paints under test are white-lead, lead-zinc and lithopone. Thus far results have been obtained on six weeks of exposure in the accelerated cycle, taking a set of panels out at the end of every week. The white-lead paints are failing by chalking, fine checking, and a gradual disappearance of the paint coat (by chalking off). The lead-zinc paints are failing by cracking, resulting in a flaking or crumbling of the paint coat.

The lithopone paints chalk heavily, crack, and soon disappear from the wood. White-lead shows up the best, lead-zinc next, and lithopone a poor third. Lithopone paint fails in about three weeks and lead-zinc in about five weeks. The white-lead paints have not reached (after six weeks' exposure) as bad a condition as the lithopone paints at the end of three weeks. A comparison, on a quantitative basis, of the relative merits of these paints is difficult, because of the different types of failure for the various paints. Using three weeks as the period of failure for the lithopone paints, the other paints appear to be in somewhat the following ratio at the present time:

Lithopone paint, 2; lead-zinc paint, 5; white-lead paint, more than 6.

USE OF "ARCHITECT" IN FIRM NAMES DEFINED BY ATTORNEY GEN.

U. S. Webb, attorney general, at the request of the California State Board of Architecture, has passed upon the conformance of certain names of firms with the statute regulating the practice of architecture.

The full text of the ruling follows:

In your letter of Dec. 4, 1929, you state that your board is having some difficulty in determining whether certain designations of firm or partnership names are in accordance with the law, and you therefore present the following cases to us for our opinion as to the legality thereof:

"(1) A. MacDonald, architect, in partnership with Oliver Olds, nonarchitect, and Mrs. Bates, nonarchitect, operating under the name of 'Wm. Hates & Company, A. MacDonald, Architect, Oliver Olds, Manager.'"

"William Bates was a certificated architect, but has been deceased for five years. Is this in accordance with the requirements of the law?"

This firm designation would be legal providing that the name of the architect appears as the architect on all instruments of service and no other member of such partnership be so designated.

Name Held to Be Legal

"(2) A. and B. O'Grady, nonarchitects, and W. A. Jones, architect, operating under the name of 'O'Grady Bros., and W. Jones, Architect.'"

We believe that the firm name herein sufficiently designates Mr. Jones as the only architect of the partnership.

"(3) S. C. Hardacher, nonarchitect, conducting a business designing golf courses and styling himself 'Golf Architect.' Can the word 'architect' be legally used in this connection?"

Section 9 of the act in question provides that the word "architect" means

a person who holds a certificate to practice architecture in the State of California under authority of this act. We do not believe, therefore, that one should style himself "golf architect" unless the provisions of the act have been complied with.

"(4) Williams-Ravens, nonarchitects, engaged in the real estate business operating a home planning department under the title of 'Williams-Ravens Co. Architectural Dept.' Is this a violation?"

It would not be permissible for the Williams-Ravens Co. to use the designation "architectural department."

"(5) John Smith, architect, B. Johnson, nonarchitect, operating under the title of 'East Bay Planners,' would the board be right in prosecuting this man?"

We believe this to be a legal designation.

"(6) The following firm is operating under the style of 'Curby & Rivets, Architect and Engineer.'"

"Mr. Curby is an architect, and Mr. Rivets, nonarchitect. The question with us is, how will we be able to tell which is the architect and which is the engineer. Is this a legal style of firm name?"

We believe this designation to be legal.

"(7) John Gray, architect, operating under the fictitious name of Gray & Gray, architects, his brother, Paul Gray, architect, formerly associated with him having died a year ago, in this connection we would like to know if it is legal for John Gray to operate under the name of Gray & Gray, Architects."

This firm should designate itself "Gray & Gray, Architect," in order to comply with the provisions of the act regulating the practice of architecture.

In order to meet this situation, the General Assembly of Maryland, in 1791, passed the first Mechanics Lien Law of the United States. The act was passed at the solicitation of a commission of which Thomas Jefferson and James Madison were members. Such men were influenced by their desire to encourage the rapid building of the city of Washington as a permanent seat of government.

Since 1791 every state in the Union has passed some sort of a mechanics lien law; however, there has been no uniformity in the mechanics lien laws and in order to ascertain the rights of mechanics or materialmen, it is necessary to study the state laws under which such rights arise. At the present time the Government is fostering a so-called Uniform Mechanics Lien Law which, when drafted and adopted by all the states, will make the lien law the same in every state of the Union.

The Mechanics Lien Law is a radical departure from old lien law. Under the common law all liens depended upon possession. In writing the Mechanics Lien Law, a change was made whereby it was possible to obtain a lien without reducing the thing on which the lien was claimed to possession. Instead of possession, the writers of the Mechanics Lien Laws substituted the doctrine of recordation. That is, all claims of lien must be recorded to become valid and such recordation gives notice to the world that the lien claimant has some claim upon the property.

The present Mechanics Lien Law of California is an evolution from prior statutes of the other states upon the same subject, resulting from the desire of the Legislature to adjust the respective rights of lien claimants and the rights of the owners of property improved by labor and material. The changes made in the law by the California Legislature, however, have been so persistent and constant that the Supreme Court of California has felt itself called upon to make the following remark:

"It must be remembered that the Mechanics Lien Law of this state has been changing at nearly every session of the Legislature since the first statute on the subject was passed; and that many former decisions of this Court in relation to it rested upon provisions not now in evidence."—Booth vs. Pendol 83 Cal. 36.

A Mechanics Lien in California is of the highest possible dignity since it is secured, not by legislative enactment, but by the Constitution of the State of California. Every provision of the laws which the Legislature may enact must be subordinate to and in consonance with the constitutional provision. The Constitution of California provides that:

"Mechanics, materialmen, artisans and laborers of every class shall have a lien upon the property upon which they have bestowed labor or furnished materials for the value of such labor done and materials furnished, and the Legislature shall provide by law for the speedy and efficient enforcement of such liens."

(EDITOR'S NOTE:—The second article by Mr. Westover will appear in an early issue. Watch for it.)

HISTORY OF MECHANICS LIENS

By Harry C. Westover, Attorney-at-Law.

Most of the law used in the United States as a whole, and in California, is based upon the old common law of England. The common law of England was purely a law of custom. Before the era of printing and during the early formative years in England, when printing was first being introduced and people were learning to read it was necessary to have laws to govern the conduct of people. At that time very few people could write and very few could read what had been written. There had grown up in England a series of customs which, after having been tried countless times, became the established custom or established law. These established customs became known as the Common Laws of England and were not codified until the time of Blackstone. The codification of the law was nothing more than the putting down in writing the old laws of England which, up to that time, had never been reduced to writing.

When the Atlantic Seaboard was colonized by the people of England, it was as natural for such colonies to bring to the American continent the laws of England as it was to bring the English language, and wherever there was an English colony, there also became established a colony which was governed by and under the common law of England. The separation of the colonies from the Mother Country no more destroyed the law of England, which was used in the colonies, than it destroyed the English language, which was also used by the colonies,

with the consequence that even after the revolution, the common law of England was still a foundation for all American laws.

Under the old common law of England there was no mention of such a thing as a "mechanics lien" as we now understand the term. The common law of England, however, did contain lien laws. A landlord was given a lien upon the baggage of his guest until his bill had been paid, and an inn-keeper was given a lien upon his traveler's horse until the guest had paid for the food and lodging used by the horse, and common carriers had liens upon goods which they transported until such transportation charges had been paid.

All of the liens under the old common law of England depended upon possession and when possession was lost, the lien was also lost. Inasmuch as the cardinal right of all liers was possession, the common law did not acknowledge a lien upon anything which could not be reduced to the possession of the person claiming the lien.

Shortly after the colonies had gained their independence from the Mother Country, it was decided to establish the colonies capitol in the wilds of Maryland, but immediately there arose the question of how to get labor and materialmen to go into such wild and undeveloped country and perform labor or furnish materials without some additional assurance that they would be compensated for the work and labor done and for the materials furnished.

Kleiber Motor Company of San Francisco, announces a new gasoquin vehicle is now in construction, being turned out in a 3-ton 6-cylinder truck. This type of vehicle uses wood for fuel, the wood generating gas which is carried through a condenser and into the combustion chambers of the motor. This type of motor has proven successful in Europe and it is believed that this is the first construction of this kind in the United States. Delivery date of the new truck has not been set.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

"Prospects are that the building construction industry will check its downward trend within the next few months," says Standard Trade and Securities Service. "Moderate recovery in the housing division seems probable, reidences. Advancement is anticipated improvement in the mortgage money situation and a sizable reduction, at least, of the present excess supply of reidences. Advancement is anticipated, also, in the public works and utilities and the public buildings divisions, as a result of President Hoover's stabilization program, while activities will be fairly well maintained in the other two major classifications—commercial and industrial. In the aggregate, therefore, a slight uptrend, as compared with 1929, is forecast for 1930, but this probably will not become apparent before the second or third quarter."

Following the practice followed by the West Coast Lumbermen's Association, the members of the California White & Sugar Pine Mfrs., Assn. are issuing under serial number a "Shipper's statement of car contents" in a sealed envelope in each car. The statement declares that the lumber has been graded and tallied under the rules of the California White & Sugar Pine Mfrs., Assn. and that the grading has been supervised and checked by experienced lumber inspectors.

Dispatches from New York indicate that the Otis Elevator Company proposes an increase in its capital stock from 500,000 shares to \$50 per share to 2,500,000 shares without par value. The increase provides for a four to one stock split-up.

Harley A. Norton, Oakland contractor, has filed a voluntary bankruptcy petition in the San Francisco Federal District Court, setting his debts at \$207,652 and assets at \$10,050. He named more than seventy creditors. The principal claim against him, according to the petition, is held by the Western Loan & Building Company, 1150 Divisadero St., San Francisco, with four notes for \$32,000, \$30,000, \$21,000 and \$29,000. The notes are secured by Oakland property, the petition says.

"1929 WAS—the most profitable year for business since the war—it was the first boom year in industrial production since 1925. It was a record year in railroad earnings and efficiency—it was a good year for agriculture—it was an excellent year for wage earners—it was a terrible year for speculators.

"1929 WASN'T—a year of sound, well-balanced business growth—it wasn't a year in which business made its money in its own business—it wasn't a year of wise spending or wise saving—it wasn't a good year for building or real estate—it wasn't a year of much business efficiency or financial wisdom—it wasn't the kind of a year we want very soon again."

So says "The Business Week."

Modesto city council has adopted an ordinance regulating the storage of inflammable X-ray and other films. The ordinance was drawn for the purpose of preventing a possible re-occurrence of hospital tragedies here which took heavy tolls of lives in Cleveland, Ohio, and other places this year. The ordinance covers only films of the nitrocellulose variety, which are highly inflammable and emit a deadly gas when burnt. The measure provides stringent rules for the storage of such films.

During the year 1929, building-loan associations of the nation made mortgage loans to the amount of one billion, eight hundred and fifty millions of dollars, which enabled over five hundred thousand families to enjoy the blessings of home ownership, the California Building-Loan League reports.

The license of the Port Stockton Cement Company to sell stock has been suspended by the State Corporation Department and 80 per cent of the money already collected by the corporation ordered returned to the stockholders. The company planned the construction of a cement mill in Stockton, securing the limestone and shale from a deposit near Columbia, Tuolumne county. Further negotiations are said to be under way to refinance the project.

A revision of Reno's building ordinance to prevent contractors alleged to be irresponsible from going to Reno "from San Francisco" and coast points to engage in building is being considered by the Reno, Nevada, city council at the request of labor union representatives. Union representatives who have taken the matter up with the council say that coast contractors will come to Reno in large numbers next spring, bringing their own mechanics with them, and if Reno does not have a good building ordinance and enforce it that many poor buildings will be erected.

There are romances in trade associations as well as in individual experience. The United Roofing Contractors' Association was organized 43 years ago by a few gravel and slag roofers. It has successfully survived the many vicissitudes that beset the life of a trade organization and is still active in setting high standards for the entire roofing industry. Its specifications for built-up roofs are regarded by government authorities and leading architects as guides to the best in roof construction. This association will hold its 43rd annual convention at Louisville, Ky., Jan. 22 to 24, 1930. Delegates from all parts of the United States and Canada will be present. C. C. James of Grand Rapids, Mich., is president.

During the month of December, 1929, the Los Angeles city building department issued 2201 permits with an estimated valuation of \$3,992,459, as compared with 2120 permits with an estimated valuation of \$10,032,321 for the same month last year. For the year 1929 Los Angeles building total was \$93,016,160, as compared with \$101,678,768 for 1928.

The Sacramento city council can solve the problem of getting another city manager, if it wants to, saving the tax payers some \$8,999 a year. Chas. E. Wright, Sacramento real estate dealer, has offered his services as city manager to the council at \$1 a year. Wright said he'd be willing to work for that amount if the council wanted to consider it. His offer was noted in the records for future reference.

CONTRACTOR CHARGES PLOT TO BOYCOTT

Charges by an independent building contractor that a boycott agreement exists among building trades members of the East Bay Industrial Association are under investigation by District Attorney Earl Warren of Alameda County.

The alleged disclosure of a combine to boycott nonmembers was precipitated by the theft of 70 sacks of cement from an apartment house under construction at 2120 Delaware street, Berkeley.

J. M. Kinley, building contractor and nonmember of the association, told Berkeley police he believed the theft to be the result of his refusal to join the association.

Because of the refusal he was unable to buy cement in the East Bay and was forced to go to San Francisco for his materials, Kinley said.

Told of the charges in the hands of Hutchinson, District Attorney Earl Warren said:

If what Kinley says is true there will be a warm time for somebody, no matter who it is. This charge will be thoroughly sifted.

Denial that a boycott agreement exists between members of the association was made by Secretary Lawrence E. Crawford.

METALLIC AGGREGATE HARDENS CONCRETE

Unusual hardness, wear resistance and impenetrability to moisture and oil are claimed for a metallic aggregate known as Betonac, which has been introduced into this country from abroad by the American Betonac Corporation, New York City. The material is made in three grades which may be used separately or in combination to obtain surfaces of different characteristics. To secure a smooth texture throughout, the coarsest grade is used, consisting of particles about the size of wheat grains. The fine grade is used where unusual waterproofing efficiency is desired, and the medium grade is mixed with either of the two others to secure a non-slip surface. In mixing, the maximum strength is secured by taking equal parts, dry measure, of Betonac and portland cement. This can be applied to green concrete foundations as a top dressing, or to old concrete wherever a concrete surface finish would adhere. For some purposes, Betonac can be diluted with sand up to a maximum of 50 per cent sand content. The ingredients are thoroughly mixed dry before water is added in sufficient quantities to obtain the consistency desired. When desired, Betonac can be used in combination with coloring materials or with quick-setting cement.

IN NEW QUARTERS

Harvey A. Klyce, general contractor, announces the removal of his offices from the Call Building to the Builders' Exchange, 666 Mission Street, San Francisco.

ALONG THE LINE

W. R. Yelland, Oakland architect, and Miss Edna Holroyd, for a number of years San Mateo county librarian, were married in St. James Church, at Monterey, December 23.

Nels H. Sjöberg and Harold O. Sjöberg announce the formation of a partnership, doing business under the firm name of N. H. Sjöberg & Son. They will engage in the general contracting business with headquarters at 632 Call Bldg., San Francisco.

John Flynn has been named assistant building inspector of San Mateo and George Wade, office engineer in connection with the city engineer's office. The appointments are announced by E. P. Wilsey, new city manager of San Mateo.

Chester C. Fisher, construction engineer with the J. G. White Engineering Corporation on irrigation projects in Mexico, has resigned to become consulting engineer to the Soviet government on irrigation construction in Transcaucasia, with headquarters at Tiflis. Fisher was formerly an engineer for the U. S. Bureau of Reclamation.

J. E. Curd, city superintendent of public works for Porterville, Calif., has submitted his resignation to Fred Pease, city manager, to become effective in sixty days. Curd has been in the employ of the city for 13 years.

John C. Denney, director of the Washington State Department of Public Works, has resigned and his resignation has been accepted by Governor Roland H. Hartley, effective at once. His successor has not yet been named.

W. H. Eisenman of Cleveland, Ohio, secretary of the American Society for Steel Treating, is at the St. Francis Hotel making preliminary plans for the Western Metal Congress to be held in San Francisco next month, drawing 1000 delegates and friends. A local committee of arrangements for the congress consists of Albin Johnson and Ralph Hirst of San Francisco and F. B. Drake of Berkeley.

Frank M. Butler, construction engineer, who was engaged in connection with the erection of the San Francisco Ferry Building and other noted structures throughout the West, died of heart failure in Oakland Jan. 4. He was 71 years old and a native of Massachusetts. He lived in California for more than fifty years.

Through a decision by Superior Judge Michael J. Roche (San Francisco) the city of Santa Cruz is awarded the verdict in a suit brought by Charles Gilman Hyde, engineer, for services. Mr. Hyde, employed in connection with a sewer project for city of Santa Cruz, was allowed additional time beyond contract specifications, it was shown. He presented a bill for \$5,717 for his additional time, which was disallowed by the court.

Joseph B. Shaw, for the past two years connected with the National Brick Manufacturers Association as engineer, has been appointed city engineer of Utica, N. Y., effective Jan. 1, succeeding Richard S. Cookingham.

TRADE NOTES

J. W. Pearson has been appointed general manager of the Redwood Manufacturing Company, succeeding A. W. Jongeneel, whose resignation was effective January 1. Pearson has been with the company for nine years and previous to his recent advancement was general superintendent.

Port Orford Cedar Products Co. has opened an office in Los Angeles at 605 Petroleum Securities Bldg. with Thos. W. Dant in charge.

Andrew C. Stewart will operate from 2536 Santa Clara Ave., Alameda, under the firm name of Stewart Mantel and Tile Company.

Good Lumber Co. has purchased the Cash Lumber Company of Tracy, Cal., Ray E. Burnett, former owner of the Cash Lumber Company, proposes to take a long vacation from business and then enter business elsewhere.

Fickling & Chaffee, Ltd., manufacturers of the Thermador electric heater, have opened a branch and warehouse at 447 Sutter St., San Francisco, under the direction of J. A. Graham. Stock is carried for distribution in this territory.

Pacific Paint & Varnish Company, Fourth and Cedar Sts., Berkeley, plans to double the size of its present plant and complete the construction of a spur track in connection therewith.

Kaiser Paving Company, producers of Livermore Valley sand and gravel, announces the opening of San Francisco office at 407 Call Bldg., with M. T. Scott in charge. Mr. Scott was formerly connected with the California Rock Company.

Coast Engineering Laboratories, Inc. capitalized for \$150,000, has been incorporated with the principal place of business in San Francisco. Directors of the company are Robt. D. Scholes, William Brooks, Robert E. Child, P. E. Fitzpatrick and Simeon E. Shepley.

Progress Lumber Company of Redwood City, at \$250,000 corporation headed by Paul M. P. Merner, has been organized to acquire the company of similar name heretofore operated by Merner. Merner is to receive 825 shares of common stock, par value \$100 a share, of the new corporation in payment for his business and assets subject to liabilities of \$55,371. The permit issued by the State Corporation Department also authorizes the sale of 750 shares preferred and 925 shares common stock to its incorporators, stockholders and employees at par, \$100 a share.

The Ohio Varnish Company has located a branch office and warehouse at 64 Natoma St., San Francisco, for the purpose of distributing their products of paints, varnishes, etc., throughout California, Washington, Oregon and Nevada. The San Francisco office and warehouse occupies 5000 square feet of floor space, and is under the management of Mr. W. T. Averá. The local office is a branch of the Ohio Varnish Company of Cleveland, Ohio.

HERE — THERE —
EVERYWHERE

Walter Scrim of Los Angeles has been re-elected president of the Philippine Mahogany Association to serve during the coming year. Other officers re-elected are: Howard R. Black, vice-president; Cayton D. Mell, secretary, and Herbert L. Black, treasurer. Roy Barto of Los Angeles is a director of the association.

H. E. Vickroy of Stockton submitted the lowest bid to the San Joaquin county supervisors to erect a structure costing \$1,569. He will probably lose the contract, due to the fact that he was unable to produce a contractor's license as demanded by the state law.

Builders' Exchange of Alameda Co. is preparing to launch a drive for new members, according to Wm. Makin, president of the organization.

American Concrete Pipe Association will meet in Los Angeles, January 15-16.

PUBLIC CONSTRUCTION WILL BE
EXPEDITED

A preliminary survey of the new division of public construction, just created in the Department of Commerce, at the request of President Hoover, reveals wide-spread, prompt, and efficient mobilization of effort to expedite public construction, in response to President Hoover's appeal for the co-operation on the part of Governors, and other public officials, says the Commercial Standards Monthly.

The newly organized division, which is under the direction of Dr. John M. Gries of Ohio, former chief of the Division of Building and Housing of the Bureau of Standards, serves as a clearing house of information on methods and plans. In general, it is helping to co-ordinate the efforts of the Federal Government departments and of State and local Governments in their programs to help to stabilize business and employment conditions by speeding up construction projects.

The State Governors, in response to telegrams from President Hoover, have assumed responsibility for carrying out the idea in their own state, and for encouraging similar efforts on the part of county and municipal officials. Some of the Governors have indicated that they wish to be informed of measures and methods being used elsewhere, particularly where the best results are achieved, and the division of public construction is analyzing the reports already in hand from this point of view.

The new unit is also making an intensive study of Federal Government projects now under way or which can be put in motion within the next few months. Such information on the position of the many Federal departments and bureaus which carry on construction is necessary for the most effective mobilization of the Federal Government's own efforts.

Facts on many phases of the problem are already in the hands of Dr. Gries, as a result of the study of public works by the division of Building and Housing, and the National Bureau of Economic Research.

Trade Literature

A 24-page catalogue entitled "Behind the Plastered Wall," has been published by The Herman Nelson Corporation, Moline, Ill. This pamphlet contains much valuable descriptive material on invisible radiators and is replete with illustrations.

National Steel Fabric Company, Pittsburgh, Pa., is distributing a 24-page, illustrated booklet, "Better Walls for Better Homes," describing the methods of application and the results obtained by the use of Steeltex reinforcing for plaster.

A catalogue which describes the complete line of builders' hardware produced by the Frantz Mfg. Co., Sterling, Ill., has been published by that company. This booklet contains 112 pages and includes data on house, barn and general building hardware.

A 270-page catalogue has been published by the Gould Mfg. Co., Oshkosh, Wis., to acquaint the trade with the present status of its complete line of woodwork. The booklet is entitled "A Design Book of Gould Quality Woodwork" and contains a large number of illustrations and specifications as well as much useful information on its subject.

The Wisconsin Steel Co., Chicago, Ill., has published a 248-page catalogue which lists the large variety of steel products, round bars, flat rolled steel and industrial shapes produced by that company. Weight and area tables and drawings assist to make this a very informative booklet.

Two new circulars distributed by the Litterer Bros. Manufacturing Co., Chicago, Illinois, describe the Ferrometal Partitions and Unit Shower Stalls manufactured by that company. With adequate illustrations and drawings included in their make up these circulars carry complete information, including construction details on this equipment.

Youngstown Sheet & Tube Company, Youngstown, Ohio, has issued two bulletins giving technical information and data on electrical conduit and on pipes of both the welded and the seamless variety. The first is primarily a descriptive bulletin on conduit the second is a data book containing many engineering tables on pipe dimensions and weights and similar information, as well as brief descriptions of manufacturing processes and brief directions for the proper handling of pipe on the job to secure satisfactory results.

Tractor Equipment, Inc., of San Francisco, has established a retail and wholesale branch in Sacramento, the first of three to be located north of the Tehachapi. Fresno and Stockton will be locations of the others. The firm is distributor of Monarch Track-type tractors, United Wheel-type tractors and complete lines of agricultural implements and industrial equipment. George W. Williams of Sacramento, who has covered the Superior California territory for the company as salesman for the past five years, has been selected to manage the Sacramento branch.

LOCALIZED BOARDS PROPOSED TO STABILIZE BUILDING

Local "Stabilization boards," to accelerate construction work in times of depression and to retard it in times of unusual natural activity, with a central agency in the Federal Government to act as a clearing house of information, were advocated by John R. Ringleman, senior economist of the division of building and housing of the Department of Commerce, in an address Dec. 28 before the American Economic Association, meeting in Washington.

The object of the plan, he stated, is to help relieve unemployment during depressions and to assist in stabilizing business activity in general.

The community conference board of Rochester, N. Y., was cited by Mr. Ringleman as an example of a local stabilizing organization that had produced good results. In this city of 330,000 people, he stated, severe fluctuations in construction and employment had been experienced. Since 1921, when the conference board was formed at the suggestion of George R. Eastman, head of the Eastman Kodak Company, it was cited that the board has been able to obtain the co-operation of interested elements in such a way that an increasing amount of work has been furnished each year during the months of December to March.

In most cases, said Mr. Ringleman, it would be best to appoint the local boards for the specific purpose in view and to have them composed principally of persons having direct relation with the control of construction activity.

The Federal Government could take part in the plan, Mr. Ringleman pointed out by co-ordinating its own construction work, by acting as a clearing house for information, and by suggesting methods of operation.

S. F. BOASTS 15 BUILDINGS 200 FEET OR HIGHER

San Francisco has fifteen buildings that are more than 200 feet in height, it was revealed recently by John B. Leonard, superintendent of the bureau of building inspection.

The highest is the Russ Building, 408 feet, and the others are the Shell 380 feet; Telephone, 368; Fort-fifty Sutter, 346; Standard Oil, 327; William Taylor Hotel, 310; Hunter-Dulin, 209; City Hall, 300; Sir Francis Drake Hotel, 273; Pacific Gas & Electric, 259; Mark Hopkins, 256; Clay-Jones Apartments, 252; Matson, 226; Cathedral Apartments, 220, and the Financial Center, 206.

The Russ Building, being the highest, also cost the most. It cost \$5,000,000. The total cost of the others was \$26,000,000.

WESTERN PIPE EXPANDS

Western Pipe & Steel Company, already one of the largest manufacturers of fabricated steel on the Pacific Coast, with headquarters in San Francisco and a large plant at South San Francisco, has recently further expanded through the acquisition of the Western Pipe & Steel Company of Illinois. The Chicago concern started about six years ago and manufactures a specialized line of pressed steel products including bulkheads for refrigerator cars, steel concrete forms, and similar products. Other plants operated by Western Pipe & Steel are located at Los Angeles, Fresno, Taft and Phoenix.

TULARE'S MUNICIPAL WATER PLANT PAYS PROFITS

The municipally owned water system of the city of Tulare, Calif., is paying its own way, according to a report presented to the Municipal Board of Public Utilities.

During the year 1929, a revenue of \$36,848 was derived from the sale of water. Of this, \$23,398.66 went for the expenses of operation, maintenance and general administration. \$127.06 went for extension of the system, and \$1532.58 towards a new well.

Thus the department not only paid costs, but was able to proceed to the amount of \$3658.84 on a program of extension obligatory from the growth of the city.

A balance of \$8453.44 was left in the city's water department fund at the end of the year, City Clerk Cobb's December 31 report showed.

Tulare uses almost exactly an average of \$3000 worth of water each month. Last year the monthly totals varied from \$2735.09 in November, to \$3472.23 in October.

The amount of water used corresponded generally with the heat of the weather, November, February and March being the low months, and August, September and October being the high.

PRICES OF TRACTORS AND GRADERS REDUCED

Substantial reductions in the prices of Caterpillar tractors and of Caterpillar graders (formerly known as Russell graders) are announced by Caterpillar Tractor Company, to take effect immediately, as follows:

Caterpillar Model 60 was reduced \$125; Model 30, \$100; Model 20, \$75; Model 15, \$50; Model 10, \$25.

Reductions in the prices of Caterpillar graders are: Super Mogul, reduced \$285; Super Reliance, \$190; Super Special, \$190; No. 3 Standard, \$100; No. 2 Standard, \$95; No. 10 Grader, \$55. Corresponding reductions have been made in the prices of the Three Hi-Way Patrol, Motor Patrols No. 20, 11 and 10, the "Sixty" Elevating Grader and the "Forty-two" Giant.

LIGHT-WEIGHT FLOOR CONSTRUCTED OF STEEL AND CONCRETE

Elimination of unnecessary dead weight is the objective of a new type of steel deck floor construction developed by the Rivet-Grip Steel Company, of Cleveland, Ohio. Besides its light weight, this design also has the advantage of excellent rigidity. Component parts include a welded steel joist made up with a channel for the top chord, a tee for the bottom chord, and heavy webbing welded into place to connect the two; ribbed, solid plate steel decking interlocking with the top chord channels of the steel joists; the special bridging forms and fireproofing forms. In building the floor, the joists are first placed in accordance with the usual practice. The steel deck pans are laid with their hooked ends turned down into the trough of the joist channels and are wired into place. At the center of each floor panel bridging forms of heavy gage metal are hurg from the deck pans. The panel ends are then closed by fireproofing forms. This assembly produces a solid interlocked steel deck which forms a satisfactory flooring for the mechanical trades and upon which concrete or terrazzo can be cast without sag or dripping of cement mortar.

Building News Section

APARTMENTS

Preliminary Plans Being Prepared.

APARTMENTS Cost, \$—
YOSEMITE VALLEY, Mariposa Co.,
Two-story rustic apartments (4-family
building).

Owner—U. S. Government.
Architect—Thomas C. Vint, 525 Mar-
ket St., San Francisco, % Dept.
of Interior.

Project is in a very preliminary
stage.

Preparing Working Drawings.

APARTMENTS Cost, \$125,000
LOS ANGELES, Los Angeles Co., Cal.
Oxford St. near Sixth St.
Five-story Class B brick and steel
apartments (60x140 feet).

Owner and Builder—Maurice Felgen-
baum, Union Bank Bldg., Los An-
geles.

Architect—Lester T. Squiers, 321
Union League Bldg., Los Angeles.

Contract Awarded.

APARTMENTS Cost, \$175,000
LOS ANGELES, Cal. Menlo Ave.
near Eleventh St.

Seven-story Class A reinforced con-
crete apartments (100x125 ft.)

Owner—Withheld.

Architect—Fred Sward, California Re-
serve Bldg., Los Angeles.

Contractor—Bogue & Lindquist, Per-
guson Bldg., Los Angeles.

Plans Completed.

APARTMENTS Cost, \$12,000
CAPUCHINO MANOR, San Mateo Co.,
Two-story frame and stucco apart-
ments and stores (2 3-room apts.
and 2 stores).

Owner and Builder—S. A. Born Bldg.
Company.

Plans by Grimes & Schoening, Balo-
vich Bldg., San Mateo.

Sub-bids will be taken Jan. 6.

Preparing Working Drawings.

APARTMENTS Cost, \$17,000
BURLINGAME, San Mateo Co., Cal.
Two-story reinforced concrete apart-
ment and store building (4 2-room
apts. and 3 stores).

Owner—Carl Torello, 1145 Drake St.,
Burlingame.

Architect—E. L. Norberg, 580 Market
St., San Francisco.

Plans will be ready for bids in about
two weeks.

Sub-Figures Being Taken.

APARTMENTS Cost, \$—
SAN FRANCISCO. Location Withheld
Six-story and double basement steel
frame and concrete apartment
building (60 2 and 3-room apts.)

Owner & Builder—Michael Demplak,
355 Octavia St., San Francisco.

Architect—Withheld.

Will be of Spanish type of architec-
ture and basement will accommo-
date 60 cars. Clearing of site will start
after January 1st.

BURLINGAME, San Mateo Co., Cal.
John P. Hall has been authorized by
the city council to erect a three-story
Spanish type 24-apartment building
with a 15-ft. set-back at El Camino
Real and Willow Ave. Estimated cost
\$30,000.

Plans Prepared.

APARTMENTS Cost, \$150,000
FRESNO, Fresno Co., Cal. SE M
and Mariposa Streets.

Four-story fireproof apartments, 100x
50 feet.

Owner—Griffith Estate Co., Ltd., Grif-
fith-McKenzie Bldg., Fresno.

Architect—Not Given.

Fisher & McNulty, Mattel Bldg.,
Fresno, general contractors, have been
requested to submit a figure on the
proposed structure.

Working Drawings Being Prepared.

APARTMENTS Cost, \$—
SAN FRANCISCO. SW California and
Octavia Sts.

Six-story Class C steel frame and
brick apartment building (42 3, 4
and 6-room apts.)

Owner and Builder—Herman Hogrefe,
149 Greenwich St., San Francisco.

Architect—E. E. Young, 2002 Califor-
nia St., San Francisco.

Sub-Contracts Awarded.

APARTMENTS Cost, \$700,000
SAN FRANCISCO. SW Green and
Leavenworth Sts.

Twenty-three-story Class A (74
apartments).

Owner—Belhairs Bldg., Inc., Crocker
First National Bank Bldg., San
Francisco.

Architect—H. C. Baumann, 251 Kearny
St., San Francisco.

Structural Engineer—L. H. Nishkian,
595 Market St., San Francisco.

Hardwood Floors—Royal Floor Co.,
7th and Brannan Sts., San Fran-
cisco.

Heating—Andy Harper, 140 8th St.,
San Francisco.

Sub-bids are being taken on other
portions of work.

As previously reported, plastering
awarded to Carl Berg, 719 45th Ave.,
S. F.; concrete forms to Mission Con-
crete Co., 270 Turk St.; excavating to
North Beach Auto Hauling Co., 2055
Greenwich St.; painting to D. Zelinsky,
165 Grove St.; structural steel to Jud-
son-Pacific Co., 609 Mission St.

Plans To Be Prepared.

APARTMENTS Cost, \$—
LOS ANGELES, Cal. Mariposa Ave.,
Bet. 7th and 8th Sts.

St., San Francisco.

Bids will be taken in one week.

BONDS

MENDOCINO, Mendocino Co., Cal.—
Election will be called shortly in Men-
docino Grammar School District to
vote bonds of \$20,000 to finance erec-
tion of new grammar school, replacing
building recently destroyed by fire.

FORTUNA, Humboldt Co., Cal.—
Fortuna Grammar School District will
call election shortly to vote bonds of
\$35,000 to finance erection of the first
unit of a new school building. No
architect has been selected as yet.

SAN JOSE, Santa Clara Co., Calif.—
County Superintendent of Schools is
assisting in the formation of the Linda
Viata School District, comprising por-
tions of the Berryessa Union, Pala and
Hukey schools. After formation an
election will be called to vote bonds to
finance erection of a new school.

January 6, 1930
City To Vote Bonds To Finance.
CITY HALL Cost, \$60,000
CARMEL, Monterey Co., Cal.
Combined city hall and firehouse.
Owner—City of Carmel.
Architect—Not Yet Selected.

WILLOW GLEN, Santa Clara Co.,
Cal.—County supervisors sell \$43,000
bond issue of Willow Glen School Dis-
trict; proceeds of sale to finance
erection of a new school building.
Issue brought a premium of \$530.

WALNUT CREEK, Contra Costa
Co., Calif.—Local Chamber of Com-
merce urges election to vote bonds of
\$75,000 to finance erection of addition-
al units at the Mt. Diablo high school
at Concord. An election recently held
to vote \$350,000 for a new school was
defeated.

ALTURAS, Modoc Co., Cal.—Jan. 27 is date set by Alturas Grammar School District to vote bonds of \$150,000 to finance erection of a new grammar school, preliminary plans for which are being prepared by Architect Ralph D. Taylor, Belli Bldg., Alturas. Trustees of the district are: P. S. Dorris, W. H. Smith and S. T. Ballard. Will be of concrete construction containing 16 classrooms.

CHURCHES

Plans Being Figured.

CHURCH Cost, \$—
LOS ANGELES, Los Angeles Co., Cal.
 No. 4510 Finlay Avenue.
 Two-story and basement reinforced concrete church.
 Owner—Philip Memorial Church (Rev. Neal Dodd, Vicar).
 Architect—Carleton M. Winslow, Architects' Bldg., Los Angeles.

Plans To Be Prepared.

CHURCH Cost, \$—
HAYWARD, Alameda Co., Cal.
 Church building.
 Owner—First Christian Church (Rev. J. A. Shoptaugh, Pastor).
 Architect—Not Yet Selected.

At a recent meeting of the congregation it was voted to purchase a site and erect a modern church building. A committee to work out means of financing will be named shortly.

DINUBA, Tulare Co., Cal.—First Baptist Church destroyed by fire December 31. The loss is estimated at \$50,000, partially covered with insurance.

Plans Completed.

CHURCH Cost, \$—
LOS ANGELES, Cal. No. 4510 Finlay Avenue.
 Three-story frame and stucco church (concrete basement; 56x109 ft.)
 Owner—Mrs. Florence M. Quinn.
 Architect—Carleton M. Winslow, Architects Bldg., Los Angeles.

Contract Awarded.

CHURCH Cost, \$—
BEVERLY HILLS, Los Angeles Co., Cal. 51st St. and Halldale Ave.
 Two-story frame and stucco church.
 Owner—St. John's Evangelical Lutheran Church.
 Owner—John P. Pedersen, 437½ N. Beverly Drive, Beverly Hills.
 Contractor—Schroenrock & Johnson, 1323 Santa Monica Blvd., Beverly Hills.

Plans To Be Prepared.

ADDITION Cost, \$10,000
PLEASANTON, Alameda Co., Cal.
 Sunday school addition for church.
 Owner—Presbyterian Church, Rev. R. C. Cross, Pastor, Pleasanton.
 Architect—Not Yet Selected.
 The necessary funds to finance construction has already been pledged. It is proposed to have construction completed this Spring.

Plans To Be Prepared.

CHURCH Cost, \$—
SAN PEDRO, Los Angeles Co., Cal.
 Church.
 Owner—Bethel Lutheran Church, Rev. N. P. Anseen, Pastor.
 Architect—Not Selected.

Plans To Be Prepared.

CHAPEL Cost, \$60,000
SAN RAFAEL, Marin Co., Cal.
 Chapel.
 Owner—Dominican College of San Rafael.
 Architect—Arnold Constable, 580 Market St., San Francisco.

FRESNO, Fresno Co., Cal.—Bids will be asked at once by the Trinity Lutheran Church to erect Sunday School unit in connection with the present church plant at Belmont and Thesta Ave.; estimated cost \$10,000. Will have seating capacity of 250 persons with stucco exterior and amber glass windows. Rev. Theodore Seashore is pastor. Money to finance is available.

FACTORIES AND WARE-HOUSES

Contract Awarded.

IMPLEMENT BLDG. Cost, \$9597
KING CITY, Monterey Co., Cal. Lots 101-103 Block H.
 One-story frame implement building.
 King City.
 Owner—H. A. F. Company, Broadway.
 Architect—H. B. Douglass, Greenfield.
 Contractor—Fred McCrarry, Fremont St., Monterey.

Sub-Contracts Awarded.

STORAGE BLDGS. Cost, \$30,000
RICHMOND, Contra Costa Co., Cal.
 Two 1-story concrete storage buildings; one 26 by 70-ft. and one 26 by 100-ft. and one 1-story frame lumber shed, 40 by 175-ft.

Owner—Santa Fe Railway.

Architect—Engineering Dept. of Owners.

Contractor—Villadsen Bros., 417 Market St., San Francisco.

Reinforcing Steel—Gunn, Carle & Co., 444 Market St., San Francisco.

Lumber—Christensen Lumber Co., 5th and Hooper Sts., San Francisco.

Steel Sash—Gensire Steel Co., 461 Market St., San Francisco.

Miscellaneous Iron—Patterson & Koster, 280 13th St., San Francisco.

Hardware—Marshall Newell Co., Mission and Spear Sts., San Francisco

Mill Work—Redwood Mfg. Co., Hobart Bldg., San Francisco.

Steel Forms—Steelform Contracting Co., Monadnock Bldg., San Francisco.

Sub-bids are being taken on sheet metal, plastering, sewers and glass work.

FRESNO, Fresno Co., Cal.—Canham Dairies, Inc., Ltd., of Fresno, has been incorporated and proposes to finance the erection of a modern dairy plant in Fresno. The company is capitalized for \$200,000. Directors are J. S. Canham, (formerly general manager of the Jersey Farm Dairy at Fresno); Annie L. Canham, Ella Canham and Florence Canham, all of Fresno.

Plans Completed—Bids To Be Asked Shortly.

HANGAR Cost, \$—
HANFORD, Kings Co., Cal. Municipal Airport.

Steel frame hangar, 60x70 feet.
 Owner—City of Hanford.
 Architect—Swartz & Ryland, Brix Bldg., Fresno.

Slight revisions are being made in the plans and when these receive the approval of the city council bids for construction will be asked.

Preparing Working Drawings.

ADDITION Cost, \$—
SAN FRANCISCO, Eighth St. near Folsom St.

Four-story reinforced concrete addition to present laundry.

Owner—Galland Laundry Co., 301 8th St., San Francisco.

Architect—Hyman & Appleton, 88 Post St., San Francisco.

Plans will be ready for bids in about 30 days.

Sub-Figures Being Taken.

CLEANING PLANT Cost, \$90,000
SAN FRANCISCO, Mission St. bet. 9th and 10th Sts.
 Four-story reinforced concrete cleaning plant.
 Owner—Thomas Dyeing and Cleaning Works, premises.
 Architect—F. W. Dakin, 625 Market St.
 Contractor—MacDonald & Kahn, Financial Center Bldg.

Revised Plans Being Completed.

PUBLISHING PLANT
 Cost, \$1,250,000 with equipment.
SAN FRANCISCO, Russ and Howard Streets.
 Three-story brick and reinforced concrete newspaper publishing plant.
 Owner—San Francisco Daily News, 340 Ninth St., San Francisco.

Architect—Howell & Thomas, 3868 Carnegie Ave., Cleveland, Ohio.

Structural Engineers—Shank & Fisher, 6007 Euclid Ave., Cleveland, Ohio.

Plans for this structure were recently approved, but due to the purchase of a larger press it was necessary to revise the plans to meet new arrangements in the mechanical department. Final approval of the plans will be made by the Scripps-Howard Press, 230 Park Ave., New York. It is proposed to commence construction at once.

Commissioned To Prepare Plans.

MFG. PLANT Cost, \$100,000
LOS ANGELES, Cal. Hostetter Industrial District, 2½ Acre Site.
 Manufacturing plant.

Owner—Liquid Carbonic Corp. of Chicago.

Architect and Contractor—The Austin Co. of Calif., 777 E. Washington St., Los Angeles.

OAKLAND, Alameda Co., Cal.—Bids will be asked at once by City Port Commission, 424 Oakland Bank Bldg., for structural steel frame for Transit Shed to be constructed on 9th Ave. Pier.

Owners To Erect By Day Labor.

CREAMERY Cost, \$150,000
BAKERSFIELD, Kern Co., Cal. Union Ave. and 18th St.

Three-story and basement steel and reinforced concrete creamery and ice cream plant (site 124x310-ft.).

Owner—Wasco Creamery & Coast Co., H. G. Hull, president, Wasco, Cal.

Architect—Not Given.

Equipment of latest type of stainless steel will be installed; direct expansion cooling or refrigeration system.

Contract Awarded.

LAUNDRY Cost, \$15,000
OAKLAND, Alameda Co., Cal. E. Poplar St. 80 N 22d.

One-story concrete laundry.

Owner—Superior French Laundry, 1028 22nd St., Oakland.

Architect—R. C. Schuppert, 4637 Park Blvd., Oakland.

Contractor—Gaubert Brothers, 4725 Brookdale Ave., Oakland.

STOCKTON, San Joaquin Co., Cal.—Proposal of the Port Stockton Cement Co., Claus Spreckels Bldg., San Francisco, to establish a cement plant in Stockton has been temporarily abandoned and the license granted the company by the State Corporation Department to sell stock has been suspended.

Eighty per cent of the money already collected by the corporation has been ordered returned to the stockholders.

The company planned the construction of a mill within the Stockton city limits, securing limestone and shale from a deposit near Columbia, Tuolumne county. Further negotiations are said to be under way to refinance the project.

Sub-Contracts Awarded.
WAREHOUSE Cost, \$250,000
SAN FRANCISCO. Foot of Twenty-third St.

One and two-story steel frame and concrete warehouse (140x320 ft.)
 Owner—Western Sugar Refining Co., 2 Pine St., San Francisco.

Plans by Engineering Dept. of Owner.
 Engineer—H. J. Brunner, Sharon Plg., San Francisco.

Contractor—Barrett & Hlpl, 918 Harrison St., San Francisco.

Plumbing—Mechanical Contracting Co., 53 Shipley St., San Francisco.

Sheet Metal—Fire Protection Products Co., 1101 16th St., San Francisco.

Electrical Work—Chas. Langlais, 472 Tehama St., San Francisco.

Sprinkler System—Fire Protection Engineering Co., 369 Pine St., San Francisco.

As previously reported, excavating awarded to Sibley Grading & Teaming Co., 165 Landers St., S. F.; structural steel to Dyer Bros. Iron Works, 17th and Kansas Sts., S. F.; reinforcing steel to Pacific Coast Steel Co., 111 Sutter St., S. F.

RODEO, Contra Costa Co., Calif.—Construction has been started on a \$12,000 commercial experimental refinery by the Bear State Refiners, Ltd., at Rodeo, it is announced by J. H. Bill, Jr., of Oakland, president of the company. The plans will be devoted to the manufacture of petroleum products through a new process which has been successfully tried in a Utah refinery. Others interested in the company besides Bill, are B. P. Walker, Oakland, vice president; Roy G. Weslake, Los Angeles, secretary; and J. P. Menjolet, treasurer.

Plans Being Figured.
SHOP BLDG. Cost, \$12,000
SAN FRANCISCO. Bay St. & Columbus Ave.

One-story 50x100-feet reinforced concrete shop building.
 Owner—Max Samuel.

Architect—H. C. Baumann, 251 Kearny Street.

Sub-Contracts Awarded.
ADDITION Cost, \$15,000
SAN FRANCISCO. 20 Bayshore Ave.

Addition to present factory (steel frame, steel sash and brick construction).

Owner—Schlage Lock Co., premises.
 Plans by Austin Co. of California.

Contractor—Austin Co. of California, 609 Bldg.

Structural Steel—Judson - Pacific Co., 800 Mission St.

Steel Sash—Detroit Steel Products Co., Hunter-Dubin Bldg.

New machinery and equipment will be installed.

Sub-Bids Being Taken.
FACTORY BLDGS. Cost, \$60,000
LIVERMORE, Alameda Co., Cal.

Four 1-story reinforced concrete factory buildings.

Owner—Coast Mfg. & Supply Co. (T. W. Morris, President).

Plans by Austin Co. of California.

Contractor—Austin Co. of California, 1924 Broadway, Oakland.

Plans Completed.
ADDITIONS Cost, \$—
BERKELEY, Alameda Co., Cal.

Fourth and Cedar Sts.

Additions to present plant and complete construction of spur track, etc.

Owner—Pacific Paint & Varnish Co., Fremont.

Architect—None.

More information will be given within one week.

RICHMOND, Contra Costa Co., Cal.—Edsel Ford, president of the Ford Motor Co. at Detroit, announces construction will be started this Spring on the proposed assembly plant at Richmond to have a capacity of 400 cars a day. Plans, it is said, have been completed for the main plant, warehouse and dock. Further mention will be made of this project when negotiations are further advanced.

FRESNO, Fresno Co., Cal.—Stanley R. Pratt, for the past six years identified with the development of the cotton industry in the San Joaquin Valley, announces formation of a company to finance construction of a \$500,000 cotton seed oil mill on a site yet to be selected in San Joaquin County. Associated with Pratt in the company are: T. E. Dempsey of Kern County, H. G. Fawcett of Chowchilla, who is secretary of the new concern; P. A. Williams of Bakersfield, W. V. Allen of Madera, Roy L. Cross of Bakersfield and others.

Construction Started.
WAREHOUSE Cost, \$—
PORTERVILLE, Tulare Co., Cal. D Street.

One-story concrete block warehouse (40x112 feet).

Owner—Porterville Poultry Assn.

Architect—None.

Contractor—D. B. Miller, San Diego.

Sub-Bids Being Taken.
WAREHOUSE Cost, \$35,000
OAKLAND, Alameda Co., Cal. Third and Clay Streets.

Two-story and basement steel and brick warehouse and office building

Owner—Earl M. Jorgensen Company.

Architect—Eng. Dept. of Owner.

Contractor—Larsen & Larsen, Russ Bldg., San Francisco.

SALINAS, Monterey Co., Calif.—Standard Oil Company of California has acquired Moss Landing wharfage for an oil storage and distributing depot for the territory including San Benito County. A plant of 40,000-gallons capacity will be built at once.

Form Lumber Contract Awarded.
WAREHOUSE Cost, \$250,000
SAN FRANCISCO. Foot of Twenty-third Street.

One and two-story steel frame and concrete warehouse (140x320 ft.)

Owner—Western Sugar Refining Co., 2 Pine St., San Francisco.

Plans by Engineering Dept. of Owner.

Engineer—H. J. Brunner, Sharon Bldg., San Francisco.

Contractor—Barrett & Hlpl, 918 Harrison St., San Francisco.

Form Lumber—Christensen Lumber Co., Fifth and Hooper Sts., San Francisco.

As previously reported, excavating awarded to Sibley Grading & Teaming Co., 165 Landers St., S. F.; structural steel to Dyer Bros. Iron Works, 17th and Kansas Sts., S. F.; reinforcing steel to Pacific Coast Steel Co., 111 Sutter St., S. F.

Preliminary Plans Being Prepared.
HANGAR Cost, \$12,000
FRESNO, Fresno Co., Cal. Chandler Field Municipal Airport.

Steel hangar, 60x100-ft. (capacity of from 10 to 12 planes).

Owner—City of Fresno.

Engineer—Chris P. Jensen, city engineer, Fresno.

Plans Being Figured—Bids Close Jan. 22, 2:30 P. M.
ADDITIONS Cost, \$35,000
SAN FRANCISCO. Municipal Airport.

Additions to Hangars Nos. 2, 3 and 4.

Owner—City and County of San Francisco.

Architect—Eng. Dept., Board of Public Works, 3rd floor, City Hall.

Work will be done under Contract No. 16. Cert. check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall, on deposit of \$10, returnable.

Plans To Be Prepared.
CREAMERY Cost, \$50,000
LOMPPOC, Santa Barbara Co., Cal.

Creamery Plant.

Owner—Knudsen Creamery, Santa Maria.

Architect—Not Selected.

Efforts are now being made to have local dairymen provide a supply of 10,000 lbs. per day to assure construction of the plant.

GARAGES AND SERVICE STATIONS

Sites Purchased—Plans To Be Prepared.
STATION Cost, \$—
SANTA CLARA, Santa Clara Co., Cal.

Alameda and Bellomy Sts.

Gasoline service station (35 ft. frontage).

Owner—Union Oil Co. of Calif., Mills Bldg., San Francisco.

Architect—Eng. Dept. of Owner.

Site Purchased—Plans To Be Prepared
STATION Cost, \$—
SAN JOSE, Santa Clara Co., Cal. SE

Julian and First Sts.

Gasoline service station.

Owner—Union Oil Co. of Calif., Mills Bldg., San Francisco.

Architect—Eng. Dept. of Owner.

Plans Being Completed.
GARAGE Cost, \$120,000
WEST LOS ANGELES, Los Angeles Co., Cal.

Two-story and basement Class A garage (210x130 feet).

Owner—Master Service Co., Administration Bldg., Los Angeles.

Architect and Contractor—Westwood Mortgage & Investment Co., West Los Angeles.

Contract Awarded.
STATION Cost, \$14,000
SAN JOSE, Santa Clara Co., Cal.

Santa Clara and Vine Sts.

Steel and terra cotta super service station.

Owner—Standard Oil Co., 225 Bush St., San Francisco.

Architect—Eng. Dept. of Owner.

Contractor—W. H. Ball, 1288 Lupton Ave., San Jose.

Bids In—Under Advisement.
GARAGE Cost, \$12,500
SAN MATEO, San Mateo Co., Cal.

One-story reinforced concrete garage with truss ceiling.

Owner—Gus Adolphson, 706 N. Claremont St., San Mateo.

Plans by Russell Coleman, 1404 Broadway, Burlingame.

The buildings will be of brick and concrete construction, plaster exterior, tile roofing, ornamental iron, cement floors, iron folding gates, steel sash, tile work, restrooms, etc.

OAKLAND, Cal.—Dyer Bros., Ray Bldg., granted permit by city council to erect and maintain super-service station at the southwest corner of Shattuck Ave. and Aileen St.

GOVERNMENT WORK AND SUPPLIES

SACRAMENTO, Cal.—Until Jan. 21, 11 A. M., under Order No. 1578, bids will be received by U. S. Engineer Office, California Fruit Bldg., 4th and J Sts., to fur. and del. one electric driven refrigerator compressor unit.

The compressor unit to be fur. and installed shall be driven by a ½-hp. elec. motor, 110 volt direct current. The compressor shall be a 2-cylinder, slow speed, reciprocating type, bolt driven. The condenser shall be spiral grooved, brass, shell type, with water cooled receiver and compressor. All bearings shall be of extra heavy bronze and lubricated by bath or oil and splash system. It shall be fitted with a safety interlocking switch to break the motor circuit at excess pressure and shall have a water valve motor control by means of pressure or low pressure side of system, adjustable type. It shall be equipped with a "Fulton" shut-off valve in the service line to the ice making coil and a snap action valve connected to the flood coil. The unit shall be compact and mounted on a single base with a maximum floor space required of 16½"x22½"x40". The refrigerant shall be about 6 lbs. of anhydrous sulphur dioxide (SO₂) and the liquid receiver shall be not smaller than ¾" dia. and 14½" high. The capacity of this compressor unit shall be sufficient to give service to finned type cooling coils with a melting ice equivalent of 220 lbs. at 40 degrees F., and also an ice making coil with a production of 13½ lbs. of ice cubes per 5-hour period.

SACRAMENTO, Cal.—Until Jan. 14, 11 A. M., under Order No. 1575-1576, bids will be received by U. S. Engineer Office, California Fruit Bldg., 4th and J Sts., Sacramento, to fur. and del. Rio Vista, Solano county, 3,000 ft. 1½-in. dia. wire rope, 6 strands, 19 wires to the strand galvanized proof steel, Warrington construction. Minimum breaking strength 15,700 lbs.; to be in one piece on individual reel.

SACRAMENTO, Cal.—Until Jan. 17, 11 A. M., under Order No. 1579, bids will be received by U. S. Engineer Office, California Fruit Bldg., 4th and J Sts., Sacramento, to furnish one gas driven electric generator plant, 4 KW, 110 volts. The plant to be furnished shall be gasoline driven (4 cylinder engines) direct connected to the generator. The plant shall start and stop automatically when the current is turned on or off. It shall have a capacity of 4 kilowatts at 110 volts direct current. The average daily load will be under 2 kilowatts, but the nightly load will be in the neighborhood of 2 kilowatts. Therefore, a combination of two 2 kilowatt units connected with a multiple automatic switch is desired; that is, the system should be so designed and assembled that one unit only will be in operation when the load is under 2 kilowatts and when the load exceeds 2 kilowatts the other unit will automatically "kick in." These units shall have a single 24 volt starting battery with a minimum of 40 ampere-hour capacity, and shall have a fuel supply tank with a minimum capacity of 50 gallons. This plant is to be used on a houseboat and shall be of the marine type with closed runner circulating water pump. Two cylinder operated plants will not be considered. The installation will be made by and at the expense of the United States, but the

direction, supervision, and testing of the installation will be made by the successful bidder. Delivery shall be made f.o.b. U. S. houseboat in the vicinity of Sacramento 10 days after notification of award.

PEARL HARBOR, T. H.—Until February 26, 11 A. M., under Specification No. 6905, bids will be received by Bureau of Yards and Docks, Navy Department, Washington, D. C., for refrigerating plant and alterations and additions to existing wood frame building at Naval Operating Base (Air Station), Pearl Harbor, T. H. Specifications obtainable from above or from Commandant, Naval Operating Base at Pearl Harbor or the Commandant at the Mare Island, Calif., Navy Yard, on deposit of \$10, payable to Chief of the Bureau of Yards and Docks, returnable.

BURLEY, Idaho—Haas, Doughty and Jones, Merchants Exchange Bldg., San Francisco, submitted low bid to the Bureau of Reclamation, Burley, at \$537,200 for construction of earthwork and structures, stations 2315-00 to 3129-99, main canal, gravity extension division, Minidoka project, Idaho. The work will include 1,050,000 cu. yds. excavation, 900,000 sta. cu. yds. over haul, 3,600 cu. yds. backfill about structure, 900 cu. yds. concrete, placing 67,000 lbs. reinforcement bars, laying 2,550 lin. ft. of 18 to 36 ins. diam. of precast concr. pipe laying 190 lin. ft. of 21-in. and 24-in. corrugated-metal pipe, erecting 1,200 lin. ft. of semi-circular metal flume, erecting 225 ft. b. m. timber in structure, installing 32,000 lbs. gates, gate hoists, and other metal work. Specifications No. 503.

SAN FRANCISCO—Until January 15, 11 A. M., under Specification No. 6085, bids will be received by Public Works Officer, Mare Island Navy Yard, for re-roofing operator's quarters, Building No. 6 at U. S. Naval Radio Station, Farallon Islands.

SAN FRANCISCO—Until January 15 2 P. M., bids will be received by Superintendent of Lighthouses, Customhouse, San Francisco, for construction of upper and lower landings; concrete stairs to and from landings; reinforced concrete retaining wall at upper landing; construction of permanent and temporary roadways; construction of concrete raised bed complete with piping system; installation of service pipe lines; erection of tank foundations and of two 50,000 gallon redwood tanks, and installation of two complete derricks at landing platforms, one 5 ton and one 4 ton, complete; in accordance with specifications and drawings. Information upon application.

Plans Being Prepared.
NURSES' HOME \$150,000 appropriated VALLEJO, Solano Co., Cal. Mare Island Navy Yard.
Fireproof Nurses' Home.
Owner—U. S. Government.
Architect—Bureau of Yards and Docks Navy Department, Washington, D. C.

Preliminary plans have already received the approval of the Bureau of Medicine and Surgery at Washington, D. C.

WILLOWES, Glenn Co., Cal.—Engineers of the U. S. Department of Commerce have selected a site and construction will be started shortly on a radio range station to cost \$10,000. Will have a range of 250 miles and will guide planes along air mail lines.

SAN DIEGO, Cal.—Mangrum & Otter, Inc., 1235 Mission St., San Francisco, at \$19,826 with a bid of \$4,454 on proposition No. 2 submitted low bid to Bureau of Yards and Docks Navy Department, Washington, D. C., for cafeteria equipment for San Diego, under Spec. No. 5523. Other bids, taken under advisement, were:
The Dohrmann Hotel Supply Co., 623 C St., San Diego, item 1, \$20,164.90; 2, \$3,000.

Starrett Equip Corp. 2 Lafayette St., New York City, item 1, \$24,982; 2, \$20,982.

Plans Being Prepared—Bids Open Jan. 23, 2 P. M.

WAREHOUSE—SHOPS Cost, \$—
SAN FRANCISCO. Goat Island in San Francisco Bay.

Three-story reinforced concrete warehouse and three-story reinforced concrete shops.

Owner—U. S. Government.

Architect—Superintendent of Lighthouses, Customhouse, San Francisco.

Plans for this project are available from Superintendent of Lighthouses at Customhouse.

See call for bids under official proposal section in this issue.

WASHINGTON, D. C.—Bids are being received by Bureau of Supplies and Accounts, Navy Department, to furnish and deliver materials and equipment to Navy Yards and Stations, further information being available from the Navy Purchasing Officer, 100 Harris St., San Francisco.

Bids Open January 21

Sch. 2508, western yards, copper-nickel alloy, bar and shot.

Sch. 2557, Mare Island, 2,600 lbs. antimony.

Sch. 2540, eastern and western yards, approximately 1,300,000 foundry pig iron.

Sch. 2539, Mare Island, 600,000 lbs. dry white lead.

Sch. 2555, Puget Sound, 70 gro. soapstone pencils.

Sch. 2544, western yards, solder.

Sch. 2541, western yards, bar rivet steel.

Sch. 2548, western yards, 600,000 lbs. medium steel.

Sch. 2545, western yards, steel shapes.

Sch. 2547, Mare Island and Puget Sound, china and glassware, officers' and crews' mess.

Sch. 2550, Puget Sound, 1 motor driven wire forming machine.

Sch. 2558, western yards, approx. 20,000 ft. steam hose and 800 ft. fuel oil hose.

Sch. 2559, western yards, aluminum water pitchers, platters and tureens.

Sch. 2561, Puget Sound, 5,000 lbs. ingot phosphor tin.

Sch. 2568, San Francisco, 300 double deck bunks.

Sch. 2569, Mare Island, 5400 lbs. steel forgings, propeller shaft.

Sch. 2573, Puget Sound, one rod straightener, shear and gagger maker.

SAN FEERNANDO, Cal.—Pacific Telephone Equipment Co., 704 S Spring St., Los Angeles, awarded contract by Medical Officer in Charge, U. S. Veterans' Hospital, to rebuild telephone cable system, etc., at \$2,287.50. Other bids.

Butte Elec. & Mfg. Co., 356 Folsom St., San Francisco, \$2,500; alt., \$100; 180 days.

Telephone Equip. & Repair Co., 515 Market St., San Francisco, \$3,462; alt., \$150; 60 days.

Interphone Electric Co., 5510 Monte Vista St., Los Angeles, \$3,477; alt., \$6,900 cwt.; 60 days.

PEARL HARBOR, T. H.—Until Mar. 5, under Specification No. 5921, bids will be received by Bureau of Yards and Docks, Navy Department, Wash-

ington, D. C., for extension of motor testing building at the naval operating base (air station), Pearl Harbor, T. H. Work includes earthwork, concrete, steel, and iron work, tubular steel and hollow metal doors, steel windows, roofing and sheet metalwork, woodwork, hardware, glazing, painting, and electric lighting.

 Owner—Los Angeles Gas & Electric Corporation.
 Architect—Eng. Dept. of Owner.

NEWARK, Alameda Co., Cal.—The Pacific Gas & Electric Co., San Francisco, have started construction of an addition to the sub-station at Newark. Work comprises construction of main power line of two circuits to carry 220,000 volts from Mokelumne River. Capacity will be 200,000 kilowatts. Spur track is being put in by United Commercial Co. Machinery has been purchased from Westinghouse Co. An eight-inch pipeline is to be laid from the main gas line in Alvarado to the Kraftile plants. All work is being done by the the Pacific Gas & Electric Co.

LANE COUNTY, Ore.—Laurence Macomber, 210 W-Seventh St. Los Angeles, seeks from Federal Power Commission a preliminary permit to construct a power project on Waldo Lake, Black Creek and Salmon Creek, Lane County, Ore., involving public lands in the Cascade National Forest. The proposed development includes a dam across the outlet of Waldo Lake creating a reservoir of about 140,000 acre feet, a tunnel conduit and penstock conducting the water from Waldo Lake reservoir to a power house on Black Creek. A conduit, penstock and tunnel conducting the waters of Black and Salmon Creeks to a second power house on north fork of the Willamette River also is proposed. The installed capacity of the development is estimated at approximately 56,000 horsepower and it is proposed to sell the power to municipalities in the Willamette Valley and to the city of Portland.

SEATTLE, Wash.—Bids will be asked at once by the Board of Public Works for generating apparatus for two proposed units below Diablo Dam. Each unit to cost \$700,000, will have a generating capacity of 60,000-k.w. An additional \$600,000 is provided by the Board for a power house, surge tanks and other work in connection with the Diablo project.

HOLTVILLE, Imperial Co., Cal.—The Southern Sierras Power Co. has announced that about \$138,000 will be

expended in the Imperial Valley during 1930. According to F. E. Lucking, local superintendent, among the important items are: New 5000 kva. condenser for the El Centro terminal to replace the present 2000 kva. to cost \$41,500; the rebuilding of the Brawley-El Centro 17 kva. line at \$50,000; and general sub-station improvements of \$13,000; line and other construction at Calpatria, Brawley, Holtville, Calexico and Niland.

PHOENIX, Ariz.—The Central Arizona Light & Power Co. has announced that \$2,500,000 will be expended for construction during 1930. A total of \$1,750,000 will be devoted to the completion of the new steam plant begun in 1929. About \$750,000 will be expended on the usual gas and power lines and equipment.

BURLINGAME, San Mateo Co., Cal.—Mayor C. A. Buck has appointed committee to investigate proposal of city to establish a municipal gas and electric lighting system similar to that in operation in Palo Alto.

Engineering News Section

BRIDGES

SANTA ROSA, Sonoma Co., Calif.—County Surveyor E. A. Peugh will start surveys shortly for new bridge on road between Sebastopol and Freestone; estimated cost \$3,000.

STOCKTON, San Joaquin Co., Cal.—State Railroad Commission is considering plans for proposed subway under tracks of Southern Pacific R. R. on Lower Sacramento road in the Forrest Lake District, San Joaquin county; estimated cost \$13,000. It is understood the railroad will pay one-half the cost and the county the other half from the gas tax fund. J. B. Manthey is county surveyor.

PALO ALTO, Santa Clara Co., Cal.—City Engineer J. F. Byxbee, Jr. will confer with San Mateo and Santa Clara county supervisors regarding widening of Middlefield road bridge to meet traffic needs. The existing sidewalk on the bridge would be eliminated and a pedestrian walk provided on the outside of the bridge, according to tentative plans.

SAN FRANCISCO—Duncanson-Harrelson Co., De Young Bldg., at \$26,829 awarded contract by State Department of Public Works, Division of Engineering, for borings in connection with the proposed bridge over San Francisco Bay connecting San Francisco with Alameda county. Borings will be made along suggested bridge sites from Goat Island to Telegraph Hill; from Rincon Hill to Goat Island; from Rincon Hill to the Alameda Mole and in adjacent territory.

SANTA CRUZ, Santa Cruz Co., Cal.—City Clerk S. A. Evans, will ask bids at once to be opened January 20 to construct proposed new bridge in Market St. of Branciforte Creek. Will be combined wood and concrete construction. Plans obtainable from Roy Fowler, city engineer.

DREDGING, HARBOR WORKS & EXCAVATIONS

BURLEY, Idaho—See "Government Work and Supplies," this issue. Bids opened by U. S. Bureau of Reclamation.

IRRIGATION PROJECTS

OROVILLE, Butte Co., Cal.—Jan. 27 is the date set by the county supervisors to consider the petition seeking formation of the Richvale Irrigation District, embracing 30,000 acres, in the vicinity of Richvale. Proceedings have been started for another district comprising 100,000 acres in the northern section of Butte county and in Sutter county.

OROVILLE, Butte Co., Cal.—Petition seeking formation of the proposed Rio Seco Irrigation District, embracing 8,600 acres, is being considered by the Butte county supervisors.

COLUSA, Colusa Co., Calif.—Colusa County landowners and farmers have called a meeting for January 13 to discuss Colusa's proposed \$1,000,000 Sacramento weir project. Fred H. Thibbets, consulting engineer of San Fran-

cisco, and a representative of the State Engineer's office will address the meeting to further steps in connection with the project.

STREET LIGHTING SYSTEMS

SAN JOSE, Santa Clara Co., Calif.—City declares intention (4953) to install lighting system in Second St. bet. San Salvador and Reed Sts., involv. 20 (San Jose Standards) Duplex electrolux posts together with underground system. 1911 Act. Bond Act 1915. Hearing Jan. 6. John J. Lynch, city clerk. Wm. Popp, city eng.

SAN LEANDRO, Alameda Co., Cal.—City trustees have abandoned proceedings to install ornamental lighting system in Dutton Ave. W. A. Richmond is city manager.

HANFORD, Kings Co., Calif.—Until January 20, 7 P. M., bids will be rec. by D. C. Williams, city clerk, to install ornamental lighting standards together with underground system in 7th St. from Harris to Redington Sts., Doucy St. for 6th to 8th St., Irwin St. from 6th to Court Sts. and 7th St. from Thornton St. to west line of Blocks 110 and 140. Est. cost, \$20,000. 1911 Act. Bond Act 1915. Cert. check 10% payable to city required with bid. Plans on file in office of clerk. A. Segel, engineer, Griffith-McKenzie Bldg., Fresno.

SANTA CRUZ, Santa Cruz Co., Cal.—City Engineer Roy Fowler preparing plans to install 28 Marbelite standards with underground system in connection with Walnut Ave. widening.

SAN JOSE, Santa Clara Co., Cal.—Proceedings have been started by the city council to install ornamental lighting system in Second St., bet. San Salvador and Reed Sts. Wm. Popp, city engineer.

RAILROADS

WINSLOW, Ariz.—The Santa Fe Ry. announces plans are under way for the construction of a 22-mile rail line east of Winslow to cost \$1,375,000. The line will parallel the existing main line. Upon the completion of this work the Santa Fe will be double-tracked from Los Angeles to Chicago with the exception of 20 miles in northern Arizona. The average cost of Santa Fe track construction is \$55,000 per mile. Construction will involve a new double track bridge over the Little Colorado river, 2 miles east of Winslow. The present bridge has a 164-ft. span.

OAKLAND, Alameda Co., Cal.—Bids will be asked at once by City Port Commission, 424 Oakland Bank Bldg., to furnish and deliver track material in connection with Brooklyn Basin, 7th Ave. Pier. Spec. obtainable from above office.

FIRE ALARM SYSTEMS

PITTSBURG, Contra Costa Co., Cal.—City council plans to install new fire and police alarm boxes in various sections of the city at a cost of \$12,000. Roy A. Watkins is city manager.

FIRE EQUIPMENT

NORTH SACRAMENTO, Sacramento Co., Cal.—City council plans purchase of motor-driven fire equipment to replace present chemical equipment.

SAN ANSELMO, Marin Co., Calif.—Chester N. Weaver Co., 1355 Van Ness Ave., San Francisco, at \$8,000 submitted low bid to city trustees to furnish a 600-gallon pumper for the Fire Department. American La France Fire Engine Co. and Seagrave Co. were on other bidders at \$9,000 each. Taken under advisement. (Fire Dept. endorses American La France equipment).

SAN MATEO, San Mateo Co., Cal.—American Rubber Mfg. Co., Matson Bldg., San Francisco and Piereur Rubber Mills, 353 Sacramento St., San Francisco, submitted identical bids to city council to furnish 500-ft. of hose for Fire Department. Bids were: \$1.30 ft. first grade; \$1.15 ft. second grade; \$1 ft. third grade. Referred to City Manager E. P. Wilsey for report.

MISCELLANEOUS SUPPLIES AND MATERIALS

SAN FRANCISCO—Postcard Engineering and Const. Co., 434 Russ Bldg., is in the market for 30,000 10-in. dials for electric clocks, 30,000 one-thirtieth hp. electric motors and 30,000 reduction gears. Further information is obtainable from above.

BERKELEY, Alameda Co., Calif.—Until January 20, 8 P. M., bids will be received by Clara F. Andrews, secy., Board of Education, 2325 Milvia St., to furnish and deliver one piano. Further information obtainable from secretary.

WASHINGTON, D. C.—See "Government Work and Supplies," this issue. Bids wanted by Navy Department for miscellaneous supplies, materials and equipment for various Pacific Coast Navy Yards.

PIPE LINES, WELLS, ETC.

SANTA ANA, Orange Co., Cal.—Southern Counties Gas Co. has announced that improvements and betterments in Orange County during 1936 will cost \$260,000. The figure includes an appropriation of \$183,870 for extension of mains, services and the necessary equipment for such extensions; \$65,000 for replacement of a number of miles of existing mains; \$10,000 for a new office building at Laguna Beach, and \$44,160 for additional service in various parts of the county. C. S. Rutledge is the district manager.

SEWERS AND SEWAGE DISPOSAL PLANTS

OAKLAND, Cal.—Until January 16, 12 noon, bids will be received by Frank C. Merritt, city clerk, to improve portions of Foothill Blvd. and Sts. in "Country Club Manor" tract, involv. vitrified pipe sewers with manholes, lampholes and wye branches. 1911 Act. City will pay \$20,000 of the total cost from the General Fund. Cert. check 10% payable to City required with bid. Plans on file in office of clerk. Geo. N. Randle, city engineer.

PASADENA, Cal.—Until 10 A. M. January 22, bids will be received by the city council for one cylindrical, revolving, double-shell dryer and appurtenant apparatus for drying sewage sludge at the Pasadena Sewage Disposal Plant, located near Alhambra. Specifications may be obtained from the city engineer, G. K. Hooper. Certified check, 10%.

BAKERSFIELD, Kern Co., Calif.—City declares inten. (600) to construct 6-in., 8-in. and 15-in. vitrified sanitary sewers together with manholes, lampholes and wye branches in Sewer Dist. No. 600. 1911 Act. Hearing Jan. 20. V. Van Riper, city clerk. W. D. Clarke, city engineer.

OJAL, Ventura Co., Cal.—Until 7:30 p. m., Jan. 27, bids will be received by the city council for additions to the existing city domestic sewage disposal plant by construction of a sludge tank, sprinkling filter beds, chlorination plant, sludge drying beds and other necessary equipment and appurtenances in connection therewith. Black & Veatch, consulting engineers, 621 Ferguson Bldg., Los Angeles. Plans obtainable from engineers on deposit of \$15, of which \$10 will be returned. Certified check, 10%. Bids will be taken as follows: (1) 900 cu. yds. excavation; (2) screening chamber; (3) Imhoff tank alterations and additions; (4) dozing tank; (5) sprinkling filter alterations and additions; (6) resetting tank alterations and additions; (7) sludge digester and pump house; (8) sludge bed concrete and piping; (9) yard piping, (a) lump sum for all yard piping, (b) for variations from the specified lengths of pipe lines, drains and sewer, (1) 4-in. class B cast iron pipe, (2) 6-in. class A cast iron pipe, (3) 8-in. class A cast iron pipe, (4) 10-in. class A cast iron pipe, (5) 6-in. vit. clay pipe sewer, (6) 10-in. vit. clay pipe sewer, (c) class C concrete, 5 cu. yds.; (10) class B concrete, 5 cu. yds.; (11) class D concrete, 5 cu. yds.

LAS VEGAS, Nev.—A. H. Koebig of the firm of Koebig and Koebig, Rowan Bldg., Los Angeles, has given the city council an estimate of \$200,000 as the probable cost of the new sewer collec-

tion system and disposal plant for which tentative plans have been prepared. The contract will probably be divided into mains and disposal plant.

SAN FRANCISCO—Bureau of Engineering, Department of Public Works, completes plans, and supervisors have been requested to authorize the calling of bids to construct Section A of the 15th St. Sewer, under Contract No. 3. Estimated cost \$70,000. Funds will be provided from the Sewer Bond Issue. Project will involve approx. 940 ft. 6-ft. 8-in. by 8-ft. 6-in. reinf. concrete sewer; 230 ft. 6-ft. reinf. conc. circular sewer; 28,000 sq. ft. wood piling. M. M. O'Shaughnessy, city engineer.

LOS ANGELES, Cal.—County Sanitation District No. 3 has authorized A. K. Warren, chief engineer, and Bruce Mason, special counsel, to prepare proceedings for a \$3,400,000 bond election for construction of trunk sewers within the district, costing \$1,600,000 and this district's share in the ocean outfall, \$1,800,000. The date for the election will probably be set at the district meeting on Jan. 8.

POINT REYES, Marin Co., Calif.—Formation of sanitary district at Pt. Reyes station has been recommended by Dr. J. H. Kuser, county health officer. Sewer, drainage and garbage conditions will be improved when permission in granted by State Board of Health.

LOS ANGELES, Cal.—Until 2 P. M., Jan. 20, bids will be received by county supervisors for constructing cement pipe sanitary sewers in C. I. No. 725, in Belvedere Gardens, Unit No. 3, including Eugene St., First St., Fourth St., Gratlan St., McBride Ave., et al, involving: 16,660 ft. 8-in. cement pipe sewer; 2050 ft. 8-in. cement pipe main sewer; 250 ft. 10-in. cement pipe main sewer; 6420 ft. 6-in. cement pipe house connections; 16 flushing manholes; 37 manholes; 17 junction chambers; 7 ft. 6 in. cement pipe chimney; 162 ft. ¾ in. galv. iron pipe; break into existing drop manhole or county and form new channel in base. Estimate, \$42,288. Work involves 3.59 miles.

SAN MATEO, San Mateo Co., Cal.—Plans will be started shortly by city for the proposed \$75,000 South San Mateo sewer system, according to City Manager E. P. Wisley.

BURLINGAME, San Mateo Co., Cal.—See "Streets and Highways," this issue. Sewage Improvements in connection with Primrose road widening.

OROVILLE, Butte Co., Cal.—City Engineer S. J. Norris making surveys to extend storm sewer in Myers St. from Robinson street. Surveys are

also being made for other improvements in connection with the sewer system.

MISCELLANEOUS CONSTRUCTION

SEATTLE, Wash.—Application to the city council of Seattle, Wash., for a franchise to build a traffic tube with 24-ft. roadway on the bed of Lake Washington between the Seattle Mainland at Seward Park and Mercer Island has been made by A. J. Ghirdi, 2112 5th St., N., Seattle, and C. A. Newhall, 6303 21st St., NE, Seattle, engineers for the Traffic Tube Construction Company who estimate the cost of carrying out the project as approximately \$4,500,000. Water depth off Mercer Island is 150 ft. The council also has under consideration the long-debated Mercer Island toll bridge plans of the Puget Sound Bridge & Dredging Company, Central Bldg., Seattle. This plan has not been favored by the council, because of opposition of the park board to any surface approach being built either through or around the rim of the park.

OAKLAND, Cal.—Until Jan. 16, 12 noon, bids will be received by Frank C. Merritt, city clerk, to fur. transportation, storage and compression tests on Portland cement concrete cylinders for the remainder of the fiscal year ending June 30, 1936. Bond of \$150 required of successful bidder. Spec. obtainable from city clerk.

WATER WORKS

HUNTINGTON BEACH, Cal.—The California Oil & Gas Association of Los Angeles has announced that the oil operators of Huntington Beach will build a \$100,000 waste water disposal system similar to that in operation at Santa Fe Springs.

LOS ANGELES, Cal.—Until Jan. 21, 10 A. M., bids will be received by Purchasing Agent, City Water and Power Bureau, 207 S. Broadway, for eight direct motor-driven deep well turbine pumps; under Advertisement 1275.

ALHAMBRA, Los Angeles Co., Cal.—City Engineer Otto N. Rugen announces three miles of transmission lines will be laid by city water department during current year at a cost of \$50,000; distribution of mains, \$20,000; services, \$5,000, and additional fire hydrants to cost \$20,000.

PATTERSON, Stanislaus Co., Cal.—Patterson Water Co. will spend \$10,000 in replacements during the current year, involving in the main 250 iron gates, costing \$5,000.

FOR BRICK MORTAR, WHITE COAT, AND SAND FLOAT FINISH

Sold by Representative Dealers Everywhere

MODESTO, Stanislaus Co., Calif.—City council has appropriated \$20,000 to finance drilling well, purchase of pumps and installation of water pipe extensions. Bids will be asked shortly. Frank Ross, city engineer.

PUNTE, Los Angeles Co., Calif.—Bids will be asked shortly by Rowland Union School District for water storage system. Will consist of a reinforced concrete tank, 21-ft. dia. and 8-ft. deep; electrically driven pump and connections and pipe line connections. Plans by Jeffery and Schaefer, architects, Kerckhoff Bldg., Los Angeles.

REDWOOD CITY, San Mateo Co., Calif.—Property owners and residents in Millbrae Villa Tract have petitioned the county supervisors to undertake improvements affording modern fire protection and water service in the Millbrae section. Referred to County Surveyor Geo. A. Kneese for report.

MODESTO, Stanislaus Co., Calif.—City Engineer Frank Ross is preparing plans for pumping plant in connection with municipal water system. City council has appropriated \$20,000 for this project.

SAN MATEO, San Mateo Co., Calif.—Proceedings will be started shortly by city council for installation of 8-inch water mains with fire hydrants in Beresford Park district. E. P. Wilsey, city manager.

MODESTO, Stanislaus Co., Calif.—United States Pipe and Foundry Co., Monadnock Bldg., San Francisco, and Pacific States Cast Iron Pipe Company, Hunter-Dulin Bldg., San Francisco, the two bids totaling \$8,556.60, awarded contract by city to furnish 5,600 feet 4-in., 1,250-ft. 8-in., 600-ft. 10-in. and 4,400-ft. 6-in. water pipe.

STRATFORD, Kings Co., Cal.—Plans to formulate a public utilities district to establish a publicly owned water system for domestic use and fire protection are under way. J. H. Brothers is chairman of committee in charge of formation of the district. It is proposed to provide a system costing \$25,000, including a 30,000-gal. tank on 100-ft. tower with new water mains in the business section.

SAN FRANCISCO—See "Government Work and Supplies," this issue. Bids wanted by Lighthouse Service for roadwork tanks, derrick installations, roadways, piping system, etc.

SAN DIEGO, Calif.—Contracts for construction of the Otay Reservoir-San Diego second main pipe line were awarded by the city council as follows:

Schedule 1, for trench excavation and completion of backfilling from Lower Otay Reservoir to Lantana Dr., about 14.8 miles, to R. E. Hazard Contracting Co., 2548 Kettner Blvd., San Diego, at \$43,269.25.

Schedule 11, pipe conduit and appurtenances, furnishing and installing from Lower Otay Reservoir to Lantana Drive, about 16.2 miles, to Western Pipe & Steel Co., 5217 Santa Fe Ave., Los Angeles, at \$621,317.60, using electric welded steel pipe.

Schedule 111, tunnel excavation, Gunite and concrete reinforced lining and floor, 4 turnels, aggregate length about 1.4 miles, to M. N. Guho and M. Miller 208 W 2nd St., Los Angeles, at \$67,346.50.

Schedule 1V, trench excavation, furnishing and installing pipe and appurtenances and backfilling, Lantana Dr. along city avenues and streets, paved and to be paved, to University Hgts Reservoir about 3 miles, to Miracle Const. Co., 4500 Menlo Ave., San Di-

ego, at \$220,728, using U. S. Hi-Tensile cast iron pipe.

OAKLAND, Cal.—Until January 13, 5:30 A. M., bids will be received by John H. Kimball, secretary, East Bay Municipal Utility District, 512 Sixteenth St., to furnish approximately 3618 tons of cast iron pipe of diameters ranging from 4-in. to 16-in. inclusive. Specifications obtainable from secretary.

PLAYGROUNDS & PARKS

SAN MATEO, San Mateo Co., Cal.—San Mateo School District has purchased a 50-foot frontage lot from the city adjoining the San Mateo Park Grammar School and will improve the site for playground purposes.

SOUTH SAN FRANCISCO, San Mateo Co., Calif.—City council will call election to vote bonds of \$120,000 to finance development of three public parks and to pave Orange Ave.

STREETS AND HIGHWAYS

Other bids: Oakland Const. Co., Oakland, \$988.82; F. Gaggero, Napa, \$1,154.20; R. E. Errington, Napa, \$1,144.20.

SAN FRANCISCO—Federal Const. Co., Call Bldg., at \$106,325 submitted low bid to Board of Public Works to improve Great Highway (lower road) between Ulloa St. and Lincoln Way. Other bids were: Meyer Rosenberg, \$112,167; California Const. Co., \$115,929; Fay Imp. Co., \$116,115; C. L. Harney, \$119,829; Pacific States Const. Co., \$129,502; C. Eaton, \$122,186; L. J. Cohn \$124,334; J. T. Tobin, \$129,231.

SAN FRANCISCO—Fay Imp. Co., Phelan Bldg., at \$1,787 submitted low bid to Board of Public Works to imp. Bayshore Ave. bet. Tunnel Ave. and Wheeler Ave. invol. conc. curbs; side sewers; 6-in. conc. base, 1½-in. asph. conc. surface pavement and one br. catchbasin with 10-in. ironstone pipe culvert and art. stone walks at crossing of Tunnel and Bayshore Avenues. Other bids, all taken under advisement, were: N. J. Barry, \$1,984; C. B. Eaton, \$2,317; K. I. Dowdy, \$2,970.

SACRAMENTO, Cal.—Until Jan. 27, 5 P. M., bids will be received by Chas. C. Hughes, secretary, Board of Education, to construct approximately 4,000 sq. ft. concrete sidewalk, fronting school properties. Cert. check 10% payable to Board of Education req. with bid. Specifications obtainable from secretary.

FRESNO, Fresno Co., Cal.—City declares inten. (99-D) to improve Inez St. from Huntington Blvd. to Ventura Ave., involving construction of cement concrete sidewalks and curbs. 1911 Act. Hearing January 23. H. S. Foster, city clerk. A. M. Jensen, city engineer.

IMPERIAL COUNTY, Cal.—R. E. Hazard Construction Co., San Diego, at \$110,426.30 awarded contract by State Highway Commission to grade and pave with asph. conc. 5.0 mi. bet. Dixieland and Seeley. Project involves: 32,600 cu. yds. rdwy. excav. without classification; 457,100 cu. yds. overhaul; 1430 cu. yds. struct. excav.; 19,500 sq. yds. preparing subgrade; 37,000 sq. yds. asph. paint binder; 17,500 tons asph. conc.; 150 cu. yds. Class "A" cem. conc. (struct.); 960 lin. ft. bar reinf. steel (struct.); 960 lin. ft. 12", 622 lin. ft. 18", 374 lin. ft. 24" and 458 lin. ft. 36" corrugated metal pipe; 1172 lin. ft. 4" drain tile; 132 tons gravel blanket for siphons; 170 cu. yds. untreated crushed gravel or stone surfacing; 288 lin. ft. solid timber guard rail; 280 cu. yds. removing and disposing of conc. in existing pave. and struct.; 2.3 mi. moving and reset property fences; 260 sta. finish rdwy.; 20 monuments. State will fur. corr. metal pipe.

MILL VALLEY, Marin Co., Cal.—Town trustees declare intention (693) to construct hydraulic concrete sidewalks in portions of Bithledale Ave., Park Ave., etc. 1911 Act. Bond Act 1915. Hearing January 9. Will Falley, town clerk. F. H. Lacy, city engineer.

SOLANO COUNTY, Cal.—Following bids received Jan. 8 by State Highway Commission to grade and pave with Port. cement concrete 0.7 miles thru Dixon:
D. W. Wood, Stockton.....\$27,974
Fredrickson & Watson & Fredrickson Bros., Oakland.....30,665

MILL VALLEY, Marin Co., Cal.—Town trustees declare intention (69%) to improve portion of Circle Ave., involving grade; hydraulic concrete pavement; ironstone pipe lateral sewers with wye branches; one brick and concrete manhole. 1911 Act. Bond Act 1915. Hearing January 16 Will Farley, city clerk. F. H. Lacy, town clerk.

SANTA BARBARA COUNTY, Cal.—As previously reported, bids will be received January 29 by State Highway Commission to grade and pave with concrete, 4 miles between Zaca and Wigmore. Project involves: 38 sta. clearing and grubbing right-of-way; 100,000 cu. yds. rdwy. excav. without class; 234,000 sta. yds. overhaul; 2550 cu. yds. struct. excav.; 44,500 sq. yds. subgrade for pave.; 1100 cu. yds. cushion course; 9550 cu. yds. class A conc. (pave.); 150 cu. yds. class A cem. conc. (struct.); 237,500 lbs. bar reinf. steel (pave.) and (struct.); 876 lin. ft. 18", 498 lin. ft. 24" and 202 lin. ft. 30" corr. metal pipe; 352 lin. ft. corr. metal pipe (clean and relay); 4.8 mi. new property fence; 3200 lin. ft. solid timber guard rail; 2050 cu. yds. removing and disposing of cem. conc. in existing pave. and struct.; 1000 bbls. fuel oil (shoulders); 211 sta. finish rdwy.; 33 monuments. State will fur. corr. metal pipe as more explicitly set forth in the special provisions.

SAN LUIS OBISPO COUNTY, Cal.—As previously reported, bids will be received January 29 by State Highway Commission to grade and pave with concrete, 7.2 miles between Santa Maria River and Los Berros Creek. Project involves: 157,250 cu. yds. rdwy. excav. without class; 700,000 sta. yds. overhaul; 3000 cu. yds. struct. excav.; 64,500 sq. yds. subgrade for pave.; 2900 cu. yds. cushion course; 17,250 cu. yds. class A cem. conc. (pave.); 885 cu. yds. class A cem. conc. (struct.); 500,000 lbs. bar reinf. steel (pave. and struct.); 425 tons crusher run base; 716 lin. ft. 18", 634 lin. ft. 24", 208 lin. ft. 36" and 62 lin. ft. 42" corr. metal pipe; 47 lin. ft. corr. metal pipe (clean and relay); 12.3 miles new prop. fence; 2215 cu. yds. removing and disposing of cem. conc. in existing pave. and struct.; 1815 bbls. fuel oil (shoulders); 335 stations finish rdwy.; 75 monuments. State will fur. corr. metal pipe and cast steel frames and covers for drop inlets.

PACIFIC GROVE, Monterey Co., Cal.—City council declares intention No. 3140 to improve 19th St., bet. Junipero and Sinex Aves., involv. grade; cem. conc. curbs, gutters; 3-in. crushed rock base with 2-in. asph. conc. surface pavement; concrete catchbasin. 1911 Act. Bond Act 1915. Hearing January 23. W. G. Stubbs, city clerk.

PACIFIC GROVE, Monterey Co., Cal.—City declares intention No. 3137 to improve 19th street, between Light-house Ave. and Junipero Ave., involv. grading; cement concrete curbs and gutters; asphalt concrete pave.; storm drains; vitrified clay sanitary lateral sewers. 1911 Act. Bond Act 1915. Hearing January 23. W. G. Stubbs, city clerk.

REDWOOD CITY, San Mateo Co., Cal.—County supervisors petitioned to straighten out dangerous sections of the La Honda Road, particularly on curves. County Surveyor Geo. A. Kneese instructed to make surveys. Funds will provide in the budget to finance the work.

AJAO, Ariz.—J. R. Benton, Box 21, Ajao, Ariz., offers two-thirds of briquet machine invention to company or individual who will cover cost of patent, construction and installation of one machine.

\$5,475,533 POWER PLANT SUIT IS FILED

Suit to recover more than \$5,000,000 on a contract has been filed in San Francisco by Robert C. Storrie and Robert D. Muir, co-partners in R. C. Storrie & Co., against the Feather River Power Company and three other defendants.

According to the complaint the Storrie Company contracted for the construction of Buck's Creek power plant in Plumas county at an original estimated cost of \$7,691,889. Later the contract was abrogated and the plans and specifications changed, bringing the cost up to \$9,903,006.10. On a verbal agreement they completed the project. In payment, they charge, they have received only common stock of the Feather River Power Company of no value.

Contracts Awarded Liens, Acceptances, Etc.

SEATTLE PLANS BRIDGE OR VEHICULAR TUNNEL

Application to the city council of Seattle, Wash., for a franchise to build a traffic tube with a 24-ft. roadway on the bed of Lake Washington between the Seattle mainland at Seward Park and Mercer Island has been made by A. J. Gliard and C. A. Newhall, engineers for the Traffic Tube Construction Company, who estimate the cost of carrying out the project as approximately \$4,500,000. Water depth off Mercer Island is 150 feet.
The city council also has under consideration the long-debated Mercer Island toll bridge plans of the Puget Sound Bridge & Dredging Company. This plan has not been favored by the council, because of the opposition of the city park board to any surface approach being built either through or around the rim of the park.

NOTICE TO CONTRACTORS

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, February 4, 1930, thereafter on said day to be publicly opened and read for the erection and completion of the Assistant Physician's Residence, Napa State Hospital, Napa, California, in accordance with plans and specifications therefor.

The building is a one-story frame structure of seven rooms and basement with stucco exterior and shingle roof.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, California, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California cities Builders' Exchange Offices.

Plans and specifications may be obtained by General Contractors who propose bidding on the entire work by direct application to the Division of Architecture and including a deposit of twenty-five (\$25.00) dollars for the set. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

Bids must be submitted on Proposal Form furnished by the Division of Architecture. All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works reserves the right to reject any or all bids and to waive any informality in any bid received.

STATE DEPARTMENT OF PUBLIC WORKS,

DIVISION OF ARCHITECTURE

B. B. MEEK,

Director of Public Works
(Jan. 10-17-24-31)

NOTICE TO CONTRACTORS

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, February 4, 1930, thereafter on said day to be publicly opened and read for the erection and completion of the Assistant Physician's Residence, Sonoma State Home, Eldridge, California, in accordance with plans and specifications therefor.

The building is a one-story frame structure of seven rooms and basement with stucco exterior and shingle roof.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, California, and also at Room 1025 Associated Realty

Building, Los Angeles, and at the principal California cities Builders' Exchange Offices.

Plans and specifications may be obtained by General Contractors who propose bidding on the entire work by direct application to the Division of Architecture and including a deposit of twenty-five (\$25.00) dollars for the set. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

Bids must be submitted on Proposal Form furnished by the Division of Architecture. All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works reserves the right to reject any or all bids and to waive any informality in any bid received.

STATE DEPARTMENT OF PUBLIC WORKS,

DIVISION OF ARCHITECTURE

GEO. B. McDOUGALL, State Architect.

B. B. MEEK,

Director of Public Works.

SEEKS PERMIT FOR POWER PROJECT IN OREGON

An application for a preliminary permit to construct a power project on

Waldo Creek, Black Creek and Salmon Creek, Lane County, Ore., involving public lands in the Cascade National Forest, was filed with the Federal Power Commission Dec. 7, by Laurence Macomber, of Los Angeles.

The proposed development includes a dam across the outlet of Waldo Lake creating a reservoir of about 140,000 acre feet, a tunnel, conduit and penstock conducting the water from Waldo Lake reservoir to a power house on Black Creek. A conduit, penstock and tunnel conducting the waters of Black and Salmon creeks to a second power house on the north fork of the Willamette river is also proposed.

The installed capacity of the development is estimated at approximately 56,000 horsepower, and it is proposed to sell the power to municipalities in the Willamette Valley and to the City of Portland.

R. F. DEANE NAMED DISTRICT SALES MANAGER

R. F. Deane, formerly district sales manager of the Thew Shovel Company in Philadelphia, is now in charge of the west coast territory for the company, with headquarters at San Francisco. He will have full charge of Thew shovel sales and service in California, Oregon, Washington, Idaho, Nevada and British Columbia. He will have as his service engineer J. C. Lyons, who has had ten years' experience with the service department of the company, the last two years of which was spent on erection and testing at the factory. Complete stocks and repair parts will be carried by distributors on the west coast, including Smith Booth Usher Company, Los Angeles; Jenison Machinery Co., San Francisco; Feenaghty Machinery Co., Portland, Seattle and Spokane; Hall - Perry Machinery Co., Butte and Paragon Supplies, Vancouver, B. C.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

STEEL REINFORCING BARS

Dependability of materials used is a prime requisite to the success of construction.

For twenty years Gunn, Carle & Co. has been able to guarantee STEEL REINFORCING installation service, without error—without complaint.

We shall be pleased to consult you, without obligation, regarding the construction problems in the field of Iron and Steel on jobs of any size.

Gunn, Carle & Co.

444 Market St., S. F.

Tel. Sutter 2720

Model four-flat building in LEIMERT PARK, Los Angeles, completely equipped with approved appliances:

*Gas Refrigerators
Automatic Water Heaters
Unit Furnaces
Space Heaters
Kitchen Ranges*

—equipment in keeping with beautiful appointments throughout—from peak to patio.

“Blue Star” Flats* attract permanent tenants

Like the “Blue Star” homes so successfully marketed by Walter H. Leimert Co., Inc., this distinctive four-family *flat* building features the most complete and modern *gas* equipment.

Gas refrigeration—because of its novelty as well as proved superiority—displayed amazing “pulling-power” in bringing investors and home-seekers to Leimert Park.

The new gas ranges, too, with their heat-controlled ovens and appealing colors, exerted a lure which few women could resist. And men were instantly impressed by the convenience, cleanliness and comfort of gas heat.

In fact, *you* will find, as did the Leimert Company, that nothing adds more to the *salability* of a home, or “*lease-ability*” of an apartment, than up-to-date gas appliances.

*BLUE STAR means “completely equipped with modern gas appliances, laboratory-approved by the American Gas Association”.

Your gas company will gladly assist you in planning for gas.

INDEPENDENT ARCHITECTS FOR FEDERAL BUILDING URGED

Inauguration of a movement to make it possible for architects other than those directly employed by the Federal government to be used for governmental work has been started by Congressman Louis Ludlow of the Indianapolis, Indiana, district.

In a recent statement Ludlow said: "I see no reason why the architects of Indiana, who are among the best in the country, should not have some employment on big governmental jobs. The United States is about to launch a great building program involving \$15,000,000 for Federal buildings throughout the country.

"Having noted the passage of the new legislation and having learned that it originated in the Treasury department, I wrote to the secretary of the treasury to try to open the way for the employment of qualified Indiana architects and I have an encouraging reply from Ogden L. Mills, assistant secretary of the treasury, in which he answers in part as follows:

"As you know, specific authorizations and appropriations have been provided for public building projects at Fort Wayne and South Bend, Ind. Consideration will be given to the proposal of the Indiana Society of Architects with regard to those two projects."

(Although the government has in several recent instances permitted the employment of architects not directly connected with governmental bureaus, should this movement be given recommendation, it would definitely establish the Federal policy on the question).

STONE AND WEBSTER AWARDED \$6,000,000 POWER PROJECT

Stone & Webster, Inc., Stuart Bldg., Seattle, Wash., at approximately \$6,000,000 has been awarded a contract by the Engineers' Public Service Corporation to construct the first unit of a \$15,000,000 hydro-electric project at Rock Island, on the Columbia river, near Wenatchee. This is announced by William H. McGrath, vice president of the Puget Sound Power & Light Company.

Federal license was issued and accepted Monday for the construction of the dam by the Washington Electric Company, a subsidiary of the Puget Sound Power & Light Company, which, in turn, is a subsidiary of the Engineers' Public Service Corporation.

It was estimated that the first unit of this project will take about three years to complete, the initial generating capacity being approximately 80,000 horsepower. Provision will be made in the power house for additional units that will be added as needed until a maximum of 240,000 horsepower has been installed.

STEEL AND CONCRETE FRAMING IN TALL CHICAGO BUILDING

A combination of reinforced concrete, structural steel and cast iron is employed in the framing of the 30-story Trustees System Building, now under construction at Lake and Wells Sts., Chicago, this combination being adopted for reasons of economy and convenience in the design, says Engineering News-Record. The building, 50x150 ft., rises 37½ ft. from sidewalk to top of 30th story, above which a pyramidal roof and smokestack inclosure extends 57½ ft. to top of masonry. A bank will occupy the first two stories, while the upper floors will be for offices. The foundations are concrete piers on hardpan 8½ ft. below street grade.

Column design includes structural steel with concrete fireproofing, ordinary reinforced concrete and Emperger reinforced concrete columns having cast-iron cores. In the lower stories the columns are from 36x36 in. to 32x32 in., reducing to 28x28 in. in the twentieth story, with smaller special sizes in the tower. Where cast-iron cores are used, their diameter ranges from 12½ to 3½ in. for the lower and upper stories respectively.

Six of the columns under the tower are of structural steel to the 21st floor and two others to the tenth floor. Of these, two are wall columns and four are interior columns. The floor framing connected to these steel columns is also of structural steel. For the pyramidal roof and stack inclosure, the framing is of light structural steel, supporting cement tile slabs on the horizontal surfaces and brick on the vertical surfaces. Elsewhere the columns (30 in number) and floor framing are of reinforced concrete. All the basement columns have cast-iron cores, but in the upper stories the reinforcement varies according to conditions.

In general, the panels average 17 ft. 2 in. x27 ft. 6 in., and no spans exceed this last figure. In the slab-and-joint floor system the slab is 2½ in. thick with joists 12x5¼ in. spaced 35½ in. center to center. From the third to the twentieth floor the beams frame in the shorter direction and were made 14½ in. deep, thus providing a level ceiling for practically the entire floor. It was necessary to reverse the framing of the first and second floors in order to provide additional wind bracing east and west. Approximately 40 per cent of the east-and-west wind stress is taken by brackets on the structural steel framing, while 60 per cent is taken by deep concrete spandrel beams which are carried up from the lintels to the window sills.

The McLennan Construction Company has the general contract for this office building, the architects of which are Thielbar & Fugard, with James B. Black as structural engineer.

CIVIL ENGINEERING DEFINED BY STATE ENGINEER BOARD

A definition of the term "Civil engineering," as used in the new state law providing for the registration of civil engineers, has been adopted by the State Board of Examiners for administrative purposes. This definition was written after a thorough study of laws in other states and correspondence with heads of leading engineering schools. It was found that there are differences of opinion as to just what particular branches are covered by the term civil engineering, and the board framed its own definition after a very careful analysis of all the information obtainable. This will be known as Rule 5 of the regulations of the State Board of Examiners. The text follows:

Civil Engineering.—For the purposes of the administration of the Act the board defines civil engineering as that branch of professional engineering which deals with the economics of the use and design of, the materials of construction and the determination of their physical qualities; the supervision of the construction of engineering structures, and the investigation of the laws, phenomena and forces of nature, in connection with fixed works for:

Irrigation, drainage, water power, water supply, flood control, inland waterways, harbors, municipal improvements, railroads, highways, furthermore, it includes City and regional planning, valuations and appraisals, tunnels, airports and airways, purification of water, sewerage, refuse disposal, foundations, framed and homogeneous structures, bridges, buildings.

Surveying, other than land surveying as defined in the General Laws of California, Chapter 247, Statutes of 1907.

WESTERN TIMBER INTERESTS TO MEET IN PORTLAND

Western timber interests will be discussed at Portland, Ore., March 3, 4, and 5 when private, State, Federal and Canadian timber and protective agencies meet in convention, the United States District Foreign office here announced.

Meetings will be devoted to committee action on cooperative fire prevention work, methods employed, educational projects and various other questions identified with forest work on the Pacific slope.

In addition to the general convention the five regional forest protection boards, representing all western territory between the Rocky mountains and the coast, will meet.

These boards are composed of Federal officials from the various forest officers, general land office representatives, Indian affairs officials, weather bureau men and representatives of the National Park service, biological survey, forest disease and insect bureaus.

PROPOSED "AMERICAN" UNIFORM SYSTEM OF THE QUANTITY SURVEY

In June, 1926, in Chicago, quantity surveyors and estimators in various branches of construction, met and organized the American Institute of Quantity Surveyors.

At this initial meeting the problem of a Uniform Quantity Survey System and Standardization was discussed and a committee was appointed.

At the second convention, held in Washington, in 1927, members of the Department of Commerce Committees on Simplified Practice and Wood Utilization were present, and explained their respective parts in the government's work of Standardization, Simplification and Conservation, and resolutions were passed calling the Secretary's (now President Hoover) attention to Quantity Survey as an economic factor in the construction industry.

At the New York and Detroit Conventions, in 1928 and 1929, further resolutions were passed as a result of the Uniform Systems Committees reports, which stressed the importance of standardization and the development of a scientific method of quantity survey for the purpose of bringing about more economical results in estimating, bidding and contract awarding procedure.

Standardization

This problem of Standardization is a big one, not only on account of the fact of the many different practices and methods in use, but also because it is a very slow and difficult process to get people to change the ways they are accustomed to, even when convinced of something better. The failure of the attempts of the U. S. Government to get people to take up the metric system, which is generally acknowledged to be much more scientific and simpler than the methods of measurement in common use, is an example of the futility of expecting people to readily change their habits.

This problem of Standardization is recognized by quantity surveyors as one that must be solved, before any progress can be made in getting the construction industry to adopt themselves to advanced methods in estimating or awarding of contracts. Furthermore, they recognize that no single individual or organization can force any change of method, or any new plan or the rest of the construction public. All they can hope for is to set up a plan which may have sufficient merit to obtain for them the support of the leading organizations in the construction industry who are engaged in work of a constructive nature in matters appertaining to quantities in so far as they are able in respect to their own particular branch of the industry.

The A. I. Q. S. as a body of professional quantity surveyors, are not trying to direct the construction development of any particular craft or branch of construction work in its estimating departments, but it has the unique position of being the only disinterested organization which could possibly have a chance of success in any attempt to co-ordinate the estimating methods of all different crafts under a single plan.

It has therefore directed its attention, as individuals and through its committees, to devise a simple practical plan which would be:

Universal in scope and distribution; applicable to all purposes involving quantities and costs; conformable with rules and practices in New York, Los Angeles or any other part of the coun-

try; a scientific, positive method of arriving at quantities, the accuracy of which can be proven; a logical system for the use of units of measurements that will co-ordinate all crafts; capable of facilitating all estimating and quantity surveying; an important factor for the reduction of costs, not only in the actual taking off of quantities and pricing for estimating, but also in cost accounting and valuation work of all kinds.

The principle involved in this plan is very simple. It is based on the use of superficial measurement in either lineal or square feet, with the third dimension as part of the description (or specifications).

This method of measurement is one that is applied to finished construction work in place, and not a bill of material, which should be developed as a separate instrument from the quantity survey.

It will bring out the ingenuity and professional ability of the engineers in certain lines of construction work to adapt this method of measurement to their particular branches, and it is acknowledged that there may be certain crafts where the plan may not satisfactorily apply without resorting to bills of quantities of material, but it may be practically applied to nearly all branches of construction work with the result of simplification and economy.

Details To Be Worked Out

At this time nothing definite is submitted except this skeleton plan, and details will be worked out in each different branch of construction work, and it is hoped that the different organizations interested in quantity surveying will direct their attention to this plan with the idea of finding out how it may be applied to their own particular line, and that they will co-operate with the A. I. Q. S. instead of continuing to go their own individual estimating ways as in the past, to the continued confusion and complication of everything in connection with building quantities.

It will be expected that certain contractors of the old school in all lines of construction work will continue to hold the idea that the more difficulties that are placed in the way of the introduction of intelligent and scientific methods in quantity surveying, the more they will gain individually in selfish acquisition, but this type is fast passing out of the picture. The representative builder of today deprecates haphazard methods and wants to see the building business stabilized by scientific methods.

Explanation of the System

The proposed "American" system is an attempt to reduce the measurements of a building to their simplest possible form.

In spite of the many complications of modern construction a building is in reality a simple matter. It is primarily an enclosure of different kinds of material forming a horizontal top and bottom, with vertical sides, and both horizontal and vertical divisions. Besides this it has certain features added by either strength, ornament or convenience.

The simplest method of measuring a building is by length, breadth and depth, or thickness. This can be expressed in superficial terms, with the breadth or thickness as a part of the qualifying description. Its various members can also be described most simply in the same way.

The first step in analyzing the contents of a building is to measure superficially the members differing in any particular, which may affect the purpose for which the measurement may be required.

Ordinarily the purpose of measuring a building is to find out two things:

1. Cost.
2. Quantity of material required.

The simplest way to find out cost is, with scientific cost accounting methods, directly from the measurements of the members of the building.

The only way to find out the quantities of material is to first find out the measurement of the members and then multiply the result obtained by the unit quantity of the different kinds of material.

It is unnecessary to carry out both operations, when the results are required for arriving at cost only. In other words, if only one contractor can get the job, why should it be necessary for a dozen or more contractors to go through both operations? If the contractors have proper cost data it is unnecessary. Unless the engineer, architect or owner is desirous of having contractors who have not proper cost data figure their work they would not advocate a system based on quantities of material as the unit of measurement. Unless the contractors have not proper cost data, and do not want to take the trouble to get it, they would not continue a system which required them to do two things when one will answer.

Accuracy and Positive Checking

The use of the "American" system of measurement makes it possible to assure much greater accuracy than in the methods which use various kinds of units of measurement.

Every different type of floor construction, wall construction or partition construction, exterior or interior openings, may be totaled for each story, and compared with the quantities taken by over all measurements. This is a positive method of proving the work.

Code

A simple code is suggested dividing all branches of building construction into twenty-six divisions, one of which is designated by each letter of the alphabet, and each different subdivision by two other letters, selected with the idea of being easily called to mind by the word or words they represent. Capital letters may be used for material, small letters for labor, and material and labor combined by using capital letters for the main division and small letters for the sub-division.

This code is used to simplify quantity survey and bill of material and may also be used by the contractor in his accounting.

Quantity Survey Service

It is proposed to establish with the "American" system a complete standard service, and when a contract is made for a complete "American" quantity survey service, engineer, architect, and owner will know if these suggestions are confirmed by the A. I. Q. S. convention next April at St. Louis.

1. That the quantity surveyor will expect to receive at least one per cent of the contract price.

2. That he will compile measurements of all different parts of the building in lineal and superficial measurements, segregating by different buildings, by different stories in each building, and by varying costs, and

giving the third dimensions as a part of the description. These measurements will be known as basic measurements. They will be carefully checked for accuracy by comparing the totals of the segregated measurements with the overall measurements. These basic measurements to be started when the quantity surveyor is furnished with preliminary sketches and skeleton specifications and corrected when the working drawings are completed and the regular specifications written.

3. That he will receive a preliminary estimate from the preliminary drawings or sketches and skeleton specifications.

4. That he will receive a priced "American" quantity survey made from the working drawings and regular specifications, with estimates for alternate proposals of method of construction or type of material, to enable him to make such final changes in his drawings and specifications as to assure the obtaining of proposals to perform the work within the available amount of money.

5. That he will be furnished with sufficient copies of a corrected UNPRICED quantity survey as may be needed to supply to all general and sub-contractors expected to bid on the work, for the purpose of assuring that all contractors are bidding on the same quantities in their respective lines, and to eliminate the element of contingency, and the wasteful and uneconomical practice of duplicated effort in estimating, and to assure the selection of the general and sub-contractors on a basis of Competency, Honesty and Responsibility, rather than on sole qualifications of a low bid.

Co-operation with Other Branches of Construction

It is not the intention of the A. I. Q. S. to assume any position of superiority in knowledge in any branch of construction, or to lay down any rules with the idea of attempting to force others to accept them. On the contrary, it expects to endorse all constructive efforts in matters appertaining to quantity surveying and standardization, and to adapt the "American" system to the rules these organizations may formulate so far as they can do so in conformity with their plan, and in cases where there is necessarily a conflict the methods obtaining under the plan will be paralleled by a conformance with the methods advocated by the other organization.

For instance, the rules formulated by the American Concrete Institute have been endorsed by the A. I. Q. S. and in the case of measurement of concrete, while the unit of measurement under the "American" system would be expressed in superficial area of different thickness of walls, slabs, etc., the measurement of formwork, which is not finished but temporary construction, and unnecessary to have as a unit of measurement when cost is the sole object, and proper cost data are available, will also be given in the quantity survey furnished contractors, and the cubic feet of concrete will likewise be given.

The A. I. Q. S. will, however, ask the A. C. I. and all other organizations controlling different branches or crafts of construction work, to co-operate with them in attempting to establish this universal plan, for the benefit of the construction industry at large, and if necessary to make some personal sacrifice in the way of changing their necessarily limited views to the larger needs of the general good.

This article will be followed by others explaining in detail the application of the proposed "American" system to the different crafts, and the

natural order of the construction will be followed, starting with excavation, concrete, masonry, etc., and will eventually be carried into the mechanical trades.

It is expected that this plan will be endorsed by the A. I. Q. S., and followed in the standard set up as a uniform system, but will always be liable to be superseded by a better plan if one can be devised that will fulfill the requirements of universality, simplicity, efficiency, and adaptability.

It is hoped that both members and non-members will contribute papers, showing the application of this plan to the crafts in which they are especially interested, or to submit an alternative plan, if they have one.

JESSUP NAMED CITY ENGINEER OF LOS ANGELES

J. J. Jessup of San Francisco, has been appointed city engineer of Los Angeles to succeed Maj. John C. Shaw who has filled that post for the last four years. The appointment, which was made by the Board of Public Works, was in the nature of a surprise, as Maj. Shaw's administration of the engineering department has been generally regarded as most efficient. The reason given by the board for the change is that Mr. Jessup's services as sewer and garbage disposal expert are needed at this time.

The new city engineer is 55 years of age and is a graduate of Penn. College, Iowa. He was also a graduate student at University of California, Berkeley. He was for five years professor of mathematics at Pacific College, Newberg, Oregon; four years president of Whittier College, and three years instructor in the college of engineering, University of California, Berkeley. He served 15 years in the engineering department of the city of Berkeley, 10 years in the post of city engineer.

During the World War Mr. Jessup was engaged in construction and salvage for the Y. M. C. A. in France. Since that time he spent one year in the state engineer's office on water resources problems, two years as consulting engineer on Imperial county highways, and for the last seven years has maintained offices in San Francisco and Los Angeles as consulting engineer. He is a member of the American Society of Civil Engineers.

In relinquishing his post Maj. Shaw stated that he had planned to establish during the present year a sanitary division for the more economical handling of the city's garbage and refuse and the cleaning of streets. He said he trusted the board of public works and his successor would put through these and other needed changes which are in the interests of the taxpayers.

ONLY LICENSED CONTRACTORS MAY DO PUBLIC WORK

In response to an inquiry as to whether contractors doing construction work for municipalities and other political subdivisions of the state must have a state license, attention is called to a ruling made by the state attorney-general that the exemption in the law contained in Section 2, Subdivision (a), applies only to directly authorized employees of political subdivisions. The opinion written by Deputy State Attorney-General Frank English in reply to a request from the Registrar of Contractors says:

"It is with reference to the first exemption in Section 2 that you inquire.

"Section 2, Subdivision (a), reads:

"This act shall not apply to:

"An authorized representative of

representatives of the United States government, the state of California, or any incorporated town, city, county, city and county, irrigation district, reclamation district or other municipal or political corporation or subdivision of this state."

"You state that certain attorneys have advised that political subdivisions of the state may make contracts with contractors for building purposes without any reference to this act. That is, they need not concern themselves as to whether contractors with whom they are dealing are licensed.

"Your department is of the view that the said exemption in Subdivision (a) of Section 2 refers only to the directly authorized employees of political subdivisions of the state who perform work on a time and material basis for the political subdivision which they represent. This means that the employing body would employ a superintendent, and all men working would be direct employees of the official body, and all materials purchased would be brought in the name of official body.

"I concur in your construction of this language found in Subdivision (a) of Section 2 of the act."

PART-TIME BOOKKEEPER \$3,615,000 FOR CITY BUILDING DURING CURRENT YEAR

Contemplated building construction to be undertaken by the city and county of San Francisco during the current year will involve an expenditure of approximately \$3,615,000, according to Chas. H. Sawyer, acting chief of the Municipal Bureau of Architecture.

Projects included in his estimate are summarized as follows:

Ward "F", Laguna Honda Home	\$185,000
Additional Wards, S. F. Hospital	365,000
Fire House	45,000
Emergency Hospital	45,000
Balboa High School (3rd unit)	600,000
Aptos Jr. High School	600,000
Lick Jr. High School	600,000
Laguna Honda Home (2 new units)	500,000
T. B. Preventorium, 2 bldgs.	125,000
Health Center and Emergency Hospital Building	550,000

It is possible that the first unit of the George Washington High School may be included in this year's program, according to Sawyer.

VANCOUVER VOTERS AUTHORIZE EXTENSIVE IMPROVEMENTS

At the recent municipal election at Vancouver, B. C., the ratepayers authorized the expenditure of \$1,200,000 for four major projects, including \$2,800,000 for the Burrard St. bridge, \$750,000 for sewers, \$300,000 for the development of a city airport and \$350,000 for new fire alarm headquarters.

The Burrard St. bridge will be a link in the main traffic artery providing direct access to the Point Grey section of the city and will form an important part of Vancouver's town-planning program. The proposal is to erect a double-deck bridge over the False Creek inlet, with the upper deck to be used by vehicular traffic and the lower deck for street cars and steam railway lines serving the industrial areas in the vicinity. The city council was authorized by the electorate to proceed with its investigations of the power potentialities of the Cheakamus River and its tributaries with a view to ascertaining if this river, on which the city has a reserve, can be developed for civil hydro-electric purposes.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

The year 1929 saw approximately 555 invested in new construction in the United States for each resident of the country, according to an examination of latest data made by the research department of Greenbaum Sons Investment Co. This figure includes expenditures for all types of buildings, as well as engineering projects, public works and utilities.

The 1929 per capita outlay, while large, is less than that of each of the four preceding years, it is seen. In 1928 some \$61 were spent for new building for each person in the U. S. This was the highest mark ever attained. For 1927 the average expenditure was \$58 per person. For 1926 it was \$60, and for 1925 it was \$57.

The heavy building done in these four prior years resulted, in the opinion of many, in the country becoming to a degree overbuilt. If this view is correct, the comparative lull which characterized operations in 1929 gave population an opportunity to catch up with its accommodations. This is especially so of residential building, which was the line which particularly lagged the past year.

The five-year comparison further reveals that building activity has advanced to new heights in each alternate year. This was true in 1926 and again in 1928. Should the rule still hold, 1930 may be expected to show a substantial increase by comparison with 1929.

Seattle Real Estate Board will award certificates of honor to architects for the best structures erected in that city during the year 1930. In awarding the certificates, beauty, suitability and true economy will be considered. Awards will be made on the following:

- (1) For the best business building in the downtown area.
- (2) Best business building in a business sub-center.
- (3) Best industrial building.
- (4) Best single detached residence.
- (5) Best apartment house.
- (6) Best single detached residence costing more than \$7000 exclusive of ground, but including all other expenses of construction and development.

At the recent joint meeting of the West Coast wholesalers and manufacturers of lumber at Seattle the question of market stabilization and the need of better selling methods was discussed. When mills sell direct to dealers at the same price quoted to wholesalers, it was brought out, the effect is to force wholesalers to buy from other mills at a price low enough to enable them to meet this competition and to cover their operating costs. The committee expressed itself as being in favor of the industry adopting some form of sales differential which would provide for the cost of merchandising as a part of the sales price, regardless of the method of distribution.

New York Electrical Contractors have agreed with the union workmen they employ to give 8000 electrical workers a \$3000 Life Insurance Policy — \$30 monthly disability and \$40 a month pension after the age of 65.

San Joaquin Light & Power Co. is preparing plans for a \$3,500,000 steam plant with a capacity of 35,000 kilowatts and completion of a new hydro-electric plant at Merced Falls with a capacity of 4000 kilowatts. It is announced by A. Emory Wilson, vice-president and manager of the company. The exact location of the new steam plant has not yet been determined, but will probably be at Buttonwillow, Kern County, where the corporation now has one steam plant. Natural gas from the Kettleman Hills oil fields of Fresno and Kings counties will be used for fuel.

A total of \$4,300,000 will be spent for new construction by the Portland (Oregon) Electric Power Company during 1930, more than twice the 1929 figure. One 40,000 horsepower water wheel will be added to the Oak Grove plant and a 46,000 horsepower steam turbine will be installed in the East Lincoln street plant. The cost of these two additions will be approximately \$2,602,000.

Decision to consider carefully a plan for effecting a gradual reduction in the working hours of labor, with the hope of improving the unemployment situation of the country, was reached by the executive council of the American Federation of Labor in midwinter convention at St. Petersburg, Fla., January 13.

United States Steel Corp. reports its unfilled tonnage as of Dec. 31, 1929, at 4,417,193 tons, an increase of 291,848 tons over the preceding month when unfilled tonnage as of Oct. 31 when unfilled tonnage amounted to 4,125,345 tons. The unfilled tonnage as of October 31 totaled 4,086,562 tons, and on the corresponding period of last year the unfilled tonnage report equalled 3,976,712 tons.

A budget of \$1,100,000 for the year 1930 for trade extension work has been approved by the National Lumber Manufacturers Assn. Of this amount \$110,000 is to be spent on research, \$475,000 for trade promotion, and \$423,000 for advertising and publicity. Of this last amount \$85,000 will be spent for promotion work by the wooden box bureau and in the commercial furniture campaign. In addition it was decided to appropriate \$75,000 for a co-operative trade extension campaign with the Concatenated Order of Hoo Hoo.

The state legislature committee on joint highway district laws is seeking the co-operation of county supervisors in handling county highway problems. In a letter to the Alameda county supervisors the committee stated, "It is a notable fact that the problem of financing joint highway districts in California is a very serious problem. This committee is desirous of contacting the boards of supervisors of all the counties in the state, the automobile associations and any other interested agencies for the purpose of receiving from them such suggestions and help as they may see fit to offer."

Incomplete returns received by President Hoover in response to his drive for increased construction and improvement work indicate that a total of \$4,700,000,000 will be expended during the current year.

J. E. Bankson, general sales manager of the Redwood Manufacturers Co., after 24 years of service with that concern, has submitted his resignation to become effective on February 1. Bankson started with the company as a boy and worked his way up to an executive position.

Southern California Edison Company and the city of Pasadena have filed a joint application with the state railroad commission for an order authorizing the company to give the city a two-year option on certain lands along the San Gabriel river on which the city proposes to construct a storage dam and reservoir. The purchase price for the site was given as \$783,494.

The Stockton Builders' Exchange to send a delegation representing that body to attend the Nineteenth Annual Convention of the National Association of Builders' Exchanges to be held in San Francisco next month. It is announced by E. H. Grogan, president of the Stockton Exchange.

Celotex Company's net sales for the year ended October 31, 1929, were approximately \$10,317,640 compared with \$8,979,858 for the year previous. Shipments for the year totaled about 332,006,000 square feet compared with 257,409,065 for 1928.

George P. Baldwin, vice-president of the General Electric Co., a recent visitor from New York, announces the company contemplates an expenditure of between \$500,000 and \$1,000,000 for improvements at the Oakland plant during the current year.

Directors of the Oakdale Irrigation District have withdrawn their offer to sell the district's pipe manufacturing plant to the United Concrete Pipe Corp.

East Bay Income Builders Corporation, Ltd., formed under the laws of Nevada to conduct a general real estate business with an authorized capital of \$250,000, has filed articles of incorporation with Secretary of State Frank C. Jordan. Alfred Cordis of Oakland is named the California agent. The corporation will build apartment houses and deal in realty transactions.

Hardwood Manufacturers' Institute will meet in Louisville, Ky., January 30-31.

The expenditure of \$15,000,000 over a three-year period beginning in the fiscal year 1931 by the Secretary of the Interior for the construction of roads leading to the highway systems of national parks would be authorized under a bill introduced by Representative Leavitt, Republican, Montana.

Construction requirements of the United States during 1930, as estimated by the Copper & Brass Research Association, in its annual building survey, will total nearly \$9,000,000,000.

Everett Isley, a general contractor, formerly of Los Angeles, has established permanent headquarters at Oroville, Calif., and will engage in a general contracting business.

ALONG THE LINE

Henry C. (Harry) Chlsm, city engineer of Reno, Nevada, died in a San Francisco hospital Jan. 9 following an illness of several months. He was a graduate of the engineering school of the University of Nevada in the class of 1905.

Hayward, Calif., city council has adopted an ordinance combining the offices of building inspector, sanitary inspector and fire marshal. The ordinance places the salary at \$175 per month.

Fred L. Swartz, a member of the architectural firm of Swartz & Ryland, has been elected president of the Fresno Kiwanis Club.

William H. Metz has been appointed city engineer of Beverly Hills. Mr. Metz has been acting city engineer since the resignation of J. C. Albers to become city engineer of Glendale.

J. W. Gross, consulting engineer, addressed the Sacramento Chapter, American Association of Engineers, Jan. 9, speaking on aerial photography and its use in mapping.

P. M. Sanford, general contractor, has been re-elected president of the Chamber of Commerce of Richmond, Calif. This is his fourth consecutive term as president.

Harry N. Jenks has entered the consulting engineering field in conjunction with Clyde C. Kennedy, with offices in Call Bldg., San Francisco. They will specialize in sanitary engineering.

C. E. Grunsky, San Francisco consulting engineer, was elected president of the American Engineering Council at the annual meeting of that body in Washington, D. C., January 10.

Paul Ceragioli and Augusto Montini will operate from 619 34th Ave., San Francisco, under the firm name of Cement & Concrete Company.

Federal Ornamental Iron & Bronze Company, San Francisco, which recently increased its capitalization to \$500,000, has been authorized by the State Corporation Department to distribute assets or a stock dividend amounting to \$32,310 to its common stockholders. Sale of 7,400 shares common stock and 25,000 shares preferred stock, both of \$10 par, to the public at par for cash was also authorized.

Edward Krout and S. A. Schneider will operate from 1001 Bryant St., San Francisco, under the firm name of California Glass Company.

Ray Engleson, representing the state department of professional and vocational standards, addressed a dinner-meeting of the Bakersfield Builders' Exchange, January 8. He spoke on the California contractors' license law, adopted at the last session of the Legislature. Other speakers included Clarence Cullimore, Bakersfield architect; R. H. Hubbard, Bakersfield building inspector; Clark Gramling and Fred Gribble, Bakersfield contractors.

TRADE NOTES

L. C. Hunter, for twenty years manager of the Sacramento branch of the W. P. Fuller Company, and at present manager of the San Francisco branch, has been made a director of the company. Chas. R. Root, who was the manager of the Fuller store in Sacramento in 1906, also was made a director. Root has been with the company for fifty years. Hunter's service dates back forty years. The new honor was given at the annual convention of the branch managers held in San Francisco. The directorate of the company is composed mostly of members of the family, and the former Sacramentans are among the few outsiders given a place on the board.

To "take advantage of lower freight and shipping rates available to Berkeley manufacturers," according to company officials, the Built-in Fixtures Company, international distributors of household articles, will cut their Los Angeles plant in half, moving a branch estimated at \$25,000 to Berkeley. This is announced by Ray B. Cox, Berkeley president of the concern. The move is being made, Cox announced, to augment the \$100,000 plant now in operation at 2608 San Pablo Avenue. The addition is expected to nearly double total investment to nearly \$150,000.

J. M. Rich Paint & Varnish Company has leased quarters at 88th Ave. and D St., Oakland, and will engage in the manufacture of lacquer for painting white and red traffic lines, a full line of paints and paint specialties, enamels, colors and oils, varnishes, automobile enamels, automobile lacquers, engine and marine paints, roofing cement and Portland cement paint. These products will be marketed under the trade names of "Ricolite" and "Haderlight." The Pacific coast states will be served from the Oakland factory. Offices are located at 4465 E-Fourteenth St., Oakland.

Standard Gypsum Company, Inc., a Nevada corporation headed by William Woodburn of Reno, has been organized to acquire the Standard Gypsum Company, a California corporation, according to word from Reno. Under a permit issued by the state corporation department of California, the new company is to issue 131,279 1/4 shares no par common stock valued at \$20 a share and \$10 in cash to the California corporation in payment for its business and assets subject to liabilities of \$660,000. The assets of the California company are valued at \$2,625,585. The Nevada corporation is capitalized at 300,000 shares of preferred and 100,000 shares of common stock.

Luse-Stevenson Co., manufacturers of corkboard and granulated cork, with factory headquarters in Spain, has located a branch office and warehouse at 140 Spear St., San Francisco. W. J. Paul is in charge of the branch.

Calrock Asphalt Co., operating a plant at Santa Cruz, has established San Francisco offices at 625 Market Street, with J. W. Hayes, as branch manager.

HERE — THERE —
EVERYWHERE

After numerous special committee meetings between the union carpenters and contractors of Fresno, a compromise fixing the new daily wage at \$9 has been effected. The increase was granted on the basis of the 5-day week. The agreement is effective immediately.

Seventy-one accidents, including fourteen fatalities, were reported on electric light, power and communication systems in California during the last six months. According to the State Railroad Commission none of these were due to improper equipment.

The 1930 expansion program of the Western Electric Company calls for the expenditure of about \$55,000,000 for additional factory buildings and machinery and tools with which to equip them. Additional floor space to be provided amounts to 2,500,000 square feet. Sales of the company last year were in excess of \$400,000,000, compared with \$387,000,000 in 1929, and were the largest in the company's history.

The sum of \$3,000,000 for construction of boulevards and sewers is requested by the San Francisco Board of Public Works for the 1930 construction program. The money, according to T. A. Reardon, president of the Board of Public Works, is available from the recent sale of boulevard and health bonds.

Contra Costa County Building Trades Council at a meeting next Friday night will decide on the question of putting the 5-day week schedule into effect. Contractors are being interviewed by labor officials to learn their attitude in the proposal.

A. B. Jacobsen has been elected president of the Monterey County Builders' Exchange. Fred Ruhl was elected vice-president. The executive committee consists of Fred Ruhl, Chas. Frost, Hugh W. Comstock, Ernest Raymond and Louis H. Crane. The exchange has adopted the five-day week for all crafts, the new schedule to go into effect immediately.

Twelfth annual convention of the Canadian Construction Ass'n will be held at Chateau Frontenac, Quebec, Canada, January 28 to 30.

Sonoma County Building Trades Council has endorsed the five-day week for all building trades in the county. It is expected the plan will go into effect next month, according to A. G. Hinshaw of Petaluma, president of the council.

Members of the Monterey city council contemplate the adoption of the Uniform Building Code as prepared by the Pacific Coast Building Officials' Conference.

Plumbers operating in Santa Clara have been requested by Mayor Kohner to prepare a plumbing ordinance for submission to the city council for adoption.

National Sand and Gravel Association will meet at Memphis, Tennessee, January 28, 29, and 30.

TRADE LITERATURE

Detroit Steel Products Company, Detroit, Mich., gives a non-technical presentation of the methods used to predetermine the daylighting and aeration of industrial building in two booklets, "Industrial Daylighting" and "Industrial Aeration," containing the results of several years of experimentation by engineers of the company in co-operation with the department of engineering research of the University of Michigan. The subject matter is presented in clear and non-technical form.

Westinghouse Electric & Manufacturing Co., East Pittsburgh, Pa., has issued a special publication, 1717-D, featuring engineering achievements of the Westinghouse interests, during the year 1929.

ENGINEERING SOCIETIES
EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone Sutter 1684)

R-2953-S MECHANICAL DRAFTSMAN, 30-40 years, with 5 to 10 years or more experience on design and detail of various types of cranes. Permanent opportunity for a man with engineering ability and initiative. Apply only by letter with experience and photo. Salary open. Location, San Francisco.

R-2955-S ENGINEER, with theoretical training in aeronautics and some experience in airplane construction, for executive position with manufacturing company. This is a rare opportunity to connect with aviation industry and an investment of \$5000-\$25,000 is expected from the qualified applicant. Headquarters, San Francisco.

R-2951-S ENGINEER, young, preferably E. E. graduate, but degree not necessary if experience and personality are satisfactory, to sell electric motors. Permanent opportunity. Salary \$125-\$175 month. Location, San Francisco.

R-2952-S ENGINEERING SALESMAN, preferably 30-38 years, experienced in power plant operation or general mechanical, to sell lubricating oils. Must have sales personality if not experienced salesman. Salary open. Location, San Francisco.

R-2954-S SALES ENGINEER, with experience selling deepwell turbine pumps in California. Apply by letter. Salary open. Headquarters, South.

R-2931-S FIELD ENGINEERS AND TOPOGRAPHICAL DRAFTSMEN, for employment in Cuba Central and South America. Starting salaries \$125-\$175 per month plus living quarters. Apply by letter; if for drafting send samples of work. Headquarters, East.

R-2957-S ENGINEER, young, graduate with 2 or 3 years experience preferably in highway construction, for sales work. Salary during training course about \$150 month with increases as soon as ability is shown. Location, California. Headquarters, San Francisco.

STOCK MARKET AFFECTS PACIFIC
COAST BUILDING DURING YEAR 1929

One Hundred and Five Cities Report December, 1929, Totals Lower Than Those of December, 1928—Sixty-one Cities Report Totals for the Year 1929 Lower Than Those of 1928—San Francisco Shows Six Per Cent Increase in December, 1929—Building Fairly Good in Earlier Part of Year but Slacks in Latter Part Due to Stock Market Activities

The position of the building industry in its promise of stable activity during 1930 was further strengthened by December's record of permits issued in 105 Pacific Coast cities tabulated in the National Monthly Building Survey of S. W. Straus & Co. Restriction of new construction adds to the stability of demand and December's total of new buildings permitted was 35% below that of December, 1928.

Of the 105 Pacific Coast cities comprised in the survey, 69 report December totals lower than those of December of last year and 61 report totals for the year of 1929 lower than those of 1928. Of the larger cities, four show December increases: Salt Lake City, 117%; Vancouver, B. C., 56%; Seattle, 55%; San Francisco, 6%. Five report totals for the year greater than those of 1928: Vancouver, 68%; Salt Lake City, 27%; Pasadena, 17%; Long Beach 10%; Tacoma, 2%.

Although building activity during the first half of the year showed a slight increase over the comparable period of 1928, succeeding months, affected by the unprecedented popular interest in stock market operations, reflected a reduction. The third quarter of the year total of building permits issued was 19% less than that of 1928 and the fourth quarter total was 13% less.

San Francisco's 1929 total, 7,120 building permits involving \$33,682,025 in construction costs, reflects a 10% reduction from the 1928 figure but December's total is slightly greater than that of the previous year.

Los Angeles, during 1929, issued 31,-

721 permits for new buildings to cost \$93,016,160, 8% less than the 1928 total. This figure amounted to 25% of the California total for 66 cities and 24% of the Pacific Coast total for 105 cities. The December figure was 60% below that of December, 1928, and the lowest monthly total for many years.

Portland's 1929 total, 7,700 permits issued for new buildings to cost \$15,495,310, is 27% below that of 1928 and the December figure is 59% less than that of December, 1928.

Oakland, issuing 4,754 permits for \$14,317,428 of new buildings during 1929, reports a 26% reduction for the annual total compared with 1928, and a December total 57% below that of last December.

Seattle issued 7,949 permits during 1929, for buildings to cost \$29,104,770, 16% less than during the previous year. The December total shows a 55% increase.

San Diego's 1929 total, 4,586 building permits involving \$11,583,738 in costs, shows a 6% reduction from the previous year's record, while the December figure is 34% below that of last December.

From all parts of the Pacific Coast come reports indicating a gradual strengthening of demand for new housing and floor space, the result of the restricted building program of the past two years. Coincident with this comes news of many building projects being inaugurated or revived in anticipation of more ready financing than has been evident for many months.

Following are the official construction cost figures as reported by building department executives from cities comprised in the Pacific Coast Section of the National Monthly Building Survey of S. W. Straus & Co.

CALIFORNIA

City	December, 1929		December 1928		Year, 1929		Year, 1928	
	No.	Cost	No.	Cost	No.	Cost	No.	Cost

A. S. M. E. TO STUDY PIPE-LINE PUMPING STATIONS

On recommendation of the Petroleum Division, the American Society of Mechanical Engineers, Main Research Committee, has authorized the organization of a Special Research Committee to study problems connected with automatic pipe-line pumping stations in the oil fields. The purpose of this project is to confer on various methods of installing equipment in automatic pipe-line pumping stations and to conduct experimental work and testing to determine which of the installations are the most efficient and reliable.

METALOS-DECORATOS "NEW MATERIAL"

Metalos-Decoratos is a new patented building material. Its uses are practically unlimited, according to Jensen & Corbett, the manufacturers, with headquarters at 6390 Sunset Blvd., Los Angeles. "It can be used for any surface requiring a decorative finish from the finest inlays in its most refined state to a finish for tar and asphalt roofing in its rougher grades," the manufacturers say. "It has the appearance of pure gold which it maintains against all conditions of weather and time. Its original luster is absolutely proof against tarish. Acid and gases have no effect whatever on it. When it is applied and finished off, it never need be cleaned or polished, as the metal from which it is made has the same resistance to tarnish that gold possesses. It can be produced at very low cost."

MAKERS OF COMMON BRICK PLAN TRADE CONFERENCE

Manufacturers of common brick representing 75 per cent of the total national production have been granted permission to hold a trade practice conference before the Federal Trade Commission, the Commission announced Dec. 27.

While no time nor place for the meeting has been determined the Commission has designated Commissioner Wm. E. Humphrey to preside.

Among subjects to be taken up at the conference with a view to adopting rules of business practice, are the following: Price discrimination, inducing breach of contract and agreement, fraud and misrepresentation, and secret rebates.

*MECHANICAL ENGINEERS TO GO TO STOCKHOLM AND LIEGE

Through its Applied Mechanics Division, The American Society of Mechanical Engineers will participate in the Third International Congress of Applied Mechanics to be held in Stockholm from August 24 to 29, 1930.

The Division has appointed a special committee, of which Dr. S. Timoshenko is chairman, to take care of the details, in connection with its part in this Congress. The field of interest in this coming convention lies in hydrodynamic and aerodynamic, theory of elasticity, and rational mechanics.

The Applied Mechanics Division of the Society is also arranging a tour of the most important European laboratories in mechanics.

Following the Stockholm Congress there will be a Congress on general mechanical engineering to be held in Liege, Belgium, from August 31 to September 7, which is being held at the same time as the Belgium International Exposition of Trades and Manufacturers, Sciences and Their Application.

 Grocers, Inc., 414 P St., Fresno, have
 purchased property at Inyo and R Sts.
 and will erect a modern warehouse.
 The site has a frontage of 200 feet in
 R street and 150 feet in Inyo street.

ROSEVILLE, Placer Co., Cal.—
 California Lime Products Co., has
 been authorized by the State Corpor-
 ation Department to issue stock of
 the aggregate par value of slightly
 more than \$1,500,000, of which amount
 \$750,000 is authorized to be sold to
 the public, to enable the company to
 finance construction of a plant at
 Walero, a siding of the Southern
 Pacific, just beyond Antelope, for the
 production of "dry ice" for use as a
 refrigerant. As a source of raw ma-
 terial, the company has obtained an
 option on a large limestone deposit
 located near Towle, Placer County.
 Plans of the concern also include the
 manufacture and marketing of vari-
 ous lime products. Those connected
 with the corporation are: Chas. Lum-
 bard, president; R. L. Hollingsworth,
 vice-president; William Howard, sec-
 retary; G. T. Gunston, treasurer, and
 Chas. L. Gilmore, director.

Completing Plans.
BAKERY Cost, \$500,000
 HOLLYWOOD, Los Angeles Co., Cal.
 Orange Dr., Willoughby St. and
 Romaine Ave.
 Four-story Class A steel frame and
 reinforced concrete bakery (165x
 200 feet).
 Owner—Van de Kamp's Holland Dutch
 Bakers, (L. L. Frank, President).
 San Fernando Bldg., Los Angeles.
 Architect—The McCormick Co., 41
 Park Row, New York.

ICE AND COLD STORAGE PLANTS

BAKERSFIELD, Kern Co., Calif.—Central California Ice Co.'s plant destroyed by fire Jan. 11 with a loss of between \$75,000 and \$100,000, partially covered by insurance.

LOS ANGELES, Cal.—County Architect Karl Muck has completed and filed with the Board of Supervisors plans for ice machine, motors, and condensers at the Los Angeles county farm. Bids will be asked within the next few weeks.

POWER PLANTS

HUNTINGTON PARK, Los Angeles Co., Cal.—The Southern California Edison Co. has announced that approx. \$24,600 will be expended for extensions and betterments in the Vernon District during 1930. The Vernon district includes Vernon, Bell, Florence, Home Gardens, Huntington Park, Maywood, South Gate and Graham.

PIXLEY, Tulare Co., Cal.—Southern California Edison Co., Los Angeles, plans to construct sub-station at Pixley, which together with line construction will involve an expenditure of \$199,000.

WENATCHEE, Wash. — Puget Sound Power & Light Co., Stuart Bldg., Seattle, plans immediate construction of a 200,000-horsepower hydroelectric development at Rock Island, on the Columbia River, near Wenatchee. The completed project will cost approximately \$15,000,000.

LODI, San Joaquin Co., Cal.—Nelson Eckhart, engineer with the San Francisco Department of Public Works, has submitted estimates of cost to the Lodi city council for that city's power project on the Mokelumne river. Several alternative proposals are submitted for the dam which will cost approximately \$98,185 with appurtenances: Roads and preliminary, \$4,000; land and rights of way, \$7,500; head-works and track works, \$15,749; power house and penstocks, \$73,629; crane, \$5,000; hydraulic installation, \$5,810; generators and switchboards, \$67,297; transformers and high tension switch-rooms, \$18,654; auxiliaries and miscellaneous, \$5,000; transmission and phone lines, \$69,625; transformers and stations, \$20,832; operator's cottage, \$4,000; engineering and overhead, \$68,142; total \$522,425.

SANTA MARIA, Santa Barbara Co., Cal.—Steps are being taken to construct a 18-mile telephone line connecting the Cuyama Valley with Santa Maria. It is proposed that the counties of Santa Barbara and San Luis Obispo, the State Highway Commission and the U. S. Forestry Service finance the work, estimated by the Santa Barbara Telephone Co. to cost \$8,000.

TULARE, Cal.—The Southern California Edison Co. planning to construct substations at Cotel and Bliss, Tulare county, during 1930. The total amount to be expended for construction and betterments in this district is \$446,400.

MERCED FALLS, Merced Co., Cal.—San Joaquin Light & Power Co., Power Bldg., Fresno, is preparing plans for a new hydro-electric plant at Merced Falls with a capacity of 4000 k. w., it is announced by A. Emory Wishon, vice-president and general manager of the company.

BUTTONVILLOW, Kern Co., Cal.—San Joaquin Light & Power Co., Power Bldg., Fresno, is preparing plans for a \$3,500,000 steam plant with a capacity of 35,000 k. w. Natural gas from the Kettleman Hills oil fields of Fresno and Kings counties will be used for fuel, according to A. Emory Wishon, vice-president and manager of the company.

PORTLAND, Ore.—Portland Electric Power Co. will spend \$4,300,000 in improvements during the current year which will include one 400,000 h. p. water wheel for the Oak Grove plant and a 46,000 h. p. steam turbine will be installed in the East Lincoln St. plant. The cost of these two additions will be approximately \$2,602,000.

WENATCHEE, Wash. — Stone and Webster, Inc., Stuart Bldg., Seattle, at \$6,000,000 awarded contract by Engineers Public Service Corp. to construct the first unit of a \$15,000,000 hydroelectric project at Rock Island on the Columbia river, near Wenatchee. The work will be undertaken for the Puget Sound Power and Light Co., a subsidiary of the Engineers' Public Service Corp. Initial generating capacity will be approximately 80,000-hp. Provision will be made in the power house for additional units that will be added until a maximum of 240,000-hp. has been installed.

LOS ANGELES, Cal.—Until 10 A. M., Jan. 21, bids will be received by the water and power department, D. P. Nicklin, purchasing agent, 207 S. Broadway, for cedar poles under Adv. 1277.

PUBLIC BUILDINGS, FIRE HOUSES AND JAILS

DELANO, Kern Co., Cal.—City trustees will ask bids shortly to erect a one-story brick or tile, reinforced with concrete, 30x30 ft., addition to firehouse. Will have 12-inch walls. Stucco facing will be specified.

PORTERVILLE, Tulare Co., Cal.—City Board of Library Trustees proposes to install additional shelving in municipal library.

FRESNO, Fresno Co., Cal.—Fresno County Chamber of Commerce authorized calling of meeting for advisability of requesting board of supervisors to make survey of county building needs in way of new structures, including hall of records and jail building.

LOS ANGELES, Calif.—Both the board of supervisors and city council formally approved lease contract whereby city and county will each appropriate sum of \$225,000 for increasing seating capacity of Coliseum at Exposition Park. Architects John and D. B. Parkinson, 808 Title Insurance Bldg., Upper half of the coliseum will be removed and reconstructed of reinforced concrete and permanent concrete seats provided.

SAN JOSE, Santa Clara Co., Cal.—Civic organizations and local citizens urge the supervisors to start proceedings to secure the erection of a new county jail building, declaring that the present building is in a "foul and inadequate" condition.

RENO, Nevada.—Until Feb. 11, 7:30 P. M., bids will be received by Board of Trustees of Washoe County Library, Reno, to furnish and install in Washoe County Library, 12-ft. of steel railing and 91-ft. of steel shelving. Specifications obtainable from the office of the Librarian at Reno.

Plans Being Figured—Bids To Be Opened Feb. 4, 10 A. M.
LIBRARY Cost, \$275,000
BERKELEY, Alameda Co., Cal. Shattuck Ave. and Kittredge St. Reinforced concrete and steel Class A public library (50 ft. high).

REDDING, Shasta Co., Cal.—Leslie Engram, city clerk, authorized by city council to secure prices for purchase of 500 posts in connection with fencing project at city farm.

WINTERS, Yolo Co., Cal.—Natural Gas Products Co., granted franchise by city trustees to establish natural gas plant consisting of "Flamo" tanks to connect with a system of mains throughout the city. Improvements involved will cost \$10,000.

LONG BEACH, Los Angeles Co., Cal.—Long Beach Racing Coaster Co., H. H. Horsch, manager, repairing Silver Spray pier and will erect \$200,000 racing roller coaster. C. H. Jones in charge of pier improvements. One million feet of lumber ordered.

Contract Awarded.
COMFORT STATION Cost, \$50,875
SAN FRANCISCO, Gt. Highway bet. Judah and Taraval Sts.
Construct comfort station.
Owner—City and County of San Francisco.

Architect—Bureau of Architecture, 2nd floor, City Hall.
Contractor—Clinton Stephenson Co., Mondnock Bldg.

HAYWARD, Alameda Co., Cal.—Hayward Forum, a civic organization, backs proposal to erect a permanent show pavilion in Memorial Park to stage poultry and flower exhibits, etc.

SAN FRANCISCO.—Contemplated building construction to be undertaken by the city and county of San Francisco during the current year will involve an expenditure of approximately \$3,815,000, according to Chas. H. Sawyer, acting chief of the City Bureau of Architecture, 2nd floor, City Hall. Projects included in the estimate are summarized as follows:
Construction of Ward "F" at
Laguna Honda Home.....\$185,000
Additional wards at the San Francisco Hospital.....265,000
Fire House.....45,000
Emergency Hospital.....45,000
Third Unit, Balboa High School.....600,000
Aptos Jr. High Schol.....600,000
Lick Jr. High School.....600,000
Two new units at the Laguna Honda Home.....500,000
Construction of two buildings T. B. Preventorium.....125,000
Health Center building and Central emergency hospital.....550,000
It is possible that the first unit of the George Washington High School may be included in the above program.

OAKLAND, Cal.—Until January 22, 8 P. M., bids will be received by John H. Kimball, secretary, East Bay Municipal Utility District, 612 16th St., to furnish and install electrically operated dumbwaiter in Oakland Office Building at 512 16th St. Plans obtainable from secretary.

See call for bids under official proposal section in this issue.

VALLEJO, Solano Co., Cal.—Standard Oil Co. granted building permit by city council to construct a storage and distributing plant on Alden property just south of the Maine Street holdings of the Southern Pacific, covering an area of 100 by 230 ft. Three large steel tanks and three small containers in addition to a concrete wall surrounding the site are among the improvements proposed. A wharf extending into the channel for a distance of 175 ft. is also contemplated. (5168) 1st report Dec. 13, 1929.

Plans Being Prepared.

DEPT. OF SPOCKTON, San Joaquin Co., Cal.
One-story brick passenger depot (41x263 ft.; terra cotta roof and trim; Spanish type).
Owner—Southern Pacific R. R. Co., 65 Market St., San Francisco.

Architect—Eng. Dept. of Owner.
Station and grounds will cover approximately two acres. Bids will be called for at a later date.

Plans To Be Prepared.
MAUSELEUM Cost, \$500,000
GARDENA, Los Angeles Co., Cal.
182nd Street; 33 acre site.
Reinforced concrete mausoleum and crematory.

Owner—Fred O. Waterman, 6526 W. Fifth St., Los Angeles.
Architect—Luther T. Mayo, Inc., Wilshire Professional Bldg., Los Angeles.

OAKLEY, Contra Costa Co., Cal.—S. F. Landin Building and adjoining cottage, owned by S. F. Landin, destroyed by fire Jan. 12. Loss covered by \$2000 insurance.

REDWOOD CITY, San Mateo Co., Cal.—Western Pacific R. R. plans to establish railroad yards and freight depot at Redwood City to serve as the southern terminal on the San Francisco side of the bay district. Plans for the improvements are yet to be prepared.

CALIFORNIA.—Under a bill just introduced in the House by Congressman Scott Leavitt of Montana, California will ultimately receive approximately \$7,000,000 for construction of approach roads to national parks and the construction program would be advanced 50 per cent over prior proposals.

The measure (HR-8,000) appropriating \$5,000,000 annually would permit among other projects construction of five approach roads to Lassen Volcanic National Park and a more direct route from Fresno to Yosemite Valley.

It is understood the Leavitt bill would permit this program as tentatively and roughly estimated: Lassen Park—Manzanita Lake towards Burney, 40 miles, \$1,400,000; Manzanita Lake to Viola, 10 miles, \$350,000; northeast boundary to Poison Lake, 15 miles, \$525,000; Mineral to Forest Highway, 3 miles, \$105,000; southeast park boundary to Red Bluff-Susana Valley Highway, 7 miles, \$245,000.

Yosemite Park—Wawona—Coarsegold road, 50 miles, \$1,750,000; Crane Flat entrance to Jacksonville, 40 miles, \$1,400,000; Levinning Canyon road, 14 miles, \$490,000.

General Grand Park—Park boundary to Dunlap, 17 miles, \$595,000.
Sequoia Park—Sequoia to General Grand, 17 miles, \$595,000.

Crater Lake—Park boundary to Diamond Lake, 6 miles, \$210,000; Diamond Lake road to U. S. No. 97, 20 miles, \$700,000.

The total mileage for all parks would approximate 600 and would cost roughly \$21,000,000. The secretary of the Interior would supervise expenditures.

PORTLAND ENGINEERS ELECT

F. R. Schanck, consulting engineer, has been elected president of the Portland Section, American Society of Civil Engineers. Other officers are: 1st vice-president, O. E. Stanley; 2nd vice-president, John W. Cunningham; treasurer, H. M. Chadwick.

BRIGHTER OUTLOOK FOR RESIDENTIAL BUILDING DURING 1930

Construction activity in 1929 showed a slight decline from that of 1928 according to a statistical study just completed by the Associated General Contractors of America. The total volume of construction performed during the year as indicated by shipments of basic construction material was one per cent less than the total volume on record for 1928. This decline though slight marks the first year since the war that construction activity did not show a progressive increase.

The volume of construction performed during December, as determined through the study by the contractor's association, declined fifty-six points to index number 169. This was twelve points lower than the index figure for the same month last year and indicates that job activities are feeling the effects of the decline in contract awards which set in early in 1929.

The activities of the National Business Survey Conference, organized at the instance of President Hoover to stimulate construction and other business activity have not yet had any effect on the statistical picture of the industry according to the contractor's data.

Long term state and municipal bond issues which were marketed in increasing volume during October declined in volume in November to \$63,000,000, the lowest amount issued in any month since 1923. The average monthly figure for the first eleven months of 1929 was \$106,000,000 as compared with \$118,000,000 per month in the same period in 1928 and \$123,000,000 during the corresponding period in 1927.

Contract awards have likewise shown no statistical evidence of recovery to normal volume although it is reported that plans in progress, which should eventuate in future contracts, are above normal, especially in the public works construction field. The total volume of contracts awarded in the 37 eastern states reported on by the F. W. Dodge Corporation amounted to \$5,613,606,600 during the first 50 weeks of 1929. During the same period in 1928 the awards were \$6,395,524,900.

The decline in contract awards was largely in residential type construction during 1929. The outlook for 1930 is thought to be improved as regards this class of building. Evidence of this is indicated in the analysis of recent contract awards which show an increase in number by 1731 compared with the previous week. The total floor space and valuation awarded was less, however, indicating that smaller projects are being let in greater volume.

MERGER VALUE BILL BEFORE U. S. SENATE

A new proposal affecting valuations where tremendous mergers are concerned emerged from the hearing by the Senate Interstate Commerce Committee on the Couzens bill looking toward consolidation of communication systems.

Senator Pittman, Democrat, Nevada, announced that he would offer an amendment to the pending bill allowing railroad consolidations. It will seek to stipulate that the Interstate Commerce Commission must fix values for rate-making purposes before it could approve any proposed merger. Nevada Senators' statement followed testimony by Ellery W. Storz, president of the Federal Telephone & Telegraph Company, who opposed mergers of radio and cable companies.

Engineering News Section

BRIDGES

WOODBRIDGE, San Joaquin Co., Cal.—Jules Perrin, Lodi, at approx. \$4,000 awarded contract by Woodbridge Irrigation District to construct three concrete culverts at various points in the district.

SAN FRANCISCO—City Engineer M. M. O'Shaughnessy is conferring with Southern Pacific R. R., 65 Market St., with regard to proposed Third street bridge over channel and the widening and deepening of the channel. The total estimated cost of the work is placed at \$1,500,000. The project, however, will not be started before July of this year, due to the fact that money from city funds will not be available until that time.

OAKLAND, Cal.—Hearings are being held by State Railroad Commission in connection with proposed subway at 7th and Goss Sts., to eliminate dangerous crossing at Southern Pacific tracks.

OAKLAND, Calif.—County Surveyor Geo. A. Posey preparing plans for realignment of Bay Farm Island Bridge; estimated cost \$50,000. Alameda city will furnish \$6,000 to finance construction of approaches. It is proposed to move present center pier so that irregularities in the Alameda and Island approaches to the span can be eliminated.

SANTA CRUZ, Santa Cruz Co., Cal.—Until January 20, 3 P. M., bids will be received by S. A. Evans, city clerk, to construct reinforced concrete and timber bridge in Market street over Branciforte Creek, involving 122 cu. yds. excavation; 57 timber piles in place; 127 cu. yds. class "A" concrete; 12,000 lbs. reinforcing steel in place; 34 M. B. M. timber in place 2170 sq. ft. roadway wearing surface. Certified check 10% payable to city required with bid. Bond of 100% of contract price required of successful bidder. Plans obtainable from City Engineer Roy Fowler on payment of \$5, not to be refunded.

YUBA CITY, Sutter Co., Cal.—County Surveyor William Shearer authorized by county supervisors to substitute one-half of redwood piling and one-half crosstied piling in connection with the Rio Oso bridge, the contract for which was awarded last September to M. A. Jenkins, 3560 Y St., Sacramento, at \$50,340, using crosstied piling. The change is made, according to the county surveyor, at the request of the War Department, which desires to test out the life of the two kinds of piling under identical conditions. The supervisors originally voted 9 to 1 in favor of crosstied piling.

PLACERVILLE, El Dorado Co., Cal.—Until February 4, 2:30 P. M., bids will be received by Arthur J. Koletzke, county clerk, to construct a reinforced concrete girder bridge over Weber Creek at Darlington, and a concrete slab bridge over North Weber Creek on the Pleasant Valley road. Certified check 10% payable to county clerk required with bid. Plans obtainable from Henry Lahiff,

county surveyor, on deposit of \$10, returnable.

OAKLAND, Cal.—County Surveyor Geo. A. Posey is preparing preliminary plans for submission to the War Department seeking authorization of a new bridge to replace the present Park street structure over the Estuary between Oakland and Alameda. The cost is placed at \$650,000.

OAKLAND, Cal.—County Surveyor Geo. A. Posey preparing plans for repairs to Fruitvale bridge; estimated cost \$15,000.

OAKLAND, Cal.—County Surveyor Geo. A. Posey making surveys for new steel and concrete bridge to replace the old Hord bridge in Niles Canyon; estimated cost \$10,000. Approximately \$20,000 will be expended for road work in connection with this project.

STOCKTON, San Joaquin Co., Cal.—Until February 17, bids will be received by Eugene Graham, county clerk, for improvements in connection with bridge over Old River. A portion of the cost will be borne by Contra Costa county. Plans obtainable from Julius Manthney, county surveyor.

REDWOOD CITY, San Mateo Co., Calif.—City Engineer Chas. Dimmitt instructed to prepare estimates of cost for new bridges, street extensions and sewers which may be included in a bond issue on the ballot at the municipal election April 14. Included in the estimates will be the new bridge across the Redwood Creek at Bradford St., the type of which is dependent upon the state highway commission's application before the war department to close the creek and erect a bridge of its own 700 ft. further downstream.

SAN RAFAEL, Marin Co., Cal.—Bids will be asked at once by county supervisors to construct a concrete bridge at San Clemente on the Altamira road. Rodney Mesner, county surveyor.

CALIFORNIA—The attention of contractors is called to a "Notice to Contractors," published in another column of this issue, where contractors will be required to file a statement of their experience and financial condition with the State Department of Public Works, before being furnished with plans and specifications

on State Highway construction. Prospective bidders are requested to file their statements, or to supplement previous statements, for qualifying to bid on a job at least fourteen days before they desire to take out plans and specifications, in order to allow sufficient time to review and pass on the statement or supplemental data. No plans and specifications will be furnished to prospective bidders until their statement of experience and financial condition has been examined and approved.

DREDGING, HARBOR WORKS & EXCAVATIONS

REDWOOD CITY, San Mateo Co., Cal.—City council has accepted (informal) bid of Healy Tibbitts Construction Co., 64 Pine St., San Francisco, to drive piles in connection with municipal harbor project. Contract price, \$9.75 per pile, involving 42 piles in all.

MONTEREY, Monterey Co., Cal.—A \$610,000 harbor improvement at Monterey has received the approval of the House Rivers and Harbors Committee. The committee has adopted the report of Lytle Brown, chief of army engineers, recommending construction of a breakwater 1300 feet long between Reeside Avenue and Presidio Boundary. The annual upkeep is estimated at \$18,000.

STOCKTON, San Joaquin Co., Cal.—City Manager Walter B. Hogan announces developments in the Stockton deep water project as follows:

1. The city completed payment of its half of the initial fund to start dredging operations when a check for \$365,000 was presented to Major J. R. D. Matheson, chief of United States engineers in this district.
2. A surety bond for \$907,500, guaranteeing that the city will complete the channel, is now on its way to Washington for deposit in Government files.
3. Preparations for the dredging program will be made as soon as Washington officials rule that the city has complied with government regulations in every respect at which time the local federal engineer will be empowered to advertise for bids for the channel construction.

4. Two parcels of land remain to be acquired by the city from the East Bay Municipal Utilities District as rights-of-way on the channel. The city council has authorized the purchase of this property for \$1046.

5. The city will have expended \$931,000 for rights-of-way when this transaction is closed, and previously appropriated \$35,000 to defray the expenses of government engineers who originally conducted the channel survey at Stockton.

6. The State of California has already expended \$419,000 toward the acquisition of channel property, while a sum of \$91,500 has been allocated for dredging work on New York slough at the lower end of the Stockton project.

Work on this stretch of the channel will be started as soon as the state turns over the amount to the city.

7. Congress has appropriated a total of \$525,000 to date for the channel construction and further appropriations are expected to be a part of the rivers

Market 2322	Westmore 4179

and harbors bill which will be before the body in March.

8. The channel contract specifies that the city must make provision for the construction of 1200 lin. ft. of wharves on the harbor, 800 feet of which must be covered. A total of \$1,669,000 remains to be spent of the original bond fund of \$3,000,000 which was voted by the city for the channel work.

9. The entire cost of the project to the Government has been set at \$2,407,500. With the \$91,500 yet to be applied by the state, and the \$1,669,000 still remaining to be spent by the city, a total of \$4,168,000 will be available to complete the \$6,000,000 project.

DIXON, Solano County, Cal.—Fred Birchmore, county supervisor and secretary of the Vallejo Chamber of Commerce, urges an appropriation for a preliminary survey for a deep water harbor near Benicia. A preliminary survey, Birchmore says, is necessary before asking federal aid on the proposed \$2,500,000 project. Later a harbor district, comprising several counties, would be created. A \$3,500 allotment from the county is sought by Birchmore for the survey. A committee, consisting of H. G. Brown, A. C. Madden and J. M. Cowden, has been appointed by Milton Carpenter, president of the Dixon Service Club, to work with Birchmore.

SAN FRANCISCO—See "Bridges," this issue. \$1,500,000 expenditure planned by city for bridge and dredging project.

SACRAMENTO, Cal.—See "Parks and Playgrounds," this issue. Estimate submitted for fill in connection with city park site.

IRRIGATION PROJECTS

WOODBIDGE, San Joaquin Co., Cal.—Jules Perrin, Lodi, at \$2.82 per bbl. awarded contract by Woodbridge Irrigation District to furnish and deliver 500 barrels of Portland cement.

CALIFORNIA.—Following is a partial list of permits granted during the month of December, 1929, by the State Department of Public Works, Division of Water Rights, to appropriate water:

Permit 2387, Application 6445 (San Diego Co.) Issued to H. S. Kibbey, Lakeside, for .05 c.f.s. from unnamed spring for domestic use. Est. cost, \$1,000.

Per. 3388 App. 6454 (Sutter Co.) Austin Kramer, Knights Landing, 1.3 c.f.s. from Sacramento river, for irrigation on 104.3 acres. Est. cost, \$5000.

Per. 3389, App. 6397 (San Joaquin Co.) W. H. McFall, Manteca, 1.47 c.f.s. from Lone Tree Creek for irrigation on 117.36 acres. Est. cost, \$1000.

Per. 3390, App. 2186 (Plumas Co.) Feather River Power Co., San Francisco, 70,000 a.f. from Bucks Creek for irrigation on 44,314 acres. Est. cost, \$3,209,500.

Per. 3391, App. 6395 (Sierra Co.) B. C. and Wm. S. Brown, La Porte, Calif., 65 c.f.s. from Whiskey Creek and unnamed ravine for mining. Est. cost, \$2,000.

Per. 3392, App. 6396 (Sierra Co.) B. C. and Wm. S. Brown, La Porte, Calif., 25 c.f.s. from North Branch of Slate Creek for mining. Est. cost, \$1000.

Per. 3393, App. 6449 (Butte Co.) Holly Citrus Land Co., Hollywood, 1.25 c.f.s. from two unnamed streams, for irrigation on 100 acres. Est. cost, \$2,500.

Per. 3398, App. 5925 (Trinity Co.) R. S. Gurley, Hyampack, Calif., 1 c.f.s. from Allen and Blackham Creeks, for irrigation on 80 acres. Est. cost, \$1000.

Per. 3399, App. 6259 (Santa Barbara Co.) 4H Club of Santa Barbara, Goleta, 1 c.f.s. from Arroyo Burro Creek

Canyon and two springs, for domestic use. Est. cost, \$2500.

Per. 3401, App. 6430 (San Joaquin Co.) C. B. Orvis, Stockton, 12 c.f.s. from State Canal, for agricultural purposes on 960.5 acres. Est. cost, \$6500.

Per. 3402, App. 6270 (Mono Co.) Champion Sillimanite Inc., Merced, .025 c.f.s. from Dry Creek, for agricultural purposes. Est. cost, \$1500.

Per. 3404, App. 6272 (Mono Co.) Champion Sillimanite Inc., Merced, .05 c.f.s. from Dry Creek, for mining purposes. Est. cost, \$1500.

Per. 3405 App. 6241 (Plumas Co.), Feather River Power Co., San Francisco, 120 c.f.s. direct diversion 6,000 ac. ft. from Milk Ranch and Bucks Creek tributary to north fork Feather river, for power purposes. Est. cost, \$9,531,000.

Per. 3407, App. 5910 (Orange Co.), Rome Miller, Los Angeles, .15 c.f.s. from six springs, for domestic purposes. Est. cost, \$3000.

Per. 3409, App. 6294 (Ventura Co.), Topa Topa Co., Ojai, Calif., 1 c.f.s. from two wells, for irrigation on 122 acres. Est. cost, \$18,000.

Per. 3410, App. 6152 (Humboldt Co.) Wm. Campbell, Salyer, Calif., 5 c.f.s. from Madden Creek, for mining purposes. Est. cost, \$2000.

Per. 3412, App. 6293 (Colusa Co.), Northern California Duck Club, Sacramento, 3 c.f.s. from Lurline Creek, for irrigation on 440 acres. Est. cost, \$1,000.

Per. 3416, App. 5770 (Trinity Co.) W. P. Anderson, et al, Weaverville, for 1.5 c.f.s. from north fork Trinity river for power purposes.

Per. 3417, App. 6444 (Solano Co.) A. C. and Minnie T. Sullivan, Winters, 37 c.f.s. from Miller or Pleasant Valley creek, for irrigation on 30 acres. Est. cost, \$1400.

Per. 3418, App. 3808 (Los Angeles Co.) H. Hay as trustee and San Dimas Water Co., Covina 16.8 c.f.s. from Pudding Stone canyon, for irrigation on 4422.21 acres. Est. cost, \$60,000.

CALIFORNIA.—Following is a partial list of applications filed during the month of December, 1929, with the State Department of Public Works, Division of Water Rights, for permit to appropriate water:

APPLICATIONS

Application 6503 (Del Norte Co.) C. R. Ward and J. L. Ward, Crescent City, for 0.15 c. f. s. from unnamed creeks tributary to Smith River for domestic purposes. Est. cost, \$2000.

App. 6504 (Sutter Co.) Frank Berry, Yuba City, 0.5 c. f. s. from Feather River tributary to Sacramento River for irrigation purposes. Est. cost, \$1100.

App. 6505 (Amador Co.) Preston School of Industry, State of Calif., Waterman, Calif., 10 c. f. s. from Sutter Creek tributary to Mokelumne River via Dry Creek for power purposes. Est. cost, \$75,000.

App. 6506 (Amador Co.) Preston School of Industry, 8.5 c. f. a. and 3750 ac. ft. per annum from Sutter Creek tributary to Mokelumne River via Dry Creek for domestic and irrigation purposes. Est. cost, \$75,000.

App. 6509 (Nevada Co.) Nevada Irrigation District, Grass Valley, 100 c. f. s. from Auburn Ravine tributary to American River for irrigation purposes.

App. 6512 (Sonoma Co.) Joe M. Fernandez, Box 490, Sonoma, 0.22 c. f. s. from Sonoma Creek tributary to San Pablo Bay for irrigation purposes.

App. 6514 (Clatsop Co.) A. F. Westover, % Geo. G. Underhill, Etna Mills, Calif., 140 c. f. a. from Trail Creek, Fish Lake Creek, E. Br. 6 Mile Creek and West Br. 6 Mile Creek tributary to E. Fk. of Salmon River for mining purposes.

App. 6515, Karl Brehme, Hobart Bldg., San Francisco, 200,000 ac. ft. from Cache Creek tributary to Sacramento River for industrial and domestic purposes. Est. cost, \$12,000,000.

App. 6516 (Placer and Nevada Co.) Bear River Water & Power Co., % J. L. Rollins, Colfax, Calif., for 111,020 ac. ft. from Bear River and its tributaries tributary to Feather River from either or both for power purposes. Est. cost, \$2,500,000.

App. 6518 (Modoc Co.) Irwin C. Everly, Davis Creek, Calif., 700 ac. ft. from Fletcher Creek and Drainage area of Reservoir tributary to Clear Lake Reservoir for irrigation purposes.

App. 6520 (Los Angeles Co.) Candido Herreres, R. 2, Box 1134, San Fernando, 1,240,000 gallons per annum from Underground water developed from Muerte Canyon tributary to Little Tujunga Canyon for irrigation and domestic purposes. Est. cost, \$2,000,000.

STREET LIGHTING SYSTEMS

WINTERS, Yolo Co., Cal.—City trustees have started proceedings to install electrolor system in four blocks of Main St., and two blocks of Railroad Ave.

OAKLAND, Cal.—City council has started proceedings to install ornamental street lighting system with underground system in East 12th St., between Lakeshore Ave. and First Ave. and between First and 12th Aves. Geo. N. Randle, city engineer,

SAN JOSE, Santa Clara Co., Cal.—Bids will be asked at once by Board of Education to furnish and install electrolors at vocational shops at high school. Walter Bachrodt is secretary of the Board of Education.

SAN FRANCISCO

SAN JOSE, Santa Clara Co., Cal.—Until January 20, 8 P. M., bids will be received by John J. Lynch, city clerk, (4953) to install lighting system in Second St., bet. San Salvador and Reed Sts., involv. 20 (San Jose Standards) Duplex electrolator posts together with underground system. 1911 Act, Bond Act 1915. Certified check 10% payable to city required with bid. Specifications on file in office of clerk. Wm. Popp, city engineer.

MACHINERY AND EQUIPMENT

MADERA, Madera Co., Cal.—Western Pipe and Steel Co., San Francisco, at \$241 awarded contract by city council to furnish and deliver a sand trap.

MODESTO, Stanislaus Co., Cal.—Frank Paradis Co., Modesto, at \$801 awarded contract by city to fur. and del. motor truck of one and one-half ton capacity. 24

SAN FRANCISCO—Until January 20, 3 P. M., bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish two 2½-ton motor trucks with dump bodies. Specifications and further information obtainable from above.

MODESTO, Stanislaus Co., Cal.—Until January 13, bids will be received by F. J. Rossi, city engineer, for the sale of the following materials and equipment at the City Yard in 11th St., bet. F and G Sts., including: About 3 tons of cast iron; about 1 ton of iron pipe; about 900 pounds of copper; about 60 pounds of brass; about 25 pounds of lead; one 3-cylinder 85-horsepower distillate engine; one 4-wheel dump truck; one 12-foot blade highway grader; one 45 Holt tractor. The material is no longer required by the city.

EL CERRITO, Contra Costa Co., Cal.—Until January 20, 8:30 P. M., bids will be received by Alice M. Walker, city clerk, to furnish and deliver one new Ford automobile, Model A Standard Coupe, complete with standard equipment. Further information obtainable from clerk.

OCEANSIDE, San Diego Co., Cal.—Until 7:30 P. M., Jan. 29, bids will be received by the city council for furnishing the city a one-man motor grader with leaning front wheels and scraper, 12-ft. blade. Bids are to be submitted on installment or rental basis plan of monthly payments for 36 months. A certified check for 5% required. R. L. Loucks, city engineer.

LOS ANGELES, Calif.—Until 10 A. M., Jan. 21, bids will be received by D. P. Nicklin, purchasing agent of the Los Angeles Department of Water and Power, 207 S Broadway, for two electric shovels under Adv. 1231.

SONORA, Tuolumne Co., Cal.—J. L. O'Neil, Sonora, at \$939.55 awarded contract by city trustees to furnish 1½-ton Chevrolet motor truck. Chas. Goetz, Sonora, only other bidder at \$949 for Ford truck.

SACRAMENTO, Calif.—Automotive equipment totalling 33 pieces may be bought for the use of the city employees during the coming year, if a plan outlined by Joseph Plato, city purchasing agent, is approved by the city council. A fund of \$31,420 was set aside in the 1929 budget for this purpose. Twelve new trucks are to be put into service, including one new pumper for the fire department. There will also be four new motorcycles, one tractor and 16 automobiles.

BAKERSFIELD, Kern Co., Calif.—V. Van Riper, city clerk, will ask bids at once to furnish and deliver a 3-ton dump truck for street department. W. D. Clarke is city manager.

RAILROADS

VACAVILLE, Solano Co., Cal.—Utah Construction Co., Phelan Bldg., San Francisco, at approximately \$250,000 awarded contract by Western Pacific Railroad to construct seven and one-half miles of railroad to connect the Sacramento Northern Railway with its so-called "orphan branch," the Vaca Valley line. The new line will start from Creed, 32 miles south of Sacramento, on the San Francisco-Sacramento main line, and will end at Vacaville Junction.

FIRE ALARM SYSTEMS

OAKLAND, Cal.—Crouse-Hinds Co., Syracuse, N. Y., awarded contract by city council to furnish 85 traffic signals at \$2966.50 and 12 secondary traffic signal timers at \$2016 and one master signal timer at \$175.

SAN ANSELMO, Marin Co., Cal.—Sierra Equipment Corp., 361 9th St., San Francisco, at \$6220 submitted low bid to town trustees to install fire alarm system. Gamwell Co. only other bidder at \$6,795. Taken under advisement.

BAKERSFIELD, Kern Co., Calif.—Civic organizations are conferring with City Manager W. D. Clarke relative to the installation of a fire alarm system. According to tentative estimates the installation will involve an expenditure of \$230,000.

NAPA, Napa Co., Cal.—Gamewell Co. at \$2346.10 awarded contract by city council to install fire alarm system to replace that installed 42 years ago. The payments will extend over a period of four years.

FIRE EQUIPMENT

SIGNAL HILL, Los Angeles Co., Cal.—Contract for furnishing 500 ft. of 2½ inch fire hose to the city fire department was awarded by the city council as follows: Eureka Fire Hose Co., 250 ft. at \$1.40 (3-ply Paragon brand). Pioneer Rubber Mills, 250 ft. at \$1.15 ft. (Battleship brand).

MADERA, Madera Co., Cal.—Gibbs Hardware Co., Madera, at 90c per ft. awarded contract by city council to furnish 1,000-ft. Pacific Jacket fire hose.

LOS ANGELES, Calif.—Until 10 A. M., Jan. 29, bids will be received by Thos. Oughton, city purchasing agent, 107 City Hall, for furnishing a straight hose wagon under Spec. 2001, and under Spec. 2000 for furnishing comb. hose wagons.

SAN ANSELMO, Marin Co., Cal.—City trustees reject bids to furnish motor pumper for Fire Department due to the fact that they were unable to agree on the type and capacity of the equipment. New bids will be asked.

RESERVOIRS AND DAMS

LODI, San Joaquin Co., Calif.—See "Power Projects," this issue. Estimates of cost submitted to city council for power development on Mokelumne river.

PASADENA, Los Angeles Co., Cal.—The state railroad commission has authorized the Southern California Edison Co. to give the city of Pasadena an option to purchase 1000 acres of land and the company's hydro-electric plant in the San Gabriel Canyon as the first move toward the proposed \$10,000,000 water and power project of the city, according to S. B. Morris, chief engineer of the Pasadena water department. Plans call for the construction of a gravity dam in the main channel of the San Gabriel river, about 4 miles above Azusa and 6 miles below the Rincon forks site of the Los Angeles county dam. The proposed Pasadena dam would be 295 ft. high above stream bed and 375 ft. above the lowest foundations, providing a storage reservoir of 64,209 acre feet. Bonds in the sum of \$10,000,000 have been voted.

LOS ANGELES, Calif.—Edwards, Wilkey and Dixon, Edwards & Wilkey Bldg., Los Angeles, at \$717,245 awarded contract by county supervisors to construct Harsen Dam and appurtenant structures in Big Tijuana Canyon, 12 miles northeast of Sunland and one mile above Hansen's Lodge; will be concrete arch structure with earth fill wing and will be approx. 204 ft. above stream bed and 300 ft. in length between abutments, earth fill wing on north end, valve outlets and spillway. County will furnish cement, admixture, asphaltum paint or filler reinforcing steel and mesh. Structural steel, etc.

PIPE LINES, WELLS, ETC.

TRACY, San Joaquin Co., Cal.—R. P. Easley, Antioch, awarded contract by Standard Oil Co. to excavate trench for 22- and 27-inch natural gas pipe lines for 40 miles between Tracy and Crockett. W. A. Betchel, 206 Sansome St., San Francisco, has the contract for laying pipe.

SEWERS AND SEWAGE DISPOSAL PLANTS

SEBAS/TOPOF, Sonoma Co., Cal.—City Engineer C. E. Mueller preparing plans for sewage disposal plant for which bonds of \$22,000 were recently voted to finance.

SAN JOSE, Santa Clara Co., Cal.—City Engineer William Popp is completing plans and bids will be asked about Jan. 20 to construct a slough crossing in connection with the new outfall sewer system. The work will cost about \$5400.

PHOENIX, Ariz.—February 11 has been set as the date for the \$3,453,000 water and sewer bond issue election. Of the total, \$2,636,000 will be used for water purposes and \$517,000 for sewer purposes.

ALAMEDA, Alameda Co., Cal.—City Engineer Burnett Hamilton making surveys to provide drainage for area contiguous to High St. north from Lincoln Ave. to Farnside Blvd. Funds will be provided in the 1930-31 budget.

HILLSBOROUGH, San Mateo Co., Cal.—Town trustees will call election to vote bonds of \$28,000 to finance extension of sewer up Cherry Canyon.

TIBURON, Marin Co., Calif.—Clyde C. Kennedy, consulting engineer, in a report to the directors of Sanitary District at Tiburon submitted preliminary plans for laying sewers throughout the district involving 2,700 ft. 8-in. and 10,500 6-in. laterals together with necessary lampholes and manholes. The cost is estimated at \$15,000. A hearing will be held in the Tiburon School February 3. Mrs. Agnes B. Kircher is secretary of the board.

REDWOOD CITY, San Mateo Co., Cal.—Engineer Robert A. Klassen, Courthouse, Redwood City, commissioned by county supervisors to prepare plans for Colma Sanitary sewer system; estimated to cost \$200,000. The sewer will connect with the present Daly City system. Work under County Improvement Act of 1921.

PHOENIX, Ariz.—City Manager G. H. Todd has announced a list of projects contemplated under the proposed \$3,453,000 bond issue for which an election on Feb. 11 has been authorized. Besides, \$317,000 for sewage treatment plant and sewer lines, the following water projects are planned:
• Flow line sand trap to reservoir, \$1-319,000. Reservoir to 16th St. and Thomas Road, 48-in., \$566,000; 12th St. and McDowell Road to 16th St. and Thomas Road, 42-in., \$146,000; line from 16th St. and Thomas Road to 7th Ave., 24-in., \$140,000; belt line distributor system, \$128,000; five wells and pumping plant at Verde river, \$25,000; pump station at Verde river, \$24,000; bank protection at Verde, \$110,000; 10,000,000-gal. reservoir, \$92,000; well field, 168 acres, \$8000; completion of lines within city, \$78,000. Expenditures contemplated under the proposed sewer bond issue include the construction of a sewage treatment plant and mains and lines within the city.

PAJO ALTO, Santa Clara Co., Cal.—City Engineer J. F. Byxbee Jr., preparing plans for sewers in Merner Tract.

OAKLAND, Cal.—As previously reported, city council declares intention to construct sewers in Country

Club Manor, Melrose Heights and adjacent streets, protests to be heard January 16. The project involves 3576 lin. ft. 12-in., 1045 lin. ft. 15-in., 1726 lin. ft. 18-in., 3944 lin. ft. 21-in. and 1290 lin. ft. 24-in. vitrified pipe sewer; 48 lin. ft. 24-in. cast iron pipe sewer; 45 manholes; one 12-in. lamphole; 233 wye branches. Geo. N. Randle is city engineer and Frank C. Merritt, city clerk.

LOLETA, Humboldt Co., Calif.—County supervisors have been petitioned to start proceedings for formation of sanitary district to vote bonds to finance construction of a sewage system in the Loleta district. The petition will be considered at the regular meeting of the county board on January 27.

WATER WORKS

PAJO ALTO, Santa Clara Co., Cal.—City Engineer J. F. Byxbee Jr., preparing plans to drill well and construct pumping plant at Colorado Ave. and Alma St. The cost is estimated at \$13,300.

ALHAMBRA, Los Angeles Co., Cal.—Until 9 A. M., Jan. 23, bids will be received by the city commission to furnish 1500 tons of cast iron pipe and fittings for use at the Longden Well property. Pipe is to be cement-lined. Bids will be taken at the same time for installation of the pipe. Specifications obtainable from R. B. Wallace, city clerk.

LOS ANGELES, Cal.—An election will be held Jan. 30 in Municipal Improvement Dist. No. 75, to vote on a \$510,000 water works bond issue. A hearing on protests will be held by the council Jan. 15. The district is located in the vicinity of Exposition Blvd., Military Ave., Kelton Ave., National Blvd. and other streets near Palms.

SAN ANSELMO, Marin Co., Cal.—Following bids taken under advisement by town trustees to furnish fire hydrants:

Shand & Jurs Co., Berkeley, 2½-in. single hydrant, \$44; 2½-in. double, \$54.

United Iron Works, Oakland, 4-in. bell inlet singles, \$42; 6-in. Bell inlet singles, \$44; 4-in. Bell inlet doubles, \$52; 6-in. bell doubles, \$54.

M. Greenberg & Sons, San Francisco, 2½-in. single outlet hydrant, \$30; 2½-in. double outlet hydrant, \$40. Rensselaer Valve Co., San Francisco, 2½-in. Corey No. 1 hydrant, \$45; 2½-in. Corey No. 2, \$47.50; Corey steamer connection hydrant, \$52.50.

SAN FRANCISCO—Bids will be asked shortly by Board of Public Works to furnish and install motor-driven centrifugal pump with auxiliary engine drive at Mills Municipal Airport. Specifications have been completed by the Bureau of Engineering, 3rd floor, City Hall.

TURLOCK, Stanislaus Co., Cal.—City Engineer Horace Hall recommends to city council installation of a fifth auxiliary pumping plant in connection with the water system.

WHITTIER, Los Angeles Co., Cal.—The \$310,000 water bond issue which was defeated at the November election will be submitted to voters again at the April 14th election.

SOUTH SAN FRANCISCO, San Mateo Co., Calif.—City council will call election shortly to vote bonds of \$50,000 to finance construction of a municipal swimming pool.

LONG BEACH, Los Angeles Co., Cal.—Chicago Bridge & Iron Works, Rialto Bldg., San Francisco, submitted low bid to the city manager at \$6,875 to furnish and erect 100,000-gal. elevated steel water tank and tower at the foot of Riverside Drive at the east end of Pier No. 1, Long Beach Harbor. The bid or hemispherical bottom tank was \$6450. Other bids were: Des Moines Steel Co., \$6720; Minneapolis Moline Power Implement Co., \$7386; Consolidated Steel Corp., \$7640.

PLAYGROUNDS & PARKS

BAKERSFIELD, Kern Co., Cal.—Supervisor J. O. Hart has announced that developments at the Kern River park this year contemplate creation of a lake suitable for water sports, additions to the zoo, erection of a monument of natural Kern county stone and improvements of two approach roads. Later it is planned to erect a building to house the nucleus of a county museum.

SACRAMENTO, Cal.—B. C. Clark, city engineer, estimating cost of filling old gravel pit at 51st and M Sts., under consideration for a city park site, at \$45,000. Condemnation proceedings for purchase of the land have already been started.

COMPTON, Los Angeles Co., Cal.—Until 8 P. M., Jan. 21, bids will be received by the city council for planting of about 1800 ornamental shade trees in the district bet. Main and Olive Sts., under the Tree Planting Act. Bids will be taken on a number of varieties and the bids will state a unit price per tree. Glen Rood is the city engineer.

SOUTH SAN FRANCISCO, San Mateo Co., Calif.—City council will call election to vote bonds of \$100,000 for public park improvements, and \$15,000 for purchase of lands.

STREETS AND HIGHWAYS

REDWOOD CITY, San Mateo Co., Calif.—City Engineer Chas. Dimmitt instructed to prepare estimates of cost for new bridges, street extensions and sewers which may be included in a bond issue on the ballot at the municipal election April 14. Included in the estimates will be the new bridge across the Redwood Creek at Bradford St., the type of which is dependent upon the state highway commission's application before the war department to close the creek and erect a bridge of its own 700 ft. further downstream.

CALIFORNIA—The attention of contractors is called to a "Notice to Contractors," published in another column of this issue, where contractors will be required to file a statement of their experience and financial condition with the State Department of Public Works, before being furnished with plans and specifications on State Highway construction. Prospective bidders are requested to file their statements, or to supplement previous statements, for qualifying to bid on a job at least fourteen days before they desire to take out plans and specifications, in order to allow sufficient time to review and pass on the statement or supplemental data. No plans and specifications will be furnished to prospective bidders until their statement of experience and financial condition has been examined and approved.

SOUTH SAN FRANCISCO, San Mateo Co., Calif.—City council will call election shortly to vote bonds of \$20,000 to finance paving of Orange Ave.

OAKLAND, Cal.—Until January 23, 12 noon, bids will be received by Frank C. Merritt, city clerk, to improve portions of Proctor Ave., Florence Ave., St. Paul Court and Estates Drive, involving grade, curbs, gutters, pave; conduits and storm water inlets. Imp. Act 1913. OFFICIAL PROPOSALS

NOTICE TO CONTRACTORS

General Work

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, February 11, 1930, thereafter or said day to be publicly opened and read for the erection and completion of the General Work for the Additional Wings, San Francisco State Building, San Francisco, California, in accordance with plans and specifications therefor.

The addition consists of two wings of six stories and basement, steel frame, concrete floors and court walls, granite and brick walls on street elevations, and two basement and one story reinforced concrete connecting wings; composition roof for all work. No interior partitions above basement. Plaster finish on metal furring thru-out above basement floor.

The floor area is approximately 45,500 sq. ft.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, California, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications and proposal forms may be secured by licensed contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

NOTICE TO CONTRACTORS

Mechanical Work

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to

2 o'clock P. M., Tuesday, February 11, 1930, thereafter or said day to be publicly opened and read, for the installation and completion of the Mechanical Work for the Additional Wings, San Francisco State Building, San Francisco, California, in accordance with plans and specifications therefor.

Mechanical Work includes Plumbing, Heating, and Electrical Work. Separate bids will be received for "Electrical Work" and for "Plumbing" and "Heating Work." Combined bids will also be received covering all three branches of the work.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, California, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications and proposal forms may be secured by licensed contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" ac-

companying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

In accordance with the provisions of Chapter 644, Statutes of 1929, prospective bidders on State highway work, before being furnished with plans and specifications, will be required to file a statement of their experience and financial condition.

Prospective bidders are requested to file their statements, or to supplement previous statements, for qualifying to bid on a job at least 14 days before they desire to take out plans and specifications, in order to allow sufficient time to review and pass on the statement or supplemental data.

No plans and specifications will be furnished to prospective bidders until their statement of experience and financial condition has been examined and approved.

"Blue Star" Flats* attract permanent tenants

Like the "Blue Star" homes so successfully marketed by Walter H. Leimert Co., Inc., this distinctive four-family flat building features the most complete and modern gas equipment.

Gas refrigeration—because of its novelty as well as proved superiority—displayed amazing "pulling-power" in bringing investors and home-seekers to Leimert Park.

The new gas ranges, too, with their heat-controlled ovens and appealing colors, exerted a lure which few women could resist. And men were instantly impressed by the convenience, cleanliness and comfort of gas heat.

In fact, *you* will find, as did the Leimert Company, that nothing adds more to the *salability* of a home, or "*lease-ability*" of an apartment, than up-to-date gas appliances.

*BLUE STAR means "completely equipped with modern gas appliances, laboratory-approved by the American Gas Association".

Your gas company will gladly assist you in planning for gas.

A. I. A. CHAIRMAN "RAZZES" AMERICAN ARCHITECTURE

Chas. E. Cheney, chairman of the Committee on City and Regional Planning of the American Institute of Architects, is not very complimentary to the architects of America. In a recent statement he said:

"America must build better cities. We are a rich nation but a tawdry one in appearance. Our station in civilization demands and requires a better dress. Our progress in education and culture insists upon a better environmental condition for our children and our children's children.

"Our cities, their architecture and planning are the chief measure of our civilization. Despite the falling off in building, during the past year something over four billion dollars in new structures was expended in cities and towns of this country. Yet it is estimated roughly that three billion dollars' worth of these structures were so ugly, so badly planned, so inappropriately located or on such narrow or inconvenient streets as to have been a liability instead of an asset.

"Building inspectors tell us that the number of plans which came to them designed by competent architects or designers were still approximately only about ten to fifteen per cent of the total number of new buildings erected, and that the proportion of good designs does not seem to be materially increasing.

"As this architecture that we leave behind us is what future generations will judge us by, America must act to ensure that in the future, at least, no more such ugliness, ugliness, or lack of color shall be tolerated in new buildings."

FRESNO WILL REVISE ITS ELECTRICAL ORDINANCE

Minor changes in Fresno's electrical ordinance have been approved by journeymen electricians and local building contractors and will be incorporated in amendments to the present ordinance introduced in the city council by A. M. Jensen, city commissioner of public works.

The amendments will include a new national electrical workers' code, adopted every two years by the National Board of Fire Underwriters. Another slight change provides a basis for minimum watt capacities for electrical circuits for different conditions.

The amendments also will provide for a plant electrician for packing houses and other industrial plants, such employees to be journeyman electricians and their work limited to electrical maintenance only.

Chief among the changes is a provision laying down rules as to the alteration or addition to existing electrical wiring, the present ordinance containing no specifications on this type of work.

BUILDINGS LAST YEAR HIGHER TYPE THAN IN 1923

The United States spent more heavily for building in 1929 than in 1923, when the amount of new space provided is taken into account.

The average 1929 outlay per square foot of floor area constructed was \$5.73, it is indicated by the newest study completed by the research department of Greenebaum Sons Investment Company. The preceding year approximately \$5.57 was invested for each unit of new space built. Since labor and material costs varied comparatively little as between the two years, the conclusions seem justified that the building done in 1929 was on the whole of a somewhat higher type than in 1923.

The unit price paid in the 12 months just closed was exceeded in only two recent years, 1927 and 1926. This is shown by the table which follows, which gives the year and the price per square foot of floor area:

1923	\$5.73
1928	5.57
1927	5.99
1926	5.97
1925	5.55
1924	5.32
1923	4.90
1922	4.81
1921	4.84
1920	4.81
1919	4.59

These amounts are averages, covering all types of buildings. They include only the cost of the structures. Prices of building sites were not taken into account in computing the averages.

\$40,000,000 STEEL PLANT IS PROPOSED

The National Steel Corporation has purchased a 1000-acre tract of land on the shore of Lake Michigan east of Gary, Ill., and will establish a steel mill representing an investment of between \$40,000,000 and \$50,000,000 within the next three years. The National Steel Corporation is a holding company formed recently through the consolidation of the Weirton Steel Company, Great Lakes Steel Corp. and subsidiaries of the M. A. Hanna Company of Cleveland.

JUTE TWINE INSTITUTE HAS ADOPTED CODE OF ETHICS

Members of the Jute Twine Institute, New York City, comprising manufacturers of 80 per cent or more of all jute twine manufactured in the United States, recently have adopted a code of ethics, interpreting the Clayton Act and the Federal Trade Commission Act. A feature of the Jute Twine Institute's plan is an unfair competitor bureau, under the charge of the institute's legal counsel, which will investigate all complaints charging unfair methods of competition on the part of anyone in the industry, whether a member or a non-member of the institute.

CREDITORS FARE WORSE IN 1929 BANKRUPTCIES

General creditors lost about \$30,000,000 more through bankruptcies last year than during the previous fiscal year, and got back less on each dollar of their claims, according to an analysis of the Attorney General's report published in the current number of Credit Monthly magazine.

The analysis, prepared by the research department of the National Association of Credit Men, throws light particularly upon the increasing share of bankruptcy losses born by unsecured creditors. This group, in the case of commercial failures, includes mainly manufacturers, wholesalers and jobbers.

During the fiscal year ending June 30, 1929, unsecured creditors lost \$610,804,811 through bankruptcies, while their losses during the previous year were \$580,950,615. During the last fiscal year they received only \$5.53 of every \$100 owed them by bankrupts, while during the previous year they received \$6.21. The decrease from the 1928 figure amounts to 12.3 per cent. Secured creditors fared proportionately better than during the previous year.

Total bad debt losses resulting from the year's 57,039 bankruptcies amounted to \$817,282,301. This figure compares with total bad debt losses of \$762,577,883 due to bankruptcies during the previous fiscal year.

One encouraging fact shown by the analysis is that the cost of administering bankrupt estates declined slightly last year. Court costs, fees and other expenses of administration took 22.42 per cent of assets realized, whereas during the previous fiscal year expenses of administration took 23.76 per cent of assets realized.

This reduction in administration costs, the analysis shows, is partially accounted for by a decrease in attorneys' fees. Last year attorneys got 7.39 per cent of the total amount realized from bankrupt estates, while during the previous fiscal year attorneys received 8.49 per cent of the total.

RICHMOND ADOPTS FIVE-DAY WEEK SCHEDULE

Commencing February 1, building tradesmen in Richmond will operate on the five-day week schedule, with time and one-half for work on Saturdays, Sundays and holidays. It is announced by the Building Trades Council of Contra Costa County.

Contractors interviewed by committees of the council declared they were in favor of the move, delegates of the council declare.

Common laborers employed in the building industry will not be affected by the change, it is said. Under the new plan, building workers will receive their regular daily pay, but will not be paid for Saturday. Time and one-half will be paid for all overtime.

INTER-RELATION OF AIRWAY AND HIGHWAY TRANSPORTATION

By C. H. Purcell State Highway Engineer

Airway transportation in the United States is a development which has occurred since the war. At first the only airway lines were mail lines operated by the federal government. Some attempts were made by private agencies to establish air routes but they failed for two reasons: the uneconomy of available aircraft and the lack of popular air consciousness.

In order that all of us may be more familiar with the subject I will briefly note some facts regarding the present status of airway transportation and the conditions which are responsible for this development.

In 1925 national legislation was effected authorizing the Postmaster General to advertise for bids on contract airmail routes wherever he deemed advisable. As a result, air mail service came into operation during 1926 on a network of air lines and by the latter part of 1927 the Post Office Department had relinquished its main line operation to private contractors.

Prior to this time and for a short time thereafter the government had operated a few trunk air mail routes.

This act terminated direct governmental participation in the operation of commercial air lines and paved the way for inauguration of transcontinental air express and passenger service.

Commencement of commercial airplane transportation in the United States may properly be considered as dating from the spring of 1926, when the first of the contract air mail routes began operations. Subsequently, air mail contracts have been awarded and operations started on more than a score of routes ranging from short-line feeders to coast-to-coast service, including a route from Miami, Florida, to the Panama Canal Zone, and routes into Canada and Mexico. That some of these contracts have proven profitable, thus placing airplane transportation in the United States on a sound basis economically, and therefore at an advantage over the subsidized lines of other nations, is indicative of the value that American business places on time and the premium it is willing to pay for rapid transit. Up to the commencement of contract air mail service in this country the capacity of airplane transportation to earn its way had not been demonstrated. None of the nearly 400 attempts to establish commercial air lines in various parts of the world had revenues from transportation business sufficient to meet operation costs.

The American contract air mail lines were soon to change this. Several of them became definitely profitable after a pioneering period much shorter than is usually required to establish new concerns in older and proven fields of business.

Another important piece of legislation was the Air Commerce Act of 1926 which placed upon the Department of Commerce responsibility for developing and maintaining airways, inspecting and licensing aircraft and pilots, and promoting aids to aerial navigation, including radio communication systems.

Airplane passenger service offering daily accommodations on fixed schedule the year around was unknown in the United States until operators of air mail contract routes began to develop passenger traffic as a source of additional revenue. The first effort in this direction was made in con-

Paper read at annual meeting of the American Association of State Highway Officials held at San Antonio, Texas, November 11 to 14.

nection with the air mail operation between Los Angeles and Salt Lake City in May, 1926, when this line was opened to passenger service. Subsequently, popular interest in commercial travel resulted in the development of extensive de luxe passenger service.

Passage of the transcontinental line from government operation to private hands also paved the way for nationwide air express service. At the inception of contract air mail service many of the operators offered a field-to-field package delivery which was not a very satisfactory accommodation and attracted only limited use. The possibilities of such a service had,

C. H. PURCELL
State Highway Engineer

however, been long under consideration by the express companies, whose officials, in the late summer of 1927, negotiated air express contracts with four of the principal air mail carriers. Early in 1928 this air express service was extended to most of the other air mail lines.

The principal services performed by airway transportation are mail, passenger, and express.

In industry, finance, law, agriculture, merchandising—wherever time is an element of any transaction—air mail may be turned to advantage. The air mail service of the United States now extends to practically every major city of the nation and correspondence desired for points 600 miles or more distant from post office of origin will be advanced several hours in delivery by air mail. The air mail line between Pacific coast points and New York City is only one-third of

the time required for rail mail. With completion of airway lighting, making night flying possible, there will be but one business day lost between Atlantic and Pacific coast points.

An interesting study deals with the concentration of population necessary to support an air mail operation. Circumstances of location, and accessibility through surface transportation agencies will, by influencing the comparative value of airway transportation, affect the air mail volume to be developed in any territory. Generally speaking, excepting where peculiar local conditions intensify the time-saving value, it appears that the air mail volume to be anticipated from any area of less than 300,000 population is insufficient to warrant flying daily both ways over a 200-mile airway. As airplane operation costs are lowered and the time between the airport and the delivery to the post office is reduced the benefits of air mail may be extended to smaller cities and communities nearer to each other.

At the present time, and until the traveling public becomes better acquainted with airway travel, airway passengers are recruited from three classes: Vacationists who want the experience of flight or desire a quick trip to a weekend resort; business men and women who can turn speed to profitable account; and individuals facing personal emergencies which demand their immediate presence at distant points.

As to the first group the question of speed is of small consequence excepting as it extends the range within which a limited vacation period may be spent or permits of more playtime by cutting down the time spent in travel. For instance, under presently available accommodations, a New Yorker desirous of visiting the Pacific coast and having but one week of vacation would find himself in this situation: By rail his entire vacation would be consumed in travel on the fastest trains and he would have to make closest connections in order to complete the journey on time. By airplane only 60 hours would be spent in travel, leaving four and one-half days for recreation. In other words, the airplane has its point of time brought transcontinental travel within range of a vast group of workers who have a minimum of leisure from the necessity of employment.

At one of the recent football games on the Pacific Coast a number of enthusiastic fans came to the game a distance of 400 miles by airplane while others used the airplane to come 35 miles from a nearby city in order to avoid the usual highway traffic congestion. More than 80 airplanes were parked near the stadium.

It is from the second and third groups, however, that under present costs air travel volume can best be developed on a sound basis. From the standpoint of business, in the main, it is conservation of business time that counts. That is, to offer an advantage the airplane schedule must be such as will make available to the user a greater portion of the business day. An airplane schedule which does no offer such saving over available surface transportation systems has little to attract the patronage of business. For instance, business will not pay a higher rate to travel by airplane between two points if its purpose can be equally well or better served by using the cheaper agencies of surface

transportation. With present available equipment travel between two cities twenty-four hours apart by rail can, by airplane, be accomplished in from six to eight hours. Daylight flying, of course, would so cut into the business day as to make this of small value excepting in emergencies; or in cases where such flight would permit making a night connection with other form of transportation, to final destination with consequent saving of an entire business day.

Night passenger service on the air mail lines has been fairly well patronized but widespread development of this must wait improved equipment and refined practice.

Passenger airplane service appealing to business for its patronage must be guided by two restrictions on operation. If it is to serve merely the speeding up of long haul travel it should aim at covering by flight a distance traversed by rail in approximately eighteen to twenty hours at least. That is, from six to eight hours of flying time are required to give any decided general advantage. If the service, however, is between two major cities, the expenditure of so much daylight time in the air plus the ground time between business districts and airports would consume the entire business day and destroy any general advantage. Three hours of flying plus one hour of ground travel appears to be the maximum that can be taken out of a business day. Such an arrangement leaves the air traveler four business hours, or half a day, in return for the extra charge made for airplane passage. It is therefore essential that facilities in such cases provide for night flying so that not more than one-half of the business day will be consumed in the air.

The personal emergency group, of course, have no uniform necessity. From the records of one leading operator it appears that most of this group charter special planes than travel on regularly scheduled operations.

Close observation or recent airplane development leads to the conclusion that the airplane may do or the long haul what the automobile has accomplished within the short haul range. Previously to the advent of the motor vehicle cities as we know them today were economically impossible. The speed and mobility of the automobile has extended metropolitan influences over a much broader range. The result has been that socially and economically city and county have merged. They retain separate identities only in political form and the present tendency is to eliminate the duplication of administrative effort by combining city and county governments.

It is entirely possible that the airplane, coming into general use, will extend this community interest over areas composed of what were heretofore parts of several states. Airplane passenger travel may bring points two hundred miles distant as close to city hall as are present outskirts of any large city, provided airport facilities and highways to the business center are adequate. Similarly, by annihilating distance, airplane carriers may draw the great cities of the nation together.

Express is the third class of commodity opened to American airway transportation. While the volume of this type of service has not yet reached large proportions, it may eventually become a very important function of air transportation.

Starting in 1926, the development of airplane transportation has been very rapid, until in 1929 there are approximately 30,000 miles of airways of which 11,000 miles are lighted for night flying.

There are established at this time in the United States in excess of 425 mu-

nicipal airports, 416 privately owned airports and 700 auxiliary airports. At the present time there are about 500 planes carrying mail in the United States. Forty-six air transport companies are flying 85,000 miles per day, about one-third of this mileage being flown during the night. Approximately 500,000 pounds of mail per month are being carried. Figures on passenger and express transportation for the entire country are not available. However, figures on the business of two of the largest airports on the Pacific coast—the Grand Central Terminal at Los Angeles and the Oakland Terminal at Oakland—may be indicative. At the present time the volume of traffic per month at the Oakland Terminal is approximately 13,300 passengers and 1500 packages of express; at the Grand Central Terminal the monthly traffic is about 5100 passengers and 500 packages of express.

I have very briefly sketched the present scope of airway transportation. In all classes of such transportation the time between start and end of journey, including the item consumed in traveling between the airports and city, is the prime factor.

Were the established airway routes superimposed on a highway map of the United States it would be seen that the airways very closely follow the routes of the main highways. This is only natural when it is considered that, in overcoming topographical barriers, it is as economical for an airplane to seek the low summit in crossing a mountain range as it is for an automobile; that air transportation business lies between centers of population as does highway transportation; that emergency landing fields must be near a highway in order to function to the best advantage; that highways properly marked may serve as navigation aids to the airplane navigator.

Airways are composed of terminal landing fields or airports, intermediate or emergency landing fields to be used by planes desiring to land before they have reached their terminal destination and other navigation facilities, such as lighting, marking, radio communication and meteorological service. Under the present plan the federal government has undertaken the primary care of the emergency landing fields, beacons and meteorological service, leaving the matter of terminal airports to the local authorities and private corporations.

The principal types of transportation to date have been waterway, railway, highway and airway. With respect to the manner in which they were and are being developed, they fall into two classes. Waterway and railway were developed by private corporations at their own expense, with some federal assistance in the case of the railways and canals. These two classes provide at their own expense all of their facilities such as boats, docks, trains, stations, roadbeds, etc. The highways and airways are of a different class. The public furnishes all the facilities except the vehicle in the case of the highway, and the airship and some of the airport terminals in the case of the airway. It appears, therefore, that development of airway transportation is a public matter and requires public or governmental direction and assistance similar to that extended to highway transportation.

To call attention to some specific air transportation problems relating to highways: In order for an airway transportation route to be justified the total elapsed time for transporting a commodity from a point from which the commodity could be shipped by other means to the ultimate destination must be shorter or else there must be a financial saving. At the present time there is no financial sav-

ing, therefore there must be a time saving. An airplane travels twice or two and a half times as fast as any other form of transportation, but there is from thirty minutes to one hour consumed between the airports and the ultimate destination. The saving in time may be accomplished by locating the airport as closely as possible to the center of population by constructing highways between the airports and the centers of population so designed as to reduce the time of reaching the center of population to a minimum, or a combination of both. There is also the opportunity of bringing adjacent communities tributary to an airport terminal by laying out arterial highways leading between them and the airport, thereby enabling them to have the advantage of faster transportation, and permitting the larger communities to be distributing points for airway commerce.

The constructing of the airports present problems very closely related to highway construction, involving as it does location of the port, grading of the site and surfacing of the ground from which the ships take off and on which they alight. The location of the port involves many problems common to highway location adjacent to large centers of population, such as property values, elimination of traffic congestion, etc.

With the development of vacation travel by airway, particularly the weekend travel to mountain lakes and isolated resorts, the future weekend congestion on recreational highways leading to resorts may be relieved, although there will be the necessity of providing suitable landing fields adjacent to such resorts. Such a development might result in postponing or even eliminating the necessity for constructing high type recreational roads leading to such resorts. Transportation of materials and supplies into these regions could be handled by means of a very low type of road.

With all the publicity and propaganda that has been put out favoring aviation, and the efforts of this country to make the people air-minded and to develop aviation, to date there has not been any extensive volume of private flying. At a recent meeting in Los Angeles of the State Chamber of Commerce, it was very clearly brought out by one of the speakers that airplanes are being rapidly manufactured but that the problem of where they have not been answered, and the factories are facing a serious overproduction.

Should private flying become popular and a machine of the flivver type with folding wings which could be run into one's garage be developed, small landing fields would be developed and these planes would have no effect on highway traffic other than to relieve congestion to a slight extent.

Illustrating the need for emergency landing fields for planes, there have been several instances in California where aviators were forced to land on the highway, one of these resulting in a wreck involving an automobile and a plane.

As indicating the trend of increase in flying compared with motoring, it is only necessary to compare the stage of improvement of the airplane at the close of the war and the number of private individuals using planes eleven years after the war with the progress and the increase in the volume of motoring during the same period.

The volume of traffic developed to date by airway transportation is not sufficient to make a very satisfactory determination of its effect on congestion of the highways leading to and from airports. There is no indication at this time that air transportation will not be a high-class transportation, supplemental to and with practically no effect upon the volume of highway transportation.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

San Francisco Board of Supervisors contemplates a bond issue for \$1,000,000 to finance completion of the civic center project. The bonds, if voted, would provide funds to extend Leavenworth street from McAllister to Fulton, the opening of Fulton street for its entire width to Market street, and the construction of a facade on the south side of Fulton street back of the Pantages Theatre Building.

Reno, Nevada, city council is considering adoption of the Uniform Building Code as prepared by the Pacific Coast Building Officials Conference. Heretofore, private building construction was under the supervision of the city engineer's office.

The supervisors of San Diego county have decided to require contractors on all future work for the county to agree not to use any alien labor. Action was precipitated by complaint that the contractor on a road job was employing only Mexicans, none of whom were citizens of the U. S.

A resolution favoring the restriction of the height of buildings to a maximum of 150 feet in the county of Los Angeles and all cities of the county was adopted by the Southern California Chapter of the American Institute of Architects at its regular monthly meeting held January 14.

According to newspaper dispatches from Philadelphia, General Refractories has acquired all of the refractories of Evans & Howard Fire Brick Company of St. Louis. The purchase includes not only plants and business, but also important clay banks in Missouri and Georgia. This gives General a total of 18 plants with a capacity of almost 1,200,000 brick a day and places it in a position to serve consumers throughout the country.

Councilman Virgil A. Martin is the author of the following resolution recently adopted by the Los Angeles city council: "Resolved, That the city engineer make a study of the available deposits of rock, gravel and sand in or close to the city of Los Angeles; also high-grade lime deposits suitable for the manufacture of cement, with the thought in view of establishing municipally owned rock, sand, gravel and cement plants. The city engineer to report his findings to the city council."

New construction costing between \$13,000,000 and \$15,000,000 will be undertaken during 1930 by the Great Western Power Company and the San Joaquin Light & Power Corporation. The total budget for the two companies will amount to \$21,000,000 for 1930, and \$3,000,000 more will be added if construction of a new project is undertaken. It was stated that while the detailed budget will not be obtained for about 30 days, it is well understood that \$13,000,000 is to be provided for new construction and another \$4,000,000 will be spent in the San Joaquin Valley for construction. Of the amount to be spent in the latter district, \$3,500,000 is for a projected steam generating power plant and \$330,000 for the new hydro plant at Merced Falls.

Definite progress is reported in the efforts to eliminate price cutting and bid peddling amongst Boston contractors. The advisory council of the Boston Building Congress appointed three architects and three sub-contractors to consult with the price cutting committee of the Building Trades Employers Association of that city. Through the efforts of these joint committees a draft of an agreement was submitted at the meeting of the advisory council of the congress. A form of agreement tentatively drafted by the price cutting committee of the Building Trades Employers Association is now being considered at meetings of various branches of the construction industry.

Returning from a meeting of the U. S. Bureau of Plant Industry, Geo. A. Root of the California State Department of Agriculture, announces every effort will be made by the state to keep out the white pine blister rust. The tree disease so far has not made its appearance in California though it exists in other western states. California has extensive white pine forests, extending from the Oregon line to Kern County, which would be jeopardized commercially by entrance of the pest.

Upon invitation a representative of the Division of Simplified Practice, U. S. Department of Commerce, recently met with the Board of Directors of the American Face Brick Association, during their annual convention at Edgewater Park, Miss., and presented to that group the history of the project on masonry opening sizes. The directors decided to appoint a committee to go into the matter of a possible change in the standard size of face brick in case such a step is essential to the success of the project. The conference appreciated the fact, that while the cost of such a change might be considerable, the savings effected through better masonry-openings would more than offset any increased costs.

Sebastopol, Calif., city trustees have adopted an ordinance providing for enforcement of the "National Electric Code" for electric wiring and apparatus, as recommended by the National Fire Protection Association, American Standard, July 19, 1929, by American Standards Association, effective January 1, 1930."

R. F. Arndt of the City Iron Works has been elected president of the Portland (Oregon) Builders' Exchange. Other officers are: vice-president, Glen Hord, recording secretary, V. H. Dent; treasurer, Victor Shearer; secretary, Helen Bartlett.

Bids will be considered February 14 by the Long Beach city council to erect a steel frame and reinforced concrete municipal auditorium, covering an area of 400 by 185 feet, seating 3,500 persons and costing in the neighborhood of \$1,400,000. Bids are being taken on a general contract with separate bids for plumbing, electric work, heating and ventilating.

Industrial & Financial REVIEW

By WILLIAM McMAHON, Pres.

William McMahon's Market Digest

There is a universal feeling among economists that 1930 will be as good for business as 1929, if not better. The vast amount of public improvements planned will give employment to labor, and manufacturing plants and public utility companies have ambitious programs of expansion.

Trade should be especially good, particularly among the chain stores. In fact, investors would do well to look carefully into the chain store units for opportunities. Whether times are good, bad or indifferent, the chain stores, dealing in the necessities of life, are certain to flourish.

In the year just closed, chain store companies increased their business about 13 per cent and the total public financing for the year amounted to approximately \$77,000,000, or less than half of that done in 1928. The growth of the chains in 1929 was accomplished almost entirely from earnings.

It would be playing more safe if securities in chains dealing in commodities other than necessities, were to be passed up. Also further expansion must be taken into account. There does seem to be almost enough chain grocery stores to supply a normal need, and chain drug stores seem to be bobbing up everywhere. As for the five-and-tens, it would be difficult to find sites for many more. Tobacco stores are overdone and this was the only chain that did not show progress in 1929.

In the last few years clothing chains have been forging ahead fast. Ready made clothing is a necessity and this sort of merchandise is even now selling too high. There is about 400 per cent more room for clothing chains further development and expansion than for any other chain known to merchandising, and net profits in sales of clothing run 90 per cent above those of grocery chains.

A good guide to go by in selecting a chain store stock for an investment is when the company excels other chain companies in market price times earnings, in book value, in ratio of assets to liabilities, in investment yield and in margin of earnings over dividends.

JOSEPH GEIGER OF STOCKTON, LONG ILL, PASSES

Joseph Geiger, president of the Geiger Iron Works of Stockton, and for many years a civic and industrial leader of that city, died January 14, following an illness of several months.

Geiger was born in Wisconsin April 27, 1874, going in 1902 to Stockton where, in 1904, he founded the Geiger Iron Works. Later he developed this into one of Stockton's most successful industries.

In addition to the Geiger Iron Works, Geiger was a sponsor of the Seller Iron Works, another promising Stockton industry, and played an important part in founding the Bellota Walnut Groves near Bellota, one of the early moves that has given San Joaquin country an important place in the walnut industry.

A leader in the Stockton Merchants, Manufacturers and Employers' Association, Geiger served as president in 1918, 1919 and 1920, and as a director from 1915 to 1927.

ALONG THE LINE

Whether he realizes it or not the engineer requires a considerable knowledge of salesmanship if he expects to be successful. Chas. S. James, San Francisco sales engineer, told members of the San Jose Engineers' Club at a recent meeting.

James M. Glynn, assistant city engineer since 1913, has been named city engineer of Reno, Nevada, succeeding the late Harry C. Chism. Mr. Glynn has been a resident of Reno since 1905 going to that city from Leadville, Colo. Except for twenty-six months, when he was in the army during the World War, Mr. Glynn has been continuously employed in the city engineer's office at Reno.

W. G. Frost, formerly connected with the staff of George A. Kneese, county surveyor of San Mateo County, has been appointed an assistant to the engineering staff of the city of San Mateo. The appointment was made by City Manager E. P. Wilsey.

Karl L. Tretten, civil engineer of Northern Sacramento, died in that city June 14. Mr. Tretten was 43 years of age and a native of California, residing in this state all his life.

C. E. Plummer has been made superintendent of power distribution and L. H. Parker is now assistant engineer of the Turlock Irrigation District, following the resignation of R. W. Shoemaker, for several years electrical superintendent for the district, who has accepted a position in Rio de Janeiro with Electric Bond & Share Company interests.

H. G. Butler, consulting engineer of San Francisco, has taken up his duties as consulting engineer for the Port of Sacramento project between Vallejo and Benicia. He will make an investment survey of the port, which it is estimated will cost \$2,225,000, including a refrigerating plant, grain elevators and wharves.

National Annual Spring Meeting of the American Society of Engineers will be held in Sacramento, April 23 to 26.

William C. Elsemore, 56, general contractor of Eureka, died in that city Jan. 13 after an illness of several months. He was a native of Eureka and a graduate of the Stanford University, where he was a classmate of President Herbert Hoover. Previous to 1922 he was associated in the contracting business with George Jacobs.

Geo. H. Sanford has been appointed city building inspector at Sebastopol, California.

Henry Klein & Co., Inc., Elmhurst, Long Island, N. Y., consolidated with the Improved Office Partition Co. and Drivewood Corp., has issued a portfolio of Drivewood interiors, showing the Drivewood line of mantels and a series of rooms in which Drivewood Period Mouldings have been used in various ways. On the back of each plate the booklet gives the source of inspiration of each room and something of the historical background.

TRADE NOTES

E. B. Bushnell, an authority on concrete form construction, formerly connected with the Portland Cement Association, is now associated with the Masonite Corporation of Chicago. His duties will be to acquaint engineers, builders and contractors with the company's presdwood product, used in concrete form work.

Establishment of a half-dozen plants to handle a wholesale and retail building material business in the San Joaquin Valley was announced with the filing of articles of incorporation of the Valley Materials Company, Ltd., in Sacramento. Headquarters will be in Fresno with branch plants at Visalia, Corcoran, Selma and other towns not yet selected. John A. Van Cleave of Exeter is president of the company. Iredell Jourdan of Selma, vice-president and H. W. Chutter, secretary. Chutter is also connected with the Jourdan Concrete Pipe Company. There will be no direct connection between the new company and the Jourdan Company, Chutter announces. The business will retail and wholesale sand, gravel, brick and other building material.

Alphonse E. Bell Corporation has four harbor sites under consideration at Los Angeles for a cement plant it proposes to erect. According to the plans of the company, the slurry from the quarry in the Santa Monica Mountains will be piped directly to the plant where it will be processed into cement.

John Lucas & Co., Inc., manufacturers of paint and varnish, has been merged with the Sherwin-Williams Co. of Cleveland, according to word from Philadelphia, Pa. The Lucas business will be continued at Philadelphia as a separate and distinct organization, according to announcement by Ernest T. Trigg, president of the Lucas interests.

John R. Lindsay Building Co., Inc., capitalized for \$25,000, has been incorporated in San Francisco. Directors are: John R. Lindsay, Dodd M. McRae and J. D. McRae.

Stockholders of the Citizens Lumber Co., operating yards at Selma and Kingsburg, Calif., at their annual meeting elected Robert Schoeneman of San Francisco, president; J. Milford Johnson of Kingsburg, vice-president; Virgil Schoeneman of Selma, secretary-treasurer and Chas. Schaffer, manager.

Metropolitan Construction Co., specializing in "good homes at low cost," has opened offices at 1825 San Pablo Ave., Oakland. C. J. Mahoney is manager of the company.

Walter P. Hyde Hardware Co. has opened quarters in the Warner Bros. Theatre Building at Fresno. The firm is operated by Walter F. Hyde, former department manager at Kutner's store in Fresno for eighteen years, and Ernest Huntzicker, prominent in the automobile industry in Fresno.

MacArthur Concrete Pile Corp., has opened a branch office in the Holbrook Bldg., San Francisco, with S. Burke Smith in charge.

HERE — THERE —
EVERYWHERE

San Joaquin Building Trades Council has started a movement for the five-day week for all crafts in the construction industry, declaring that "it is not a trade union policy, but an economic necessity."

A. E. Zimmerman was elected president of the Society of Engineers at the annual election held at a meeting in the Palace Hotel, San Francisco, Jan. 14. Other new officers include: H. T. Sutcliffe, vice president; Wm. G. Rawles, treasurer, and as directors Robert C. Clark and John C. Sheusner. D. E. Prenveille is a holdover director. A fourth is to be appointed to fill the vacancy caused by the elevation of Sutcliffe to the vice presidency.

Elmer Kier of Kier Bros. Const. Co., has been elected president of San Diego Chapter, Associated General Contractors, for 1930. R. E. Hazard is vice-president and M. A. Mathias, secretary. New directors are: Henry G. Fenton, M. H. Golden, Fred Jarboe, O. U. Miraciale and E. P. Watson, Jr.

John Cassaretto of San Francisco has been authorized by the Napa city council to dredge the Napa river within the Napa city limits. He proposes to remove 4000 cubic yards of gravel each month for a period of three years.

Three months' credit toward apprenticeship requirement will be granted by the San Jose carpenters' union to anyone completing the course in house carpentry at the San Jose Evening High School vocational department. The course is under the supervision of Ambrose Nichols, city director of vocational education. Two evenings a week of trade extension work in the theory of carpentry will be given by M. L. Blanchfield after February 3.

J. M. Hotchkiss of Hobbs, Wall & Co., San Francisco, was re-elected president of the California Redwood Association at the recent annual meeting. L. C. Hammond of the Hammond Lumber Co., San Francisco, was re-elected president and R. F. Hammett, San Francisco, was re-elected secretary-manager. Reports submitted at the meeting showed that during the first 11 months of 1929 sales of redwood were 12 per cent greater than for the corresponding period in 1928.

Selection of February 3 as the date and Memphis, Tenn., as the place for the trade practice conference of the common brick industry has been announced by the Federal Trade Commission, Washington, D. C. It is expected that manufacturers representing 75 per cent of the total production of the industry will attend to discuss present trade practices with a view to adopting rules for better regulation in the industry.

W. F. Hart was elected president of the National Association on Practical Refrigeration Engineer of California, No. 11, at the annual meeting recently held in Watsonville. Other officers are: A. E. Pellett, vice-president; A. Burnell, secretary and treasurer, and Ed. Torres, sergeant-at-arms. Three year director, Fred Bobby.

ESTIMATING BRICKWORK

Most contractors and builders have their own pet ideas on how to estimate the quantity of brick required for a certain job. In any case, the following rules as published in Permanent Color will be of service:

The dimensions of standard size brick are $8\frac{1}{4} \times 3\frac{3}{4} \times 2\frac{1}{4}$ inches for rough texture brick and $8\frac{1}{4} \times 3\frac{3}{4} \times 2\frac{1}{4}$ inches for smooth brick. While the above are standard sizes, brick may be slightly smaller or slightly larger, depending on the amount of shrinkage due to burning.

The following table is based on standard size brick and contemplates one tier or vertical layer of brick in a wall:

Standard size brick required per square foot for running stretcher bond: Thickness of mortar

Joint, ins. per

1/4	3/4	1/2	3/4	1/2	3/4	1
-----	-----	-----	-----	-----	-----	---

No. brick per

sq. ft.

7% 7 1/2 6 3/4 6 1/2 5 3/4 5 1/2

To determine the number of standard size brick required in a building, you first get the number of square feet in the surface of the wall, then deduct all openings larger than 10 square feet; multiply the balance by the number of brick for each square foot according to the above table, taking into consideration the thickness of the mortar joint. The result will be the number of brick required for one vertical layer, for standard running bond work.

As an example, suppose the total wall area is 2,450 square feet, and the openings larger than 10 square feet total 475 square feet, you would have a difference of 1,975 square feet. If you

use the usual one-half inch mortar joint, you will see by the table that $6\frac{1}{2}$ brick per square foot will be required 14,638, or say 15,000 brick. If by $6\frac{1}{2}$, which will show that you will require 14,638, or say 15,000 bricks. It is always well to have a few too many rather than not enough brick on the job, and it is therefore suggested that you add a small percentage to your actual figured requirements for loss, waste, etc.

The term "Stretcher" refers to a brick laid with the side out, while a "Header" refers to a brick laid with end out. Bonds other than "Running" such as "Flemish," "Dutch," etc., are combinations of headers and stretchers. When the brick for headers are broken in half, thus making two headers, no additional brick will be required for other bonds, so that the above example would then hold good regardless of the bond used.

To estimate the number of face brick required for piers or chimneys, use the following table:

Number of bricks required for each lineal foot of piers or chimneys, when one-half inch or five-eighths inch mortar joints are used:

Size of pier, inches

8x3 8x12 12x12 12x16 16x16 20x20

No. of brick

9 14 18 24 28 36

Size chimney

9x9 8x9 9x13 9x13 9x13

flue Sng Dbl Sng Dbl Dbl

No. brick 27 45 22 54 50

Example: If you wish to determine

the number of brick in a pier 16x16

inches square and 8 feet high, multiply

28x8, giving 224 brick required.

SPIRIT AND THEORY OF MECHANICS LIEN LAW

By HARRY C. WESTOVER, Attorney-at-Law

This is the second installment of a series of articles written especially for Building and Engineering News by Mr. Westover on the California Mechanics' Lien Law. Other installments will appear from time to time.

Mr. Westover is a specialist in handling cases on the lien law in the Southern Section of the state and is a member of the Orange County Builders' Exchange.—Editor.

When the first Mechanics Lien Law was enacted in this country it was a new experiment in law and was first enacted by Maryland in order to stimulate the building of the city of Washington. Prior to the enactment of the various Mechanics Lien Laws, there had been in the civil law a maritime lien; that is, parties who worked upon or furnished materials to boats were entitled to liens for the work performed and for the materials furnished.

Since the first enactment of the Mechanics Lien Law there has been an attempt made by the various legislatures of the country to enact Mechanics Lien Laws which would afford protection to laborers and materialmen so as to assure them pay for services rendered or for materials furnished.

Such laws were intended to aid contractors, materialmen, mechanics and laborers to secure the just or contract price for materials furnished, money expended or labor done upon the property on the theory that the materials used in or labor expended on the specific property had enhanced its value and that it was only just and equitable that the materialman or laborer

should pursue the results of his material or labor in order to secure a just compensation; and because the building is the result of such labor and material furnished, it is not just that the owner should succeed to that labor and material without compensating the persons furnishing such labor and materials.

The mechanics lien was meant, according to the statement of our Courts, as "A protection of laborers and materialmen on the theory that laborers and materialmen have an equitable right to follow their labor and materials into the buildings of which they have become a component part and to have a lien upon such buildings because they contain such labor and materials." The Mechanics Lien Laws were passed for the purpose of giving persons of ordinary intelligence the means by which they may secure themselves for their work done and materials furnished.

Although the Mechanics Lien Law was intended to give persons of ordinary intelligence a means of protecting themselves, nevertheless in many instances it takes a person of more than ordinary intelligence to find out what the various lien laws mean and how to protect those who have furnished either labor or material. Lien law work has become a specialized work in the various communities and in nearly every community there will be found someone who gives more than ordinary amount of time to the problems of mechanics, laborers and materialmen.

There are many persons who are in-

terested in the operation of the Lien law and as usual, when an attempt is made to satisfy more than one party or more than one group of parties, the law is not satisfactory to all parties who are effected thereby. All parties who are effected by the various lien laws are not satisfied with the laws as they now exist and attempts are made at every session of the Legislature to change the law in one or more particulars. The various lien laws were written with the idea of fairness to all parties and although in some instances the law may not be fair and equitable, in the majority of cases they who follow the Lien law will discover that they are given adequate protection. There are three classes of people who are interested in the Lien law. First, of course, are the contractors, laborers and materialmen. The second class of people interested in the Mechanics Lien Law are the property owners; and the third class are the owners of mortgages or trust deeds.

It has been difficult to evolve a law that is satisfactory, just and equitable not only to contractors, laborers and materialmen, but also to the property owners and those persons who hold mortgages or trust deeds upon the property which is to be improved. It was a question of getting all of the interested parties together and working out a law which would not be perfect as far as any one special group was concerned, but which would be satisfactory substantially to all three parties. It was hard to satisfy all parties in the enactment of such a law and yet more than a passable job has been done by the Legislature of the State of California in bringing the interest of such various parties to an equitable solution.

The Mechanics Lien Law is as much a part of the building industry as a law of mortgages or trust deeds, the law of conveyances or any tool used by contractors, laborers or materialmen. Contractors, laborers, and materialmen should know how to use the Mechanics Lien Law as well as any other tool that they use in either performing labor or furnishing materials. Property owners should also know the Mechanics Lien Law in order to adequately protect their rights and the same holds true as far as trust deed and mortgage holders are concerned.

Section 3527 of the Civil Code of California provides: "The law helps the vigilant before those who sleep on their rights."

ASPHALT PRODUCERS FORM INSTITUTE

The Asphalt Institute, a new organization whose membership is made up of the producers of asphalt and asphaltic oil responsible for more than ninety per cent of the production east of the Rocky Mountains, succeeded January 1. The new organization will conduct extensive educational and research work pertaining to all the uses of asphalt and asphaltic oils.

The Asphalt Association was composed of producers and manufacturers but it confined its activities entirely to paving asphalts. The various branches of the asphalt paving industry will now be realigned more effectively in appropriate organizations and already the hot-mix paving contractors have formed an association known as The Asphalt Paving Association, of which Mr. Frank J. Slabbe, Engineering Bldg., Chicago, Illinois, is secretary, and Frank O. Hodson, a leading contractor of Gary, Indiana, is president.

Headquarters of the new institute will be maintained at 441 Lexington Ave., New York City.

CLASSIFIED BUILDING PERMITS FOR SAN FRANCISCO YEAR 1929

The following is a classification of building permits issued in San Francisco during the calendar year 1929, as compiled by the Bureau of Building Inspection, Department of Public Works:

Classification	No. of Buildings	Est. Cost	No. of Families
One-family dwellings	1,236	\$ 6,063,211	1,236
Two-family dwellings	94	796,490	188
One- and two-family dwellings with stores and shops	11	104,500	18
Multi-family dwellings (Apartments)			
Class A	6	1,827,000	396
Class B	4	374,800	112
Class C	22	2,448,500	689
Class F	87	2,253,700	879
Hotels	7	1,399,500	
Other non-housekeeping dwellings, clubs, etc., with bedrooms	5	77,326	
Amusement clubs, association buildings without bedrooms	5	26,300	
Churches, Parish halls, Sunday schools	3	279,000	
Factories, including bakeries, laundries, etc.	30	1,023,465	
Public garages	7	94,000	
Private garages	80	81,193	
Gas and service stations	40	108,350	
Institutions, hospitals, etc.	1	700,000	
Office buildings, including banks	10	2,967,600	
Public buildings, city and state	10	2,186,120	
Sheds	26	20,090	
Stables and barns	4	32,700	
Stores, warehouses and other mercantile buildings	98	3,267,550	
Additions, alterations and repairs			
Housekeeping dwellings	2,346	1,419,606	
Non-housekeeping dwellings	76	396,105	
Non-residential buildings	1,280	2,853,164	
Installations, signs and billboards	1,615	255,708	
Totals	7,120	\$33,682,025	3,518

\$682,674,000 FOR CONSTRUCTION IN CALIFORNIA DURING YEAR 1930

Work and not words constitute California's industrial and business program for 1930, Frederick J. Koster, first vice-president of the California State Chamber of Commerce, told members of the Board of Directors of that organization meeting in Los Angeles last Friday.

Answering President Hoover's challenge for construction to assure a continuance of normal business conditions in 1930, the state of California and its counties and municipalities have pledged a public works construction program of \$202,230,000 in 1930, public service corporations have announced a constructive program of \$180,444,000 and the volume of industrial, commercial and residential building included in municipal permit records, is expected to total about \$200,000,000, Koster declared.

"The real task before our organization and other public bodies in California is to make certain that these optimistic prospects materialize, to remove possible obstacles and delays on important projects, and give impetus to latent plans which may have been overlooked in the first survey," Koster said. "If this is done thoroughly, California's public works and building program may exceed the \$682,674,000 total now in prospect for the coming year."

Koster quoted a special study by the Research Department of the California State Chamber of Commerce, which listed most recent estimates of 1930 construction expenditures in California as follows:

Public Works—	
State of California	\$ 42,900,400
County governments	45,451,473
Municipalities	110,468,250
Public Utility Extensions—	
Railroad	\$ 53,000,000
Gas and electric	82,200,000

Telephone	45,244,000
Volume of Building—California Cities	
New factory buildings	\$ 54,000,000
Other commercial and residential	216,000,000
Total	\$682,674,000

"These figures," Koster said, "represent reports from public and private interests, but the California State Chamber of Commerce, and cooperating organizations, are using every means to find out latent projects which may be developed this year."

"The State Chamber of Commerce has mobilized financial, industrial, commercial and agricultural interests of the State in a concentrated and coordinated drive, in order that the maximum amount of sound construction be undertaken at the present time."

In addition to his forecast of activity for 1930, Koster reviewed California manufacturing activity for 1929, which in many industries showed increases of "outstanding proportions."

He said: "In California's manufacturing industries, which contribute 48 per cent of the state's basic income from production, 1929 records of employment indicate an increase of 6.4 per cent in the average number of wage earners, compared with the previous year, bringing the estimated total to 278,559 employees. The increase in industrial payrolls during 1929 is estimated as about 9 per cent, bringing the total up to \$412,300,000. Output and value of products were in proportionate increase."

"Among the larger individual industries, iron and steel, motor vehicles, ship-building, rubber tires, oil refining, printing and paper, clothing, fish canning and dairy products industries have shown increased employment and activity during 1929 as compared to 1928, some of which have been of outstanding proportions."

SCIENTIST TO BE CHOSEN FOR \$10,000 AWARD

The largest single monetary award in America for scientific accomplishment has been created by Popular Science Monthly, which, beginning this autumn, will confer an annual prize of \$10,000, accompanied by a gold medal, upon the American citizen who has been responsible, during the preceding year, for the achievement in science of greatest potential value to the world.

It is explained that the award is intended to heighten the interest of the American people in those conquests of the laboratory and the workshop which benefit the entire community and to focus attention upon the many scientific workers who, without thought of personal profit, toil to better man's control over his physical surroundings.

The Popular Science Institute has enlisted twenty-four leaders in American science to serve as a Committee of Award. The distinguished men comprising the Committee of Award include the following members of the American Society of Mechanical Engineers: Prof. Collins P. Bliss, director, Popular Science Institute; Dr. Harvey N. Davis, president, Stevens Institute of Technology; Charles F. Kettering, president, General Motors Research Corporation, Dr. Arthur D. Little, president, Arthur D. Little, Inc.; Dr. Elmer A. Sperry, chairman, board of directors, Sperry Gyroscope Co.; Dr. Samuel W. Stratton, president, Massachusetts Institute of Technology; Henry Herman Westinghouse, chairman, board of directors, Westinghouse Airbrake Co.; Dr. Albert E. White, director, Department of Engineering Research, University of Michigan; and Orville Wright, co-inventor of the airplane.

A. S. M. E. PETROLEUM DIVISION PROGRAM

The Petroleum Division of the American Society of Mechanical Engineers, organized in 1925, has a registration of 1300 and plans an ambitious program for its annual meeting in Tulsa, Okla. This will be held in October, 1930, at the time of the Petroleum International Exposition.

The division also plans the formation of special committees to study special mechanical engineering problems, as follows: Production, Oil Transportation, Gas Transportation, Refining, Lubrication Engineering, Utilization as a Fuel.

The Petroleum Division intends to co-operate closely with the Technical Divisions of the American Petroleum Institute and other organizations that are interested in the petroleum field.

On February 13, bids will be considered by the California State Highway Commission to construct a reinforced concrete bridge, about 5 1/2 miles north of Yreka, Siskiyou County. It will consist of one 200-ft. open span and three 40-ft. girder approach spans.

Sierra Construction Co. Ltd., recently organized with headquarters at 235 Third Ave., San Mateo, is in the market for catalogs and pamphlets on all types of building materials and equipment. Niles P. Petersen is president of the company, Enri E. Cavas, vice-president, and Wm. J. Harbin, secretary-treasurer. The company will engage in a general contracting business.

BOSTON TO HAVE STUDY OF PREQUALIFICATION

The Boston Building Congress was propounded two questions by Leonard C. Wason, president of the New England Branch of the Associated General Contractors at a meeting where the subject of prequalification of bidders was under discussion. Mr. Wason reviewed the history and economic necessity for prequalification on public work and put the questions as follows: 1. Does the Boston Building Congress approve of the fundamental proposition of the prequalification of bidders? 2. Does the Boston Building Congress approve of a bill introduced into the legislature of Massachusetts to provide for such procedure?

After considerable discussion, the congress voted to appoint a committee to make a further study of the subject and to report a form of recommendation for early action on the part of that body.

URGES U. S. TO BUY BONDS FOR RECLAMATION - DRAINAGE

Acting at the request of the Irrigation Districts' Association of California, Congressman Henry E. Barbour of Fresno, has introduced a bill whereby the federal government would establish a revolving fund of \$100,000,000 to be used as loans to drainage and reclamation districts to pay off indebtedness incurred in constructing such projects.

The fund would be administered by the federal farm loan board.

The bonds of irrigation and irrigation districts would be taken over and would be retired at a rate of interest equivalent to the rate the government would have to pay for the money.

It is estimated that in the San Joaquin Valley alone there are 29 districts with outstanding bonds of \$39,838,537.

Several similar proposals already have been laid before this session of congress.

JOINT HIGHWAY DISTRICT ACT TO FACE COURT TEST

Proposals to amend the state joint highway district act to clear up legal technicalities and to provide more funds for counties in such districts were discussed at a meeting of the legislative committee on the subject with county officials and representatives of interested organizations in Sacramento, Jan. 18.

A friendly suit to test the act in the state supreme court will be filed by Donald Young and Mrs. Mary Schwab, attorneys for joint highway district No. 9, comprising San Francisco, San Mateo and Santa Cruz counties, against San Mateo County, it was announced.

The present law is defective, speakers declared, because there is doubt as to the legality of bonds issued by joint highway districts to finance highway construction.

The committee will hold another meeting in Los Angeles February 14, Chairman F. W. Luttrell announced.

OAKLAND WATERFRONT HIGHWAY SURVEY AUTHORIZED

Ezra W. Decoto, state railroad commissioner, announces the appointment of an engineering committee to study the entire problem of highway access to Oakland's western waterfront, in order that the commission may consider the broader aspects of that problem in connection with the proceedings now pending before it, looking toward a separation of grades between Seventh street and Southern Pacific Company's tracks.

At the hearing in this matter on January 9th, Commissioner Decoto made the suggestion that such a committee be appointed and this suggestion was concurred in by the interested parties. The personnel of this Engineering Committee, as announced by Commissioner Decoto, consists of the following:

Chairman, A. G. Mott, Chief Engineer, California Railroad Commission; George N. Randall, City Engineer, City of Oakland; G. B. Hagardt, Chief Engineer, Port of Oakland; E. G. Wilcox, Oakland Chamber of Commerce; J. P. Dunnegan, Assistant Engineer Southern Pacific Company; C. C. Cottrell, Manager, Good Roads Bureau, California State Automobile Association; H. P. Bell, Chief Engineer, Key System Transit Company.

The committee will proceed, as promptly as possible, to carry out its instructions for a complete survey of the street and highway situation affecting Oakland's western waterfront, in order that the results of the study may be made available at the next hearing on the Seventh street grade separation, set for April 8.

INDIANA CONTRACTORS MUST FILE AFFIDAVIT

Loose credit is being eliminated in Indiana by the enforcement of the contractor's law which provides that a contractor, before receiving final payment on any job, must file an affidavit that all material bills have been paid. Any contractor failing to file such an affidavit is subject not only to a fine, but to imprisonment.

NO COMPENSATION FOR DISOBEDIENT FOREMAN

A recent rule of the Ohio Industrial Commission relates to one of the most frequent causes for fatal accidents to be met with in the construction industry. A foreman for a general contractor has been ordered by superintendents and employers of the firm to advise all employees to keep away from and refrain from using the hoist when it was in motion. Riding the hoist from floor to floor was expressly forbidden and warning signs had been posted by this foreman giving notice of such order. The foreman himself, however, rode the hoist and in doing so met an accident which caused his death.

The Highway Industrial Commission in considering an application for award maintained that the decedent having violated the positive instructions and orders of the employers had departed from his employment by stepping on the hoist to ride and consequently the injury to him was not received in the course of his employment.

Whether such an interpretation of violation of orders can be applied to workmen other than foreman or superintendents is not known. If such a decision were established generally it would have a salutary effect especially as regards riding of hoists and sticking heads into elevator shafts to see where the hoist is. A report from New York City indicates that the only three fatal accidents last month were suffered by employees whose curiosity to see where the hoist was operating coincided with the arrival of the hoist at the point where they put their heads.

Berkeley, Calif., reports the issuance of 301 building permits for homes during the year 1929, the improvements being estimated at \$1,402,600 as compared with 376 homes in 1928, these costing \$1,888,261.

MILLWORK INSTITUTE NAMES FIVE STANDING COMMITTEES

The Millwork Institute of California has appointed five standing committees. The trade promotion committee will have full charge of the trade promotion program and the glass committee will work with the central office in securing information for a special list of stock sizes for California markets.

Members of the committees are: Trade promotion, standards and certification—A. W. Bernhauer, chairman, Fresno Planing Mill Co., Fresno; H. C. Senter, Pacific Door and Sash Co., Los Angeles; Vice—Chairman, Frank Graves Sash, Door & Mill Co., Los Angeles; C. W. Lannom, Vice-Chairman, Lannom Bros. Mfg. Co., Oakland; J. G. Kennedy, Pacific Mfg. Co., San Francisco; H. C. Weyler, Boyd Lumber & Mill Co., Santa Barbara.

Millwork schedules—A. J. Todhunter, chairman, Hammond Lumber Co., Los Angeles; E. A. Nicholson, Pacific Door & Sash Co., Los Angeles; C. E. Morrison, Pacific Mfg. Co., Los Angeles.

Membership, dues and subscriptions—E. J. Nutting, chairman, Herring & Nutting, San Francisco; D. N. Edwards, The Oakland Planing Mill, Inc., Oakland; H. C. Treff, Southern California Hardwood & Mfg. Co., Los Angeles; C. G. Chipchase, Friend and Terry Lumber Co., Sacramento; J. W. Shrimp, Cresmer Mfg. Co., Riverside.

Board meetings—A. W. Bernhauer, chairman, Fresno Planing Mill Co., Fresno; H. C. Senter, Pacific Door and Sash Co., Los Angeles; C. W. Lannom, Lannom Bros. Mfg. Co., Oakland; E. J. Nutting, Herring & Nutting, San Francisco; A. J. Todhunter, Hammond Lumber Co., Los Angeles.

Glass sizes—Ray Garner, chairman, Hammond Lumber Co., Los Angeles; C. E. Senter, Pacific Door and Sash Co., Los Angeles; Wm. Hayward, Pacific Mfg. Co., Santa Clara; 7. A. Boell, The California Door Co., Oakland. The legislative committee will be named later.

ARCHITECT WINS FEE ON ABANDONED JOB

"If the lowest bid is not accepted because it exceeds the amount which the owner proposed to spend and the house is not built, the architect is not entitled to the agreed percentage on such a bid.

"However, the architect is entitled, notwithstanding the abandonment of the project, to the agreed percentage on the maximum cost which the owner intended to spend and within the limits of which he wanted the architect to keep."

These principles were laid down by Judge Leon R. Yankwich of the superior court of Los Angeles county, in awarding a judgment of \$1300 to Marbury Somervell of the architectural firm of Somervell & Putnam against E. B. Rivers, produce merchant, for balance of fee claimed for preparation of plans for a residence in the Botanical Garden tract. Rivers contested the suit, claiming he had already paid the architect \$2000 for plans which he could not use because the lowest bid exceeded the maximum amount he desired to spend by \$12,500 and the residence had not been built.

National advertisers will spend \$20,000,000 more in advertising in 1930 than they did in 1929, according to the Association of Advertisers. A survey of 291 of the country's largest national advertisers indicated that more than one-half were increasing their 1930 appropriations, the percentage of increase varying from 5% to 300%.

Building News Section

APARTMENTS

Sub-Contracts Awarded.
APARTMENTS Cost, \$40,000
BURLINGAME, San Mateo Co., Cal.
El Camino Real bet. Broadway and
Carmelita Avenue.

Two-story frame and stucco apart-
ment building (6 2-room and 4 3-
room apts.; Spanish type.)

Owner and Builder—Harry H. Randles
1029 Paloma Ave., Burlingame.

Will contain all modern conven-
iences, including steam heat and hot
burning plant, refrigeration, oil
water, etc.

Concrete—C. C. Sayre, San Francisco
Lumber and Mill Work—Wisnom
Lumber Co., San Mateo.

Sub-bids are being taken on other
portions of the work.

Plans Being Prepared.
APARTMENTS Cost, \$18,000
CASTROVILLE, Monterey Co., Cal.

Two-story and basement frame and
stucco or brick apartment build-
ing (13 rooms; Spanish type).

Owner—Mrs. Franco.
Architect—W. H. Weeks, Hunter-
Dulin Bldg., San Francisco; 1736
Franklin St., Oakland, and Bank
of Italy Bldg., San Jose.

Will contain large dining room,
lobby, booths and banquet rooms. The
plans will be ready for bids in about
three weeks.

Sub-Figures Being Taken.
APARTMENTS Cost, \$275,000
LOS ANGELES, Cal. No. 521 S.
Manhattan Place.

Eight-story Class A reinforced con-
crete apartments.

Owner and Builder—John C. Dawson,
Fremont and First Sts., Los An-
geles.

Architect—E. Van Den Hoven, Rowan
Bldg., Los Angeles.

January 18, 1930
Sub-Bids Being Taken.
APARTMENTS Cost, \$175,000
SAN FRANCISCO. S Ellis St. E Hyde
Street.

Six-story Class C steel frame and
concrete apartments (50 2-room
apts.)

Owner and Builder—J. G. Kincannon,
1306 Geary St., San Francisco.

Architect—H. C. Baumann, 251 Kear-
ny St., San Francisco.

January 18, 1930
Sub-Bids Being Taken.
APARTMENTS Cost, \$150,000
SAN FRANCISCO. Ellis St. E Hyde
Street.

Six-story Class C steel frame and
concrete apartments (40 2-room
apts.)

Owner and Builder—J. G. Kincannon,
1306 Geary St., San Francisco.

Architect—H. C. Baumann, 251 Kear-
ny St., San Francisco.

Sub-Figures Being Taken.
APARTMENTS Cost, \$290,000
LOS ANGELES, Cal. 933 S Lake St.
Seven-story and basement class A re-
inforced concrete apartments.

Owner—Rex R. Obuchon.
Architect—Arthur Le Brun, Ferguson
Bldg., Los Angeles.

Contractor—Control Engineers, 1111
Architects' Bldg., Los Angeles.

Plans Completed.
APARTMENTS Cost, \$60,000
SAN FRANCISCO. Ninth Ave. near
Lake Street.

Three-story and basement frame and
stucco apartment building (12 4-
room apts.)

Owner and Builder—H. O. Lindeman,
619 27th Ave., San Francisco.

Architect—Irvine & Ebbets, Call Bldg.,
San Francisco.

Sub-bids will be taken shortly.

Contract Awarded.
APARTMENTS Cost, \$600,000
SEATTLE, Wash. Spring Street and
Minor Ave.

Thirteen-story and basement reinf.
concrete apartments (50 4- 5- 6-
room apts., 250 rooms in all).

Owner—Gainsborough Inv. Co.
Architect—Earl W. Morrison, Lloyd
Bldg., Seattle.

Contractor—Howard S. Wright, 2410
First Ave., Seattle.

Face brick exterior trimmed in ter-
ra cotta; 50-car garage in basement.

Sub-Bids Wanted.
APARTMENTS Cost, \$200,000
OAKLAND, Alameda Co., Cal. E.
Twelfth St. near Second Ave.

Seven-story Class C brick apartment
and store building (125 rooms, 3
stores).

Owner & Builder—L. J. Newton, 1130
First Ave., Oakland.

Architect—J. W. Oliver, 3720 Foothill
Blvd., Oakland.

Sub-bids are wanted on brick work,
rough lumber, finish lumber, mill work,
tile, plastering, painting, furnishings
and furniture.

Plans Being Figured.
ALTERATIONS Cost, \$10,000
SAN FRANCISCO. SW Broderick and
O'Farrell Streets.

Alterations and additions to present
3-story frame and stucco apart-
ment building (41 rooms).

Owner—E. W. and A. M. Bender, 2232
O'Farrell St., San Francisco.

Architect—Not Selected.

Work to be done involves plaster-
ing, steam heat, hardwood floor, new
wall beds, new roof, painting, stucco-
ing, plumbing (complete bathroom fix-
tures), tile flooring and tiling.

Sub-Contracts Awarded.
APARTMENTS Cost, \$525,000
OAKLAND, Alameda Co., Cal. Jack-
son St. back of Women's City
Club.

Fourteen-story class A reinforced con-
crete apartment bldg. (145 apts.;
8-room bungalow on roof, and 60-
car garage in basement).

Owners—Mr. and Mrs. Henry G. Hill,
1428 Alice St., Oakland.

Architect—Miller & Varnecke, Finan-
cial Center Bldg., Oakland.

Contractor—Chas. S. Mabrey, 730 1st
National Bank Bldg., Oakland.

Rough and Finish, General, Ornament-
al Iron and Glazing—R. W. Lit-
tlefield, 337 17th St., Oakland.

Tile, Marble and Roofing—Malott and
Peterson, 3221 20th St., San Fran-
cisco.

Plastering—Wm. and A. Gilmour, 666
Mission St., San Francisco.

Painting—Raphael Co., 270 Tehama
St., San Francisco.

Electric Wiring—Matson-Seabrooke
Co., 4115 Broadway, Oakland.

Heating, Plumbing and Sheet Metal—
George Schuster, 4712 Grove St., Oak-
land.

Site is 85x130 ft. Plans call for ten
room, dining room and lounge on the
ground floor.

Plans Being Completed.
APARTMENTS Cost, \$17,000
BURLINGAME, San Mateo Co., Cal.

Two-story reinforced concrete apart-
ment and store building (4 2-room
apts. and 3 stores).

Owner—Carl Torello, 1145 Drake St.,
Burlingame.

Architect—E. L. Norberg, 680 Market
St., San Francisco.

Bids will be taken in one week.

Plans Complete.
APARTMENTS Cost, \$65,000
OAKLAND, Alameda Co., Cal. E 16th
St. and 27th Ave.

Three-story frame and stucco apart-
ments with concrete basement (24
2- and 3-room apts.)

Owner and Builder—Paul H. Haller,
3808 West St., Oakland.

Architect—Ernest Flores, 1301 Frank-
lin St., Oakland.

Sub-bids will be taken shortly.

Plans Being Prepared.
APARTMENTS Cost, \$16,000
SAN JOSE. Santa Clara Co., Cal. 1st
and Oak Sts.

Two-story reinforced concrete and
frame apt. and stores (4 3-room
apts. and 2 stores).

Owner—Mike Sasa, San Jose.

Architect—Chas. McKerzie, Bank of
San Jose Bldg., San Jose.

Plans will be ready for bids in ten
days.

Contract Awarded.

SONOMA COUNTY, Cal.—Pacific
Gas & Electric Co., 245 Market St.,
San Francisco, will spend \$34,250 in
providing increased electric service to
Russian River resorts. Plans are be-
ing prepared to rebuild the transmis-
sion line from the Green Valley sub-
station into Guernewood Park.

SEATTLE, Wash.—City proposes to
bond for \$10,000,000 to finance exten-
sions to municipal light and power
systems.

TACOMA, Wash.—Engineering De-
partment of Board of Public Works
is completing plans for proposed \$2-
000,000 steam generating plant. Bids
will be asked shortly for the turbo
generator and accessory apparatus,
including transformers, oil circuit
breakers, switch gear, etc. The plant,
developing 25,000 kilowatts, will sup-
plement the hydro-electric develop-
ments at LaGrande and Lake Cush-
man, plants owned and operated by
the city of Tacoma.

HAYWARD, Alameda Co., Calif.—Great Western Power Co. plans construction of a \$1,500,000 sub-station near Hayward. Connecting with the main service system of the company through high power transmission lines from a switching station to be installed in the Moraga valley, the Hayward substation will handle the distribution of power for a wide area, including Hayward, San Leandro and a large part of East Oakland.

Auxiliary transmission and distribution lines to be built make up a large part of the construction project. Hayward sub-station is to be closely connected with the distribution lines of the company in Oakland. Surveys are under way, and the new facilities are expected to be ready for operation by this summer.

The transmission line which will connect Hayward with the Moraga valley switching station is to be extension of the 100,000-volt main transmission system of the company. Over this double-circuit, power will feed into the new sub-station from Great Western Power's system in the Feather river.

LOS ANGELES, Calif.—Until 10 A. M., February 5, bids will be received by D. P. Nicklin, purchasing agent, Los Angeles water and power bureau, 207 S. Broadway, for cable terminal and fittings, etc., under Adv. 1230.

UNEMPLOYMENT SURVEY PLANNED BY UNION LABOR

Members of the executive council of the American Federation of Labor on January 18 reviewed the results of their conference recently concluded at St. Petersburg, Fla.

Outstanding among the decisions of the council was the agreement to make a survey on the unemployment situation in connection with the national census of this year.

William Green, the president of the federation, estimated 3,000,000 laborers were out of work and suggested that consideration be given efforts to bring about a gradual reduction in the hours of labor, either by the establishment of a universal eight-hour day or a five-day week.

In the proposed railway consolidation plan of the Interstate Commerce Commission Green saw the possibility of adding 1,600,000 transportation workers to the ranks of the unemployed and said organized labor would ask that contractual relations between railroads and employees be protected.

The council discussed legislation compelling contractors receiving contracts for government buildings to post bond guaranteeing that they would pay the prevailing wage scale to laborers, whether union or non-union. Such a plan would be similar to a system used by the United States Navy wage board.

PROPERTY NOT OWNED BY LEASEE SUBJECT TO MECHANICS' LIEN

Under Kansas statutes a mechanics' lien attaches in favor of one under contract to drill an oil well to all material, supplies and casing furnished by the owner of an oil and gas lease regardless of whether he owns such material, or whether he has borrowed it, or rented it, the Supreme Court of Kansas has held.

It is essential under the statute that there be a contract with the owner of the oil and gas lease, or some share or interest therein, but it is not necessary that the owner of the lease own the material and equipment to which the lien attaches, it was held. If such owner furnished that material it is sufficient.

The decision was rendered in the case of J. F. Williams, et al, against the Otstot Oil Company, et al.

Paragon Machine Tool & Die Works of Richmond, capitalized for \$50,000, has filed articles of incorporation in Martinez and will erect a plant for the manufacture of dies, surgical instruments, metal containers, washing machines and various kinds of machinery. Incorporators are L. W. Evans, A. de Soto, S. Belazs and H. K. Watchers.

URGE HEIGHT LIMIT FOR MARINA BUILDINGS

A resolution introduced in the San Francisco Board of Supervisors by Supervisor William F. Stanton requests the City Planning Commission to prepare an ordinance limiting the height of buildings in the Marina District. The resolution suggests a limit of forty feet in the height of the buildings. The area included is bounded by Chestnut, Fillmore and Laguna streets and the Marina.

OAKLAND PLUMBING PERMITS INDICATE CITY'S GROWTH

As further evidence of the growth of Oakland during the past year, the city plumbing department granted \$712 plumbing permits in 1929 as against 5525 in 1928, according to an annual statement by Inspector Joseph Francis, chief of the city plumbing department.

The department made 35,146 inspections during 1929 as against 23,313 in 1928. There were 152 master plumbers' licenses issued in 1929 as against 131 in 1928, though journeymen plumbers' licenses decreased to 327 in 1929 as against 356 in 1928. There were 30 sewer contractors' licenses issued in 1929 as against 24 in 1928.

Owing to the new city ordinance compelling rigid inspection and supervising of gas appliance and furnace dealers, who must now be licensed, there was 77 of these licenses issued in 1928 who were never licensed before.

The total number of licenses issued was 556 for 1929 as against 511 in 1928.

November and December, with winter approaching, were the big months of the city plumbing inspection bureau, there being 1633 permits issued in November and 1482 in December.

EMPLOY AN ARCHITECT

The architect should be the first consideration with the prospective home builder. Nine times in ten the man who plans to build a house has no practical knowledge of construction. He may have an idea of what he wants in his home, but he is without both knowledge or skill in designing. All he has is an idea which he must pass on to the contractor.

That is a dangerous resort. It is responsible for more botched houses, more dissatisfied home owners, than any one other cause.

You may think you cannot afford the services of an architect. Strain a point anyway and employ one.

It is far better than to do without him and when you have put all your money into the house and mortgaged your future for five or ten years as well, at last awaken to find you have only a disappointment.

Safeguard not only your own satisfaction but your investment by insuring the proper construction of your home. That is good sense and real thrift.—Building Economy.

SEATTLE PLASTERERS ELECT

Joseph J. Jefferson was elected president of the Contracting Plasterers' Association of Seattle at the annual meeting of that body held last week. O. C. Erickson was elected vice-president and A. G. Linhoff, secretary. Headquarters of the association are located in the Arcade Building, Seattle.

Engineering News Section

LOS ANGELES, Cal.—Until January 29, 10 A. M., bids will be received by County Supervisors for demolition and removal of existing Fourth Street bridge preparatory to erection of new Fourth Street Viaduct. The proposed bridge will be a reinforced concrete viaduct consisting of a single arch 254 ft. in length over the river and girder and arch approaches, a total length of 2400 lin. ft., with a 600-ft. ramp to Mateo St. It will be 71 ft. wide over all, with two 5-ft. sidewalks, and a 56-ft. roadway. The work will involve: 48,000 cu. yds. class F concrete; 7,000,000 lbs. reinforcing steel; ornamental balustrade and hand rail; special design concrete lighting posts; storm drain in approaches. Bids on wrecking the existing structure were taken some time ago but the contract was never awarded. The low bidders were deWaard & Son. According to latest information, the board of public works will reject these bids. City Attorney E. P. Werner has been ordered by the council to prepare contracts for the division of costs between the railways and the city, the latter to pay 25½ per cent of the cost.

SANTA CRUZ, Santa Cruz Co., Cal.—City council rejects bids to construct reinforced concrete and timber bridge in Market St. over Branciforte Creek, involving 122 cu. yds. excavation; 57 timber piles in place; 127 cu. yds. class A concrete; 12,000 lbs. reinforcing steel in place; 34 M. B. M. timber in place; 2170 sq. ft. roadway wearing surface. Ralph Hunter, Secretary, was low bidder at \$7,024. New bids have been asked, to be opened Jan. 27, 3 P. M. Certified check 10% payable to city required with bid. Bond of 100% of contract price required of successful bidder. Plans obtainable from Roy Fowler, city engineer, on payment of \$5, not to be refunded.

REDWOOD CITY, San Mateo Co., Cal.—Election will be called in April by city council to vote bonds of \$55,000 to finance construction of bridges, storm sewer and several street extensions. Charles L. Dimmitt is city engineer.

PHOENIX, Arizona—Lynch-Cannon Eng. Co., 1027 Chapman Bldg., Los Angeles, submitted low bid to the Arizona highway commission at \$397,608.10 for construction of the Phoenix-Tempe Highway Bridge, P. A. P. 2-B. The work consists of the construction of a bridge, composed of

ten reinforced concrete arches, across the Salt River at Tempe, Ariz. Projects involves: 12,000 cu. yds. excav. (unclassified); 1,800,000 lbs. reinf. steel; 17,400 cu. yds. concrete; 500 cu. yds. sand fill in abutment piers; complete lighting system.

SAN LUIS OBISPO, San Luis Obispo Co., Cal.—City Council plans construction of a new bridge to senior high school at Marsh and Ida Sts. Estimated cost \$10,000.

DREDGING, HARBOR WORKS & EXCAVATIONS

STOCKTON, San Joaquin Co., Cal.—According to H. K. Griffin, chairman of the marine committee of the chamber of commerce of Stockton, work will start probably next month on the first unit of the \$6,000,000 deep water ship channel near Stockton. The first contract will probably be awarded in February. The proposed channel will be 26 feet deep, 100 feet wide at the bottom and measure 200 feet across the top and accommodate 85 per cent of the vessels now entering San Francisco harbor. It will follow the course of the Stockton Slough for a distance of 12 miles to the San Joaquin river.

NEWPORT BEACH, Orange Co., Cal.—Standard Dredging Co., Central Bldg., Los Angeles, at \$136,490 awarded contract by city council to construct improvements in connection with harbor development involving 400,000 cu. yds. dredging; 14,100 tons stone in place in rock groyne and removal of approx. 4000 tons rock revetment.

IRRIGATION PROJECTS

TURLOCK, Stanislaus Co., Cal.—Until February 17, 3 P. M., bids will be received by Anna Sorensen, Secretary, Turlock Irrigation District, for cement lining of private ditches in Improvement District No. 5. Plans obtainable from R. V. Melkie, chief engineer of the district.

STREET LIGHTING SYSTEMS

TRACY, San Joaquin Co., Cal.—City Engineer E. T. A. Bartlett preparing plans for electroliters with underground system in 11th St. bet. East St. and a point approximately 220 ft. west of Roosevelt Ave., involving 60 standards.

GLENDALE, Los Angeles Co., Cal.—Until 10 A. M., Feb. 6, bids will be received by city council for the construction of an ornamental lighting system in Highland Ave., between Glenwood Rd. and Kenneth Rd., and portions of Norton Ave. and other streets, involving 32 Lalux single-light concrete standards; 1911 Alt. J. C. Albers is the city engineer. G. E. Chapman, city clerk.

SANTA ROSA, Sonoma Co., Calif.—Until Feb. 12, 12 noon, bids will be received by Geo. P. Sanborn, county clerk, for lighting Monte Rio Lighting District. Bond of \$500 required of successful bidder. Further information obtainable from clerk.

TRACY, San Joaquin Co., Calif.—City Engineer E. T. A. Bartlett preparing plans for installation of electroliters in 11th St. bet. East St. and approx. 200-ft. west of Roosevelt Ave.

SAN JOSE, Santa Clara Co., Cal.—R. Flatland, 1399 Mission St., San Francisco, at \$3184 awarded contract by city council (4953) to install lighting system in Second St., bet. San Salvador and Reed Sts., involv. 20 (San Jose Standards) Duplex electro-liters posts together with underground system. Other bids were: Roy M. Butcher, \$3262; San Jose Paving Co., \$3305; Martin Z. Montgomery, \$3631; Hugo Frank, \$3672; Butte Electric Co., \$3706; H. C. Reid & Co., \$3837; E. E. Burgess, \$9460.

HANFORD, Kings Co., Cal.—R. A. Wattson, Los Angeles, at \$13,994 submitted low bid to city council to install ornamental lighting standards, together with underground system in 7th St. from Harris to Redington St., Dooty St. from 6th to 8th St., Irwin St. from 6th to Court Sts., and 7th St. from Thornton St. to west line of Blocks 110 and 140.

Other bids, all taken under advisement until January 24, follow:
Walker, Martin & Montgomery, 645 N. Calif. St., Stockton.....\$19,025
Sam Fingerhut, Bakersfield.....19,145
E. E. Burgess, San Francisco.....19,445
H. C. Reid & Co., San Francisco.....19,683
Robinson Elec. Co., Fresno.....20,800
R. Flatland, San Francisco.....20,338
Hugo Frank, Hayward.....21,350

LOS ANGELES, Cal.—Until 2 P. M. Feb. 10, bids will be received by the county supervisors to install lighting system in Las Tunas Drive and other streets, Tract 6561, C. I. No. 903, involving 306 Union Metal standards. Est. cost, \$37,589.

MACHINERY AND EQUIPMENT

Juanita Ave., Los Angeles, awarded contract by the county supervisors at \$97,923.50 to improve Topeka Canyon Road between the summit and a point 15,408 ft. south, or 2.9 miles, involving: 334,423 cu. yds. excav.; 3290 ft. wire link highway guard fence; 7-in. to 15-in. corr. pipe.

SAN FRANCISCO.—Until February 5, 2 P. M., bids will be received by State Harbor Commission, Ferry Bldg. for paving Cider No. 48. Project involves 172,900 sq. ft. 1½-in. Topeka surface and 64,300 sq. ft. 1½-in. Topeka surface and 35,600 sq. ft. 2-in. Topeka surface on 2-in. binder. Plans obtainable from Frank G. White, chief engineer of commission, Ferry Bldg.

IMPERIAL COUNTY, Cal.—Following three low bids received Jan. 22 by State Highway Commission to grade and pave with Portland cement concrete 9.0 miles between El Centro and Holtville:
A. M. Peck Co., Los Angeles.....\$264,955
Sander Pearson, Santa Monica 285,506
Balsch Bros. Con. Co., L. A. 266,331

KERN COUNTY, Cal.—Following three low bids rec. Jan. 22 by State Highway Commission to grade and surface with oil treated crushed gravel or stone, 9.7 miles between San Emigdio and Route Four:
V. R. Dennis Constr. Co., San Diego.....\$126,455
Tieslau Bros., Berkeley.....127,439
G. W. Ellis, Glendale.....130,943

NATIONAL CITY, San Diego Co., Cal.—Until 8 P. M., Feb. 4, bids will prove D Ave., between 18th and 30th streets, and portions of 16th and other streets, involving grading and paving with asphaltic concrete pavement, in- be received by city trustees to im- volving approximately 96,856 sq. ft. pavement; 1911 Act. O. A. Mullen, city clerk.

RIVERSIDE COUNTY, Cal.—Engineer A. C. Fulmor, Riverside, estimates cost of Ortega Highway at \$250,000 of which the State Highway Commission share portion of cost on that unit between Riverside and Orange counties. The route will start a Lake Elsinore and terminate at San Juan Capistrano.

STAINLESS STEEL ALLOY NOW IN QUANTITY PRODUCTION

The problem of inaccessible and exposed metal parts of buildings has been solved by the development of a new stainless steel alloy which is now entering quantity production. This is announced by F. J. Griffiths, chairman of the Central Alloy Steel Corp. of Massillon, O., and designated head of the research company of the Republic Steel Corp., the new \$350,000, 000 midwest steel merger, of which Central Alloy is to be a part.

The new alloy, known as Nirosta Steel, was discovered in the Krupp laboratories in Germany. It is being produced and developed for mass production under license from Krupp by Central Alloy and a few other American companies.

"The stainless steel may be made with a dull finish which will not corrode and will last as long as the building, requiring no further attention," Griffiths says. "It will represent a substantial economy in cornices, flagpoles, window frames and other places the painting and preservation of which now entail a considerable amount of risk and expense."

"Laboratory tests have shown it resistant to air, water, and acids at high temperatures and pressures. The stainless quality is integral and not merely a surfacing. Therefore, wear will not affect it."

"We are told that a sportsman on the Pacific Coast is now having a yacht built with a hull of the material. It is so smooth as to be virtually immune to barnacles, while the salt spray test, regarded as the most destructive to any metal surface, has no effect upon it whatever. Building parts of this material require no painting and no maintenance work on the surface."

"In addition to the building industry, an important market for this alloy is the automobile industry, where it is to be used for radiator shells and other bright parts of motor cars."

CEMENT AND ROCK FIRMS MERGE IN LOS ANGELES

Amalgamation of three cement and rock companies, Gordon Harrison, Russell, Inc., Sawyer-Hassett Company and R. B. Willard Company, is revealed by the State Corporation Commission. The three companies all have plants located in Los Angeles. The new company, Allied Rock & Materials Company, has an authorized capitalization of \$1,000,000 of \$10 par value stock and has been permitted to issue 61,092 shares. The company has also been permitted to issue \$250,000 in bonds. According to Earle M. Daniels, a director of the company, all of the stock has been purchased. Other directors include C. W. Russell, Ray W. Hassett, R. B. Willard, Perry E. Sawyer, Thomas Gordon and George W. Harrison.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA DEPARTMENT OF PUBLIC WORKS DIVISION OF HIGHWAYS NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on February 13, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefore, to which special reference is made, of portions of State Highway, as follows:
 Siskiyou County, a reinforced concrete bridge at Station 296+75.25, about 5 ½ miles north of Yreka (II-Sis-3-C), consisting of one 200-foot open spandrel arch span and three 40-foot girder approach spans.

Los Angeles County, between Castale School and Canton Creek (VII-L.A.-4-G), about seven and one-tenth (7.1) miles in length, to be graded.

Proposal forms will be issued to only those Contractors who have furnished verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works. Plans may be seen, and forms of pro-

posal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
 DIVISION OF HIGHWAYS.

C. H. PURCELL,
 State Highway Engineer.
 Dated January 15, 1930.

VALUE OF HOME OR MONTHLY RENTALS IN CENSUS

A question on home valuation and rentals which will bring findings of great importance to the real estate profession, according to the National Association of Real Estate Boards, will be included in the questionnaire now being prepared for

enumerating the population in the 1930 census. For the first time enumerators will ask the value of the home, if owned, or the monthly rentals paid on the home.

In making public its 1930 questionnaire the United States Department of Commerce stated that the question of home ownership would make possible a classification of families according to economic status or buying power.

The National Association of Real Estate Boards points out that the findings of the census will make it possible to ascertain the percentage of home ownership in the many cities, counties and villages throughout the United States, which, when correlated with the cost of homes in those same localities, will show to what degree the cost of homes in a given city determines the extent of home ownership in that community. Likewise the data collected on this question in the census taking, when correlated with a study of the obtaining systems of home financing in different cities, can show what, if any, influence the local home financing methods have on the extent of home ownership, the Association states. Interesting statistics can also be made available on the average value of the home and the average rental in any given city as compared with the average home value and home rental for the country as a whole.

ESTABLISHES SAFETY RECORD

A remarkable safety record was achieved by the Kaiser Paving Company of Oakland in its gravel plant at Livermore during 1929. According to J. J. Rosedale, safety engineer, there was not a single lost time injury during the year although rock crushing operations are hazardous. An average of 35 men were employed throughout the year and a total of 84,000 hours worked.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

Daily News Service.

Are You Satisfied With a Weekly News Service?

Would a Daily News Service Be More Beneficial?

Effective January 2, 1930, DAILY PACIFIC BUILDER, the pioneer daily construction newspaper of the Pacific Coast, will be merged with LARSEN ADVANCE CONSTRUCTION REPORTS, the daily service of BUILDING AND ENGINEERING NEWS.

Every unit of the present service offered by BUILDING AND ENGINEERING NEWS and LARSEN'S ADVANCE CONSTRUCTION REPORTS will be published each day in DAILY PACIFIC BUILDER, in addition to other important features. The subscription price will be \$1.50 per month or \$15.00 per year payable in advance.

DAILY PACIFIC BUILDER, under this consolidation of services, will bring to your desk each morning the latest developments in the construction field—Building Permits and Building Contracts, Mechanics' Liens, Completion Notices, advance construction news, covering every branch of the construction industry, building and engineering improvements, business opportunities, etc.

If you are now a subscriber to BUILDING AND ENGINEERING NEWS and desire to receive the DAILY PACIFIC BUILDER, sign the order blank below and enclose your check for the period you desire to subscribe.

ENGINEERS' REGISTRATION FOR BUILDING INSPECTORS

The following opinion regarding the registration of building inspectors has been sent to the Pacific Coast Building Officials' Conference headquarters at Long Beach, Calif., by Donald M. Baker, president of the California Board of Registration for Civil Engineers:

"1. Practicing city building inspectors may or may not be required to register. Each individual must be considered upon the facts as they present themselves.

"Take the building inspector in a small town where there are probably one or two buildings over one-story in height and none over two stories, where all the residential development is small frame houses. It is felt that such a position would not constitute civil engineering work or require the services of a civil engineer—a trained mechanic might handle the job.

"In a large town where height limited buildings exist, where plans and specifications must be checked and construction work inspected, the building inspector should undoubtedly be a civil engineer.

"2. The Act provides that any one having certain qualifications which are set forth herein may on or before June 30, 1930, apply for and secure a certificate of registration as a civil engineer from the Board. A fee of \$15.00 must accompany the application, and a renewal fee of \$5.00 each year is required by the Act.

"3. The Act provides that subordinates to registered engineers need not be registered. It would appear that the department head would be the only one required to register, provided that registration was necessary for him. Plan checking engineers, although they might be in responsible charge of the work they are doing, are in reality responsible themselves to the department head, and he is responsible for all of the acts of his subordinates."

The above quotation in Mr. Baker's opinion as president of the Board after discussion with the other members. To make an official ruling, a specific case would have to be considered.

Application blanks for the licensing of civil engineers, as required under a new California state law, will be available shortly after Jan. 1 and may be obtained from Albert Givan, secretary, Board of Registration for Civil Engineers, Sacramento, Calif.

Pacific American Street Lighting Co. of San Francisco, capitalized for \$50,000 has been incorporated. Directors are R. H. Haven, G. L. Richardson and George Fenney.

T. Smith, contractor, has opened a new planing mill in Depot street, Sebastopol, to operate in conjunction with his contracting business.

BAKERSFIELD CONTRACTORS ELECT OFFICERS

Clark Gramling, general contractor, was elected president of the Bakersfield Association of General Contractors at the annual meeting of that body held Jan. 25. Other officers are: P. W. Paynter, vice-president; L. H. Moon, secretary and George L. Harris, Henry Gribble, Henry Eissler and V. A. Young, directors.

Purposes of the organization, as set forth in article 2 of the association's constitution and by-laws, are:

"The objects of this association are to promote better relations between private owners and public bodies, their architects or engineers on the one hand, and contractors on the other; to maintain high professional standards in the conduct of work; to combat unfair practices; to encourage efficiency among contractors; to encourage those practices which tend to eliminate waste and unprofitable practices; to support contractors and contractors' associations in efforts to rectify conditions of an unsatisfactory character.

Other functions are to encourage harmony and co-operation between contractors and their employees; to encourage those methods of contracting for work which relieve the contractor of improper risks, and to encourage sound business methods tending to raise the standing of contractors generally in the business world."

J. S. DEAN, ARCHITECT, NAMED SACRAMENTO CITY MANAGER

James S. Dean, Sacramento architect, has been appointed city manager of the Capitol City, succeeding Harry A. Kluegel of Berkeley and San Francisco. The appointment is effective March 1.

Mr. Dean is a member of the architectural firm of Dean and Dean of Sacramento. He has been a resident of Sacramento for 25 years, a graduate of the Boston Institute of Technology. He prepared plans for the Sacramento Municipal Auditorium and several school buildings in that city as well as many commercial structures.

Other candidates for the position were John C. Stone, former Sacramento railroad department manager and Oscar F. Weissgerber, former city manager of San Mateo.

Richmond H. Skinner of Boston, Mass., has joined the engineering staff of the National Lumber Manufacturers Association as structural engineer, succeeding Nelson S. Perkins, who recently resigned to accept a position with the National Committee on Wood Utilization. Mr. Skinner was graduated from the California Institute of Technology in 1923 and since that time has had a varied technical experience.

FEATURES OF THE CHRYSLER SKYSCRAPER CITED

Walter P. Chrysler's announcement that the new Chrysler Building rises 1030 feet above the sidewalks of New York ranks this structure as the tallest which has ever been erected. This is the first man-made structure in the world's history to rise to a height of more than one thousand feet.

Even the Eiffel Tower must bow before the \$15,000,000 office building which is the latest addition to the skyline of New York. The top of the Eiffel Tower is 984 feet above the ground. This great observation tower, completed in 1889 for the exposition of that year, made the city of Paris supreme in high construction for forty years. With the erection of the Chrysler Building the "world's championship" for tall structures is transferred to New York.

The Chrysler Building exceeds by more than one hundred feet the height of the second tallest habitable structure. In its uppermost part it is well above the 325-foot Manhattan Company Building and the 792-foot Woolworth Building in New York, as well as the Eiffel Tower in the capital of France.

There are five states which do not have a natural elevation at any point as high. If the building were located in Delaware, Florida, Louisiana, Mississippi or Rhode Island, it would be theoretically possible to see from its top all parts of the state.

The entire seventy-first floor of the building will be set aside for observation purposes. At this level visitors will be able to overlook Greater New York, the surrounding country and the Atlantic Ocean for a distance of 100 miles.

Above the observation level are six stories, giving the structure a total of seventy-seven stories. This is seventeen stories higher than the Woolworth Building which was for some years the tallest office building.

The record-breaking height and unusual architecture of the Chrysler Building provide a new and impressive symbol of industrial America and the tremendous growth of all kinds of human activity in the United States. Until some years after the Civil War the land upon which the new giant skyscraper now stands remained a rocky hillock, part of which was known as "Shanty Town," given over to squatter huts and roving goats. Within the memory of living residents the site was used as a grazing ground for a herd of goats owned by an old lady who lived there in a little white house.

Within a few months about 12,000 people will have offices in the new building. This is as though the entire population of a city like Annapolis,

PERSONS ENTITLED TO LIENS

By HARRY C. WESTOVER, Attorney-at-Law

This is the third installment of a series of articles on the California Mechanics' Lien Law, prepared by Mr. Westover, a member of the Orange Co. Builders' Exchange. Other articles will appear from time to time.—Editor.

As we have said before, the mechanics lien in California is of the highest possible dignity since it is not secured by legislative enactment but by the Constitution of the state which provides that:

"Mechanics, material men, artisans and laborers of every class shall have a lien on the property upon which they have bestowed labor or furnished materials for the value of such labor done and materials furnished; and legislature shall provide by law for the speedy and efficient enforcement of such liens."

Section 1183 of the California Code of Civil Procedure provides in part:

"Mechanics, material men, contractors, sub contractors, artisans, architects, machinists, builders, miners, teamsters, and draymen, and all persons and laborers of every class performing labor upon or bestowing skill or other necessary service or furnishing materials to be used or consumed in or furnishing appliances, teams, and power contributing to the construction, alteration, addition to, or repair in whole or in part of any building, wharf, bridge, ditch, flume, aqueduct, well, tunnel, fence, machinery, railroad, wagon road, or other structure or other work of improvement or performing of labor upon or bestowing skill or other necessary service or furnishing materials to be used or consumed in or furnishing appliances, teams and power contributing to the grading, filling in, or other improvement of any lot or tract of land or the making of any improvement in connection therewith, including within the meaning of said word 'improvement' any seeding, sowing, or planting of such lot or tract of land for landscaping process or the demolition of building thereon or the removal of building therefrom made or done on such real property shall have a lien upon the property upon which they have bestowed labor or furnished materials for the value of such labor done and materials furnished. . . ."

The Constitution of the State of California as well as section 1183 of the Civil Code seems to indicate that all persons furnishing labor and/or materials upon any building or structure are entitled to liens for the value of such labor or materials.

Although the Constitution and the Statute seems to include all persons performing labor upon or furnishing materials the fact of the case is that all persons are not entitled to liens even though they might actually have furnished labor or furnished materials. Every lien claimant regardless of whether he is a contractor, a material man or laborer must meet certain requirements of the lien law or the interpretation of the courts of the State of California before he is entitled to file a valid lien and unless such claimant can meet such requirements such claimant cannot file a valid lien.

Lien claimants have been segregated in the four divisions. The first is the "original contractor," the sec-

ond the "sub contractor," the third "material man" and the fourth "laborer."

Each group is given certain specific rights under the lien law and the rights of each group are not always the same.

In order to allow any claimant to file a valid lien such claimant must meet four requirements. This is so regardless of whether the claimant is a contractor, a sub contractor, a laborer, or a material man.

The four requirements may be stated as follows:

1. There must first be a valid contract. Unless there is a valid contract on which to base the lien no lien can be established.

2. The labor or material for which the lien is filed must be used or consumed in the building or structure on which the lien is placed.

3. The labor or materials on which the lien is based must have been sold for the purpose of going into the building or structure on which the lien is placed.

4. There must be a full performance of the contract or full performance must be excused.

If the lien claimant can meet the requirements as above set forth a valid claim of lien can usually be established.

The fundamental requirement of every lien is a valid contract. If the lien claimant does not have a valid contract or unless the law presumes that there was a valid contract it is impossible for the claimant to establish a valid lien.

Some time ago A purchased from B a lot for \$500.00, paying \$25.00 down, the balance to be paid at the rate of \$10.00 per month, and subsequent thereto commenced to build a house upon the lot. Before the house was completed A failed to pay for the lot and B threatened to take the lot away from A because A had not kept up his monthly payments. A thereupon filed a lien upon the lot for the value of the work done upon the house. The question immediately arose whether or not A could file a lien upon his own property. The law is well established that a man cannot lien his own job. The fundamental rule behind such a decision is no doubt the fact that there is no valid contract inasmuch as a man cannot make a valid contract with himself. In this case A had purchased the property upon a conditional sales contract and had commenced building the house. He could not enter into a contract as the owner of the lot with himself as the contractor for the erection of the house. If A had made a contract with C to erect the house C could have filed a valid lien because there would have been a valid contract between A and C.

Where there is a valid contract or which to base a lien it necessarily follows that there must be a substantial compliance of that contract before the claimant should be allowed to file a valid lien. If the lien claimant does not perform his contract he certainly should not be allowed to establish a valid lien and until his contract is completed he has no lien rights. However a substantial performance of the contract is all that is required and trivial imperfections or deficiencies which may be compensated by a monetary allowance does not prevent the attachment of a valid

lien. Full performance however, of the work—that is, a performance of the contract under which the lien is claimed, is a condition precedent of the filing of the valid lien.

The modification of a building contract does not effect rights of sub-contractors or material men. A contractor is not responsible for defects in construction due to faulty specifications furnished by the owner which were faithfully followed. A contractor need only perform his contract in a workmanlike manner and cannot be held for results either on implied warranty or otherwise so as to effect his right of lien. The failure of a general contractor to perform his contract or the negligence of a general contractor in the construction of the building or structure will preclude the general contractor from filing a valid lien. However, the failure of the general contractor to perform his contract or his negligence will not effect the rights of sub-contractors or of material men to file valid liens when such sub-contractors or of material men have valid contracts with the original contractor.

In order to entitle one to file a valid lien the labor or materials must have been actually used or consumed in the construction or alteration of the building or structure unless the labor or materials have been so used or consumed there can be no valid lien. Even where materials or fixtures are manufactured especially for a building and cannot be used elsewhere and are never used or consumed in the erection or construction of the building, valid liens for such materials or fixtures cannot be filed. *California Portland Cement Company vs Wentworth-118 Pac 103.*

The Supreme Court of California says in the Wentworth case:

"The fact that some of the materials were manufactured especially for use on the hotel building in our opinion does not effect these cases. They were not so used and each of the vendors of the materials was charged with the knowledge of the law which gave him no lien until his property has merged into the structure. Unless materials furnished . . . are actually employed in some part of the structure no right of lien exists on the part of the persons furnishing such materials but his right of action is a personal one against the owner."

Not only must the labor or materials be actually used or consumed in the structure but such labor or materials must have been sold for the purpose of going into the building or structure on which the lien is filed.

The Portland Cement Company sells to A a carload of cement. A sells the cement to B which cement is to be used and which is actually used in the construction of a building. The Portland Cement Company has never been paid for the cement and wishes to know if it can file a lien on the property. There is no question but that A can file a lien for the cement. However, the Portland Cement Company did not sell the cement for the purpose of going into the building in which it was used but it was sold to a distributor to be used as the distributor saw fit. Consequently the Portland Cement Company could not file a lien on the building in which its cement was used but would have to look to A for payment.

CLAY PRODUCTS INTERESTS IN ANNUAL MEETING AT LOS ANGELES

Ceramists and authorities on all branches of the clay products industry gathered in Los Angeles last Tuesday from all parts of the country to attend the annual convention of the Clay Products Institute of California held in the Architects Building.

More than 50 of the outstanding leaders of the industry representing about \$100,000,000 of invested capital listened to learned discourses and the latest trends in construction from such authorities as John J. Jessup, City Engineer of Los Angeles, W. E. Hotchkiss, Dean of the Graduate School of Business Administration of Stanford University, W. S. Dickey, head of the W. S. Dickey Clay Mfg. Company, largest manufacturer of vitrified clay sewer pipe in the world, Fred B. Ortmann, Vice President and General Manager, Gladding, McBean & Company, presiding President Robert Linton of Clay Products Institute, Vice President and General Manager of Pacific Clay Products and Norman W. Kelch, secretary-manager of the Institute.

Among the many addresses given, that of Mr. Linton reviewing construction prospects for 1930 in which he declared that construction in the West involving the use of clay products is decidedly on the up curve, created the closest interest. Optimistic forecasts of the amount of construction in the West coupled with the assertion that buildings of the future will be erected for permanence of both materials and earning power featured his talk.

A large gathering assembled for the Annual Convention Luncheon at the Elite Cafe. The convention closed late in the evening but many of the visitors are remaining over for informal discussion.

Among those present were the following:

Walter Boswell, Loula B. Merwin, T. C. Merwin, D. G. Pledge, E. G.

Girard and M. D. Shannon, Alhambra Kilns, Inc., Alhambra, Calif.

Raymond B. Collier, Norwood Howard and John R. Warfield of N. Clark & Sons, San Francisco.

Walter S. Dickey, W. S. Dickey Clay Mfg. Co., Kansas City, Mo.; N. A. Dickey, E. C. Moore and L. J. Duffey of W. S. Dickey Clay Mfg. Co., San Francisco.

F. B. Ortmann, A. L. Gladding, H. B. Potter, J. E. Stanton, Seward C. Simons, Wm. B. Phillips, V. W. Boget, J. F. Morgan and F. O. Wanaka of Gladding, McBean & Co., Los Angeles and E. M. Davids of Gladding, McBean & Co., San Francisco.

D. W. Hancock, C. P. Hancock & Son, Riverside.

Gus Larson and W. C. Reordan, Los Angeles Brick Co., Los Angeles.

W. W. Dennis, McNear Brick Co., San Francisco.

Robert Linton, Wm. McClintock, Wm. D. Hargrave, Roy Lacy and A. T. Wintersgill of Pacific Clay Products, Los Angeles.

J. Fred Eulisch, San Luis Brick Works, San Luis Obispo.

Eric A. Douglas and F. M. Taylor of Santa Monica Brick Co., Los Angeles.

Walter R. Simons, Simons Brick Co., Los Angeles; John V. Simons, Standard Brick Co., Los Angeles; Allan M. Spahn, Torrance Brick Co., Torrance; J. W. Rice, Union Brick Co., San Diego; Jack Butler Jr., Valley Brick Co., Sacramento.

G. A. Wild, E. C. Marsh, H. E. Stock and R. O. Sanders of Western Brick Co., Los Angeles.

John J. Jessup, City Engineer of Los Angeles; W. T. Knowlton and R. W. Stewart, Engineering Dept. of Los Angeles; W. E. Hotchkiss, Stanford University.

M. C. Poulsen, Engineer and Norman W. Kelch, Secretary-Manager, Pacific Institute of California.

REVISED EDITION OF CALIFORNIA CONTRACTORS' REGISTER

Announcement is made by George Finney and H. L. Boyd, publishing the Licensed Contractors' Register of California, that they are now getting out a revised edition of the register with changes, corrections and additions to date. This is the only published register of licensed contractors. It is printed in loose-leaf form, 9x12 inches, so that sheets containing additional names and corrections, which are furnished weekly to patrons, may be easily inserted.

As the register now contains more than 13,000 names and would be too bulky for a single volume, it has been divided, the contractors of the southern district being segregated in one book and those of the northern district making up another.

The list of licensed contractors is printed two ways, one being made up alphabetically and the other being classified. In the latter list the contractors are segregated by counties and cities and arranged alphabetically. This classification is made up by the publishers from the application blanks filed with the Registrar of Contractors. A total of 107 different classifications is used. Key numbers, combined in some instances with letters, following the names, indicate the various classifications under which a contractor is licensed.

Contractors are classified in the register under the first designation given in their application blanks, others being indicated by key numbers. There are 8 classifications of general building contractors, 20 classifications of general engineering contractors and 78 classifications of sub-contractors.

No attempt is being made by the Registrar of Contractors to classify contractors according to their particular lines of work. They are listed in his office alphabetically with segregations by counties and cities only.

In addition to the names of licensed contractors, the register contains a digest of various state laws which concern contractors and violation of which may affect their right to retain a license; also the text of the contractors', architects' and engineers' license laws. Publishers of the register have their headquarters at 408 Spring Arcade Bldg., Los Angeles.

STEEL INTERESTS TO MEET AT DEL MONTE

To formulate plans for a sound and orderly expansion of the iron and steel industry in California, one hundred and fifty executives of the iron, steel and allied industries of the state will meet at Del Monte February 13, 14 and 15. The meeting will be held under the auspices of the California State Chamber of Commerce.

During the past five years, the chamber points out, the iron and steel output of the state has been doubled, until it now represents approximately 20 per cent of the industrial structure of California. Many important expansions have been made with existing industries and new plants have been established in more effectively serving the Pacific coast iron and steel products.

John Fernandez, general contractor, and Karl M. Davies, mason contractor, have filed applications for membership in the Sacramento Builders' Exchange.

Annual meeting of the American Wood Preservers Association will be held in Seattle, Wash., January 23, 25 and 30.

INDUSTRIES VOTE PUBLICITY FUND TO FINANCE HOME CAMPAIGN

Formal approval of a plan involving a fund of \$500,000 to be used in a nation-wide movement to point out the present favorable condition for building and remodeling projects was voted by a delegation of the national building industries. It is announced by the National Business Survey Conference, formed at the instance of President Hoover.

The industries will be asked to appropriate this sum immediately in a unified program of action to remove whatever factors hamper expedient construction work and to make the most of those opportunities available in the field of home building and home ownership. It was stated.

To this end the conference recommended the creation of a permanent research group to keep in touch with the building needs in various sections of the country. It was explained. This body would coordinate its activities with governmental and other research organizations, giving particular attention to the danger of overbuilding in those communities where existing facilities adequately serve the requirements of the near future, it was pointed out.

Establishment of a special home-financing committee to encourage the availability of funds for building and for remodeling or modernizing was favored by the conference, it was said. One of the functions of this group, it was determined, would be directed toward bringing back into normal channels of expenditure money that had been diverted to speculation and similar uses.

An executive committee of representatives of the construction industry was formed to consider proposals for further action in carrying out the program for a united campaign to stimulate building, as approved by the conference Jan. 21 at the United States Chamber of Commerce, it was announced.

Approximately eighty organizations, comprising building supply and materials enterprises, contractors associations, building employment councils, financial associations, equipment trades, architect institutions, research and publishing societies, and allied interests, will join the campaign to promote construction, according to the conference.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

There will be no more jurisdictional strife among building trades unions if an agreement drawn up by the executive committee of the American Federation of Labor's building trades department is adopted. A national board or a series of regional boards would be set up under the agreement, to settle any disagreement over which set of craftsmen shall do new types of construction work. If regional boards are selected, then a national board or court of appeals would be appointed, to which any union might appeal if displeased with a decision. Another feature of the agreement is that there shall be no cessation of work while the dispute is being adjusted. Architects and engineers will not be represented on the new board.

A national five-day working week agreement, with five and one-half days' pay, has been signed by the United Association of Journeymen Plumbers and Steam Fitters of the United States and Canada, and the National Automatic Sprinkler Association. This is the first five-day week movement that is national in scope, according to T. E. Burke, secretary-treasurer of the United Association.

Time hereafter in Soviet Russia may be dated from November 7th, 1917, when the Bolshevik revolution began. A special governmental commission approved this project and the cabinet is expected to adopt it. Under the plan, the year would be divided into twelve months as at present, but each month would have six weeks of five days each. Saturdays and Sundays would be abolished from the Soviet calendar.

The Los Angeles city council has been requested by the City Building Safety Commission to amend the present city ordinance to enable the city building department to assist in the enforcement of the state law requiring building contractors to be licensed. Such action is necessary, in the opinion of the city attorney's office, to give the department authority to require all contractors applying for building permits to show that they have complied with the law and are registered.

Eventual elimination of all wooden school buildings in Oakland, many of which are now classified as fire hazards, is the program of the Board of Education, which will be carried out as soon as funds are available. A bond issue to finance the work is contemplated. Until the bonds are voted, proper precautionary measures against fire, as recommended by Fire Chief William G. Lutkey, will be taken to guard the welfare of pupils attending classes in the wooden structures.

The Los Angeles city council has instructed City Attorney Werner to draw up an ordinance regulating the manufacture and sale of gas stove and heater tubing in the city of Los Angeles. The ordinance was recommended by the building and safety committee due to the many deaths of persons being overcome by gas from leaky tubing. The ordinance will keep all inferior brands of tubing off the market in the southern city.

"Effective March 1, 1930, the West Coast Lumbermen's Association will inspect at mills and reinspect at point of unloading only on Standard Grading and Dressing Rules No. 9, dated July 1, 1929. This ruling is to be interpreted to permit inspection and reinspection without change on all lumber bought prior to March 1, 1930. Lumber sold under the No. 9 rules, as to grade, but of sizes other than those specified therein, will be inspected and reinspected as coming under special contract. Stocks as to grades in the previous editions of West Coast Lumbermen's Association grading rules will not be inspected or re-inspected by the Association's Grading Department after March 1, 1930." This is the text of a notice just issued by the association.

Californians operating trucks or other commercial vehicles in the State of Oregon are advised by the California Division of Motor Vehicles of a new law in that state prohibiting the operation of any motor vehicle equipped with other than pneumatic tires after July 1st next. Since January 1st it has been illegal to operate any motor vehicle, trailer or semi-trailer in Oregon equipped with solid tires unless kept within a zone of three miles from the incorporated limits of any city, when the combined weight of the vehicle and load exceeds 18,000 pounds. The only exception to this law is where special permission is obtained from the Oregon State Highway Commission to operate on state roads and from county courts to operate on county roads for temporary periods.

The Santa Clara Valley District Council of the United Brotherhood of Carpenters and Joiners has adopted the five-day week working plan, effective in February, it is announced by Bert P. Ward, secretary of the council. The pay will remain at \$9 per day, the weekly pay being for five days instead of five and a half as at present. The cut is designed to help relieve unemployment by dividing the work among more men, Ward explained.

Industry, the public and reputable general and public works contractors will be protected against bidders for construction work whose previous job performance has been unreliable, if the Associated General Contractors' plans are carried out to determine pre-qualification standards of firms and individuals contending for construction awards. Methods for weighing bidders' previous performances, based on the quality of previous work, whereby wasteful and inefficient contracting firms would be listed in the same derogatory category with those guilty of unfair practices and fraud, were detailed to the 1000 delegates of the Associated General Contractors of America meeting in New Orleans recently.

Construction will be started at once on a new plant for the New England Sheet Metal Works of Fresno. The company is now located at 301 Broadway, Fresno. The new plant will be one-story in height of brick construction, covering an area of 50 by 140 feet.

American portland cement mills continue to show a decline in the ratio of operations to capacity as indicated by the figures for 12 months' period ending December 31. According to statistics released by the Bureau of Mines of the Department of Commerce the ratio of operations for the last 12 months was 65.4 per cent. The ratio percentage has fallen from a maximum of 71.1 per cent for twelve months ending April 30 to 65.4 per cent for twelve months' period ending December 31, 1929. During the month 11,215,000 barrels were produced, 5,908,000 barrels were shipped, and stocks on hand at the end of the month were 33,519,000 barrels. Production for December 1929 was 8 per cent less and shipments 20 per cent less than December 1928. Stocks at the mills were 2.6 per cent higher than a year ago.

Money invested in the erection of new buildings for industrial purposes in Pacific Coast cities during 1929 amounted to nearly 45% more than in 1928 and reached a total of more than \$33,000,000, according to estimates made by the National Monthly Building Survey of S. W. Straus & Co. A detailed analysis of building department reports from 15 principal cities, shows a total of \$23,633,822 in building permits issued for industrial buildings during 1929. The year's total of all permits issued by these cities amounts to about 71% of the grand total of \$375,780,000 for the 100 cities comprised in the Straus survey. During 1928, these 15 cities issued but \$16,393,426 in permits for new industrial buildings and it is estimated the comparable figure for the 100 cities tabulated amounted to more than \$23,000,000. While the 1929 investment in new industrial buildings was notably greater than in 1928, and that for commercial buildings was slightly greater, there was for 1929, a marked reduction in projected public buildings and in residential construction of all kinds.

As a result of the "paving war" in Oakland, Mayor Davies introduced the following resolution to the city council which was adopted by a vote of 4 to 1: "Henceforth, open specifications shall be used in calling for bids upon all materials, supplies, public works or improvements to be purchased or performed by the city of Oakland; provided, however, that nothing here in contained shall be construed to limit or prohibit the city council from waiving, by ordinance, the requirements of this ordinance when necessary to conserve the best interests of the city."

R. F. Herrod of the Pacific Portland Cement Co., 111 Sutter St., San Francisco, is offering for sale a quantity of surplus equipment at Cement, Solano County. The list includes ball mills, blowers, cranes, cars, conveyors, crushers, coolers, driers, elevators, stacks, ice plant, kilns, locomotives, motors, shovels, tanks, tube mills, sewing machines, boilers, scales, etc.

One hundred and five old buildings were razed in Sacramento during 1929, under the direction of J. R. Shields, city building inspector and M. J. Dunphy, fire chief. In 1928, about 60 old buildings were torn down. Construction of new homes and apartments, valued at \$2,578,604, represented more than half the total of building permits taken out in 1929, according to Shields, while \$715,775 was expended for remodeling and repairs. The 1929 building total of \$4,409,245, was less than the 1928 total.

ALONG THE LINE

TRADE NOTES

HERE — THERE —
EVERYWHERE

Martin Polk, city engineer of Chico, has been appointed a member of the City Planning Commission, succeeding J. R. Head, resigned.

W. Adrain announces his withdrawal from the partnership of Pierre Zucco and W. Adrain Co., consulting engineers, and will in future carry on a structural and consulting engineering business at 417 Market street, San Francisco.

Master Painters' Association of Washoe County, with headquarters at Reno, Nevada, inactive for some time, has been reorganized. The association at a recent meeting elected W. H. Curtin, president; O. R. McGinty, vice-president and Bert Heagney, secretary-treasurer.

Unconfirmed reports from Sacramento are to the effect that Albert Glivan, chief engineer of the Sacramento Public Municipal Utility District, will succeed Bayless C. Clark as city engineer of the capitol city. It is expected the appointment will be made within the next few days by James Dean, Sacramento architect, recently appointed city manager.

B. H. Laklin, general manager of the McCloud River Lumber Co., is the new president of the California White Pine & Sugar Pine Manufacturers' Association. Bernard F. Scott is the acting secretary-manager.

James Clifford, vice president and general manager of the Sugar Pine Lumber Co., has been anointed general manager of the Yosemite Lumber Co. at Merced Falls. The Sugar Pine and Yosemite concerns were recently merged.

W. J. Robertson, 65, for the past 40 years a resident of Oakland and assistant manager of Crane Co., San Francisco, died at the Peralta Hospital, Oakland, January 24, following a brief illness. He was a native of Ontario, Canada, and came to California in 1890.

Present day trends in highway construction and the characteristics of the principal types of pavement were discussed by James Quinby, San Jose paving contractor, and Robert Chandler, county surveyor of Santa Clara county, before the weekly meeting of the Lions' Club at the Hotel Sainte Claire in San Jose, Jan. 22.

Pacific Structural Welding Corp., capitalized for \$20,000, has been incorporated in San Francisco. Incorporators are: Bonner Whitcomb, Henry Isings, W. Thomas, P. Maeder, William Hurley and Nina H. Chase.

Richard B. Carr, manager of the heavy products department, U. S. Steel Products Co. of San Francisco, has resigned from that position and has announced his intention of retiring from business activities.

Chain Belt Company sales for 1929 are just over eight million dollars. This is \$900,000 more than in 1928, according to C. F. Messinger, general sales manager. It is expected that the Chain Belt Company's earnings for 1929 will be \$7.00 per share. For 1928, they were \$5.27, and the average for five years is \$5.10.

United States Gypsum Co., Chicago, Ill., announces that the distribution of Chromite, a metal alloy tile, cemented in sheet form over walls and ceilings, will hereafter be made through their organization.

Paramount Mfg. Co., manufacturers of steel bathroom cabinets and Venetian mirrors, has opened headquarters at 5259 Mission street, San Francisco, with Wm. Remstedt in charge of sales.

Standard Building Materials Co., Ltd., of San Francisco, has been incorporated. The capital stock is \$20,000. Incorporators are J. D. Murphy, James A. White and F. Steinbauer.

Geo. B. Fackl has been named assistant general manager of Gladding, McBean & Co., and will maintain headquarters at the Los Angeles office of the company. Mr. Fackl is a recognized authority on terra cotta and a graduate ceramic engineer. He was formerly vice president and general manager of the Northwestern Terra Cotta Company of Chicago, the largest manufacturer of terra cotta in the Middle West, and was the organizer of the Denver Terra Cotta Company, which was later merged with the Northwestern.

Tractor Equipment Co. of San Francisco, capitalized for \$200,000, has been incorporated. Incorporators are Milton W. Anderson, E. M. MacMahon, James M. Anderson, Arthur G. Herring and Garton D. Keyston.

American Pipe & Steel Corp., Ltd. of Los Angeles, has added the Elgin water softening, boiler feed water deconcentrating and filtration equipment to its line of coast manufactured products. According to executives of the company this marks the first time that patented, protected and proven equipment of this character has even been offered by any western manufacturer. For many years Elgin water softeners have been in general use throughout the United States and the equipment now being manufactured by the Los Angeles firm is identical with Elgin construction and is built under the basic patents owned by the Elgin Softener Corp.

Samuel Leib is operating from 1830 Beach Street, under the firm name of National Sheet Metal Works.

Construction is under way on a new plant for the Handicraft Tile Company at Milpitas, Santa Clara County, to replace the present plant in Eighteenth St., San Jose, according to Leslie Austin, manager of the company. The plant will turn out handmade tile for all purposes.

Miss F. Luena Williams, age fifty years, living in her own home in Brookline, Mass., a home economics teacher in the Weymouth High School, East Weymouth, won the \$250 prize offered by the National Association of Real Estate Boards for the best definition of the word home. "Home," says Miss Williams, "is a domestic sanctuary—wrought out of desire—built in memory—where kindred bonds unite the family in sharing labors, leisure, joy and sorrows."

Porterville, Calif., city council has adopted a new building and plumbing ordinance. The law was adopted on the recommendation of City Manager F. W. Pease.

Adoption of the five-day week for workmen employed by the city of Stockton and the County of San Joaquin is urged in a public statement issued by the Building Trades Council of San Joaquin County over the signature of E. J. Murphy, secretary and business manager of that body.

J. H. Shepard was elected president of the Sacramento Builders' Exchange at the annual meeting of that organization. Geo. C. Foss was elected vice-president; Orland Coss, treasurer and L. S. Patterson, secretary. Directors elected to serve for the ensuing year are Fred N. Benton, John B. Hawley, H. H. Holland, C. J. Hopkinson, Earl Markwart, Jos. P. Moore, Al. W. Simmonds and Lester Wilkinson.

The National-American Wholesale Lumber Assn. will hold its annual convention at Atlantic City, N. J., April 9 and 10.

Contractors of Alturas, Calif., have organized the Contractors' Association of Modoc County for avowed purpose of protecting prospective builders and themselves against shoddy work. Frank Moore of the Alturas Building & Development Company is president of the organization.

Morton C. Tuttle Co., Boston, Mass., has issued a 4-page brochure, "The Road to Economy in Building," pointing out the importance of proper design in building development and the value of close co-operation between the builder and the designer in developing plans.

Sumner Spaulding has been elected president of the Architectural Club of Los Angeles. Other officers are: Vice-presidents, Fitch Haskell, Ralph Flewelling and Luis Payo; treasurer, Kemper Nomland; secretary, Rene Mussa; manager, George P. Hales; directors, J. E. Stanton, Julian Garnsey and Robert Lockwood.

TRADE LITERATURE

A 44-page loose-leaf type catalogue to describe their complete line of radiators has been published by the McQuay Radiator Corporation, Chicago, Illinois. This catalogue is replete with illustrations, tables and specifications.

A bulletin which fully describes and illustrates their line of tapered asbestos shingles has recently been published by the Mohawk Asbestos Slate Co., Inc., Utica, New York.

The Kerner Incinerator Co., Milwaukee, Wis., has issued a booklet on the "Estate Type Kernerator," an incinerator for homes, schools, country estates, cemeteries, etc. The booklet fully describes and illustrates the product. The company has also available for distribution seven other booklets covering various types of incinerators and waste disposal units.

ENGINEER STRESSES NEED OF FAIR CONTRACTS

The aim of contracts is to establish a fair working agreement for all concerned, according to James H. Griffin, vice-president of the American Association of Engineers of Chicago and engineer with the New York Board of Transportation, in his article, "Engineering Contracts," in the January issue of Professional Engineer, monthly publication of the American Association of Engineers.

Mr. Griffin says of a fair contract: "This is not only for economy and soundness of construction, but a one-sided contract is likely to fare badly in case it is litigated. Unfairness may be due not only to arbitrary clauses; it may frequently be due to failure to furnish the contractor with full and complete information on which to base his bid." Mr. Griffin warns that either party may be unscrupulous and ready to take advantage of any weakness.

One contract for the entire job is preferable to several contracts for various parts of it. This makes engineering supervision easier and more economical and reduces the difficulties that come with having several contractors responsible.

Mr. Griffin discusses the three most common bases of payment and shows how they affect the type of contract. The lump sum type is applicable to work where the units can be accurately estimated in advance. The lump sum contract has no flexibility and thus subjects the owner to difficulty if changes in plans need to be made. This type of contract should have a clause providing for such changes. A modified lump sum contract has more flexibility.

The unit price contract is applicable when exact estimates of costs and amounts cannot be made in advance, as in underground work. Such a contract is flexible, but its weakness is that it permits of juggling of figures. This introduction of a gamble on prices should be avoided if possible.

CHINA TO SPEND HUGE SUMS FOR RADIO STATIONS

Expenditures of \$3,000,000 for the construction of radio stations for the transmission of messages between China and America, and China and Europe, will be included in the proposed \$10,000,000 telegraph loan which will be floated shortly by the Chinese government, according to a report from Trade Commissioner Frank S. Williams made public January 18 by the Department of Commerce. In order that the ministry of communications may terminate the special privileges hitherto granted to foreign companies the government will devote \$4,000,000 to settle outstanding obligations to the Eastern Extension Telegraph Company and the Great Northern Telegraph Company, the report adds.

U. S. BOMBING BASE FOR SAN RAFAEL IS ANNOUNCED

Official assurance that San Francisco will be made the center of the U. S. Army aerial activity is contained in letters from Secretary of War Patrick J. Hurley who announces that the Marin Meadows site, north of San Rafael, has been determined upon for a general bombing base and that the site adjoining the Alameda Airport has been accepted as the Army's general air depot and repair shops. Contemplated improvements will involve an expenditure in excess of \$5,000,000.

PRESIDENT HOOVER SEEKS AMICABLE SETTLEMENT OF STRIKES

Hope that the building trades union of the country might shortly find some method of amicable settlement of jurisdictional strikes, was expressed in a letter from President Hoover, read at the conference of building trade leaders in Tampa, Fla., Jan. 24. The letter said in part:

"To find a method for the amicable settlement of jurisdictional disputes is indeed one of the most important questions in our labor or relations. It is capable of solution. Failure to solve it results in losses to labor, to the employers, and the public at large.

"It is evidence of the advancing understanding of the whole of our social and economic problems that this conference should take place, and I am indeed glad to wish success to your endeavors."

NATIONAL CONVENTION PLANS ARE PROMOTING

Plans for the nineteenth annual convention of the National Association of Builders' Exchanges, to be held in San Francisco February 10, 11, 12 and 13, are progressing, it is announced by Wm. H. George, president of the San Francisco Builders' Exchange and chairman of the committee in charge of arrangements for the national meet.

"This will prove a great housewarming for the building industry," Mr. George says. "Two special trains have been arranged for, one out of Chicago known as the Special and another out of New Orleans, known as the Blue Special.

"Communications have been sent out to all non-members of the National Association of Builders' Exchanges and affiliated building organizations requesting them to send delegations to take part in the proceedings," Mr. George continued.

On Thursday evening, February 13, the convention will close with a banquet. Arrangements are being made to seat 1000 persons at this affair.

Wide publicity has been given the convention throughout the East with the aid of stickers and banners and coupled with the direct mail solicitation from the National Exchange headquarters in Washington, D. C. and the local committee, it is expected the meeting will draw the largest attendance of any construction industry convention ever held on the Pacific Coast.

LOS ANGELES REORGANIZES CITY DEPARTMENTS

In a recent reorganization of the Los Angeles department of water and power two subdivisions were recreated: the bureau of power and light, with E. F. Scattergood as chief engineer and general manager, and the bureau of waterworks and supply, with H. A. Van Norman as chief engineer and general manager, both reporting to the board of water and power commissioners. Additional personnel also was announced as follows: H. C. Gardett, engineer of electrical design and construction, and C. P. Garman, assistant; T. A. Panter, engineer of electrical operation, with Roy Martindale, assistant. Both Mr. Gardett and Mr. Panter report to Mr. Scattergood. Reporting to Mr. Van Norman are W. W. Hurlbut, engineer of water distribution and operation; James E. Phillips, engineer, Owens River aqueduct; and Frank E. Weymouth, engineer of design and construction.

PORTLAND A. G. C. ELECTS

W. T. Jacobsen, past treasurer, has been elected president of the Portland Chapter, Associated General Contractors of America. J. C. Compton was elected vice-president in charge of the public works division and Robert Wallace, vice-president in charge of the building division. J. A. Lyons was elected treasurer. Directors elected are: J. J. Badraun, J. F. Gilpin, Philip Hart, J. C. Compton, R. L. Crooks, Gordon Weygandt, A. M. Swartley, F. H. Cochran, M. Farelus, Robert Wallace, I. L. Young, Fred Christenson, W. T. Jacobsen, J. A. Lyons, George B. Kibbe. Past presidents to serve: C. T. Parker, C. M. Stebinger, T. W. Baker. National officers to serve: W. H. Feigenson, T. H. Banfield.

A. G. C. PROMOTES STANDARDIZATION OF BUILDING MATERIALS

Co-operation between the Associated General Contractors of America and the Bureau of Standards of the Department of Commerce during the past year has resulted in definite progress being made in the standardization of sizes and varieties of material used in the construction industry. Through standardization, a real saving in construction will be effected, officials of the association announce. The most important work during the last year involved the standardization of masonry openings, which will necessitate standardization of metal sash and trim, millwork, face brick, hollow tile and other materials. The development of necessary information was carried on by the Associated General Contractors of America and other agencies.

BUILDING MAINTENANCE

The National Association of Building Owners and Managers has "taken very definite action to carry out a program of increased expenditure for necessary maintenance and improvement works throughout the seven billion dollars' worth of office buildings in their membership," according of a recent announcement. Managers of office and apartment buildings have been urged to make a careful survey to determine needed improvements and repairs which may be made during coming months in the interest of general industrial activity.

LUMBERMAN PASSES

George W. Johnson, 77, lumber operator of the middle west and Pacific Coast, died at Sonora, Calif., January 11. Johnson came to California in 1902 and with W. R. Thorsen, J. R. Prince and Charles Canfield purchased the West Side Lumber Company at Tuolumne from the Crocker interests and operated the property until it was sold recently to W. R. Chickering of the Chickering Lumber Company. Johnson also was interested in the First National Bank of Sonora and the Tuolumne County Bank and had served as president of each for the last 25 years. He was born in East Saginaw, Michigan.

NEW EXCHANGE BLUFFS

R. B. McKenzie of Red Bluff and McDaniel & Burroughs of Marysville, general contractors, have been admitted to membership in the Sacramento Builders' Exchange, it is announced by L. S. Patterson, secretary of the organization.

shall be paid out of the proceeds of a judicial sale of the property described therein, in preference to any estate, charge or lien of which the claimant had not actual or constructive notice at that time, except municipal and tax claims and the exemption provided by law." The purpose of this section is, however, an entirely different one from that of section 23, and cannot properly be so construed as to limit the scope of the latter. To sustain appellants' argument section 13 would have to be so interpreted as to prevent the waiver of the right to file a lien in any case, though this right is expressly provided for in section 15. The only relevant purpose of section 13 is to prescribe the order of distribution after a sheriff's sale, whereas section 23 is intended to determine equitably the rights of adverse parties, so that each may know what his status will be in case of and before such sale. Moreover, appellants wholly overlooked the fact, to which we have already adverted, that their contention would limit the scope of the language of section 23, which, as a remedial provision, cannot be thus restricted.

We, therefore, hold that section 23 means exactly what it says, and may be invoked in any and every case where "for any reason [legal or equitable] the [mechanics' lien] claim is postponed to the rights of the petitioner;" that appellants' claim is postponed as to appellee; and hence the order of the court below is affirmed.

CONTRACT VIOLATED BY TAKING NOTES FOR CASH

When a creditor has accepted notes as payment for a part of the half a contract price which should have been paid in cash according to agreement, the surety company is not liable for the payment of the sum represented by the notes which remain unpaid because of the bankruptcy of the principal, is the decision of the Circuit Court of Appeals for the Third Circuit.

The case was brought into court in Pennsylvania when a cement dealer who had been supplying a construction company with cement accepted notes in part payment of a sum which should have been paid in cash, the terms of payment calling for one-half in cash with 10 cents a barrel discount and the other half in notes with 5 cents a barrel discount. The construction company went into bankruptcy and the suit was brought to recover the amount due the cement dealer represented by the notes which he had received but not yet collected on. The decision of the court held however that the surety company was liable for payment of the sum representing the other half of the debt which it had been agreed would be paid in notes.

A. I. A. SEEKS TO ELIMINATE BILLBOARDS

An appeal for nation-wide campaign to abolish billboards and kindred forms of outdoor advertising throughout the United States was sounded January 13 by the American Institute of Architects.

Following a meeting of the Board of Directors, C. Herrick Hammond of Chicago, president of the organization, announced a resolution has been adopted demanding the removal of billboards, signboards and related structures from the roads, highways and boulevards of the country.

"This selfish desecration of the landscape," the resolution adopted by the board declared, "has aroused the an-

tagonism of those whose journeys by boat, train and automobile are rendered disagreeable and dangerous by such blantant and obtrusive ugliness.

"The Institute through its chapters and individual members residing in all sections of the country, is convinced that this type of advertising is highly objectionable to a great majority of good citizens.

"The board hereby calls to the attention of the civic organizations of the country, the public, the press and the legislative bodies of the several States, a national condition which we regard as inexcusable on either aesthetic or economic grounds.

"The board earnestly urges that those agencies which are properly concerned with the cultural and spiritual welfare of the American people, as well as those concerned with their material well-being and safety, take vigorous action through the various means at their command, to bring about by regulation, legislation or the force of public opinion, the complete removal of billboards, signboards and related structures from the roads, highways and boulevards of the country, except in such limited areas as may be set aside for such advertising by direct action of the proper authorities."

CONSIDERING PRICE IN BIDS ALONE IS FALLACY

The Rolling Printing Company of St. Louis, Missouri, in their house organ entitled *Printing*, recently published some remarks indicative of the fallacy of buying on low bids without consideration of quality. The comments are as follows:

"When the river rose, the dam gave way. There was too much sand and not enough cement. The lowest bidder had built it.

"When the rains came, some cellars leaked and had to be pumped out. The lowest bidder had dug them.

"When the gales came, some houses went along with them. The lowest bidder had built them.

"And then rebuilding started. Some structures stopped halfway. The lowest bidder had made a mistake. Specifications changed and more delays occurred. The lowest bidder had made more mistakes.

"And that is the way it generally goes when only price is considered. When you buy solely on price, you can never be sure. It's unwise to pay too much, but it is much worse to pay too little. When you pay too much, you lose a little money—that's all. But when you pay too little, you sometimes lose everything because the thing you bought was incapable of doing the thing it was bought to do.

"The common law of business balance prohibits paying a little and getting a lot. It can't be done."

OWNER MUST PAY NOTE ON BREACHED CONTRACT

Contrary to the opinion of a majority, a person is bound to pay a note, obtained by an innocent party in good faith, although the contract on which the note is given is not performed, says The Constructor, A. G. Corporation.

For example, in *Lozano vs. Meyers*, 18 S. W. (2d) 639, it was disclosed that a contractor and an owner entered into a contract whereby the former agreed to construct a building for \$47,000. The owner gave the contractor two notes, one for \$45,000 and the other for \$2,000, it being agreed that the contractor should secure a loan and finance construction of the

building. The contractor failed to finance the construction work, thus resulting in both notes and the contract being void.

However, it developed that previously the contractor had sold both notes to a man named Thompson, who had no other notice or knowledge of the terms of the agreement that had been made between the parties than his reading of the "building contract" and the note given him.

Soon afterwards a man named Purdy acquired the notes and contract from Thompson without knowledge that the contractor had breached the contract.

The owner refused to pay the amount of the notes on the contention that the contractor had breached his agreement and had failed to finance the work or construct the building.

However, it is important to know that the higher court held the owner bound to pay the note, saying:

"The note is a negotiable instrument, and Purdy is holder in due course. Since the latter had no knowledge or notice, at the time he acquired the note, that the consideration therefor had failed, he does not lose the character of holder in due course, even though the 'building contract' and note be taken as imparting notice."

BILL PROPOSED TO INCREASE TREE PLANTING

Harold Knutson of Minnesota has introduced a bill in the House of Representatives, to authorize the Secretary of Agriculture to enlarge tree planting operations on national forests east of the Rocky Mountains. The bill authorizes an appropriation for the fiscal year ending June 30, 1933, of \$150,000; for the fiscal year ending June 30, 1933, \$300,000; and for each fiscal year thereafter, \$400,000, to enable the Secretary of Agriculture to establish and operate nurseries, to collect or to purchase tree seed or young trees, to plant trees, and to do all other things necessary for reforestation by planting or seeding national forests east of the one hundred and second meridian of longitude and for the additional protection, care, and improvement of the resulting plantations or young growth.

POWER LINE STARTED

Construction has been started by crews of the San Joaquin Light and Power Company on a 48-mile steel transmission line from Merced to Fresno. The cost is placed at \$720,000. The line will make possible the direct transmission of high voltage electricity from the Great Western Power Company over the tie-line between Merced and Sacramento.

INFLUENCE VIA ADVERTISING

Where formerly the newspaper's influence was through its editorial columns, it now has its greatest effect through its advertisements. So Wm. Allen White, editor of the *Emporia Gazette*, told members of the Kansas Press Association at their annual banquet. White said: "Advertisements tend to make people dissatisfied with what they have and wish for better things and the race is benefited. As a nation we are building through advertising instead of government and it is proving a better way."

An upward trend in industrial and building activity, with a decrease in unemployment, is predicted in the latest report of the U. S. Department of Labor on employment conditions on the Pacific Coast.

MECHANICS' LIEN IS SUBJECT TO MORTGAGE ON COMPLETE BLDG.

The Supreme Court of Pennsylvania has held that even though the waiver of the right of a sub-contractor to file a mechanics' lien against certain property under construction is induced by the fraud of the contractor in representing that he is the owner of the property, such waiver may constitute sufficient grounds to postpone the mechanics' lien claim, subsequently filed, against the property to a claim under a mortgage which was given by the true owner after the construction had been completed.

The claimant under the mortgage petitioned under section 23 of the mechanics' lien act of 1901 to have it decreed that the mechanics' lien claim "is postponed to the rights of the petitioner," which the statute provides shall be decreed if the facts and circumstances warrant.

The appellate court held that the lower court had properly ruled that the mechanics' lien claim should be postponed, since by the waiver and the recitation in the recorded contracts with the general contractor that all agreements and inducements were contained therein, the appellants were equitably estopped as to third parties without notice of the fraud alleged to assert a lien. The risk of such fraud can not be placed on innocent third part purchasers or mortgagees, it was ruled.

Harry Toll and David Toll, Etc.

v.

Harry Beckerman, Etc.
Pennsylvania Supreme Court.
No. 293, January Term

Appeal from order of the Court of Commons Pleas No. 4, of Philadelphia County.

Opinion of the Court

Simpson, J.—The Malvern Hotel Apartments Corporation, hereinafter called Corporation, entered into a contract with Henry Beckerman for the erection of a building on its property. He, in turn, contracted with appellants, naming himself as owner, for the doing of certain work in the course of construction. Each of these contracts contained a waiver of the right to file a mechanics' lien claim, and each was duly entered in record. Later, appellants filed such a claim, alleging therein that they had been deceived into agreeing to the waiver by the false and fraudulent representations of Beckerman (1) that he was "a person of strong financial means and responsibility," and (2) "that he was the real and registered owner of the property."

After the work on the building had been completed, appellee loaned the Corporation the sum of \$25,000, taking a mortgage on the building at the time of its recording being subsequent to that averred in appellants' lien as the date of the visible commencement of the construction work on the ground. Because of this, if the property had been sold at sheriff's sale while the record was in that state, the mortgage would have been discharged, and hence appellee filed a petition under section 23 of the mechanics' lien act of June 4, 1901, P. L. 431, 442, to have it adjudged that appellants' "claim is postponed to the rights of the petitioner," as mortgagee. Appellants answered averring that the waiver in its contract with Beckerman was void

because of the same alleged false and fraudulent representations set forth in its claim as above. The case was heard upon petition and answer; an opinion was filed stating that the first of the alleged false and fraudulent representations had not been pressed, and since, also, it was not argued in this court, it must be treated as abandoned: *Miners State Bank v. Aukstokalnins*, 283 Pa. 18; *Wagner-Taylor Co. v. Spinelli*, 295 Pa. 455. The court below concluded that the second of the alleged misrepresentations, even if appellants' allegations were true, did them no harm so far as concerned the question to be decided. It therefore granted the prayer of the petition, and the mechanic's lien claimant appealed.

Appellants have made an elaborate and ingenious argument to sustain their contention, but we cannot agree with it. Section 23 of the statute, under which the petition was filed, provides that "any party having a lien against, estate in, or charge upon the property included in such [mechanics' lien] claim, may file his petition, under oath or affirmation, averring that the date mentioned in the claim as the time when the structure or other improvement was commenced is incorrect, or that the claim is filed against more land than should be justly included therein, or that for any reason the claim is postponed to the rights of the petitioner, and praying an appropriate decree * * * [and the court shall then] make such order or decree as the facts shall warrant." Admittedly the important question to be decided is, therefore: Do the admitted facts disclose any reason why appellants' claim should be "postponed to the rights of the petitioner"? In answering it, we must bear in mind that the section is highly remedial in character, intended to prevent in the future the injustices made possible under the preceding statutes (see *Reading v. Hopson*, 90 Pa. 494; *Eckels v. Stuart*, 212 Pa. 161; *Citizens Bank of Palmerton v. Lesko*, 277 Pa. 174) and hence "is to be construed by giving the words used the largest, the fullest, and the most extensive meaning of which they are reasonably susceptible": *Cresson Borough v. Seeds*, 286 Pa. 283, 285.

When appellee loaned to the corporation the \$25,000 which was secured by the mortgage of the latter, it was dealing with the record owner of the property, in possession thereof, and beyond this, aside from possible unfiled mechanics', municipal and tax liens, it was only obliged to examine the appropriate indices in the office of the recorder of deeds, and of the various courts of record whose territorial jurisdiction embraced the mortgaged property: *Salvation Army, Inc., Trustees, v. Lawson*, 293 Pa. 459. Such an examination would have disclosed nothing regarding appellant's claim, which had not yet been filed. As stated, appellee was required to ascertain, however, whether or not a mechanics' claim could subsequently be filed against the property. Whether or not it did this is not stated, and it is hence bound by what the records of the court of common pleas would have disclosed on that point, this being the place, under the statute, where a waiver of the right to file a lien would have to be recorded in order to be effective. If it found such a record, it was not obliged to go further, in the absence of knowledge that

the waiver was obtained by fraud or of something that would put it on notice in regard thereto. If appellee had done this, as possibly it did, it would have learned that, by their contract, appellants had personally waived the right to file a lien, and had further stated therein "that there are no inducements, understandings or agreements leading up to or including the execution of the contract which are not contained herein."

To permit these two provisions to be overturned by an allegation that execution of the contract was induced by false and fraudulent representations not included therein, would, as to innocent third parties, such as appellee, be grossly inequitable, and hence as to them the conduct of appellants equitably estopped them from filing a lien, as section 15 of the statute (P. L. 433) expressly provides that it should. The fact that the contract between Beckerman and appellants recited that Beckerman was the owner, does not alter the conclusion stated. Whether Beckerman was the owner in fee, or only the general contractor with the corporation, appellants had, aside from the waiver clause, the right to file a lien, and this right they could and did personally waive. It is not to be supposed that the legislature intended to put upon purchaser and mortgagees the risk of such a fraud having been practiced on lien claimants. If appellants were wronged, they have a remedy against the wrongdoer and those acting with him, and against them only, for even "where the contract is made in bad faith for the purpose of misleading and defrauding sub-contractors and materialmen the stipulation [waiving the right to file a lien] will be held invalid * * * only as to those who were parties to the fraud or had knowledge of it before their rights in the property had been acquired": *Westmoreland Guarantee B. & L. Assn. v. Connor*, 216 Pa. 543, 547. This is equitable and just, and maintains unimpaired the general rule for the protection of purchasers and mortgagees.

Section 5 of the mechanics' lien law of 1901 (P. L. 433), upon which also appellants rely for their allegation that appellee's contention fails, does not help them. It provides that "A contract made by the owner with one not intended in good faith to be the contractor for the structure or other improvement, shall have no legal effect, except as between the parties thereto * * * but such contractor, as to third parties, shall be treated as the agent of the owner." Assuming that the contract between the corporation and Beckerman is within the purview of this section, then it had no legal effect as to appellants, and Beckerman in his contract with them is "to be treated as the agent" of the corporation. Nowhere is it said that "a contract made by the owner with one not intended in good faith to be the contractor" shall operate to relieve a sub-contractor who, by his personal contract, waives the right to file a lien. It only provides against binding the sub-contractor by a waiver which appears in the recorded contract between the owner and the fictitious general contractor; a fraud often successfully practiced prior to the passage of this statute.

The great burden of appellants' argument is that the broad language of section 23 should be restricted by that of section 13 (P. L. 437), which provides that "The lien of the claim shall take effect as of the date of the visible commencement upon the ground, of the work of building the structure or other improvement, and

Building News Section

APARTMENTS

Contract Awarded.
APARTMENTS Cost, \$31,000
SAN FRANCISCO. SE Kearny and Chestnut Streets.
 Three-story frame and stucco studio apartment building (6 4-room apts. and 2 garages).
 Owner — Mrs. Caroline Mayes, 166 Geary St., San Francisco.
 Architect—Clausen & Amandes, Hearst Bldg., San Francisco.
 Contractor—C. H. Danziger, 1860 Jackson St., San Francisco.
 Construction will start in about 3 weeks.

Sub-Figures Being Taken.
APARTMENTS Cost, \$275,000
LOS ANGELES. Cal. No. 521 S. Manhattan Place.
 Eight-story Class A reinforced concrete apartments.
 Owner—John C. Dawson.
 Architect—E. Van Den Hoven, Rowan Bldg., Los Angeles.
 Contractor — L. W. Palmer, Lennox Hotel, 317 Flower St., Los Angeles.

Plans Being Completed.
APARTMENTS Cost, \$85,000
OAKLAND. Alameda Co., Cal. Overlooking Lake Merritt.
 Three-story and basement frame and stucco apartment building (15 2-3- and 4-room apts.) garage to accommodate 18 cars.
 Owner—Withheld.
 Architect—Chester Treichel, American Bank Bldg., Oakland.
 Segregated bids will be taken in one week.

Contract Awarded.
APARTMENTS Cost, \$28,000
BURLINGAME. San Mateo Co., Cal. 11 El Camino.
 Two-story frame and stucco (10) apts. Owner—Randle & Diggs.
 Architect—None.
 Contractor—E. H. Randles, 1029 Paloma Ave., Burlingame.

To Be Done By Day's Work.
APARTMENTS Cost, \$100,000
SAN FRANCISCO. SW Hayes and Pierce Streets.
 Six-story and basement Class C apartment building (36 apts.)
 Owner and Builder — F. Harris, 15 Balboa St., San Francisco.
 Plans by Owner.

Segregated Figures Being Taken.
APARTMENTS Cost, \$80,000
SAN FRANCISCO. NW 25th Ave. and Lake St.
 Six-story and basement class C apt. building (12 apts.)
 Owner and Builder—L. B. Ham, 105 Montgomery St.
 Architect—E. M. Sharpe, 105 Montgomery St.

Owner Taking Segregated Bids.
APARTMENTS Cost, \$85,000
OAKLAND. Alameda Co., Cal. No. 541 Merritt Ave. near Cleveland St.
 Three-story and basement frame and stucco apartment building (15 2, 3 and 4-room apts.) garage to accommodate 18 cars.
 Owner—H. E. Buckland, 2065 Webster St., Oakland.
 Architect—Chester Treichel, American Bank Bldg., Oakland.

Incinerator Contract Awarded.
ALTERATIONS Cost, \$—
SAN FRANCISCO. S Sacramento 154 W Kearny St.
 Alter present two-story brick apartments and add 1 story (12 apts.)
 Owner—Kong Chow Assn., Pine near Kearny St.
 Architect—F. W. Dakin, 625 Market St.
 Contractor—P. Sartorio, Bldrs. Exch.
 Incinerator—Kerner Incinerator Co., 450 Clementina St.
 As previously reported, ornamental iron awarded to Patterson and Koster Iron Works, 280 13th St.

Contract Awarded.
APARTMENTS Cost, \$65,000
RICHMOND. Contra Costa Co., Cal. Bissell St., between 39th and 40th Sts.
 Three-story frame and stucco apartment building (18 3-room apts.); all modern conveniences.
 Owner—Clara Hansen, 426 8th St., Richmond.
 Plans By Owner.
 Contractor — A. E. Orton, 3320 68th Ave., Oakland.

Structural Steel Contract Awarded.
APARTMENTS Cost, \$250,000
SAN FRANCISCO. SW Buchanan St. and Pacific Ave.
 Six-story, basement and sub-basement steel frame and reinforced concrete apartment building (36 3-4- and 5-room apts.)
 Owner and Builder—I. Epp & Sons, 4754 Geary St.
 Architect—Irvine & Ebbetts, Call Bldg.
 Engineer—J. M. Smith, 251 Kearny St.
 Structural Steel—McClintic - Marshall Co., 2050 Bryant St.
 Sub-bids are being taken on other portions of the work.

BONDS

Bond Election Planned.
SCHOOLS Cost, \$90,000
BRAWLEY. Imperial Co., Cal.
 Two six-unit elementary schools.
 Owner—Brawley Elementary School District.
 Architect—Not Selected.

VALLEJO. Solano Co., Cal.—A. P. Hill, chief of the Department of Public School Planning of the State Department of Education, recommends erection of a new junior high school

to alleviate crowded conditions in Vallejo, it is announced by Elmer L. Cave, city superintendent of schools. A bond election is contemplated to secure funds to finance construction.

FAIRFIELD. Solano Co., Cal.—Election will be called shortly by Armijo Union High School District to vote bonds of \$50,000 to which will be added \$124,000 to finance erection of a new high school to replace the structure destroyed by fire. The \$124,000 is available from insurance paid on the fire loss. Plans for the building are being prepared by Architects Coffman, Sahlberg & Stafford, Forum Bldg., Sacramento, and 3529 Emerson St., Oakland.

CHURCHES

Plans Being Figured—Bids Close Feb. 20, 7:30 P. M.
CHURCH Cost, \$35,000
UKIAH. Mendocino Co., Cal.
 Two-story solid brick (brick veneer walls) church.
 Owner—Uliah Methodist Church, (K. C. Eversole, chairman of Building Committee), Ukiah.
 Architect—Rollin S. Tuttle, Box C, Los Gatos.

The building committee desires to secure as many out-of-town bids on this project as is possible and announces that insurance money from the edifice recently destroyed by fire is available and all bids will be paid when due. Payments will call for 75% of all costs monthly. Plans obtainable from the chairman of the building committee or the architect.
 See call for bids under official proposal section in this issue.

Contract Awarded.
CHURCH Cost, \$16,993
OAKLAND. Alameda Co., Cal. SW 12th and Myrtle Sts.
 One-story frame and stucco church.
 Owner — Zion Evangelical Lutheran Church of Oakland, premises.
 Architect—Ward & Blohme, 310 Sansome St., San Francisco.
 Contractor—J. H. Mogk, 1479 78th Ave., Oakland.

FACTORIES AND WARE-HOUSES

Planned.
ADMINISTRATION BLDG., ETC. Cost, \$125,000
Compton. Los Angeles Co., Cal. East Olive St. and Santa Fe Ave. (8 acre site).
 Group of fireproof buildings (administration building, shed, warehouse, etc.)
 Owner—Owl Truck Co., Dewey Burden, President, 120 N. Tamarind St., Compton.

Plans Being Prepared — Contract Awarded.
MFG. PLANT. Cost, \$50,000
SAN PABLO. Contra Costa Co., Cal.
 One-story Class C brick manufacturing plant (26,000 square feet).
 Owner—Rheem Mfg. Co., 4535 Horton St., Oakland.
 Architect—Alton Froberg, Ray Bldg., Oakland.
 Contractor — H. J. Christensen, Ray Bldg., Oakland.

A Demonstration of the SKILSAW PORTABLE ELECTRIC HAND SAW

Will solve your cutting problems.

 San Francisco 1267

Plans Complete.
CEMENT PLANT Cost, \$—
CEMENTAL CITY, San Diego Co., Cal.
 Cement plant.
 Owner—Columbia Cement Co., Fred A. Ballen, president.
 Plans by Government and Harbor Department.

Plans Being Figured—Bids Close Feb. 25, 2:00 P. M.
STOCK BLDG. Cost, \$250,000
SACRAMENTO, Sacramento Co., Cal.
 State Fair Grounds.

One-story steel frame, brick and concrete live stock building.
 Owner—State of California.
 Architect—Geo. B. McDougall, State Architect, Public Works Bldg., Sacramento.

Structure will have steel frame with brick and concrete walls, concrete floor and tile and composition roof and will cover an area of 65,600 square ft.

Bids are wanted for a general contract and for mechanical work. The mechanical work includes plumbing and electrical work. Separate bids will be received for electric work and for plumbing work. Combined bids will also be considered covering the two branches of the work.

WATSONVILLE, Santa Cruz Co., Cal.—Letisine Vitamin Co., Inc., of Watsonville, recently incorporated, plans early construction of a plant in Watsonville for the manufacture of vitamins from lettuce waste. Incorporators are: Dr. Chas. Dickens of Oakland; H. F. Boyer, James T. Mann, Harry B. Sears, Ned B. Strong and James R. Cutler of Watsonville and W. W. Benchley of Oakland, oleomargarine manufacturer. The company will erect a plant costing between \$50,000 and \$75,000.

EXETER, Tulare Co., Cal.—Packing plant of Laguna Olive Co., destroyed by fire Jan. 25 with a loss of \$30,000, including contents. Loss is partially covered by insurance.

Plans Being Figured.
WAREHOUSE Cost, \$25,000
SUNNYVALE, Santa Clara Co., Cal.
 Reconstruct present one-story wood frame warehouse (concrete floors).
 Owner—Libby, McNeill & Libby, Merchants' Exchange Bldg., S. F.
 Architect—Eng. Dept. of Owner.

K. E. Parker, 135 South Park, San Francisco, and Wells P. Goodenough, 310 University Ave., Palo Alto, are two of the contractors figuring the plans.

MILPITAS, Santa Clara Co., Cal.—Construction is under way on a plant for the Handicraft Tile Co., now operating a plant in S-Eighteenth St., San Jose. The main building will be 40 by 120 feet and the office, warehouse and display structure, 40 by 50 ft. Leslie Austin is manager of the company.

Contract Awarded.
ADDITIONS Contract price \$24,200
SAN FRANCISCO, Municipal Airport.
 Additions to Hangars Nos. 2, 3 and 4.
 Owner—City and County of San Francisco.
 Engineer—City Eng. Dept., City Hall.
 Contractor—Spilvock & Spilvock, Hobart Bldg.

Plans Being Figured—Bids Close Feb. 10, 3 P. M.
HANGAR Cost, \$—
HANFORD, Kings Co., Cal. Municipal Airport.

Frame aeroplane hangar, 70 by 60-ft. Owner—City of Hanford, D. C. Williams, city clerk.
 Architect—Swartz and Ryland, Brix Bldg., Fresno.

Structure will be of wood construc-

tion, 70 by 60 -ft. with corrugated iron covering. Doors to give clear openings of 70-ft. Certified check 10% payable to city required with bid. Plans obtainable from city clerk, D. C. Williams, on deposit of \$5, returnable.

Painting Bids Wanted.
SHOP BLDGS Cost, \$45,000 & \$10,000
SAN FRANCISCO, S Carroll St. N Jennings St.

Two one-story steel frame shop buildings.

Owner—Pacific Elec. Mfg. Co., 5815 Third St., San Francisco.
 Engineer—R. E. McLane, 5815 Third St., San Francisco.

Plumbing—H. Williamson Co., 1738 Howard St., San Francisco.
 Bids are now being taken on painting.

As previously reported, crane awarded to Cyclops Iron Works, 337 Folson St.; steel sash to Michel & Pfeffer Iron Works, Harrison and 10th Sts.; glass to Tyre Bros. Glass Co., 666 Townsend St.; structural steel to Herlick Iron Works, 18th and Campbell Sts., Oakland; concrete work to Adam Arras Co., 185 Stevenson St.

Contract Awarded.
OFFICE Cost, \$30,000
SAN FRANCISCO, NE Third and 18th Streets.

One-story and basement reinforced concrete and frame office and warehouse.

Owner—Gilmore Oil Co., Los Angeles.
 Architect—Stanton, Reed & Hibbard, Metropolitan Bldg., Los Angeles.
 Contractor—Cahill Bros., 206 Sansome Street.

OROVILLE, Butte County, Calif.—Vaughan and Sons, Oroville, will commence construction at once on a hay and feed warehouse with a 230-foot frontage on the Southern Pacific, and 300-ft. frontage on the Western Pacific Railroad.

Plans Being Completed.
WAREHOUSE Cost, \$100,000
SAN MATEO, San Mateo Co., Cal.
 San Mateo Drive near State St.

Three-story reinforced concrete warehouse (20,000 square feet of storage space; Spanish type).

Owner—J. B. Peckman Co., 232 Main St., San Mateo.

Architect—Withheld.
 Bids will be called for shortly.

Contract Awarded.
SHOP Cost, \$20,000
FRESNO, Fresno Co., Cal. San Benito and Broadway Sts.

One-story brick sheet metal shop, 50 by 140-ft.

Owner—New England Sheet Metal Works, 301 Broadway, Fresno.

Architect—Not given.
 Contractor—W. T. Harris, 577 McKinley St., Fresno.

MODESTO, Stanislaus Co., Calif.—Sun Garden Canning Company will enlarge its plant and equipment this year at an approximate cost of \$50,000.

Plans Being Completed.
WAREHOUSE Cost, \$50,000
WATSONVILLE, Santa Cruz Co., Cal.
 Warehouse and general offices.

Owner—Esperanza, Inc.
 Architect—A. W. Story, Pajaro Valley Bank Bldg., Watsonville.

Bids will be taken in about two weeks.

Preliminary Plans Being Prepared.
WAREHOUSE Cost, \$75,000
FRESNO, Fresno Co., Cal.
 Warehouse.

Owner—United Grocers, Inc.
 Architect—Swartz and Ryland, Brix Bldg., Fresno, Spazier Bldg., Monterey and 373 Main St., Salinas.

Sub-Contracts Awarded.
CLEANING PLANT Cost \$90,000
SAN FRANCISCO, Mission St., bet. Ninth and Tenth Sts.

Four-story reinforced concrete cleaning plant.

Owner—Thomas Dyeing & Cleaning Works, Premises.

Architect—F. W. Dakin, 625 Market St., San Francisco.

Contractor—MacDonald & Kahn, Financial Center Bldg., San Francisco.

Reinforcing Steel—W. S. Wetenhall Co., 17th and Wisconsin Sts., San Francisco.

Steel Sash—Truscon Steel Co., Call Bldg., San Francisco.

Concrete—Golden Gate Atlas Material Co., 16th and Harrison Sts., San Francisco.

Plans Being Figured.
COACH SHED Cost, \$—
FRESNO, Fresno Co., Cal.

Reinforced concrete coach shed, composition roof, iron fencing.

Owner—Southern Pacific R. R. Co., 65 Market St., San Francisco.

Architect—Eng. Dept. of Owners (W. H. Kirkbride, Eng.)

Preliminary Plans Being Prepared.
DAIRY Cost, \$20,000

\$120,000 with equipment
FRESNO, Fresno Co., Cal.
 Modern Dairy.

Owner—Canham Dairies.

Architect—Swartz and Ryland, Brix Bldg., Fresno, Spazier Bldg., Monterey and 373 Main St., Salinas.

GARAGES AND SERVICE STATIONS

OAKLAND, Cal.—Tire Service Co., Inc., 2536 Webster St., authorized by city council to erect and maintain a super-service station at southeast corner of 20th St. and Broadway.

Contract Awarded.
AUTO LAUNDRY Cost, \$8,000
SACRAMENTO, Sacramento Co., Cal.
 1117 I Street.

Auto laundry and service station.
 Owners—Zelate Smith and Wm. Snyder, 117 21st St., Sacramento.

Architect—None.

Contractor—J. A. Saunders, 2110 10th St., Sacramento.

COLUMA, Colusa Co., Calif.—Richfield Oil Co. plans early erection of a super-service station in the vicinity of 8th and Market Sts. Texaco Co. will apply for permit shortly to erect a service station at Market and 4th Streets.

BAKERSFIELD, Kern Co., Calif.—Peerless Tire Service, 2121 Chester Ave., Bakersfield, has filed application with City Building Inspector R. H. Hubbard for a permit to erect a one and one-half-story reinforced concrete, 132 by 122-ft. garage, service plant and tire sales agency at the SW corner of 24th St. and Chester Ave.; estimated cost \$90,000. V. C. Johnson is president of the company.

Low Bidder.
GARAGE Cost, \$—
SACRAMENTO, Sacramento Co., Cal.
 One-story reinforced concrete garage.

Owner—Pacific Telephone & Telegraph Co., 140 New Montgomery St., San Francisco.

Architect—Eng. Dept. of Owner.
 Low Bidder—Monson Bros., 475 5th St., San Francisco.

CRESCENT CITY, Del Norte Co., Cal.—Associated Oil Co., has taken 10-year lease of property at the corner of Ocean Shore Drive and L St. and plans immediate erection of a \$25,000 service station and garage. Site is 120 by 120 feet.

Bids Opened.
GARAGE Cost, \$50,000
BERKELEY, Alameda Co., Cal. Oxford and Addison Sts.
One-story Class C steel frame and reinforced concrete garage.
Owner—University of California, Berkeley.

Architect—W. H. Ratcliff Jr., Chamber of Commerce Bldg., Berkeley
Lessee—Langhorne-Thomas Co., 2573 Shattuck Ave., Berkeley.

Low Bidder—Dyer Constr. Co., Ray Bldg., Oakland, at \$31,000.

Other bidders were:
Connor & Connor, Berkeley.....\$31,450
H. K. Henderson, Oakland.....\$2,749
Chas. Vezey & Son, Oakland.....\$3,683
E. T. Lesure, Berkeley.....\$3,870
Sullivan & Sullivan, Oakland.....\$4,100
C. H. Wendt, Berkeley.....\$4,133
A. Cedarborg, Oakland.....\$4,534
C. H. McCullough, Oakland.....\$4,600
Leibert & Trobeck, S. F.....\$4,605
George Swanstrom, Oakland.....\$4,823
A. Frederick Anderson, Oakland.....\$5,218
Jacobs & Pattin, Oakland.....\$5,400
H. C. Schultz, Oakland.....\$5,440
Alfred L. Vezina, Oakland.....\$5,460
Young & Horstmeier, S. F.....\$5,542
N. H. Sjoberg, Oakland.....\$6,336
Louis O. Hansson, Berkeley.....\$9,900
E. T. Leiter & Son, Oakland.....\$40,400
Bids are held under advisement.
Contract will probably be awarded to either of the two low bidders, according to which alternates are accepted at the Regents Meeting in Los Angeles on February 11.

Plans Being Prepared.
ALTERATIONS Cost, \$—
STOCKTON, San Joaquin Co., Cal.
Alterations and additions to present brick garage.
Owner—Firestone Tire & Rubber Co., Architect—Chas. McCall, 1404 Franklin St., Oakland.

Contract Awarded.
STORAGE BLDG. Cost, \$30,000
STOCKTON, San Joaquin Co., Cal.
One-story reinforced concrete vulcanizing plant and tire storage building (Super service station) battery station, etc.
Owner—Valley Tire Co., Ed H. Rimmington and Frank Matteoni, 242 N. San Joaquin St., Stockton.
Architect—Jos. Lockann, 931 N. El Dorado St., Stockton.
Contractor—J. A. Allen, 525 E. Market St., Stockton.
Construction has just been started.

Plans Being Completed.
GARAGE Cost, \$30,000
WATSONVILLE, Santa Cruz Co., Cal.
One-story concrete garage building.
Owner—W. W. Bendell, 213 Main St., Watsonville.
Architect—A. W. Story, Pajaro Valley Bank Bldg., Watsonville.
Plans will be taken in two weeks.

Plans Being Figured.
GARAGE Cost, \$—
SACRAMENTO, Sacramento Co., Cal.
One-story reinforced concrete garage.
Owner—Pacific Telephone & Telegraph Co., 140 New Montgomery St., San Francisco.
Architect—Eng. Dept. of Owner.

Contract Awarded.
SERVICE STATION Cost, \$16,000
SAN FRANCISCO. SE 7th Ave. and Irving St.
One-story concrete super-service station and alterations to present steel station.
Owner—Granfield's, Inc., 12th and Howard Sts.
Architect—Blaine & Olsen 1755 Broadway, Oakland.
Contractor—W. C. Cone, 826 Crocker Building.

GOVERNMENT WORK AND SUPPLIES

SAN FRANCISCO.—Until February 10, 10 A. M., under Schedule No. 928-30-194, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish and deliver 1,500 hacksaw blades; 1300 machine bolts; 600 lbs. r. r. or track bolts; 1,000 lbs. wire finishing nails; 500 grass hooks or sickles; 5,230 lbs. iron or steel, round, in commercial lengths; 1,450 lbs. oakum; 6,800 lbs. rolled plate zinc; 12 pair of barn door bangars; 66 pair wrought steel galv. hinges; 250 rolls wire cloth, hard drawn copper or golden bronze. (50x133 ft.; reinforced concrete and

steel construction).

Owner—Los Angeles Desk Co.

Architect—Lloyd Rally, Subway Ter-

terminal Bldg., Los Angeles.

Bldgs Opened—Held Under Advisement
STORE Cost, \$200,000
STOCKTON, San Joaquin Co., Cal.
Three-story reinforced concrete store
building.

Owner—S. H. Kress Dept Store, 621
S Broadway, Los Angeles.
Architect—John H. Fleming, Los An-
geles.

Following is a list of the contrac-
tors who submitted bids:
Clinton Const. Co., San Francisco.
MacDonald & Kahn, San Francisco.
O. H. Chain, Stockton.
Lewis & Green, Stockton.
Robert McKee, Los Angeles.
Meltzer & Son, Los Angeles.
Beller Const. Co., Los Angeles.
Sumner Solitt Const. Co., Los An-
geles.
McLane Const. Co., Los Angeles.
Etherton Const. Co., Los Angeles.
Announcement of award will be
made shortly.

Plans Being Prepared.
OFFICE BLDG. Cost, \$—
SAN JOSE, Santa Clara Co., Cal. San
Fernando Street.
Three-story modern office and store
building (type of construction not
decided).
Owner—San Jose Hardware Co., Ar-
thur and Warren Holmes, Prop.
Architect—Binder & Curtis, 35 W San
Carlos St., San Jose.

Contract Awarded.
BANK Cost, \$1,000,000
LOS ANGELES, Cal. No. 621-23-S.
Spring Street.
Twelve-story and basement Class A
steel frame with pressed brick and
terra cotta facing bank and of-
fices (50x155 feet).
Owner—Spring Street Realty Co.,
Harry J. Bauer, President.
Architect—John and Donald Parkin-
son, Title Insurance Bldg., Los
Angeles.
Contractor—P. J. Walker Co., Garland
Bldg., Los Angeles.

Sub-Contracts Awarded.
STORE BLDG. Cost, \$450,000
OAKLAND, Alameda Co. Cal. Twenty-
seventh St. and Telegraph Ave.
Three-story, basement and tower
modern Class A reinforced con-
crete store building.
Owner—Scars, Roebuck Co., Ninth &
Boyle Sts., Los Angeles.
Architect—Eng. Dept. of Owner.
Contractor—P. J. Walker Co., Sharon
Bldg., San Francisco.
Electrical Work—Ne Page McKenney
Co., 128 10th St., Oakland.
Smoke Stacks—California Steel Pro-
ducts Co., 452 Bay St., S. F.
Plastering—MacGruer & Co., 266 Te-
hama St., San Francisco.
Glass and Glazing—Cobbledick-Kibbe
Glass Co., 301 Washington Street,
Oakland.

Hardwood Floors—Hardwood Floor
Co., 1911 E-12th St., Oakland.
Rubber Tile—Malott & Peterson, 3221
20th St., San Francisco.
Awning—Daahl Thoms Company 2335
Broadway, Oakland.

As previously reported, heating and
ventilating awarded to Latourrette-
Fical Co., 630 4th St., Oakland, at
\$26,162; plumbing to Latourrette-Fical
Co., at \$23,132; painting to Aristo
Painting Co., 473 Bryant St., S. F.,
at \$4045; sheet metal work to East
Bay Sheet Metal Works, 1101 Market
St., Oakland, at \$899; metal stairways
and railings to Michel & Pfeffer Iron
Works, Harrison and Tenth Sts., S.
F.; masonry work to Reed & Reed,
Hearst Bldg., S. F., at \$45,419; misce-
laneous iron and steel work to Fair
Mfg. Co., 617 Bryant St., S. F., at
\$1185; structural steel (furnish and
erect) to Fair Mfg. Co., at \$3312; cast
steel (furnish and deliver) to Geo.
MacGruer, 266 Tehama St., S. F., at

\$8036; excavating to J. Catucci, 1212
10th Ave., Oakland; metal column
forms to Des Lauriers Metal Products
Co., 1730 25th Ave., Oakland.

Plans Being Prepared.
REMODELING Cost, \$—
SAN FRANCISCO, 31 Powell St.
Remodel building for cafe.
Owner—Pign Whistle Corp.
Architect—Chas. F. Plummer, Story
Bldg., Los Angeles.
It will occupy the ground floor and
basement of the building and the work
will involve remodeling the front and
interior and installation of marble,
tile and terrazzo work, decorating,
electric wiring and fixtures, ventila-
ting system and kitchen equipment.
The work will be done by San Fran-
cisco contractors. The Pign Whistle
Corp. proposes opening up several
other cafes in the bay district and
Los Angeles, locations and particu-
lars to be announced later.

Contract Awarded.
STORE Cost, \$15,000
SANTA BARBARA, Cal. 632 Chapala
Street.
Semi fireproof store.
Owner—Freeze & Freeze.
Architect—Roland F. Sauter, Granada
Bldg., Santa Barbara.
Contractor—Santa Barbara Const. Co.,
Santa Barbara.

Preliminary Plans Being Prepared.
RESTAURANT Cost, \$25,000
FRESNO, Fresno Co., Cal.
Spanish restaurant.
Owner—Estrada Spanish Kitchen.
Architect—Swartz and Ryland, Brix
Bldg., Fresno, Spaxier Bldg., Mont-
erey and 373 Main St., Salinas.

Preparing Working Drawings.
STORE Cost, \$100,000
OAKLAND, Alameda Co., Cal. Tele-
graph Ave. and Hobart St.
Three-story class C store and dance
hall.
Owner—Sweet's Ballroom.
Architect—Miller & Warnecke, Finan-
cial Center Bldg., Oakland.
More definite information will be
given within one week.

Plans Being Prepared.
SHOP Cost, \$—
CARMEL, Monterey Co., Cal. SW
Ocean Ave. and Monte Verde St.
Two-story Norman type frame and
stucco shop bldg. (11 shops).
Owner—Mrs. Ethel Young, Carmel.
Architect—Robert Stanton, Carmel.
There will be a central heating
plant, and several open fire places.
Bids will be called for in about sixty
days.

Contract Awarded.
STORE Cost, \$11,376
MAYFIELD, Santa Clara Co., Cal. 49
College Terrace.
One-story concrete store.
Owner—Joseph A. Gemur, 309 Leland
St., Palo Alto.
Architect—None.
Contractor—Geo. B. Moore, 531 Stan-
ford St., Palo Alto.

Contract Awarded.
STUDIO Cost, \$20,000
SAN MATEO, San Mateo Co., Cal.
Two-story concrete studio building.
Owner—Frederick Smith, 300 B St.,
San Mateo.
Architect—Enrl Cavasso, 233 2nd Ave.,
San Mateo.
Contractor—Sierra Const. Co., 233 3rd
Ave., San Mateo.

FRESNO, Fresno Co., Cal.—Neil
White & Co., shoe dealers, 1937 Mar-
lissa St., has leased quarters at 1133
Fulton street to operate as a fourth
store in this city and will expend ap-
proximately \$30,000 in remodeling and
installation of fixtures. In addition to

interior work, a new front will be in-
stalled. Luther P. Neil is head of the
company.

Plans being Figured.
BANK Cost, \$30,000
REDWOOD CITY, San Mateo Co.,
Cal. Upper Broadway and Minnie
Street.
One-story concrete modern bank
building (90x90 ft.; Spanish type).
Owner—San Mateo County Bank, Red-
wood City.
Architect—Albert F. Roller, Crocker
First National Bank Bldg., San
Francisco.

THEATRES

Plans Being Completed.
THEATRE Cost, \$40,000
OAKLAND, Alameda Co., Cal. Twelfth
and Broadway.
Two-story theatre and store building
(theatre to seat approx. 800).
Owner—Levy Estate, Oakland.
Architect—Clausen & Amandes,
Hearst Bldg., San Francisco.
Bids will be taken in about three
weeks.

Contract Awarded.
THEATRE Cost, \$375,000
YUMA, Arizona. Third and Main Sts.
Five-story and basement Class A re-
inforced concrete hotel, theatre
and stores (theatre to seat 1050).
Owner—San Felipe Hotel Co.
Architect—Gilbert Stanley Underwood
& Co., California Reserve Bldg.,
Los Angeles.
Contractor—McKeefrey Bros., 1422 E-
Sixth St., Yuma.

Commissioned To Prepare Plans.
THEATRE Cost, \$250,000
HUNTINGTON PARK, Los Angeles
Co., Cal.
Class A reinforced concrete theatre
and stores, 114x150 feet (to seat
2000).
Owner—Warner Bros.
Architect—B. Marcus Priteca, 915
Warner Bros. Downtown Theatre
Bldg., Los Angeles.

Commissioned To Prepare Plans.
THEATRE Cost, \$250,000
SAN PEDRO, Los Angeles Co., Cal.
Class A reinforced concrete theatre
and stores, 125x200 feet, (to seat
2000).
Owner—Warner Bros.
Architect—B. Marcus Priteca, 915
Warner Bros. Downtown Theatre
Bldg., Los Angeles.

BAKERSFIELD, Kern Co., Calif.—
Architect S. C. Lee, 431 Petroleum Se-
curities Bldg., Los Angeles, announced
following additional bidders who will
submit general contract bids for 2-
story reinforced concrete class A the-
atre and store building in Bakersfield
for Fox West Coast Theatres: Henry
Eissler, 2223 18th St., and J. J. Garfield
both of Bakersfield. Other bidders are
H. M. Baruch Corp., A. T. Lane, Sum-
ner-Solitt Co., H. I. Beller, J. Wes-
ley Porderer, A. V. Perkinson, Inc.,
and Christ Thoren. The building will
be two-stories, 150x122 feet and will
contain 11 stores on main floor and
offices on second floor, balcony and
auditorium seating 2000.

STOCKTON, San Joaquin Co., Cal.—
L. R. Crook, president of National
Theatre Syndicate and Wallace Pred-
dy, vice-president of the same com-
pany, are in Stockton looking over
locations on which the company pro-
poses to erect a \$500,000 Class A
theatre.

SAN LUIS OBISPO. San Luis Obispo Co., Cal.—Fox-West Coast Theatres, Inc., is having plans prepared for a modern theatre to be erected in this city. Will have a seating capacity of 2000 and will be of fireproof construction. Harold B. Franklin, president of the Theatre Operating Co., operating the Elmo and Obispo Theatres, is interested in the proposed new structure.

Plans Being Completed.
THEATRE. Cost, \$200,000
MERCED. Merced Co., Cal. Seventh and J Sts. (150x150 feet).
Two-story Class C steel frame and reinforced concrete theatre, stores and office building (theatre to seat 1700).
Owner—Golden State Theatres, Inc., 983 Market St., San Francisco.
Architect—Reid Bros., 105 Montgomery St., San Francisco.
J. W. Huffman, Merced, awarded grading contract. Bids will be called for shortly.

WHARVES AND DOCKS

SAN FRANCISCO.—Until February 6, 11 A. M., bids will be received by Constructing Quartermaster, Fort Mason, for repairs to East Garrison Wharf, Coal Bunker Wharf and West Garrison Wharf at Fort McDowell. Plans obtainable from above office.

PEARL HARBOR. T. H.—See "Government Work and Supplies," this issue. Bureau of Yards and Docks to ask bids shortly for reinforced concrete pier, quays and bulkhead, including piping and electrical work.

SAN FRANCISCO.—Following bids received by Constructing Quartermaster, Fort Mason, for repairs to torpedo wharf at Fort Winfield Scott:
Clinton Const. Co., 923 Folsom Street \$1,100
M. B. McGowan, S. F. 1,260
Healy-Tibbitts Const. Co., S. F. 1,584
Bids taken under advisement.

MISCELLANEOUS CONSTRUCTION

BERKELEY. Alameda Co., Calif.—H. Johnson Co., 26th and Peralta Sts., Oakland, at \$1,331.49 submitted only bid and was awarded contract by Florence E. Turner, city clerk, to surface tennis courts at San Pablo and James Kennedy Playgrounds.

Plans Completed.
STATION. Cost, \$—
KENTFIELD. Marin Co., Cal.
One-story frame and stucco (Mission type) passenger station, 43x14 ft.
Owner—Northwestern Pacific R. R., 65 Market St., San Francisco.
Architect—Eng. Dept. of Owner.
Bids will probably be called for shortly.

MERCED. Merced Co., Cal.—L. J. C. Wegner, Merced, announces plans are being completed for the erection of a new archway on the north entrance to the city of Merced from the Golden State Highway; will be 54 ft. wide, equipped with Neon lights and electrolights.

OAKLAND. Alameda Co., Cal.—Following bids received by John H. Kimball, Secretary, East Bay Municipal Utility District, 512 16th St., to furnish and install electrically operated dumb waiter in Oakland Office Building at 512 16th St.:
C. Jorgensen Co., 604 Mission St., San Francisco \$ 975
Price Building Specialties Co., San Francisco 1017
Otis Elevator Co., San Francisco 1085
S. F. Elevator Co., S. F. 1175

Spencer Elevator Co., S. F. 1210
Bids held under advisement.

OAKLAND. Alameda Co., Cal.—Following bids received by Frank C. Merritt, City Clerk, to install flood lighting system at city hall:
General Electric Supply Co., 9th and Jackson Sts., Oakland. \$1075.45
Union Electric Co., Oakland. 1094.00
Bids held under advisement.

SAN FRANCISCO.—Until February 5, 2:30 P. M., bids will be received by Board of Public Works to rehabilitate Stockton Street Tunnel, involving waterproofing, painting, lighting and general repairs. The cost is estimated at \$11,000. A deposit of \$10 is req. for plans, obtainable from Bureau of Engineering, 3rd floor, City Hall.

BAKERSFIELD. Kern Co., Calif.—Until February 10, 5 P. M., bids will be received by V. Van Ripper, city clerk, to construct one cement tennis court and fence at Jastro Park. Cert. check 10% payable to city required with bid. Plans obtainable from clerk.

SAWTELLE. Los Angeles Co., Cal.—R. G. Meyler Corp., 940 Maple Ave., Los Angeles, has the contract for installing a 500-h. p. boiler for the new buildings being erected at Sawtelle for the U. S. Veterans' Home. Meyler Corp. also has the contract for installing a 200-h. p. boiler at Kelso, Calif., for the Union Pacific Co., and for installing two 300-h. p. boilers at the Ford Motor Co. plant at Long Beach.

REDWOOD CITY. San Mateo Co., Cal.—City Manager E. A. Rollson announces a contract will be let shortly for a one-story "bungalow" type structure to be known as the Redwood City Animal Shelter, (city pound). The structure will be financed by a private donation to the city and will be 24 by 50 feet.

OAKLAND. Cal.—E. M. Jorgensen Co., 563 Third St., seek authorization of city council to install 5-ton overhead crane for unloading cars in vicinity of Third and Clay Sts. The application has been referred to the Street Department for report and recommendation.

COALINGA. Fresno Co., Cal.—As previously reported, Boiler, Tank & Pipe Co., 75th Ave. and E-10th St., Oakland, at \$1085 awarded contract by city council to furnish and erect one gas receiver tank, 8 ft. dia. by 40 ft. long with standard dished heads ¾-in. thick, shell ¾-in. thick with all seams doubled welded, or welded inside and out with 11 by 16 manhole and one head, etc. Other bids were: Southwest Welding & Manufacturing Co., Los Angeles, \$894; California Steel Products Co., Los Angeles, \$975; Standard Boiler & Steel Works, Los Angeles, \$1031; Western Pipe & Steel Co., San Francisco, \$1050; Steel Tank & Pipe Co., Berkeley, \$1075; Consolidated Steel Corp., Los Angeles, \$1285; Kyle Co., Fresno, \$1450.

SEBASTOPOL. Sonoma Co., Calif.—Until Feb. 7, 7:30 P. M., bids will be received by F. G. McFarlane, city clerk, to clear portion of sewer farm required for new sewage disposal plant. Certified check 10% required with bid. Specifications on file in office of city clerk.

Planned.
OBSERVATORY. Cost, \$1,000,000
LOS ANGELES. Los Angeles Co., Cal.
Griffith Park.
Observatory.
Owner—City of Los Angeles.
Architect—Not Selected.

COALINGA. Fresno Co., Cal.—Boiler, Tank and Pipe Co., 75th Ave. and E 10th St., Oakland, at \$1,085 awarded contract by city council to furnish and erect one gas receiver tank, 8-ft. dia. by 40-ft. long with standard dished heads ¾-in. thick, shell ¾-in. thick with all seams double welded, or welded inside and out with 11 by 16 manhole and one head, etc.
Plans Being Figured.

REMODEL DEPOT. Cost, \$8,000
SACRAMENTO. Sacramento Co., Cal. Seventh and L Sts.
Remodeling of present depot for deluxe stage depot.
Owner—Southern Pacific Motor Transport Co., 9 Main St., San Francisco.

Architect—Eng. Dept. of Owner.
Bids are being taken by Mr. Evans, care S. P. Motor Transport Co., 2047 San Pablo Ave., Oakland, for a general contract.

UKIAH. Mendocino Co., Cal.—Until Feb. 4, 7:30 P. M. bid will be received by F. C. Handy, city clerk, to furnish and install one complete Commercial Butane gas manufacturing system as present gas plant of city. Certified check 10% required with bid. Plans obtainable from Leon B. Jones, gas engineer, 58 Sutter St., San Francisco.

Bids Wanted.
ADDITION. Cost, \$450,000
LOS ANGELES. Cal. Exposition Park.
Add to Coliseum.
Owner—City of Los Angeles.
Architect—John and Donald Parkinson, Title Insurance Bldg., Los Angeles.

Section A will include the removal of the upper half of the structure and reconstructing of reinforced concrete, with a few additions. This portion of the work will be done first and will cost about \$450,000, funds for which are available. Section B will include the addition of 25,000 seats and will cost an additional \$450,000. Funds for the work under Section B will not be available until July 1st.

FORTUNA. Humboldt Co., Cal.—Fortuna Union High School District contemplates the construction of a swimming pool in connection with the high school plant. The project has the endorsement of the Business Mens' Association.

BUSINESS OPPORTUNITIES

SAN FRANCISCO.—Names and addresses of the individuals or firms concerned in these opportunities will be furnished on request to the Business Opportunity Department of Daily Pacific Builder, 545-547 Mission Street, Phone KEarny 1252:

17073—Electric Light Globes. Seattle, Wash. The representative of a manufacturer of incandescent globes located in Tokyo is in this country to establish direct connections with importers of this product.

17084—General Representation. Tegucigalpa, Honduras. Party desires to represent in Honduras California manufacturers and exporters.

D-3372—Distributor. Indianapolis, Indiana. Distributor for malted milk who covers the soda fountain trade in and around San Francisco desired.

D-3373—Auto Supplies. Berkeley, Calif. Party looking for connection with a manufacturer or wholesaler of auto supplies, parts, equipment, or accessories, who has new territory to develop, or old territory to work more intensively.

D-3374—Representative. New Albany, Ind. Company in the market for a representative to handle complete

line of equipment for varnish making, paint and lacquer.

D-3375—Patent. New York City. Party interested in disposing of patent for safety tank filling device, for boats of any kind. Some advertising already done and the device quickly sells itself.

D-3376—Lumber. Aberdeen, Wash. Party desirous of securing market for green alder and maple lumber with shipment to San Francisco from Port Dock by steamer. Can furnish ten thousand feet per day.

D-3377—Distribution. Cincinnati, O. Concern in position to give national distribution at minimum cost to item that would come under the classification of household or kitchen utility, or novelty, either for the house or individual.

D-3378—Representation. Chicago, Ill. Company desires to secure the representation in the central and central western states of products sold through the wholesale channels. Prepare to furnish complete data as to their responsibility, etc.

STANDARDS BUREAU TO STUDY SKYSCRAPER PLUMBING

Plumbing experiments conducted some years ago at the U. S. Bureau of Standards, in co-operation with the sub-committee on plumbing in the Department of Commerce Building Code Committee, have been resumed as the result of a recent conference at New York, held by the committee. It will be recalled that the results of the previous series of experiments formed the basis for the so-called Hoover Code, which has had wide influence in determining plumbing requirements throughout the country.

The scope of the previous investigation was limited both because of available funds and because of a demand for early recommendations covering plumbing in small buildings. It is intended in the present investigation to pick up the program and extend its field into plumbing installations in high buildings.

Recommendations for plumbing in such structures have already been brought out by the plumbing committee in response to continued requests, but the committee has recognized frankly that further experimentation will be necessary before the last word can be said upon the subject.

The actual experimental work will be done as before by experts of the Bureau of Standards, and the results will be interpreted by the committee so that they may be put to general use. It is estimated that the program will cover at least three years. Tentative plans covering such a period have been drawn up and preliminary investigation work is already under way. Progress will depend upon the degree of financial support given by the plumbing industry and by those who use plumbing. Enough funds have been raised through such sources to initiate the work, and it is hoped that further support will be forthcoming so that it will not lapse.

Briefly, it is proposed to investigate actual conditions in plumbing stacks, drains, and venting systems in large buildings with the object of determining the actual facts that exist there. This will be done partly by inserting measuring instruments in the plumbing lines and measuring the loads that occur in different occupancies over a sufficient period of time to get a true picture of the situation. After enough data have been collected to form a basis for judgment, it will then be possible to prepare tables and other

so that they will function efficiently. practical means for designing systems
GRAVEL ROADS DESCRIBED IN UNIVERSITY CIRCULAR

In many localities gravel offers a possible means of satisfying the insistent demand for reasonably good all-weather and all-season roads on the secondary and outlying highways where traffic is comparatively light and funds are usually meager.

During the past few years considerable study has been devoted to gravel roads. Practically all of this study, however, has been directed at the problem of how to protect existing gravel roads from rapid destruction by excessive traffic, rather than to that of finding effective methods of building and maintaining untreated gravel roads at low cost, suitable for light to medium traffic.

The object of the investigation reported in Circular No. 18 of the Engineering Experiment Station of the University of Illinois was to secure reliable data concerning the methods, materials, and equipment best suited to the construction, rehabilitation, and maintenance of gravel roads subjected only to moderate traffic.

The experimental work consisted in the construction and maintenance of a mile of gravel road, including the preparation of the subgrade, and the rehabilitation and maintenance of a mile of existing roadway built of local material in a fair to poor state of repair. The circular contains a detailed description of the work involved, the machinery and materials used, and a summary of the results obtained.

Copies of Circular No. 18 may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

WHAT IS A CONTRACTOR?

There is no class of work that takes on as varying qualities as contracting. It appeals to men who are optimistic and to those who have been born in them the longing for doing things. The contractor must be a man first and possess the most common things, "common sense," and he must have "physical sense," the sense that tells a man without calculating wherein lies the center of gravity; the sense that tells a man values without estimating; the sense that tells a man quantities without measuring. He must have a magnetism in order to gather his men about him. He must have a reputation for justice in order to hold them. He must be forceful in order to inspire energy in others. He must be a lawyer and a buyer. He must have the ingenuity of an inventor and the grasp of a Field Marshal. He must also know when not to be a politician. He must be a financier and an advertiser and last, but not least, a prophet.—Exchange.

HALF BILLION FOR NEW YORK CONSTRUCTION IN 1930

New York state's answer to President Hoover's plea for public construction to help guarantee prosperity is a \$479,184,000 public works program. Governor Roosevelt advised Secretary of Commerce Lamont. This includes state, city and county projects. Of the total, \$94,610,357 represents state finances projects, a \$22,422,057 increase over 1929. City construction totals \$329,574,137. Fifty-four of fifty-seven counties outside New York City will spend \$41,090,948. The state also will expend \$10,000,000 bond receipts for general improvements.

BUILDING INDUSTRY ON COAST IN FAVORABLE POSITION

The building industry on the Pacific Coast is in much more favorable position than is the case for the United States as a whole, according to an analysis of recent western and national building records just completed by S. W. Straus & Co. While the total of new building for which permits were issued in 588 principal cities of the United States during 1929 was 11.6% below the comparable figures for 1928, the relative reduction in 105 Pacific Coast cities amounted to but 7.1%.

Figures compiled by the S. W. Straus & Co. National Monthly Building Survey show a 588-cities total of \$3,827,821,447 in building permits issued during 1928, and \$3,379,977,311 in 1929, while the 1928 total for 105 Pacific Coast cities was \$404,904,563 in 1928, and \$375,779,431 in 1929. The Pacific Coast total amounted to 10.5% of the national total in 1928 and 11.1% in 1929.

Throughout the country the greatest reductions in the 1929 building program occurred during the last quarter of the year. In this period the Pacific Coast cities were far less influenced than was the country as a whole by the effect on building activity produced by the drastic stock market break. Building permits totals for the last quarter of 1929, the Straus survey shows, were 26.6% below the 1928 figure for the country at large, and showed but a 12.7% decline for the Pacific Coast.

STEEL OFFICE EQUIPMENT TO BE SIMPLIFIED

A committee representing purchasers of steel office equipment throughout the country, is being organized for the purpose of determining the advisability of simplifying the existing variety in over-all dimensions of this type of equipment, as well as a clarification of the use of the term "olive green," according to the Division of Simplified Practice, U. S. Department of Commerce. Under existing conditions there is considerable difficulty experienced by the purchaser of steel office furniture in matching his present equipment, the division reports.

400 CIVIL ENGINEERS WANTED BY DEPARTMENT

Approximately 400 qualified civil engineering employees will be added to the state department of public works in the near future by means of examinations to be given by the civil service commission. Vacancies in both offices and field positions are located throughout the state, with salaries ranging from \$100 to \$230 a month.

Written examinations will be given at Sacramento, San Francisco and Los Angeles, and at such of the following points as the number of applicants may warrant: Bishop, Fresno, San Bernardino, San Luis Obispo, Eureka and Redding. Oral interviews will be given at Sacramento, San Francisco and Los Angeles.

State Senator Michael J. McDonough of Oakland, has been elected president of the Building Trades Division of the American Federation of Labor. He succeeds William J. McSorley, resigned. Before entering the legislative halls of California, McDonough was a plasterer. In assuming his new duties he will reside in Washington, D. C.

Engineering News Section

BRIDGES

LOS ANGELES, Cal.—City Engineer John J. Jessup preparing plans for First St. viaduct over Glendale Blvd. Funds to cover the cost, estimated at \$600,000, will be provided by the council after plans have been completed.

HUMBOLDT CO., Cal.—Until Feb. 19, 2 P. M., bids will be received by State Highway Commission to construct undergrade crossing under tracks of Northwestern Pacific Railroad at Loleta, consisting of a 60-ft. deck plate girder span on concrete piers with pile foundations.

See call for bids under official proposal section in this issue.

EUREKA, Humboldt Co., Calif.—County Surveyor Frank E. Kelly is conferring with the U. S. Bureau of Roads, 461 Market St., San Francisco, regarding construction of a bridge across Trinity river at Hoopa.

PHOENIX, Ariz.—Lynch-Cannon Engineering Co., 1027 Chapman Bldg., Los Angeles, awarded contract by the Arizona Highway Commission at \$397,608.10 to construct Phoenix-Tempe Highway Bridge, P. A. P. 2-B. The work consists of the construction of a bridge, composed of ten reinforced concrete arches, across the Salt River at Tempe, Ariz. The work is to be completed on or before July 31st, 1931. The approximate quantities are: 12,252 cu. yds. excav. (unclass.); 241 cu. yds. class AA concor. above curbs; (C.F.C.); 299 cu. yds. class AA concor. (sidewalks) (C.F.C.); 10,274 cu. yds. class A concr. (C.F.C.); 6584 cu. yds. class B concr. (C.F.C.); 426 cu. yds. sand fill in abt. piers (C.I.P.); 1,791,083 lbs. reinf. steel (incl. exp. plates) (C.I.P.); lighting system (C.I.P.).

MARTINEZ, Contra Costa Co., Cal.—Until February 17, 11 A. M., bids will be received by J. H. Wells, county clerk, to repair and re-floor Old River bridge over Old River on the Borden Highway. Cost will be borne by Contra Costa County and San Joaquin County supervisors. Cert. check 5% payable to Chairman of Board of Supervisors required with bid. Plans obtainable from Julius Matheny, county surveyor at Stockton, or from R. R. Arnold, county surveyor at Martinez, on deposit of \$10, returnable.

SISKIYOU COUNTY, Cal.—As previously reported, bids will be received by State Highway Commission Feb. 13 to construct a reinforced concrete bridge at Station 295 plus 75.25 about 5½ miles north of Yreka, consisting of one 200-ft. open spandrel arch span and three 40-ft. girder approach spans. Project involves: 920 cu. yds. struc. excav.; 750 cu. yds. class B, 790 cu. yds. class F, 600 cu. yds. class A and 22 cu. yds. class E Portland cement concrete; 216,000 lbs. reinf. steel; 200 cu. yds. rubble masonry; 1 lot, miscellaneous items of work.

SAN GABRIEL, Los Angeles Co., Cal.—Southern Pacific Railway plans steel railway bridge to replace the existing one over Rubio wash in East San Gabriel. Est. cost, \$60,000.

ALMADEN, Santa Clara Co., Cal.—Bids are being received by T. J. Armstrong, clerk, Almaden Union Grammar School District, to furnish and deliver one Dodge Bros. Standard School Bus on a 1½-ton chassis, 165-inch wheel base; capacity 41 to 53 grammar school children. Tire equipment to be 32x6 front and 32x6 dual rear; six-cylinder motor, 3-¾x3-¾. Four-speed heavy duty transmission and four-wheeled hydraulic brakes. Date for opening bids has not been set. Further information is obtainable from clerk.

GLEN ELLEN, Sonoma Co., Cal.—Until February 10, 7:30 P. M., bids will be received by M. F. Johnson, clerk, Dunbar Union School District, to furnish 40 to 50 passenger school bus as a complete unit. Certified check 10% required with bid. Specifications and further information obtainable from J. H. Weise, Glen Ellen, or from the clerk at Keswood, Calif.

UKIAH, Mendocino Co., Cal.—Until Feb. 4, 7:30 P. M., bids will be received by F. C. Handy, city clerk, to furnish and install one complete Commercial Butane gas manufacturing system as present gas plant of city. Certified check 10% required with bid. Plans obtainable from Leon B. Jones, gas engineer, 58 Sutter St., San Francisco.

RAILROADS

LOS ANGELES, Cal.—W. K. Etter, general manager of the Santa Fe Ry., has announced that the Atchison, Topeka & Santa Fe Railway will spend approximately \$50,000,000 this year in the maintenance, operation and betterment of its coast lines. More than \$3,000,000 will be spent for improvements alone. For the entire Santa Fe system, 1930 expenditures will amount to more than \$280,000,000. Foremost in the way of additions and betterments will be the expenditure of \$2,318,690 for 21,748 tons of new rail, covering 143½ miles, and \$2,303,000 for the construction of additional main line or second track. Most of these improvements will be made in Arizona and Southern California. Other im-

portant improvement expenditures will include \$682,743 for additions to yard track and sidings, \$501,560 for signals and interlocking plants, \$500,000 for the elimination of grade crossings, \$411,500 for water plants and \$211,820 for new bridges. New improvements coming strictly under the heading of additions and betterments will cost \$5,440,239. Of this amount, \$2,866,490 will be spent in Arizona; \$1,516,954 in California and \$233,930 in New Mexico. Each state will share in the balance of \$822,865 which cannot be segregated. Nearly as much will be spent in completing improvements begun last year, and other improvements, costing \$3,000,000, will be charged to operation. Installation of 21,748 tons of new rail, most of which will be 110-lb. section and the balance 90-lb., will be as follows: Sixteen miles on the Los Angeles division; 18 miles on the Valley division, west of Stockton; 88 miles on the Arizona division, and 71½ miles on the Albuquerque division of which 32½ miles will be between Ashfork and Phoenix.

FIRE ALARM SYSTEMS

TUCSON, Ariz.—Until 4 P. M., Feb. 17, bids will be received by the city council to furnish and install police signalling system and certain additions to the present fire alarm system. Plans on file at office of city clerk, L. O. Cowan.

SALEM, Ore.—Until April 21, 7:30 P. M., bids will be received by M. Poulsen, city recorder, to install complete municipal fire alarm system of fifty boxes with necessary switchboards, generators, batteries, gongs, recording sets, etc. Bidder to furnish all materials for six circuits. Certified check 10% payable to city required with bid. Specifications obtainable from above.

MISCELLANEOUS SUPPLIES AND MATERIALS

OAKLAND, Cal.—Until February 4, 5:30 P. M., bids will be received by John H. Kimball, secretary, East Bay Municipal Utility District, 512 16th St., to furnish approximately 50 tons of peg lead. Specifications obtainable from secretary.

SAN FRANCISCO.—Until February 10, 3 P. M., bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver 15,000-ft. underground cable for Department of Electricity. Further information obtainable from above.

See call for bids under official proposal section in this issue.

PIPE LINES, WELLS, ETC.

MODESTO, Stanislaus Co., Cal.—Until February 13, 7:30 P. M., bids will be received by H. E. Gragg, city clerk, for drilling well, furnishing and installing casing, sand pumping and developing well according to plans of City Engineer Frank Rossi. Certified check 10% payable to Mayor of city required with bid.

SEWERS AND SEWAGE DISPOSAL PLANTS

LAS VEGAS, Nev.—Plans for the new sewer system for Las Vegas have been completed and filed with the city council by Koebig & Koebig, consulting engineers, Rowan Bldg., Los Angeles. They are in the hands of Viola Burns, city clerk, who will present them to the city council for adoption of a resolution of intention.

CHICO, Butte Co., Cal.—Following contracts awarded by Board of Education for sewer connections at various schools, all successful bidders being of Chico: Nord Ave. school, C. C. De Marais, \$72.72; Linden school, C. C. De Marais, \$11.77; Chico Vecino school Parker Hardware Store, \$47.55; Chapman school, Parker Hardware Store, \$95.25.

GUSTINE, Merced Co., Calif.—City trustees set Feb. 25 as date to vote bonds of \$20,000 to finance construction of sewer system. W. L. Chappell is city clerk.

SEBASTOPOL, Sonoma Co., Calif.—Until Feb. 7, 7:30 P. M., bids will be received by F. G. McFarlane, city clerk, to clear portion of sewer farm required for new sewage disposal plant. Certified check 10% required with bid. Specifications on file in office of city clerk.

PASADENA, Los Angeles Co., Cal.—Louisville Drying & Machinery Co. submitted low bid to the city directors Jan. 22 at \$17,500 for one cylindrical, revolving, double-shell and appurtenant apparatus for drying sewage sludge at the Pasadena Sewage Disposal Plant, located near Alhambra. The Hardinge Co. bid \$18,900 with an alternate bid of \$17,985. Both bids were f.o.b. Alhambra. Geo. K. Hooper, city engineer, has left for the east to investigate both types of dryer.

VENTURA, Ventura Co., Calif.—Chester Robbins, Ventura, special engineer appointed by the board of supervisors to design the Ventura Ave. Storm Drain, has been ordered to revise the plans and present new plans to the board for further action. Previous proceedings were abandoned a few weeks ago. The previous estimate was \$180,000.

NEWPORT BEACH, Orange Co., Cal.—City council petitioned to imp. streets in West Newport district, including portions of 46th St., Orange St., Cypress St., etc., involving curbs, 5-in. and 6-in. concrete paving, water mains, etc. Estimated cost \$150,000. R. L. Patterson, city engineer.

SOLANO COUNTY, Calif.—State Highway Commission prepares plans to improve approach to north end of Carquinez bridge, approx. 4,300-feet in length; estimated cost \$8,070 of which \$500 will be furnished by Solano County.

WILLOWS, Glenn Co., Cal.—County supervisors contemplate paving four miles of road in the Fruto district in addition to paving in the vicinity of Artois. Approximately \$20,000 will be available for the work from the gas tax refund.

LAGUNA, Orange Co., Calif.—City Engineer A. J. Stead reports that preliminary and field work has been completed for the improvement of seventeen streets on the Cliffs. Street work contemplated in the next few months amounts to \$225,000, of which two projects, under 1911 act, total 34,000 lin. ft., and two projects under the Mattson Act, total 20,000. The Arch Beach and Laguna Beach sewer project, 90,000 lin. ft. in length, planned for the near future, is estimated at \$400,000.

SAN JOSE, Santa Clara Co., Cal.—City declares Intention (495) to improve 33rd street bet. San Fernando and San Antonio Sts., involving grade; 1½-in. asp. concrete surface on 3-in. asph. conc. base pavement; conc. curbs, gutters, walks; 4-in. vit. san. house lateral sewers. 1911 Act. Bond Act 1915. Hearing Feb. 10. John J. Lynch, city clerk. Wm. Popp, city engineer.

SAN FRANCISCO.—Until February 5, 2:30 P. M., bids will be received by Board of Public Works to improve 21st Ave., between Noriega and Ortega Sts. (where not) involving conc. curbs; 6-in. conc. base pavement with 1½-in. asph. conc. surface. Est. cost \$1200. Certified check 10% payable to Clerk of Bd. of Sups. req. with bid. Plans obtainable from Bureau of Engineering, Third Floor, City Hall.

January 28, 1930
HAWTHORNE, Nev.—See "Government Work and Supplies," this issue. Bids wanted by Bureau of Yards and Docks, Navy Department, for work in connection with Naval Ammunition Plant at Hawthorne, Nevada.

FRESNO, Fresno Co., Cal.—County Surveyor Chris P. Jensen instructed to prepare plans to resurface ("bitumuls") Whites Bridge road from Mendota to Firebaugh and Mount Whitney Ave. from a point near Riverdale to Lanare, involving approximately 15 miles.

STOCKTON, San Joaquin Co., Cal.—Lilly, Willard and Blasotti, Stockton, at \$7,153.75 awarded contract by county supervisors to improve Jack Tone road. Other bids: Pereira and Reed, \$7,421.89; Geo. French, \$7,424; Hubert Sykes, \$8,519.

SAN RAFAEL, Marin Co., Calif.—County supervisors declare intention (4) to improve streets in Cascades Improvement District No. 1, including portions of Cascade Drive, Redwood Ave., Laurel Drive, Hickory Ave., etc., involving grading; pave with Dur-Emulse asphalt; corrugated iron pipe culverts; hyd. cem. conc. drain inlets, catchbasins, etc. Est. cost \$30,000. Work under County Imp. Act 1921. J. B. Platt, engineer, Santa Rosa. Robt. E. Graham, county clerk.

IMPERIAL COUNTY, Calif.—A. M. Penick Co., Los Angeles, at \$264,955, awarded contract by State Highway Commission to grade and pave with Port. cem. conc., 9 miles between El Centro and Holtville. Project involves: 30,000 cu. yds. rdwy. excav. without classification; 44,000 cu. yds. imported borrow; 151,500 sta. yds. overhaul; 2600 cu. yds. struct. excav.; 12,650 sq. yds. subgrade for pave.; 12,600 cu. yds. untreated crushed gravel or stone surfacing; 14,800 cu. yds. sand cushion; 20,200 cu. yds. class A cem. concrete (pave.); 170 cu. yds. class A cement concrete (struct.); 508,200 lbs. bar reinforcing steel (pavement and structures); 10 lin. ft. 8-in., 122 lin. ft. 12-in., 698 lin. ft. 18-in., 396 lin. ft. 24-in. and 24 lin. ft. 42-in. corr. metal pipe; 903 lin. ft. corr. metal pipe clean and relay; 1410 lin. ft. 4-in. drain tile; 150 tons gravel blanket for siphons; 96 lin. ft. solid timber guard rail; 83 cu. yds. removing and disposing of cem. conc. in existing struc.; 52,400 sq. yds. asphaltic membrane; 471 stations finish rdwy.; 29 monuments. State will furnish corr. metal pipe and band couplers for corrugated metal pipe conduits.

RIVERSIDE COUNTY, Cal.—Matthie Bros., Glendale, at \$42,593 awarded contract by State Highway Commission to pave with Port. cem. conc., 0.5 mile at Wineville. Project involves: 1300 cu. yds. rdwy. excavation without classification; 800 cubic yards structure excavation; 11,100 sq. yds. subgrade for pavement; 1850 cu. yds. removing and disposing of existing cem. pave. and detour surf.; 7400 mile yds. haul (existing pavement and detour surfacing); 2300 cu. yds. class A cem. conc. (pave.); 130 cu. yds. class A cem. conc. (struct.); 415 cu. yds. class A cem. conc. (slope paving); 400 cu. yds. class A cem. conc. (curbs, gutters and walls); 101,000 lbs. reinf. steel; 140 lin. ft. 18-in. extra strength reinf. conc. pipe; 603 ft. 8-in. corr. metal pipe; 25 stations finishing roadway; pumping equipment complete in place. State will furnish corr. metal pipe and cast steel frames and covers for drop inlets.

SAN LUIS OBISPO COUNTY, Cal.—Following three low bids rec. Jan. 29 by State Highway Commission to grade and pave with Portland cement concrete 7.2 miles between Santa Maria River and Los Berros Creek: J. F. Knapp, 5301 Horton St., Oakland\$272,648 C. W. Wood, Stockton 258,371 Peninsula Paving Co., S. F. 289,732

LOS ANGELES COUNTY, Cal.—T. M. Morgan Co., Gazelle, Calif., and Los Angeles, at \$272,790 awarded contract by State Highway Commission to grade 1.5-mi. bet. 1½-mi. and 4-mi. north from La Canada. Project involves: 78 stations clearing and grubbing right-of-way; 469,000 cu. yds. rdwy. excavation without classification; 3,000,000 sta. yds. overhaul; 5220 cu. yds. structure excavation; 950 cu.

yds. class A cem. conc. (structures); 15 cu. yds. class E cem. conc. (structures); 175 cu. yds. class F cem. conc. (structures); 170,000 lbs. bar reinf. steel (structures); 1700 lin. ft. 24-in. and 360 lin. ft. 36-in. corr. metal pipe; 1430 6-in. and 2680 10-in. reinf. conc. headers (cribbing); 2110 6-in. and 2740 8-in. reinf. conc. stretchers (cribbing); 2050 10-in. reinf. concrete stretchers (cribbing); 440 conc. filler blocks (cribbing); 78 stations finish rdwy.; 90 monuments. State will furnish corr. metal pipe.

SANTA BARBARA, Cal.—Until February 6, 1:30 P. M., bids will be received by S. B. Taggart, city clerk, to improve Los Olivos St., Pueblo St., Anacapa St. and Santa Barbara St. by grading, constructing asphaltic concrete pavement, combined cement concrete curb and gutter, cement concrete curb, cement concrete driveways, cement concrete alley entrances, cement concrete curtain wall, cement concrete sidewalk, vitrified clay pipe house connection sewers, vitrified clay pipe sanitary sewer and manholes; under 1911 Act. Certified check 10% required with bid. Plans on file in office of city clerk.

SANTA BARBARA COUNTY, Cal.—Following three low bids rec. Jan. 29 by State Highway Commission to grade and pave with Portland cement concrete 4.0 miles between Zaca and Wigmore: Cornwall Constr. Co., Santa

Barbara\$153,239 J. F. Knapp, Oakland 164,154 C. M. Morgan Paving Co., L. A. 164,154

PALO ALTO, Santa Clara Co., Cal.—City council will start proceedings to pave approximately 4 miles of streets during current year of which the city will pay \$26,600, the balance by property owners. Streets to be improved, according to City Engineer J. F. Byxbee Jr., include: Palo Alto Ave. from Middlefield Rd. to Pope St.; Hale St. from Palo Alto Ave. to University Ave.; Dana St. and Forest Ave. in the Duffield subdivision; Addison Ave. from Channing Ave. to Pile Ave.; Channing Ave. from Melville Ave. to Nevell Rd.; Melville Ave. from Channing Ave. to Middlefield Rd.; Hopkins Ave. from Harriet Ave. to Middlefield Rd.; Alley in block B (Addison and Lincoln, High and Emerson Sts.); Embarcadero Rd. from Alma St. to El Camino Real (Greer side); Santa Rita Ave. from Waverly St. to Cowper St.; Wellesley St. from Cambridge Ave. to California Ave.; Princeton St. from Stanford Ave. to California Ave.; Harvard St. from Stanford Ave. to California Ave.; Amherst St. from Stanford Ave. to California Ave.; Cornwall St. from Amherst St. to Cornell St.

The streets ordered paved by the board against the vote of the majority of frontage are: Webster St. from Melville Ave. to Embarcadero Rd.; Pope St. from Palo Alto Ave. to Hamilton Ave.; Harker Ave. from Melville Ave. to Newell Rd.

Following are, the streets for whose improvement the city would share the expense:

Hopkins Ave. from Harriet Ave. to Middlefield Rd., \$6000.
Channing Ave. from Melville Ave. to Newell Rd., \$2300.
Palo Alto Ave. from Middlefield Rd. to Pope St., \$12,800.
Kingsley Ave. and Alma St. in front of city-owned triangle, \$2300.
Embarcadero Rd. from High St. to Alma St., \$3200.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M., on February 19, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Humboldt County, an undergrade crossing under the tracks of the Northwestern Pacific Railroad at Lololeta (1-Hum-1-G), consisting of a 60-foot deck plate girder span on concrete piers with pile foundations.

Calaveras County, between Murphy's and Big Trees (X-Cal-24-E), about fifteen and five-tenths (15.5) miles in length, to be surfaced with untreated crushed gravel or stone.

Proposal forms will be issued to only those Contractors who have furnished verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS.

C. H. PURCELL,

State Highway Engineer.

Dated January 22, 1930.

NOTICE TO CONTRACTORS

General Work

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, February 25, 1930, said bids thereafter on said day to be publicly opened and read, for

the erection and completion of the General Work for the Live Stock Unit, State Agricultural Park, Sacramento, California, in accordance with plans and specifications therefor.

The building is a one-story steel frame structure with brick and concrete walls, concrete floor, and tile and composition roof.

The floor area is approximately 65,600 square feet.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications and proposal forms may be secured by licensed Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works reserves the right to reject any or all bids and to waive any informality in any bid received.

STATE DEPARTMENT OF PUBLIC WORKS

GEO. B. McDOUGALL, State Architect.
B. B. MEEK, Director of Public Works.

NOTICE TO CONTRACTORS

Mechanical Work

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, February 25, 1930, said bids thereafter on said day to be publicly opened and read, for the installation and completion of the Mechanical Work for the Live Stock Unit, State Agricultural Park, Sacramento, California, in accordance with plans and specifications therefor.

Mechanical Work includes Plumbing and Electrical Work. Separate bids will be received for "Electrical Work" and for "Plumbing Work." Combined bids will also be received covering the two branches of the work.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal

California Cities Builders' Exchange Offices.

Plans, specifications and proposal forms may be secured by licensed Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

OREGON FORESTER WILL HEAD TIMBER SURVEY

C. M. Granger, district forester for Oregon and Washington since 1924, has been promoted to head a nationwide survey which will have for its object the determination of the exact amount of standing timber in the United States and its annual rate of depletion.

The survey will be started within the next few weeks and the first territory to be checked will be Washington and Oregon. It will be extended to California, the Lakes region and the lower Mississippi by July 1st.

The survey will concern itself with all of the timber in the country, including that privately owned as well as in the national forests.

EARNINGS OF PACIFIC CLAY PRODUCTS ARE UP

Earnings of the Pacific Clay Products for the full year of 1929 are conservatively estimated at \$3.90 a share on the 99,157 shares outstanding, as compared with \$3.78 a share earned on 98,860 shares in 1928, according to word from Los Angeles.

While gross earnings for the last six months of 1929 probably will not exceed the corresponding period of 1928, a higher margin of profit was realized during the past year, bringing the earnings for the final period above the level of the last six months of 1928.

During the first half of 1929 the company showed earnings of \$205,133, as compared with \$191,276 for the similar period of 1928, and \$183,055 for the last half of 1928.

\$10,000,000 BONDS FOR POWER DEVELOPMENT

The Seattle city council, by unanimous vote, has passed a bill specifying and adopting a plan or system of additions and betterments to and extension of the municipal light and power plant and system, and authorizing the issuance of \$10,000,000 bonds to defray the cost of such extension.

Daily News Service.

Are You Satisfied With a Weekly News Service?

Would a Daily News Service Be More Beneficial?

Effective January 2, 1930, DAILY PACIFIC BUILDER, the pioneer daily construction newspaper of the Pacific Coast, will be merged with LARSEN ADVANCE CONSTRUCTION REPORTS, the daily service of BUILDING AND ENGINEERING NEWS.

Every unit of the present service offered by BUILDING AND ENGINEERING NEWS and LARSEN'S ADVANCE CONSTRUCTION REPORTS will be published each day in DAILY PACIFIC BUILDER, in addition to other important features. The subscription price will be \$1.50 per month or \$15.00 per year payable in advance.

DAILY PACIFIC BUILDER, under this consolidation of services, will bring to your desk each morning the latest developments in the construction field—Building Permits and Building Contracts, Mechanics' Liens, Completion Notices, advance construction news, covering every branch of the construction industry, building and engineering improvements, business opportunities, etc.

If you are now a subscriber to BUILDING AND ENGINEERING NEWS and desire to receive the DAILY PACIFIC BUILDER, sign the order blank below and enclose your check for the period you desire to subscribe.

BIDS ORDERED ON STOCKTON DEEP WATER PROJECT

Bids for the first unit of the Stockton Deep Water Project will be opened in Sacramento March 5. The contract will involve approximately 1,772,000 cubic yards of suction dredging in the New York Slough and Suisun Bay. The total cost of the Stockton project is placed at \$6,000,000. The unit for which bids are being received will call for an expenditure of \$91,500.

The project contemplates a channel 92 miles long, 100 feet wide at the bottom and 26 feet deep at low water which is expected to accommodate 90 per cent of the vessels entering San Francisco Bay.

Included in the project is the straightening of the San Joaquin river, which will involve the cutting through of a number of islands in the delta. In addition, Stockton is to provide 1200 feet of terminals, with docks, wharves, covered cargo sheds and railroad spurs.

Three million dollars in bonds were voted in 1924 by the people. This amount is matched by the Federal Government with \$2,407,000, and the State, with \$510,500. The cost of the first unit is paid by the State.

The channel will be finished in about three years, engineers say, and, according to estimates, it will save shippers \$900,000 in freight and loading charges in the first year. The territory to be served is said to extend from Bakersfield to Klamath Falls, Ore., and as far east as Western Utah, and is contiguous to the three transcontinental railroads, the Southern Pacific, Western Pacific and Santa Fe.

CONSTRUCTION STATISTICS IN 1930 U. S. CENSUS

For the first time in the history of the country, construction statistics will be collected by the Bureau of the Census when it takes the 1930 census of the nation. This step was decided on by the Bureau's advisory committee on the recommendation of the Associated General Contractors of America. The statistics on construction will include the data obtained by the enumerators working on the special census of distribution. Figures on all construction work in progress and contracted for will be obtained, sorted and compiled for the use of Federal Agencies and other interested persons and organizations. It is believed that information developed by the census will enable the Association to speak with certainty in its dealings with the Government and with other industries. Data which will be useful in determining the state of the industry which will be useful in stimulating a flow of money into the construction field will also be collected.

S. F. BUILDING IN JANUARY TOTALS \$1,431,983

San Francisco building operations for the month of January, 1930, involved an expenditure of \$1,431,983, according to records compiled by the Bureau of Building Inspection, Department of Public Works. During the month 610 permits were issued.

For the corresponding period in 1929, records of the department show 536 permits for improvements involving an expenditure of \$2,778,323.

Following is the segregated report of the January, 1930, activities as compiled by the city building bureau:

Class	No. of Permits	Est. Cost
A	1	\$ 40,000
B	1	50,000
C	15	513,000
Frames	101	401,595
Alterations	489	219,576
Public Bldgs.	3	202,812
TOTAL	610	\$1,431,983

JANUARY BUILDING IN S. F. SUMMARIZED

The following is a classified list of construction undertaken during the month of January, based on building permits issued, as compiled by John B. Leonard, superintendent of the Bureau of Building Inspection of the Department of Public Works:

Classification	No.	Est. Cost
1-family dwlgs.....	75	\$310,450
2-family dwlgs.....	3	22,000
Frame Apts. (108 fm) 3		462,000
Church.....	1	10,000
Factories, etc.....	3	60,000
Garages (private).....	11	3,845
Gas & service stations 4		17,350
Institutions (hospitals, etc.)	1	117,734
Office Bldg.....	1	800
Public Bldgs.....	4	120,078
Sheds, Etc.....	8	3,000
Stables and Barns.....	1	16,000
Stores.....	7	69,500
Alterations		
Housekeeping dwlgs.137		66,639
Non-housekeeping.....	5	21,950
Non-Residential.....	107	104,510
Installations (signs, etc.).....	239	26,127

The Ohio industrial commission has been requested by the state division of factory and building inspection to change the building and construction code to require contractors to submit complete reports on all scaffold accidents within two days after such accidents occur.

These reports would contain information as to the nature of the accident, how it occurred, and the names of employer and employee. The division also requested the commission to pass a ruling to require that when such accidents occur, all broken ladders, chains, cable hoists, planks and scaffolding be left untouched until an inspector arrives.

FRESNO PAINTERS GRANTED WAGE INCREASE

Following closely upon the wage increase of carpenters, at a conference between representatives of the master painters of Fresno and of the painters' union, local No. 294, held Jan. 31, an increase of 50 cents a day was granted. The agreement, effective Feb. 3, will find members of the painters' union at work on a five-day week scale at \$3 a day. To the painting contractors the agreement was regarded as justified inasmuch as the painters voluntarily accepted a cut of \$1 daily from \$9.50 seven years ago. The drop at that time was on a temporary basis, but no increase in wages have been granted by the contractors since that time. The increase quieted any talk of what might have resulted in a strike among painters, who maintained that they were entitled to an extra \$1 daily.

MORE SKYSCRAPERS IS NEED IN NEW YORK

The Regional Plan of New York and Its Environs which has suggested an imposing building as appropriate for the metropolis' civic center about City Hall, has, at the same time, gone on record as favoring unrestricted building height on 25% of the city lots, with a lowering of height limitations on the remainder.

"The fundamental thing is space about buildings and not limitation of height," said Thomas Adams, director of the Regional Plan staff. "We have listed high buildings as one of several causes of congestion, but never have imagined that the remedy would be found in the yardstick method of arbitrarily limiting the skyward development of a city."

"It is believed to be better for New York to have as many 100-story towers as possible. The more high towers that cover 25% of our lots the fewer 10- and 20-story buildings will cover 90% to 100% of them. Thus the 100-story building under the zoning law is less of a menace to the city's free movement and health than solid blocks of buildings under twenty stories."

DISTRIBUTORS AND AGENTS WANTED

A manufacturer of Expansion Joints used with pavements, bridges and all forms of concrete slab work, is open to increase number of distributors and agents in certain good unassigned territory. Communications addressed to Daily Pacific Builder, Editing Dept., will be forwarded to company concerned.

The New York Central Building, New York City, contains over 16,000,000 face and common brick. It also has clay tile partitions throughout. The Furniture Mart in Chicago contains over 40,000,000 face and common brick.

PERSONS ENTITLED TO LIENS

By HARRY C. WESTOVER, Attorney-at-Law

Although the constitution of the State of California provides that all mechanics, material men and laborers of every class shall have a lien on the property upon which they have bestowed labor or furnished materials for the value of such labor done and materials furnished, nevertheless it is not always true that those parties who furnish labor and/or materials can establish a valid lien. The labor or material for which the lien is filed must be used or consumed in the building or structure on which the lien is placed and such labor or material must have been sold for the purpose of going into the building.

A obtains a contract for the erection of a one-story brick building. He buys all of the building materials from B Lumber Company with the exception of brick which B does not handle. A discovers that C, a brick manufacturer, is over-stocked on brick and is in sad need of ready money and that by paying cash he can obtain a discount of \$4.00 per M on the brick. A goes to B and explains to B that he is able to purchase the brick from C for cash at a material saving and B agrees to B to advance him \$1000.00 to be used in the purchase of the brick and charge the \$1000.00 advanced on A's account to be paid when the building is completed. B advances the \$1,000.00 to A and A purchases the brick and pays for them and the brick is delivered on the job and used in the building. A fails to pay B's bill and B files a lien upon the building including in the lien not only the materials sold and delivered to A but also the \$1000.00 which was used in the purchase of the brick.

The law is well established that B cannot maintain his lien for the \$1,000.00 advanced to purchase the brick. If B had purchased the brick and then sold them to A then B could have filed a valid lien. But as the matter was handled B really lent A \$1000.00 in cash and no lien can be filed in such an instance.

Where a contractor builds a building on a cost plus basis and does not agree to provide his own labor but merely makes contracts with others on behalf of his principle he cannot put a lien on the property for money he may have advanced for labor and materials. Such an arrangement is a loan arrangement for which there is no lien against the property.

The above was the decision on the case of the Stiles Const. Co. vs. El Serrano Country Club, decided recently by Judge Yankwich of the Los Angeles Superior Court. The court held that if the contractors had furnished no labor or materials of their own, only money for others, their arrangement was merely a money loan one and the contractors were not entitled to a lien on the land.

Section 1183 of the California Code of Civil Procedure provides that mechanics, material men, etc., performing labor upon or bestowing skill to be used or consumed in the construction of a building are entitled to file liens.

The term "used or consumed" has often been before the courts for interpretation. At one time the courts held that in order to entitle a material man to file a valid lien that the material had to be actually used in the building or structure. However, the interpretation has now been so broadened that even though the mate-

This is the fourth of a series of articles prepared by Harry C. Westover, attorney of Santa Ana, in connection with the California Mechanics' Lien Law. Other articles will appear in these columns from time to time.—Editor.

rials are not used in the actual building or structure that nevertheless the material man has a lien if the materials are consumed in the erection of the structure. Consequently a lien will lie for form material used in the erection of a concrete building although the form material may not finally become a part of the building. Where a building material dealer delivered lime in barrels, the lime to be used in the construction of a building and the barrels were not returned by the contractor to the material dealer, the building material dealer was permitted to include in his lien a charge for the lime barrels on the ground that the barrels were consumed in the construction of the building. Snell vs. Payne 115 Cal. 218.

A charge for cartage on the materials delivered and used in the building or structure can be included in the lien and at the present time a party who wrecks or removes a building is entitled to a lien.

Persons entitled to liens have been divided into four classes: original contractors, sub-contractors, material men and laborers. The failure of an original contractor to perform his contract or the abandonment of the contract by the original contractor does not preclude sub-contractors, material men and laborers from filing valid liens.

In the event a notice of completion is filed at the completion of the building or structure an original contractor has sixty days in which to file his lien and sub-contractors, material men and laborers have thirty days in which to file liens. If no notice of completion is filed by the owner then all parties regardless of whether they are original contractors, sub-contractors, material men or laborers must file their liens within ninety days after the completion of the building.

There is a clear line of demarcation between contractors and material men. One who only sells materials and has nothing to do with the installation of them or the construction of the building is a material man.

The mere fact that a contract to furnish materials is made directly with the owner instead of the contractor or sub-contractor does not transform the material man into a contractor. He is still a material man although he contracts directly with the owner. One who agrees with the owner or contractor to construct outside the building or away from the premises some detached article, machinery, or apparatus to be thereafter placed in or attached to the building by him who furnished it is a material man.

If the value of the labor to be performed is greater than the value of the materials to be furnished it is usually held that the party furnishing and installing the materials is a contractor but if the value of the labor to be performed in installing the materials is less than the value of the materials then it is generally held that the party furnishing and instal-

ling the materials is a material man.

It has been held that contracts to furnish roofing; to furnish and install roof tile, to furnish and install elevators, to furnish and install lighting fixtures were contracts for materials and not building contracts. One who contracts to furnish all the brick work in a building is a contractor, and not a material man; they who contract to bath, plaster, lay floors, put on a roof, build walls for a bath room are sub-contractors. A painter who not only furnished materials for but does the work of painting a house for the owner is an original contractor. One who contracts to furnish mill work for a building, that is sash and doors, etc., is a material man and not a contractor.

IMPROVED SURETY BONDING PRACTICES SOUGHT

Methods of inter-industry co-operation looking toward the elimination of conditions which have made for irresponsibility in the construction industry and the securing of improved surety bonding practices, were outlined at the convention of the Associated General Contractors of America meeting in New Orleans Jan. 23, when a report on the work of the Bureau of Contract Information was laid before the delegates.

This bureau was established four months ago at the joint suggestion of the contractors, architects and public officials and is financed by the Surety Companies of the United States. Its function is to investigate the performance record, past reputation and work on hand of every general contractor in the country. Delegates were told that performance records and contract statement received from contractors in the short time since the bureau was established, have reached a total of well over 1400. Verifications with respect to 10,161 contracts from engineers, architects and public officials with respect to 10,161 construction projects. Verifications received from financial institutions total 2502, and those from manufacturers and distributors of equipment and materials number 8604. The total received from all sources is given at over \$24,000.

The Bureau is investigating the performance record, reputation and work on hand of every general contractor in the United States, the convention was told, and questionnaires designed to secure the necessary information are being sent to each contractor. As soon as replies are received, the information given in the questionnaires is verified. Various sources of information are given their co-operation, the report stated, and verification reports are being received from surety companies, public bodies, engineers, architects, financial houses, manufacturers, distributors and contract reporting agencies.

Naturally, the report to the delegates pointed out, those contractors who voluntarily submit their records, will be viewed as concerns who have nothing to conceal, and are proud of their performance.

When this information is received at the Bureau, the report stated, verified information concerning any contractor will be available for legitimate inquirers.

SAN FRANCISCO THIRTEENTH IN "BIG CITY" BUILDING FOR 1929

San Francisco was thirteenth among the cities of the United States in building for the year 1929, Los Angeles was fifth, Seattle ranked sixteenth, and Long Beach was twenty-fifth.

Building in 533 comparable cities for 1929 showed a loss of 12 per cent compared with 1928 and 13 per cent

compared with 1927. The total for the year 1929 was \$3,379,977,300 and for 1928 it was \$3,827,821,400.

Forty-seven cities reported \$10,000,000 worth of building or more for the year 1929. Following is a list of these cities reported to S. W. Straus & Co., with figures for 1929 and 1928:

	Year 1929	Year 1928
New York	\$922,376,300	\$924,479,900
Chicago	202,286,800	315,800,000
Philadelphia	106,229,900	111,884,800
Detroit	100,542,500	129,260,200
Los Angeles	93,016,160	101,678,763
Washington, D. C.	58,331,200	51,255,000
Boston	51,223,100	55,535,000
Milwaukee, Wis.	46,785,700	44,488,800
Baltimore, Md.	37,509,800	38,481,900
Cleveland, Ohio	37,782,550	54,592,800
Cincinnati, Ohio	35,124,100	35,700,400
Pittsburgh, Pa.	34,774,700	38,242,500
San Francisco	33,682,025	37,696,363
Newark, N. J.	30,419,000	36,283,700
Houston, Texas	29,526,800	35,319,500
Tulsa, Okla.	24,432,770	24,522,200
St. Louis, Mo.	27,330,600	42,819,500
Oklahoma City, Okla.	24,418,300	17,660,100
Buffalo, N. Y.	24,181,500	24,515,000
Akron, Ohio	21,886,300	19,652,200
Yonkers, N. Y.	19,529,300	37,692,800
Minneapolis, Minn.	20,960,100	23,257,700
Hartford, Conn.	18,149,500	16,366,700
San Antonio, Texas	18,079,000	16,408,000
Long Beach, Calif.	15,149,585	16,366,737
Bozeman, Colo.	15,103,300	16,058,400
Indianapolis, Ind.	15,608,000	23,668,924
Portland, Oregon	15,493,310	21,275,970
Jersey City, N. J.	15,396,800	12,895,000
Kansas City, Mo.	15,270,700	15,826,900
Lexington, Ky.	15,143,300	7,747,900
Dearborn, Michigan	14,907,300	16,051,500
Providence, R. I.	14,317,428	19,596,240
Oakland, Calif.	13,492,700	17,146,900
Toledo, Ohio	13,422,900	16,083,400
Rochester, N. Y.	13,303,200	17,620,800
New Haven, Conn.	13,284,600	8,054,900
Atlanta, Ga.	13,212,600	27,580,500
Cambridge, Mass.	12,165,100	7,289,400
Tulsa, Okla.	12,132,300	14,552,600
New Orleans, La.	11,971,600	11,899,000
San Diego, Calif.	11,583,738	12,372,600
Ft. Worth, Texas	11,324,800	13,221,100
Syracuse, N. Y.	11,259,600	13,302,300
Columbus, Ohio	10,641,000	16,689,200
Bessemer, Ala.	10,504,700	436,600
Birmingham, Ala.	10,396,800	18,641,600

SALES OF SLATE DURING 1929 SHOW DECREASE

The value of the slate sold at the quarries of the United States in 1929 was \$10,868,000, according to estimates furnished by producers to the United States Bureau of Mines, Department of Commerce. This was 5 per cent less than the value reported for 1928.

The roofing slate sold in 1929, estimated at 441,000 squares, valued at \$4,630,000 decreased 9 per cent in quantity and 14 per cent in value over 1928. This represents a decrease of 70 cents in the average value per square. This decrease was largely in the New York-Vermont district where the estimated sales amounted to 148,500 squares valued at \$2,044,000, a decrease of 19 per cent in quantity. The sales of roofing slate in Pennsylvania was estimated at 243,000 squares, valued at \$1,950,000, a decrease of 5 per cent in quantity. There was an increase in sales of Virginia and Main roofing slates.

The total sales of mill stock in 1929, estimated at \$9,200,000 square feet, valued at \$3,521,000, a slight decrease in quantity and an increase of 3 per cent in value. Mill stock for structural slate—2,768,000 square feet, valued at \$1,110,000—increased 9 per cent in quantity and 7 per cent in value. Electrical slate—1,424,000 square feet, valued at \$1,140,000—increased 10 per cent in quantity and 11 per cent in value. Slate for school

slates—1,620,000 pieces (865,000 square feet), valued at \$20,000—increased 2 per cent in quantity but decreased 11 per cent in value. Mill stock for blackboards and bulletin boards—3,415,000 square feet, valued at \$1,041,000—decreased 8 per cent in quantity and 3.5 per cent in value in 1929. Slate for billiard-table tops—243,000 square feet, valued at \$39,000—decreased 15 per cent in quantity and 19 per cent in value. Slate for vaults and covers—480,000 square feet, valued at \$121,000—decreased 10 per cent in quantity and 12 per cent in value.

There was apparently a considerable increase in the quantity of slate sold for flagging, cross-walks, stepping-stones, etc. This was estimated at 1,317,000 square feet, valued at \$187,000 in 1929, compared with 932,110 square feet, valued at \$184,184 in 1928.

The sales of crushed slate for roofing granules and flour in 1929 was estimated at \$430,000 short tons, valued at \$2,530,000. This represents an increase of 4 per cent in quantity and 2 per cent in value.

Annual convention of the National Association of Building Owners and Managers will be held at Bloxi, Miss., from June 9 to 13. It is announced by Paul Robertson, president of the association. This will be the first time in fifteen years that the organization held its annual meeting below the Mason and Dixon line.

FAMOUS ENGINEERS LISTED BY VILLANOVA COLLEGE

The greatest engineer of all time is James Watt, improver of the steam engine, the deans of American engineering schools have decided.

A list of the greatest engineers, both of all time and of the last 25 years, was made public recently for the first time when the students in the School of Technology, Villanova College, met to make plans for the celebration of the 25th anniversary of the Villanova engineering department. The celebration will be held in June.

Dean Carl T. Humphrey of the Villanova School of Technology invited every dean of engineering in America to name the greatest engineers. Their selections appear in two groups.

The five outstanding engineers of all time: James Watt; Leonardo da Vinci, planned and constructed the Martesana Canal; Thomas A. Edison; James B. Eads, boat and bridge engineer; Ferdinand de Lesseps, French engineer who built the Suez Canal and projected the Panama Canal.

The Villanova survey shows that the 15 greatest engineers of the last 25 years are: Herbert Hoover, for his work in mining and administration; Charles P. Steinmetz, electrical genius; Thomas A. Edison; John F. Stevens, for his work on the Panama Canal and as head of the American Railway Mission to Russia, 1917-18; John Hays Hammond, mining; George W. Goethals, engineer-in-chief of the Panama Canal; George W. Westinghouse, airbrake inventor and pioneer in introducing alternating current machinery; Guglielmo Marconi, inventor of wireless telegraphy and responsible for first broadcasting in England; Henry Ford; Ralph Modjeski, engineer of the Delaware River Bridge at Philadelphia and the Ambassador Bridge which connects Michigan and Ontario, Canada.

BUSINESS BUILDING EXPENDITURE IN 1929 SETS RECORD

More money was invested in new construction for business uses in 1929 than in any previous year on record, according to latest data examined by the research department of Greenbaum Sons Investment Company.

New commercial and industrial buildings contracted for during the year call for an outlay of \$1,689,000, according to figures of F. W. Dodge Corporation covering awards in the 37 states east of the Rocky mountains. If the Far Western states built office buildings, factories and stores in the same relative proportions, the grand total for the entire country approximates \$1,860,000,000.

The 1929 figure represents an increase of 11 per cent over the expenditures for these types of buildings in 1928, which was the previous record year. The 1928 outlay for the 37 states was \$1,520,000,000. In 1927 some \$1,427,000,000 was spent. The 1926 total amounted to \$1,593,000,000 and 1925, \$1,321,000,000.

Commercial and industrial structures are shown to be the only important classes of construction registering an increase for 1929. The total of contracts for the year declined by 13 per cent from the 1928 level, while residential building fell off 31 per cent.

The Division of Simplified Practice of the Bureau of Standards, Department of Commerce, has just announced that Simplified Practice Recommendations No. 12, Hollow Building Tile, No. 66, affirmed, without change, for another year. Surveys of production to determine the degree of adherence accorded those simplifications disclosed that approximately 89 per cent of Hollow Building Tile production conformed to the simplified schedule.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

More than \$150,000,000 will probably be required during 1930 to finance the erection of new residential housing in Pacific Coast cities, according to estimates of S. W. Straus & Co. based on today's balance between supply and demand and on the records of the past two years. Of this amount, approximately 40% may be expected to go into multi-family housing, apartment houses, flats and hotels. In most cities of this area, occupancy records indicate that the reduced building program of the last few years, particularly that of 1929, has restored the lists of unsold residences and the tenant lists of rental properties to a basis which is practically normal, the Straus survey indicates. Current increase in population, constantly shifting centers of residential preferences, and an ever increasing desire for better housing accommodations are the three factors which are depended on to assure stability to the building industry in this class of construction. A total of \$286,700,000 was expended for this class of buildings in 100 principal Pacific Coast cities during the past two years, a figure which students of the subject have considered inadequate to meet the normal new housing requirements of a population increasing as has that of this area. Economists analyzing the building prospects for 1930 have reported that the costs for new building this year may amount to 10% more than in 1929 and that a normal proportion of this increase will be required for residential housing.

Noiseless construction for large industrial and commercial buildings as a practical proposition for the first time in the history of the American building industry is seen in the announcement of The Austin Co., international firm of engineers and builders, that the electrical welding of structural steel is to be offered as a regular part of its service. The company will make welding or riveting optional with the owner. In the past welded as against riveted construction has been employed on a more or less experimental basis. It never before has been offered as an optional proposition. The Austin Co. have conducted exhaustive tests over a period of eight years which have convinced them that welding is destined to have a substantial place in the fabrication of structural steel.

With the national tendency toward over-taxation stressed by various speakers as one of the principal causes of depression in home building activities, members of the National Association of Real Estate Boards, went on record as supporting tax reforms. Leonard P. Reaume, of Detroit, Mich., in an address following his installation as president, declared, "It is necessary to organize home owners and real estate owners of the country to work local real estate boards for their tax rights." He pointed out that a closer co-operation between home owners, real estate owners and members of the real estate profession might quickly effect radical changes in the tax situation.

Los Angeles, issuing 2031 permits, lead Pacific Coast cities in building construction for the month of January. Construction under these permits involved an expenditure of \$9,115,846. Seattle took second place with 386 permits for improvements estimated to cost \$5,249,425. San Francisco ranked third with 610 permits for work costing \$1,431,932. Portland, Ore., took third place with 1169 permits, the work costing \$838,430.

City officials of Burlingame are in a huddle to decide how to ward off an assault which threatens to drive them out of the city hall. Ants, apparently in unlimited numbers, which had established themselves in the basement of the building, moved into the upper floors. Many books and records have been damaged by the insects and their onslaught continues. It was thought that the city hall might have to be vacated temporarily while the ants are exterminated.

New legal steps to secure the erection of a new courthouse for Alameda county have been taken by Richard Liebman in a suit filed with the State Industrial Accident Commission. Liebman's suit makes as defendants the Board of Supervisors who are charged with responsibility of keeping up the public buildings. Liebman claims that the accident commission has jurisdiction because of his duty to see that places where people are employed are kept safe. Liebman, who says the building is inadequate and dangerous asks that the commission investigate the building and then issue such orders to remedy the situation.

Plans for an aggressive campaign to bring new industries to San Francisco are being considered by members of the Board of Supervisors. As a preliminary step, Supervisor James E. Power suggests a survey of available industrial sites in the city and the peninsula and asks a \$5000 appropriation for this purpose. His request has been referred to the Finance Committee.

Effective February 1, plumbers and electricians of Eureka, Humboldt Co., started work on the five-day week schedule. Carpenters and painters will shortly adopt the five-day week, according to Harry C. Breit, secretary of the Federated Trades Council of Eureka.

January was a busy month for the port of Eureka (Humboldt County). Redwood lumber shipments to New Zealand and Australia totaled 2,948,000. Twenty thousand shingles were also shipped, according to H. F. McGrath, deputy collector of customs.

Richfield Oil Company of California desires literature and catalogs from manufacturers and dealers selling materials and specialties that are used in the construction of airplane hangars and airports. The information should be addressed to Mr. Curtis, service division, Department of Aviation, Richfield Oil Company, 807 Richfield Bldg., Los Angeles.

SETTLEMENT WITH CONTRACTORS ON THE SAN GABRIEL DAM

A settlement with the contractors on the San Gabriel dam, construction of which was abandoned when the state engineer refused to approve the erection of a high masonry structure at the Forks site because of unsatisfactory foundation, was voted by the supervisors of the Los Angeles County Flood Control District after terms of a compromise has been accepted by Fisher, Ross, MacDonald & Kahn, Inc., the contractors. Claims aggregating \$4,150,459.20 has been filed by the contractors. The supervisors agreed to pay them \$830,765.90 in addition to \$1,831,312.60 already drawn by them under the terms of their contract.

The \$830,765.90 to be paid by the county comprises the following items: Due contractors for yardage excavated, \$244,463.70; due contractors on account of 10 per cent hold-back, \$203,479.20; force account, tunnel work, \$8044; standby charge, \$232,000; equipment to be bought by county, \$92,779.

The claims filed by the contractors, aggregating \$4,150,459.20, comprise the following items:

For excavation, 92,000 yds. at \$2.95 per yd., \$271,400.

For the 10 per cent "hold-back" of excavation work already paid for, \$203,479.

Damage occasioned by delays due to orders of the board of supervisors, 48 days at \$5000 a day, and 30 days at \$4000 a day, \$360,000.

For uncompleted excavation work, which is 60 per cent completed, 104,000 cu. yds., at \$1.77 per cu. yd., \$184,050.

For profit contractors would have made had not the contract been canceled, not included in previous figures, \$3,271,500.

The county counsel advised the supervisors not to pay the last two mentioned claims. According to Asa V. Call, attorney for the contractors, they were willing to take a nominal profit rather than delay settlement in the courts and tie up the project for a long period.

E. C. Eaton, chief engineer of the Flood Control District, stated about \$20,419,000 of the \$25,000,000 bond issue voted to build the dam remains. In addition to the amounts paid to the contractors, the county spent out of the fund \$900,000 for construction of a railroad from Azusa to the dam site, \$700,000 for preliminary surveys and rights-of-way, \$150,000 for removing the road above the elevation of the dam, and \$150,000 for building the construction camp.

Settlement of the San Gabriel dam claims will leave the supervisors free to develop some new plan for flood control in the San Gabriel. A low rock-filled dam may be built at the Forks site and smaller dams at other points in the canyon.

ANNUAL REPORT OF SMITHSONIAN INSTITUTE ISSUED

The annual report of the Board of Regents of The Smithsonian Institution for the year has been published in one volume of 763 pages. This volume contains a detailed account of all activities of the institute during the year and the important data included is augmented by a large number of charts and photographs. The book is published by the Superintendent of Documents, U. S. Government Printing Office, Washington, D. C., and is available at \$2 per copy.

ALONG THE LINE

Water Rights Committee of the Long Beach Chamber of Commerce is considering the advisability of placing before the voters a \$4,460,000 bond issue to finance a program of expansion for the city's water resources and system.

J. R. West, chief engineer of the Port of Seattle, has been elected president of the Western Washington Section of the American Society of Civil Engineers.

Accident insurance to the amount of \$1,000 for every paid-up member was put into effect January 1 by the American Association of Engineers.

Col. John H. Dumont, one of the builders of the Brooklyn Bridge, a charter member of the American Association of Mining Engineers, and discoverer of a number of famous mines, died in Denver, Colo., aged 98, as the result of a stroke of apoplexy suffered five years ago.

Washington Electric Co. has been granted a license by the Federal Power Commission to commence construction on a hydro-electric project on the Columbia river, to develop ultimately 210,000 horsepower, at an estimated cost of \$19,250,000.

STEEL OUTPUT INCREASED

Average operations in Youngstown this week will be 77 per cent against 75 per cent last week, with 41 open hearth furnaces of independents active out of 51 as against 40 during last week. Sheet production declines 5 per cent to 80 per cent, while strip production rises.

Republic Iron & Steel Company operations will decline slightly due to change of schedule in sheet department, but company's steel ingot production will gain. Operations of Republic will be at 78 per cent against 80 per cent last week.

General Fireproofing Company continues at 90 per cent this week, the same level as a year ago. January output equaled output in same month last year. Sharon Steel Hoop Company operations will rise to 88 per cent, an advance of 13 per cent over last week. Strip production of company will be 100 per cent. Ingot production will be 80 per cent and sheet production 10 per cent, according to company officials.

MATERIAL DEALERS TO ESTABLISH BUILDING CREDIT BUREAUS

Officials of the Material Dealers' Credit Bureau of Chicago have announced that a definite plan for the establishment of credit bureaus covering all construction activity in that city will be put into effect in the immediate future. With the purpose of establishing uniform credit policies in all branches of the supply business, the material dealers of the district expect that by cooperation between the various elements a working system of sound credit will result.

Contractors in the district, according to statements issued by the Material Dealers' Credit Bureau, are unanimously back of the movement, and it is expected that membership in the credit bureau will be soon a requisite for any successful supply business.

TRADE NOTES

Construction has been started on a new plant in Sonoma St. near Florida St., Vallejo, for the Monarch Sheet Metal Works. The present plant is located at 1021 Sonoma St., and is operated by Herman Strelchan.

T. S. Walker, resident manager of the Red River Lumber Co. at Susanville, Calif., denies reports current in construction circles that the company proposes to sell its Susanville plant. The plant will continue to operate at capacity, Walker announces.

Delta Building Material Company will commence operations in Pittsburg, Contra Costa County, February 15, it is announced by C. H. Hawxwell, general manager of the company.

Robert L. Foster, formerly with William H. Cusick, 1386 Sutter Street, is now associated with W. D. McCann, interior decorators, 404 Post St., San Francisco.

The Detroit Steel Products Company of Detroit, Michigan, makers of Fenestra steel windows, has purchased Holorib Incorporated of Cleveland, Ohio, including all manufacturing rights and patents to its product, the Holorib insulated Roof Deck. The entire Holorib personnel will continue intact, the operations of the company being considerably extended through the nation wide Fenestra sales and service organization. Through the purchase of Holorib, The Detroit Steel Products gains a product closely allied to its industrial steel windows and one which is sold through the same channels to the same market.

Sales and service departments of the De Walt Products Corp., with main offices in Leola, Penn., have been opened at 1212 Mission street, San Francisco, where the company will market the De Walt wood-worker, metal cutter, marble cutter and cut-off saw. The company also manufactures a complete line of De Walt machinery for every wood working purpose. Oakland offices are maintained at 4926 East Twelfth street.

Cork Insulation Co., Inc., manufacturers of corkboard for cold storage installation, acoustical treatment, cork pipe covering, etc., with factory and headquarters in Wilmington, Delaware, has located a branch office and warehouse at 354 Pine St., San Francisco. Stock is carried in San Francisco for distribution throughout Northern California.

Within ninety days, the Western Clay Products Company will occupy a new plant at Niles, Alameda County, it is announced by H. R. Beegle, one of the organizers of the American Face Brick Association, who will be in charge of the new plant. The Western Clay Products Co. recently took over the entire properties and business of the Californita Pottery Co., which concern operated in Oakland for the past fifty-six years. Associated with Mr. Beegle in the new company, in addition to the personnel of the Californita Pottery Company, are Robert W. Morrison of New York, treasurer, and L. R. Hanson of Salt Lake City, sales manager.

HERE — THERE — EVERYWHERE

A drive for new members has been started by the Builders' Exchange of Contra Costa County with headquarters in Richmond, according to W. A. Brown, Secretary of the organization. A. H. Winchecole, C. V. Mero and Fred Hosking have been named as a committee to conduct the drive.

Burlingame, Calif., city council is considering a petition presented by Local No. 4, United Association of Plumbers & Steam Fitters, asking that the city draft an ordinance governing the installation of gas appliances. The petition has been referred to the city attorney for report.

Support to the Community Chest to the extent of \$100 was voted at the last regular meeting of the Stockton Builders' Exchange, which organization has pledged the active assistance of its membership in the drive for funds.

Al Lassiter, journeyman electrician, A. A. Syvertsen, contracting electrician and Mayor Smith, have been named by the Marysville city council to act as an examining board under a new ordinance to regulate electrical wiring installations. The ordinance provides for licensing electricians after they have passed the examining board's tests.

Robert Hutton of Los Angeles, state secretary of the Master Plumbers' Association, was a recent visitor to Sacramento to complete preliminaries in connection with the state convention of that body in the capitol city next May.

Modesto, Calif., city council has adopted an ordinance pertaining to the storage of X-ray and other films. The measure provides drastic regulations and is aimed to prevent possible re-occurrences of tragedies like those which took heavy tolls of life during the past year.

HOLLOW BUILDING TILES BEING SIMPLIFIED

Periodic surveys of production are conducted by the various standing committees of affected simplified practice recommendations, through the co-operation of the Division of Simplified Practice, U. S. Department of Commerce, to determine the degree of adherence which the industries are according simplified practice.

One such survey recently conducted by the standing committee for simplified practice recommendation No. 12, Hollow Building Tile, indicated that 89.54 per cent of the 1928 production of hollow building tile conformed to the items listed in the recommendation. This simplification, which reduced the variety in sizes and styles of this commodity from 35 to 20, was originally developed by the industry in 1924.

Many constructive suggestions as to the possible strengthening of the recommendation were also received. This comment is to be given full consideration by the members of the standing committee of the recommendation at the next revision meeting, says the Commercial Standards Monthly.

INTERPRETATIONS OF CONTRACTORS' LICENSE LAW

The following interpretations of the California Contractors' License Law by James F. Collins, director of the State Department of Professional and Vocational Standards, is of interest to manufacturers and dealers in electric refrigerators, linoleum and shades:

(1) Electric Refrigerators—Where electric refrigerators are installed in a building as a part of the contract for the completed building, and the refrigerator is a part of the plans, there is no question in the mind of the Registrar but that the refrigerator contractor would require a license. If a dealer sells the refrigerators to the contractor who installs them, the dealer would not require a license. If a dealer sells the refrigerator for a price installed in the building, we would require him to have a license.

(2) Linoleum, Dealer and Installation. The same condition holds true for this item as for that stated above for electric refrigerators, with the added statement that an operator who assumes responsibility for payrolls, compensation insurance, safety laws and material bills is considered a contractor within the meaning of the law by the Registrar of Contractors.

(3) Shades. The same conditions as referred to in the two preceding paragraphs hold good for firms selling and installing shades.

EXTRA HEAVY-DUTY CUTTING EQUIPMENT

An now portable sawing equipment is available for cross cutting and dading 12x12 to 12x20 timber right on the job. The DeWalt Products Corporation, Lancaster, Pa., announce the development of extra heavy-duty cutting equipment, incorporating the same principle of direct-driven, balanced, guided power, and east in operation that is found in the DeWalt Contractors' Saw and "Wonder-Worker."

Instead of a two-man saw in cutting heavy timbers, this job is now handled by one man feeding the saw through the material on the DeWalt heavy-duty saw with a hand ratchet gear feed or by chain feed on the arm of the machine. This arm may be raised or lowered to depth of cut and saw blades up to 36" are provided to handle 12x20" material or a 16" dado head may be used to dado up to 3". The saw blade operates at 1750 RPM and is direct-driven by motor operating on either 2 or 3 phase current in 220 to 500 volts. Two models are supplied in this heavy cutting equipment, the Model L and the Model T, the capacity of the L being 12x12" material while the capacity of the Model T is 12x20". The Model T is mounted on all metal table, equipped with all steel conveyor rollers for easy handling of heavy material. The elevating device is operated by wheel in front of the table which gives rapid elevation and ease in operation.

Art Alliance of America, 65 East 56th St., New York City, announces a competition for a design for a weather vane. Prizes will be offered by the Carrier Engineering Corporation, which organization proposes to erect a large weather vane and a Neon Light aviation beacon on top of the tank. Designs will be received between March 14th and 18th at which time the competition closes. Entry blanks and additional data is obtainable from the Art Alliance at New York.

PROGRAM ANNOUNCED FOR 19th ANNUAL CONVENTION OF NAT'L ASS'N OF BUILDERS' EXCHANGES

Between 400 and 500 Delegates From All Sections of the United States Will Attend Convention—Sessions at Palace Hotel—Topics of Importance to be Discussed—Prominent Speakers Are Programmed—Elaborate Entertainment Features.

BY THE OBSERVER

Discussion of matters of vital interest to the construction industry, trips to industrial plants in the San Francisco Bay District, a Western dinner in the wide open spaces of Contra Costa County, a trip through the Redwoods of Santa Cruz County, an excursion on San Francisco Bay, an Italian dinner at Princeton-by-the-Sea, a golf tournament, a theatre party, smokers, and a banquet in the Gold Ball Room of the Palace Hotel.

Such is the program arranged for the Nineteenth Annual Convention of the National Association of Builders' Exchanges to be held in San Francisco, February 10, 11, 12 and 13. Headquarters will be maintained at the Palace Hotel, where all business sessions will be held.

"This convention will be the biggest and best gathering of building contractors and material dealers ever held on the Pacific Coast," according to William H. George, president of the San Francisco Builders' Exchange and chairman of the committee in charge of arrangements for the convention. "Between 400 and 500 delegates from all sections of the United States will gather for this annual house warming of the building fraternity to discuss problems of vital importance to the building interests."

Topics for Discussion

"The irresponsible contractor, the quantity survey, safety measures, industrial education, loose credits, re-forestation, construction costs, licensing of contractors, accident prevention and other subjects will be among the more important topics up for discussion," George announces.

Mayor James Rolph will open the convention with an address of welcome on behalf of the city of San Francisco. George W. Kelham, San Francisco architect, will respond in behalf of the construction industry.

Noted Speakers

A feature of the opening business session will be an address by James F. Collins, director of the California State Department of Professional and Vocational Standards on the licensing of contractors.

Will J. French, director of the California State Department of Industrial Relations, will deliver an address on "A National Safety Code."

Perry Sawyer, a director of the Los Angeles Builders' Exchange, will talk on "Loose Credits."

J. W. Morin, attorney of Pasadena, will address the convention on "The Construction Industry and What It Contributes to the Nation's Wealth Each Year."

Earl F. Stokes, executive secretary of the National Association, will tell of the relation of the local builders' exchange and its work in the field.

"February 10, 11, 12 and 13, convention days, will be red letter days for the building industry," says George. "From the president of the United States down, the Federal, State and Municipal governments are looking to all interests to further a big construction program to relieve the business depression caused by the break in the stock market. This convention will enable the construction interests to prepare for the flow of business which is bound to follow as a result of the President's conference which resulted in the disclosure of what the year 1930 holds for the building industry. Business methods which have hampered the building business in the past will be discussed to bring about better conditions for the prospective builder, architect, contractor, sub-contractor and material dealer."

Scheduled Program

The following is the tentative program as prepared by Mr. George, subject to only minor changes, if any:

MONDAY, FEBRUARY 10th.

All sessions begin at 9:30 A. M. and adjourn at 1 P. M.

9:30 A. M., Registration opposite Concert Room, Palace Hotel.

10:30 A. M., Board of Control meets in Room 2024, Palace Hotel.

10:30 A. M., Secretaries Conference meets in Room 2026, Palace Hotel.

Secretaries' Conference—Round Table Discussion

Under the direction of Clarence L. Ebbert, Chairman, Reading, Pa.

Subjects to be discussed: Duplication of Organization in the Building Industry; Commercial Arbitration as Applied to the Building Industry; Lack of Wisdom in the Low Bid; Good-Will Week; Rebuilding America.

12:30 P. M., Board of Control, Secretaries' Conference Members and Directors of the San Francisco Builders' Exchange get acquainted luncheon, French Parlor, Palace Hotel.

2:30 P. M., Joint meeting Open Forum, Members of the Board of Control,

Members of Secretaries' Conference, and visitors from non-affiliated exchanges. Concert Room, Palace Hotel.

Evening Entertainment

7:30 P. M., Ladies' Theatre Party. Gather in French Parlor, Palace Hotel and meet Reception Committee of ladies from San Francisco Builders' Exchange.

8:00 P. M., Gentlemen, Smoker at Builders' Exchange rooms, 666 Mission St.

TUESDAY, FEBRUARY 11th.

Registered members of non-affiliated exchanges welcome at all sessions.

9:30 A. M., Business session, Concert Room, Palace Hotel. Ladies are urged to attend this business session. Convention called to order by President W. H. George, of the San Francisco Exchange. Invocation by Rev. W. K. Guthrie, D. D. Song, "America" by the assembly, led by Song Leader E. H. Brown, Secretary, Oma-

ha Builders' Exchange. Address of Welcome, by Hon. James Rolph, Jr., Mayor of San Francisco. Address of Welcome on behalf of Construction Industry, by Hon. Geo. W. Kelham, Architect, San Francisco. Introduction of the Officers of the National Association of Builders' Exchanges, by W. H. George, President Builders' Exchange of San Francisco. Mr. George turns meeting over to Mr. Sam Hotchkiss of St. Joseph, Mo., President of the National Association of Builders' Exchanges. Response to Addresses of Welcome by David T. Riffe, Pittsburgh, Pa., Past President National Association of Builders' Exchanges. Address, Clarence Colman, Esq. Recess, 5 minutes. Announcement of Convention committees. Reading of Minutes of last meeting. Presentation of Resolutions. President's Message, Mr. Sam Hotchkiss, St. Joseph, Mo. Address, Executive Secretary of Contractors, by James F. Collins, Director, Department of Professional and Vocational Standards, State of California. Report of Executive Committee, by Earl F. Stokes, Executive Secretary, Washington, D. C. Report of Board of Control, by Earl F. Stokes, Executive Secretary, Washington, D. C. Report of the Treasurer, Mr. Max Baumann, New York City. Report of the Executive Office, by Earl F. Stokes, Executive Secretary, Washington, D. C. Report of the Finance Committee, by W. H. George, Chairman, San Francisco. Report of the Committee on Accident Prevention, by Mr. Wm. Tubising, Chairman, Milwaukee, Wis. Discussion by Delegates. Report of Committee on Cost Data, T. W. Dodd, Chairman, St. Joseph, Mo. Discussion of Subject by Delegates. Presentation of Resolutions. Adjournment.

2:00 P. M., Trip to Contra Costa County, visiting Johns-Manville Inc. of California, at Pittsburg, California, with Western dinner at plant of Cowell Portland Cement Co., Cowell, California, returning to Palace Hotel during evening.

WEDNESDAY, FEBRUARY 12th.

9:30 A. M., Business session, Concert Room, Palace Hotel. C. C. Choffin, Third Vice-President, presiding. Report of Committee on Ways and Means. David T. Riffe, Chairman, Pittsburgh, Pa. Discussion of subject by delegates. Report of Auditing Committee, W. H. George, Chairman, San Francisco. Report of Committee, Quantity Survey, John A. Dahman, Chairman, Milwaukee, Wis. Discussion of subject by delegates. Report of Committee on Legislation, Earl F. Stokes, Executive Secretary, Washington, D. C. Discussion of subject by delegates. Report of Committee, Standard Documents, C. G. Norman, Chairman, New York City. Discussion of subject by delegates. Address, A. National Safety Code, Will J. French, Director, Department of Industrial Relations, Division of Industrial Accidents and Safety, State of California, San Francisco. Report of Committee, Industrial Education, L. H. Rothrauff, Chairman, Reading, Pa. Discussion of subject by delegates. Recess, 3 minutes. Presentation of Resolutions. Election of Officers. Report of Committee on Depreciation Studies, Wm. F. Chew, Chairman, Baltimore, Md. Address, Loose Credits, Perry Sawyer, Director, Los Angeles Builders' Exchange. Adjournment.

2:00 P. M., Trip to the Redwoods and Italian dinner at Princeton by the Sea, on the Pacific Ocean, returning to San Francisco sometime during the night.

THURSDAY, FEBRUARY 13th.

9:30 A. M., Business session, Concert Room, Palace Hotel. Mr. Sam Hotchkiss, President, presiding. Presentation of Resolutions. Report of Committee on Inter-Relations. Grant Parsons, Chairman, Omaha, Neb. Dis-

cussion of subject by delegates. Report of Committee on Re-Forestation, Wm. M. Friederich, Chairman, Rochester, N. Y. Discussion of subject by delegates. Address, The Construction Industry and What It Contributes to the Nation's Wealth. Each Year, J. W. Morin, attorney-at-law, Pasadena, Calif. Report of Committee, Building and Housing, Wm. F. Chew, Chairman, Baltimore, Md. Discussion of subject by delegates. Address, Your National Association, Its Relation to the Local Exchange, and Its Work in the Field, by Earl E. Stokes, Executive Secretary, Washington, D. C. Unfinished business. Report of Committee on Resolutions. New business. Selection of next convention city. Introduction of new officers. Announcement of Board appointments. Announcement of standing and special committees. Announcement of zone directors and state commissioners. Adjournment. Board of Control convenes immediately after adjournment and all members of the Board are urged to attend, as there are matters of importance to transact and settle at this meeting.

2:00 P. M., Boat ride around scenic San Francisco Bay.

6:30 P. M., Grand banquet Gold Ball Room, Palace Hotel. Presentation of Reisinger Trophy to the member exchange having largest number registered delegates. Presentation of checks to the two secretaries who secured the greatest number of ads. for the program.

BUSINESS OPPORTUNITIES

SAN FRANCISCO.—Names and addresses of the individuals or firms concerned in these opportunities will be furnished on request to the Business Opportunity Department of Daily Pacific Builder, 545-547 Mission St., Phone KEarny 1252.

D-3379—Representation. Milwaukee, Wis. Concern anxious to correspond with several agents with a view toward making an agency connection, for sand blast and dust suppression equipment such as used in foundries, wholesale and retail granite shops, etc.

D-3380—Representation. Kansas City, Mo. Large exclusive manufacturer of hotel and restaurant checks is desirous of securing representation in this territory.

D-3381—Manufacturers and Distributors. Bend, Oregon. Distributor desirous of contracting manufacturers or large distributors who have products to merchandise and which can be readily sold in Bend, Oregon. Party has office, automobile, trucks and office personnel, will pay own expenses and sell to approved credit accounts only.

17093—Wire and Wire Rope. Hamburg, Germany. Company wants to make a connection with an importer of wire and wire ropes of steel, iron, copper, aluminum, etc.

17099—Japanese Merchandise. Yokohama, Japan. Firm wishes to make a connection with an importer of aluminum ware, baby ware, basket ware, beads and necklaces, bronze and cloisonne ware, brush ware, carpets and rugs, celluloid articles, damascene ware, electrical goods, enameled ware, feathers, glass ware, lacquered ware, lanterns.

18000—Push Rugs, Furniture, Etc. Lubbock, Texas. Party is interested in having some importer of Japanese rush rugs, furniture, wall decorations, posters, etc., send him descriptive material.

18002—Representation. Mexico, D. F. Spaniard, aged 30, with four years' experience in Europe and seven in Latin American countries wishes to

represent American factories in Central and South America.

18005—Representation. San Francisco, Calif. San Francisco man leaving for a six- or seven-month stay in Europe is prepared to act for account of San Francisco firms doing business there. Excellent references.

D-3375—Patent. New York City. Party interested in disposing of patent for safety tank filling device for boats of any kind. Some advertising already done and the device quickly sells itself.

D-3376—Lumber. Aberdeen, Wash. Party desirous of securing market for green alder and maple lumber with shipment to San Francisco from Port Dock by steamer. Can furnish 10,000 ft. per day.

D-3377—Distribution. Cincinnati, O. Concern in position to give national distribution at minimum cost to item that would come under the classification of household or kitchen utility, or novelty, either for the house or individual.

D-3378—Representation. Chicago, Ill. Company desires to secure the representation in the central and central western states of products sold thru the wholesale channels. Prepared to furnish complete data as to their responsibility, etc.

LABOR RESTRICTIONS ON PUBLIC WORK CONSIDERED

Attempts that have been made during the past years to restrict the employment of labor on Federal building projects to the communities in which the building work is being done are being renewed in the present session of Congress, according to Faul Wootton, Washington correspondent of Engineering News-Record (New York). A bill has been introduced by Representative Bacon, of New York, to require contractors and sub-contractors engaged in public works of the national government to give certain preferences in the employment of labor. Some of the Senators from Mid-Western states are known to be contemplating the introduction of similar measures. Under the terms of the Bacon bill contractors engaged in public works would be compelled to give preference in the employment of labor in the following order: to citizens of the United States and of the state or district in which the work is to be performed, who have been honorably discharged from military service; to citizens of the United States who are bona fide residents of the state or district in which the work is to be performed; and to citizens of the United States.

Those interested in the construction industry regard this measure as another attempt to enact general legislation to remedy a particular situation. In several cases contractors from remote sections have gone into highly competitive fields and have taken public-works contracts away from local concerns that have to meet more rigid regulation. It is believed, however, that the contractors can meet the situation through their own agencies and render unnecessary further restrictive legislation.

In response to a demand from schools and colleges for typical specimens of the commercial woods of the United States, the National Lumber Manufacturers Association has provided 500 sets, each containing finished blocks typical in grain and texture, of 40 different species of woods. The sets will be distributed to institutions that are likely to make the best educational use of them, at cost of production.

Building News Section

APARTMENTS

Structural Steel and Grading Contracts Awarded.

APARTMENTS Cost, \$200,000
SAN FRANCISCO. SE O'Farrell and Franklin Streets.

Six-story steel frame and reinforced concrete Class C apartment building (42 2 and 3-room apts.)

Owner and Builder—C. S. Hoffman, 1541 Howard St., San Francisco.

Structural Steel—Golden Gate Iron Works, 1541 Howard St., S. F.

Grading—G. Bianchini, 750 Silver Ave., San Francisco.

Sub-bids are wanted on all other branches of the work.

Owner Taking Bids.
APARTMENTS Cost, \$—
STOCKTON, San Joaquin Co., Cal. Location Withheld.

Three-story frame apartments with concrete and brick garage.

Owner—Arthur Hollenbeck, 325 E. Acacia St., Stockton.

Architect—H. G. Bissell, 421 E. Miner St., Stockton.

To Be Done By Day's Work.
APARTMENTS Cost, \$50,000
OAKLAND, Alameda Co., Cal. E 8th Ave. NE 24th St.

Three-story 45-room frame and stucco apartment building.

Owner and Builder—Harry A. Schuster, 2424 Curtis St., Oakland.

Architect—C. N. Burrell, American Bank Bldg., Oakland.

Completing Plans.
APARTMENTS Cost, \$170,000
OAKLAND, Alameda Co., Calif. 286 Lennox Ave.

Six-story and basement steel frame and concrete apt. bldg. (36 2-3 and 4-room apts.; 103 rooms).

Owner and Builder—Albert Kroll, 3112 Deakin St., Oakland.

Architect—Willis Lowe, 354 Hobart St., Oakland.

Architect will take sub-bids within a few days.

Contract Awarded.
APARTMENTS Cost, \$80,000
OAKLAND, Alameda Co., Calif. NW Avenal Av. and Bond St.

Three-story frame and stucco apartment building (78 rooms) and 1-story tile garage.

Owner—L. B. Magoon, 1967 Courtland Ave., Oakland.

Architect—None.
Contractor—P. J. Hazen, 237 Bellevue Drive, San Leandro.

Sub-Bids Being Taken.
APARTMENTS Cost, \$60,000
SAN FRANCISCO. Nineteenth Ave. near Lake St.

Three-story and basement frame and stucco apartment building (12 4-room apts.)

Owner and Builder—H. O. Lindeman, 619 27th Ave., San Francisco.

Architect—Irvine & Ebbets, Call Bldg., San Francisco.

Sub-Bids Wanted.
APARTMENTS Cost, \$170,000
OAKLAND, Alameda Co., Cal. No. 286 Lennox Avenue.

Six-story and basement steel frame and concrete apartment building (30 2, 3 and 4-room apts.; 103 rooms).

Owner and Builder—Albert Kroll, 3112 Deakin St., Oakland.

Architect—Willis Lowe, 354 Hobart St., Oakland.

Structural Steel—Herrick Iron Works, 18th and Campbell Sts., Oakland.

Sub-bids are being taken on all other portions of the work by the architect.

Preparing Working Drawings.
APARTMENTS Cost, \$350,000
BERKELEY, Alameda Co., Cal. Sacramento St. and University Ave.

Five-story Class A and C apartment building (brick, terra cotta and steel frame construction).

Owner—Davis Pearce Co., Grant and Weber Sts., Stockton.

Architect and Builder—Davis-Pearce Co., Grant and Weber Sts., Stockton.

Will contain ninety two and three-room apartments, six stores and garage.

Sub-Figures Being Taken.
APARTMENTS Cost, \$40,000
ANTIOCH, Contra Costa Co., Calif. Seventh and H Sts.

Two-story and basement frame and stucco apt. (two 5-room, five 4-room and two 2-room apts.; Spanish type).

Owner—Capt. and Mrs. George Irvine, Oakland.

Architect—Hugh White, Syndicate Bldg., Oakland.

Contractor—F. W. Peters, 163 Ridgeway, Oakland.

Plans Being Prepared.
APARTMENTS Cost, \$75,000
SAN FRANCISCO. Cervantes & Scott Streets.

Three-story and basement frame and stucco apartments with tile roof (18 3- and 4-room apts.)

Owner and Builder—Ben. Lieberman, Scott and Prado Sts.

Architect—Irvine & Ebbets, Call Bldg.

Will contain all modern conveniences, including steam heat, hot water system, etc.; sub-bids will be taken in two weeks.

Owner Taking Segregated Bids.
APARTMENTS Cost, \$—
SAN FRANCISCO. SW California and Octavia Streets.

Six-story Class C steel frame and brick apartment building (42 3, 4 and 6-room apts.)

A Demonstration of the SKILSAW PORTABLE ELECTRIC HAND SAW

Will solve your cutting problems.

MAUSOLEUM Cost, \$125,000
CHICO, Butte Co., Calif.

One-story concrete mausoleum, inter-
 ior of marble and bronze.

Owner—Memorial Association.
 Architect—Jens C. Petersen, Califor-
 nia State Life Bldg., Sacramento.

Contractor—McGillivray Const. Co.,
 Folsom Blvd. and 65th St., Sacra-
 mento.

Construction has been started.

Sub-Contracts Awarded.
COMFORT STATION Cost, \$50,878

SAN FRANCISCO, Gl. Highway bet.
 Judah and Taraval Sts.

Contract cost station.
 Owner—City and County of San Fran-
 cisco.

Architect—Bureau of Architecture, 2nd
 floor, City Hall.

Contractor—Clinton-Stephenson Com-
 pany, Monadnock Bldg.

Reinforcing Steel—Truscon Steel Co.,
 Cal. Bldg.

Mill Work—Empire Planing Mill, 750
 Bryant St.

Glass—Habenicht & Howlett Glass Co.,
 529 Clay St.

Electrical Work—W. B. Baker & Co.,
 270 6th St.

Lumber—Loop Lumber Co., Central
 Basin.

Painting—Aristo Painting Co., 473
 Bryant St.

Sub-bids are wanted on sheet metal
 and plastering.

Contracts Awarded. Cost, \$45,000
DEPOT
OAKLAND, Alameda Co., Cal. Twen-
 ty-fourth St.

One-story class C brick depot bldg.
 Owner—Tillie R. Spear.

Architect—Russell Guerne deLappe &
 Valdimir Oglov, associate, 1710
 Franklin St., Oakland.

Excavating, Concrete and Carpentry
 —J. R. B. Wilson, 3831 Dale Pl.,
 Oakland, \$26,812.

Iron Work—Pacific Coast Eng. Co., ft.
 of 14th St., Oakland, \$918.

Steel—Sash—Michel and Pfeffer Iron
 Works, 10th and Harrison Sts.,
 San Francisco, \$493.

Roofing—Slate Roofing Co., 4128 Gil-
 bert St., Oakland, \$1750.

Sheet Metal Work—Christiansen and
 Trutsch, 4279 Piedmont Ave., Oak-
 land, \$2,078.

Plastering—Cronin & Burnett, \$911.
Painting—I. Ingebrigtsen & Son, 3772
 Cannon St., Oakland, \$475.

Glazing—Tyre Bros. Glass Co., 310
 Webster St., Oakland, \$2,065.

Engineering News Section

BRIDGES

REDWOOD CITY, San Mateo Co., Calif.—City council sets April 14 as date to vote bonds of \$32,000 to finance construction of new bridges within city limits in addition to \$2000 to finance repairs to bridge at Stanford St. and Cordilleras Creek. C. L. Dimmitt is city engineer.

LONG BEACH, Los Angeles Co., Cal.—Plans for Orange Ave.-Hill St. viaduct and the Pacific Ave. underpass under consideration by Arthur H. Adams, public service director, and officials of Pacific Electric Co. Orange Ave. viaduct plans completed by city engineering department. Three sets of plans, with cost ranging from \$160,000 to more than \$200,000, drafted for underpass. Railroad company agreed to pay cost. County agreed to pay part of cost of viaduct.

SAN JOSE, Santa Clara Co., Cal.—San Jose Paving Co., San Carlos and Dupont Sts., San Jose, at \$72 awarded contract by city council to surface bridges over Guadalupe Creek at Polhemus and Hobson Sts.

DREDGING, HARBOR WORKS & EXCAVATIONS

RICHMOND, Contra Costa Co., Cal.—Until March 5, 3 P. M., bids will be received by U. S. Engineer Office, Customhouse, San Francisco, for dredging in Richmond Harbor. Specifications obtainable from above office.

NEWPORT, Orange Co., Cal.—Application has been made by City of Newport Beach for War Department permission to dredge the Entrance Channel to Newport Bay, to depth of 15 feet below mean lower low water with bottom width varying from 250 feet up to 430 feet, dredging material to be deposited along shore line west of the west jetty. W. H. Lanasan, Major Corps of Engineers, District Engineer.

SANTA BARBARA, Cal.—City Engineer E. B. Brown has started construction of repairs to the Cabrillo Beach retaining wall, part of which was damaged by recent storms. Rock cribbing will be used in place of sheet piling. Louis Berg, former engineer for Merritt, Chapman & Scott, contractors, is in charge of the work for the city.

SACRAMENTO, Cal.—Until March 5, 11 A. M., bids will be received by U. S. Engineer Office, California Fruit Bldg., 4th and J Sts., for section dredging approximately 1,772,000 cubic yards of material in New York Slough and Suisun Bay. Further information obtainable from above office. Specifications are on file in the office of Daily Pacific Builder, 545-547 Mission St., San Francisco, and may be inspected by those interested.

IRRIGATION PROJECTS

LINDEN, San Joaquin Co., Cal.—Fred H. Tibbets, civil engineer, Alameda Commercial Bldg., San Francisco, has recommended to directors of Linden Irrigation District a bond issue

for \$137,000 to finance construction of irrigation works, of which \$44,850 would be required for gates and valve for the Calaveras dam; \$63,210 for controlling works at Bellota; \$11,960 for the Linden pond; \$3,210 for the Jack Tone pond and \$3,210 for the Waterloo pond, totaling \$136,500; 20% of the total amount to be voted will provide for overhead and contingencies. The district now contains 11,360 acres and with the additional lands proposed for inclusion with the new irrigation work, the area will be increased to approximately 14,000 acres.

STREET LIGHTING SYSTEMS

SANTA CRUZ, Santa Cruz Co., Cal.—See "Streets and Highways," this issue. Resolution of intention to improve Walnut Ave., involving paving, etc., and 20 2-light electrolite (marbelite) standards.

FORTUNA, Humboldt Co., Calif.—City of Fortuna is considering erecting signs at eastern and western limits of city on Redwood Highway. Jay Smith of Civic Committee in charge. More information will be given later.

PALO ALTO, Santa Clara Co., Cal.—See "Streets and Highways," this issue. Electrolite system in connection with widening of California Ave.

MACHINERY AND EQUIPMENT

HAWTHORNE, Nevada—Until February 13, 10 A. M., bids will be received by Bureau of Supplies and Accounts, Navy Department, Washington, D. C., to furnish hydraulic lifting device for cars, railway trailer, to Naval Ammunition Depot at Hawthorne, Nevada. Proposal blanks are obtainable from Navy Purchasing Officer, 100 Harrison St., San Francisco, or direct from the Bureau at Washington.

SACRAMENTO, Cal.—Until Feb. 14, 11 A. M., under Order No. 1586-1585, bids will be received by U. S. Engineer Office, California Fruit Bldg., 4th and J Sts., to furnish one motor-generator arc welding set. Further information obtainable from above office.

SACRAMENTO, Cal.—Until Feb. 6, 5 P. M., bids will be received by H. G. Denton, city clerk, to furnish and de-

liver 4 motor trucks for use of Street Cleaning Division.

Certified check 5% payable to City Controller required with bid. Specifications on file in office of clerk. B. C. Clark, city engineer.

SACRAMENTO, Cal.—Until Feb. 6, 5 P. M., bids will be received by H. G. Denton, city clerk, to furnish and deliver 4 dump bodies for trucks of the Street Cleaning Department.

Certified check 5% payable to City Controller required with bid. Specifications on file in office of clerk. B. C. Clark, city engineer.

OAKLAND, Alameda Co., Cal.—Pacific Coast Engineering Co., Foot of 14th St., Oakland, submitted the only bid at \$3498 to City Port Commission for dredge haul and ladder pipe.

RAILROADS

ORANGE, Orange Co., Cal.—Atchison, Topeka and Santa Fe Railway Co. applied to Railroad Commission for authority to construct crossover track across Chapman Ave. in Orange, and Los Angeles and Salt Lake Railroad Co. applied to Railroad Commission for authority to construct spur track at grade upon and across Altona Place (East San Pedro).

MODESTO, Stanislaus Co., Calif.—The Railroad Commission of the State of California has received a request from the Southern Pacific Company for permission to construct a spur track at grade across Tully Avenue, West Avenue and along Madonia Ave. and a spur track across West Ave. in Modesto.

SUTTER CREEK, Amador Co., Cal.—W. J. Dingee and E. A. Bailey, Sacramento engineers, are in Amador County, particularly in the Sutter Creek District, seeking to purchase rights-of-way for the proposed railroad from lone to the Volcano site of the proposed cement quarry.

FIRE ALARM SYSTEMS

REDWOOD CITY, San Mateo Co., Cal.—City Engineer C. L. Dimmitt preparing plans for traffic signal system at Five Points on El Camino Real.

PALO ALTO, Santa Clara Co., Cal.—City council will install three-light type traffic control system for University Avenue-State Highway intersection. The cost is estimated at \$1,480 for four signals, exclusive of two amber approach lights on either side of the intersection. J. F. Byxbee, Jr., is city engineer.

NAPA, Napa Co., Cal.—City council has entered into contract with the Gamewell Co. to furnish and install an automatic fire alarm system.

FIRE EQUIPMENT

SAN JOSE, Santa Clara Co., Cal.—City council contemplates purchase of new fire apparatus to replace worn out equipment. Considerable new equipment will be added, according to tentative suggestions. C. B. Goodwin is city manager.

SAFETY SHOES

blast, protect the toes from falling objects.

MISCELLANEOUS SUPPLIES AND MATERIALS

SAN MATEO, San Mateo Co., Cal.—Until February 20, 7:30 P. M., bids will be received by W. H. Taylor, clerk, San Mateo Union High School and Junior College District, to furnish during the period beginning March 1, 1930 and ending February 28, 1931:

1. Fuel oil, commercial grade, gravity in degrees A. P. I. to be not less than fourteen, delivered in tank truck load lots to the schools of the district as ordered.

2. Lubricating oils, Eastern and Western, light, medium, and heavy, delivered in barrel lots to San Mateo High Schools as ordered. Specify trade names.

3. Stone distillate, 30°-32° Gravity, 165° Flash, delivered in lots of two hundred gallons, more or less, to the schools of the district as ordered.

Bids may be submitted on any or all of the above items. Further information obtainable from clerk.

SIERRA MADRE, Los Angeles Co., Cal.—City of Sierra Madre awarded contract by city council at \$28,368 (plus force account charges for installing fire hydrant connections, couplings, and service connections) for trenching, laying, and backfilling, for about 49,750 lin. ft. of steel pipe, pipe to be furnished by the city.

OAKLAND, Cal.—Until February 13, 12 noon, bids will be received by Frank C. Merritt, city clerk, to furnish white paint for remainder of the fiscal year ending June 30, 1930. Bond of \$200 required of successful bidder. Specifications obtainable from the office of the clerk.

RESERVOIRS AND DAMS

SAN BERNARDINO, Cal.—Constructing of second check dam in Lytle Creek Canyon voted by members of Lytle Creek Water Conservation Assn., City Engineer C. A. Hutchinson of Colton president. Proposed dam will be 3000 ft. in length, costing \$35,000. Will be located approximately one-half mile below original works.

LOS ANGELES, Cal.—Department of Water and Power engineers conducting survey to determine level of Chatsworth Dam when dams are constructed. In order to raise the level of the reservoir 20 ft., it will be necessary to build five dams.

PIPE LINES, WELLS, ETC.

AGNEW, Santa Clara Co., Cal.—J. B. Holthous, Santa Clara, at \$1,800 awarded contract by State Department of Public Works, Division of Architecture, to drill well at Agnew State Hospital. Informal bids were taken for this project.

BEVERLY HILLS, Los Angeles Co., Cal.—Until 8 P. M., Feb. 18, bids will be received by Beverly Hills city council for labor and material to install one deep well centrifugal pump in accordance with plans prepared by Salisbury, Bradshaw & Taylor, 745 Petroleum Securities Bldg., Los Angeles. B. J. Firminger, city clerk.

ELWOOD, Calif.—Application has been made by C. J. Mahoney for War Department permission to construct six buried pipe lines from approximately 7½ to 10½ feet of seaward of mean high tide line across submerged lands held under State Tideland Pros-

pecting Permits by L. G. Dreyfus, Wm. L. Appleford, C. C. Spaulding, Pacific Western Oil Co., Barnsdall Oil Co., Hankline Oil Co., Elwood Exploration Co. and C. J. Mahoney, in Pacific Ocean near Elwood, Calif. Map showing location of the proposed work will be on exhibition in the office of the U. S. Engineer, 725 Central Bldg., Los Angeles, until 11 A. M., Saturday, February 8, 1930. W. H. Lanagan, Major, Corps of Engineers, Dist. Engineer.

OCEANSIDE, San Diego Co., Cal.—Until 7:30 P. M., Feb. 26, bids will be received by city council for excavating of 1200 ft. of trench for water pipe line along Mission Ave. and Carey Road and into old reservoir site in accordance with plans at office of city engineer. Bids will also be received for uncovering with trenching machine approx. 1000 ft. of 10-in. water pipe about 2 ft. deep. R. L. Loucks, city engineer.

MARTINEZ, Contra Costa Co., Cal.—Gerwick Construction Co., San Francisco, awarded contract for constructing pumping plant at Mallard Slough by California Water Service Corp. Will be used to pump water out of San Joaquin River into pipes and carried to reservoir at Clyde.

SEWERS AND SEWAGE DISPOSAL PLANTS

PASADENA, Los Angeles Co., Cal.—Hardinge Co., awarded contract by the city directors at \$18,900 to furnish and install one cylindrical, revolving, double shell dryer and appurtenant apparatus for drying sewage sludge at the Pasadena sewage disposal plant near Alhambra.

LAS VEGAS, Nevada—Bond issue of \$200,000 will be necessary to provide funds for construction of proposed disposal plant and new collection system for Las Vegas, according to Sewer Commissioner Lou Hansell. Cost of plant \$50,000. Balance of the funds will be expended for mains. Koebig & Koebig, 821 Rowan Bldg., Los Angeles, engineers.

LOS ANGELES, Cal.—Chutuk, Kor-dich & Vukojevich, 2518 Percy St., Los Angeles, submitted the low bid to the Board of Public Works at \$145,535.53 to construct sewers in 13th St. and Leland St. Sewer Dist. (1911 Act.)

EL SEGUNDO, Los Angeles Co., Cal.—Clyde Smith, consulting engineer, Los Angeles, is preparing plans for an activated sludge treatment plant which the Standard Oil Co. is to build at El Segundo to purify or treat about 7,000,000 gallons of effluent per day to be purchased from the city of Los Angeles, for use in cooling towers, etc. at the refinery.

SALINAS, Monterey Co., Cal.—Until Feb. 10, 7:30 P. M., bids will be received by M. R. Keef, city clerk, to construct sanitary sewer from Alisal St. to Griffin St. Plans on file in office of clerk. Howard Cozens, city engineer.

FRUIT RIDGE, Sacramento Co., Cal.—Fruit Ridge Community Club is conferring with Chas. Deterding, Jr., county surveyor, regarding the construction of a sanitary sewer system to connect with the Sacramento city trunk sewer in 14th Ave. The cost is estimated by the engineer at \$110 a front foot. A second proposal is to join the proposed system with the Gould Tract and the Fruit Ridge district to build its own main sewer to

the river for both sanitary and storm purposes as well.

BURLINGAME, San Mateo Co., Cal.—Until March 3, bids will be received by J. R. Murphy, City Clerk, to extend existing sanitary sewer laterals; construct 12-in., 15-in. and 18-in. storm sewers; manholes; fill pavement depressions, etc., in Primrose Ave. 1911 Act. Certified check 10% payable to city required with bid. Plans on file in office of clerk.

REDWOOD CITY, San Mateo Co., Cal.—City council sets April 14 as date to vote bonds of \$7000 to finance construction of storm sewers in Jefferson street and \$5000 for storm sewers in other streets. C. L. Dimmitt, city engineer.

FAIRFIELD, Kern Co., Cal.—T. D. Kilkenny, city engineer of Vallejo, is conferring with county supervisors regarding formation of a sewer district in the vicinity of Vallejo. After formation the district would vote bonds to finance construction of a sewer system.

SAN FRANCISCO—L. J. Cohn, 117 Montgomery St., at \$59,334, submitted low bid to Board of Public Works to construct 15th St. sewer, Section A from Harrison St. to Howard St. Funds will be provided from the Sewer Bond Issue. Project will involve approx. 940 ft. 6-ft. 6-in. by 8-ft. 6-in. reinf. conc. sewer; 230 ft. 6-ft. reinf. conc. circular sewer; 28,000 sq. ft. wood piling. Meyer Rosenberg, second low, at \$62,629, and Rocca and Coletti, \$65,242, third low.

MISCELLANEOUS CONSTRUCTION

SANTA ANA, Orange Co., Cal.—County Supervisors have appointed board of consulting engineers to conduct survey and to formulate flood control plan for conservation of county water supplies. Engineers are: Thomas H. Means, G. A. Elliott, and Prof. B. A. Etcheverry.

WATER WORKS

FALO ALTO, Santa Clara Co., Cal.—City council will provide \$3300 in 1930-1931 budget to finance replacement of 6-inch water pipe line from Matadero Creek to Arastradero road south of the city. J. F. Byrbee Jr., city engineer.

FALO ALTO, Santa Clara Co., Cal.—L. A. Anderson, Palo Alto, at \$13.50 ft. awarded contract by the city council for new well in connection with water system at Colorado Ave. and Alma St. The estimated cost of the well and pumping plant is placed at \$13,300. J. F. Byrbee Jr., is city engineer.

LONG BEACH, Calif.—The water rights committee of Long Beach chamber of commerce is considering the advisability of placing before the voters a \$4,460,000 bond issue to finance a program of expansion for the city's water resources and system.

SACRAMENTO, Cal.—Byllesby Interest of Chicago will finance and develop \$12,000,000 Capay water project near Woodland, Yolo Co. Surveyors and engineers are now preparing for construction of huge dam 25 miles west of Woodland to store waters of Cache district.

DOWNEY, Los Angeles Co., Cal.—Edgley Co., 800 East 61st St., L. A., submitted the low bid to the Downey Water District at \$28,495.06 (on 18-ft. lengths for pipe, for installing cast iron pipe and fittings for water system to be constructed for the district. Low bidders on materials were as follows: Ducommun Corp., L. A., on valves, valve boxes and hydrants at \$7329.06; V. A. Thompson, on hydrants (California type) at \$4829; Pacific Pipe & Supply Co., on hydrants (Kennedy type), at \$3229.84; American Cast Iron Pipe Co., on cast iron pipe and fittings at \$60,639.12; Minneapolis Moline Power Implement Co., for furnishing and erecting steel tank and tower at \$12,733. Bids were taken under advisement. Burns-McDonnell-Smith Engineering Co., 422 Western Pacific Bldg., L. A., engineers.

VENTURA, Ventura Co., Calif.—County of Ventura has applied to the Railroad Commission for authority to construct an undergrade crossing connecting the Los Angeles Ave. with Oak Park, under the tracks of Southern Pacific Railroad.

SAN MATEO, San Mateo Co., Cal.—The Railroad Commission has granted a certificate of public convenience and necessity to Millbrae Highlands Water Company to operate a public utility water system on a portion of the Buri Buri Rancho in San Mateo County, at rates similarly charged by Spring Valley Water Company, and including a charge of \$1.00 per month for each fire hydrant.

SEATTLE, Wash.—J. F. Ward, Inc., Lyon Bldg., at \$39,196 submitted low bid to the Board of Public Works to construct the Lake Youngs Aqueduct intake at the diversion dam of the city's water supply. City Engineer's estimate is \$115,000.

REDWOOD CITY, San Mateo Co., Cal.—County Surveyor George A. Kneese is preparing plans for a water supply system at Millbrae, property owners having petitioned for the work.

SANTA ANA, Orange Co., Cal.—Lee R. Weber, 9632 San Antonio Ave., South Gate, awarded contract by the county supervisors at \$38,195 to construct water distributing system at Villa Park under C. I. No. 26, involving 5125 ft. 8-in., 2822 ft. 6-in., 28,490 ft. 4-in. and 19,337 ft. 2-in. cast iron pipe. Gate valves, fire hydrants, fittings, etc.

SIERRA MADRE, Los Angeles Co., Cal.—A. L. Gabrielson, Box 104, Arlington, submitted low bid to the city council Jan. 27, at \$36,453 for trenching, laying and backfilling, for about 49,750 lin. ft. of steel pipe, pipe to be furnished by the city.

STREETS AND HIGHWAYS

SAN FRANCISCO, Union Paving Co., Cal.—City Bldg., at \$14,868 awarded contract by S. J. Harbor Commission for paving Pler No. 48. Project involves 172,900 sq. ft. 1½-in. Topeka surface and 64,300 sq. ft. 2-in. Topeka surface and 35,600 sq. ft. 1½-in. Topeka surface on 2-in. binder. Frank G. White, chief engineer of commission. Ferry Bldg.

Following is a complete list of the bids:
(1) 152,900 sq. ft. 1½-in. Topeka surface; (2) 64,300 sq. ft. 2-in. Topeka surface; (3) 35,600 sq. ft. 1½-in. Topeka surface on 2½-in. binder. Union Paving Co., (1) \$4.04; (2) \$4.06; (3) \$4.14; \$14,868.
Fay Inc. Co., (1) .046; (2) .063; (3) .05; \$15,208.30.
Pacific States Paving Co., (1) .45; (2) .64; (3) .11; \$15,311.70.

Meyer Rosenberg, (1) .45; (2) .06; (3) .12; \$15,910.50.
A. J. Ralsch, (1) .49; (2) .64; (3) .117; \$16,752.50.
L. J. Cohn, (1) .049; (2) .06; (3) .108; \$16,002.
Eaton & Smith, (1) .05; (2) .067; (3) .12; \$17,225.10.

SALINAS, Monterey Co., Cal.—Until February 19, 10 A. M., bids will be received by C. F. Joy, County Clerk, for crushing and stockpiling rock in Supervisor Districts Nos. 3 and 4. Specifications on file in office of Clerk. Howard F. Cozzens, county surveyor.

SALINAS, Monterey Co., Cal.—Until February 19, 10 A. M., bids will be received by C. F. Joy, county clerk, for crushing and stockpiling broken stone for the Carmel Valley Road in Supervisor District No. 5. Plans on file in office of clerk. Howard F. Cozzens, county surveyor.

SALINAS, Monterey Co., Cal.—Until February 19, 10 A. M., bids will be received by C. F. Joy, county clerk, to construct earth approaches to Lonoak and Panchoico Creek Bridges in Supervisor District No. 4. Specifications on file in office of clerk. Howard Cozzens, county surveyor.

SAN FRANCISCO—C. L. Harney, 74 New Montgomery St., at \$12,997, submitted low bid to Board of Public Works to improve Castro St. from pavement in 29th St. to 30th St. and 30th St. east to pavement in 20th St., involving grading; construct reinforced concrete stairways with 2 pipe railing, reinf. concrete walls, curbs, fence, gutters and coping; ironstone sewers with manholes, wye branches and side sewers; brick catch basins; gutter sump and storm water inlets and at 29th, Day and 30th Sts., by construction of red warning lights and reflectors; 6-in. conc. base pavement with 1½-in. asph. conc. surface; and a concrete pavement and art. stone sidewalks. Fay Improvement Co., second low at \$13,288, and E. J.

SANTA BARBARA, Calif.—Bid of Santa Maria Const. Co., submitted to the board of supervisors Feb. 8, at \$988.80 for constructing the shoulder and oiling of the present roadway on the Orcutt-Casmalia Road in the 5th Road District, from the Lower Orcutt Road for a distance of three miles west toward Casmalia, were rejected and Supervisor Prisker of the 5th District ordered to do the work by force account.

REDWOOD CITY, San Mateo Co., Cal.—City Engineer C. L. Dimmitt preparing plans to open and widen Hudson and May Sts. south from Jefferson Ave. to the Woodside road; will be 60-ft. wide. Property rights will cost \$10,000.

REDWOOD CITY, San Mateo Co., Cal.—City council sets April 14 as the date to vote bonds of \$9,000 to finance opening and improving of Warwick St. C. L. Dimmitt is city eng.

SACRAMENTO, Cal.—City declares intention (2294) to improve the alley between W. and X. 15th and 19th Sts., involving C. I. drains; vit. sewers; reconstruct manhole; 1-in. water service connections; grading; hydraulic concrete pavement. 1911 Act. Bond Act. 1915. Hearing Feb. 20. H. G. Denton, city clerk. B. C. Clark, city engineer.

SACRAMENTO, Cal.—City declares intention (2295) to improve alley between S and T, 26th and 27th Sts., involving C. I. drains; vit. sewers; reconstruct manhole; grade; 1-

in. water main connections; hydraulic concrete pavement. 1911 Act. Bond Act. 1915. Hearing Feb. 20. H. G. Denton, city clerk. B. C. Clark, city engineer.

SAN JOSE, Santa Clara Co., Cal.—Proceedings have been started by the city council to pave N. Third St. bet. Humboldt and Keyes Sts., and north half of William St. bet. Coyote Creek bridge and 24th St. Wm. Popp is city engineer.

PERSHING CO., Nev.—Until Feb. 19, 2 P. M., bids will be received by State Highway Commission to grade, construct structures and gravel surface, 22.24 miles in Pershing County between Woolsey and two miles south of Humboldt House. Deposit of \$15 required for plans, of which \$10 is returnable.

PALO ALTO, Santa Clara Co., Cal. City will start proceedings shortly to widen and improve California Avenue from Alma St. to El Camino Real. The cost is placed at \$181,501 of which \$60,601 will be for widening; \$47,660 for street paving, curbs, etc., and \$10,240 for electrolites. J. F. Byxbee, Jr.

PALO ALTO, Santa Clara Co., Cal.—City council will request county supervisors to assist in financing opening and widening of Colorado Avenue from the Palo Alto city limits to the proposed Bayshore Highway and widening of Embarcadero rd. from Middlefield road to the bayshore lands owned by the city. J. F. Byxbee, Jr.

MARTINEZ, Contra Costa Co., Cal.—County Surveyor R. R. Arnold making surveys for road from Treat Orchard and Ygnacio Valley road along Treat Lane to the San Miguel road in Ygnacio Valley. Property owners have petitioned for the work.

SAN FRANCISCO—Until Feb. 19, 2:30 P. M., bids will be received by Board of Public Works to construct artificial stone sidewalks in portions of Flood Ave., 27th Ave., 23rd Ave., etc. Est. cost, \$400.

Bids, same date, to construct artificial stone sidewalks in portions of Silliman St., Felton St., Burrows St., etc. Est. cost, \$400.

Bids, same date, to remove sand from sidewalk area and construct bulkhead (3-ft. high) in west side of 22nd Ave. from point 225-ft. north of Moraga to point 300-ft. north of Moraga. Est. cost, \$400.

Bids, same date, to remove sand from sidewalk area and construct bulkhead (3-ft. high) in north half of 19th St. from point 100-ft. east of Sanchez to point 150-ft. easterly. Est. cost \$400.

Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

SALINAS, Monterey Co., Cal.—Until Feb. 19, 10 A. M., bids will be received by C. F. Joy, county clerk, to grade and surface the Bitterwater rd. from King City to the county line in Supervisor District No. 3. Specifications on file in office of clerk. Howard Cozzens, county surveyor.

LOS ANGELES, Cal.—Proposed Palos Verdes Highway project as outlined by the county surveyor's office, provides for a 60-ft. concrete pave. in a parkway graded to 225 ft., extending from 79th St. and Angelus Mesa, through Inglewood, Torrance and terminating at Palos Verdes. The estimated cost, including trees and curbs, will be \$3,000,000, of which one million would be assessed against Palos Verdes, \$1,023,993 against Torrance and the balance against property owners along the route.

CULVER CITY, Los Angeles Co.—Until 8 P. M., Feb. 10, bids will be received by the city council to improve Washington Blvd. from Culver Blvd. to the east city limits. Geo. E. Lee, city engineer. Certified check or bond, 10%. P. H. Jarrett, city clerk. Project involves: 534,467 sq. ft. removal of existing 1½-in. to 2½-in. surface and placing 2-in. Permacrete resurf. (price per ton, about 66,808 tons); 2926 sq. ft. 6-in. asphalt. conc. base with 2-in. Permacrete surf. (per sq. ft.); 251 ft. curb; 6355 sq. ft. walk; 1651 sq. ft. 7-in. cement conc. drive-ways; 11,000 sq. ft. grading.

FRESNO, Fresno Co., Cal.—County supervisors will call for bids soon for paving of Whites Bridge Road from Mendota to Firebaugh and of Mount Whitney Ave. from near Riverdale to Lanare. C. P. Jensen is the county surveyor. Total est. cost is \$100,000, using Bitumuls type of pavement. The first named road is 10 miles long, the latter five.

HOLLISTER, San Benito Co., Cal.—City Engineer A. M. McCray is completing estimates of cost to pave South Street from San Benito to Railroad tracks; East St. from Third to Hawkins and Fifth St. bet. Powell and Line St.

Project involves: 23 sta. clearing and grubbing right-of-way; 100,000 cu. yds. rdwy. excav. without class; 234,000 sta. yds. overhaul; 2550 cu. yds. struct. excav.; 44,500 sq. yds. subgrade for pave.; 1100 cu. yds. cushion course; 9650 cu. yds. class A cem. conc. (pave.); 150 cu. yds. class A cem. conc. (struct.); 237,500 lbs. bar reinf. steel (pave. and struct.); 876 lin. ft. 13-in., 493 lin. ft. 24-in. and 202 lin. ft. 30-in. corr. metal pipe; 352 lin. ft. corr. metal pipe (clean and relay); 4.8 mi. new property fence; 2300 lin. ft. solid timber guard rail; 2050 cu. yds. removing and disposing of cem. conc. in existing pave. and struct.; 1009 bbls. fuel oil (shoulders); 211 sta. finish rdwy.; 35 monuments. State will fur. corr. metal pipe as more explicitly set forth in the special provisions.

SAN LUIS OBISPO COUNTY, Cal.—J. F. Knapp, 3501 Horton St., Oakland, at \$272,648 awarded contract by State Highway Commission to grade and pave with concrete 7.2 miles between Santa Maria River and Los Reros Creeks. Project involves: 157,250 cu. yds. rdwy. excav. without class; 700,000 sta. yds. overhaul; 3000 cu. yds. struct. excav.; 64,500 sq. yds. subgrade for pave.; 3900 cu. yds. cushion course; 17,250 cu. yds. class A cem. conc. (pave.); 885 cu. yds. class A cem. conc. (struct.); 500,000 lbs. bar reinf. steel (pave. and struct.); 425 tons crusher run base; 716 lin. ft. 13", 684 lin. ft. 24", 208 lin. ft. 36" and 62 lin. ft. 42" corr. metal pipe; 47 lin. ft. corr. metal pipe (clean and relay); 12.3 miles new property fence; 2215 cu. yds. removing and disposing of cem. conc. in existing pave. and struct.; 1815 bbls. fuel oil (shoulders); 388 stations finish rdwy.; 75 monuments. State will fur. corr. metal pipe and east steel frame and covers for drop inlets.

PLUMBING INSPECTORS ELECT OFFICERS

J. B. Davis of Pasadena, was elected president of the Plumbing Inspectors' Association of California at the annual meeting of that body held in Los Angeles. Other officers are: G. R. Hilliker, Fresno, vice-president, No. Division; O. L. Casiday, Pomona, vice-president, So. Division; Stephen I. Smoot, Los Angeles, secretary-treasurer. Executive committee, So. Division: Charles Bailey, Los Angeles; R. N. Clapp, Alhambra; Joseph T. Curley, Long Beach; E. T. Wood, San Marino; Clifford Wyckoff, Glendale.

At this meeting it was voted to suspend the initiation fee and to reduce the dues for active members to \$5.00 per year payable in advance, and to place the fee for associate membership at \$25.00. All qualified inspectors who are employed in inspecting plumbing are eligible for active membership.

Reports from Northern California indicate that this division is rapidly being organized and that before long the northern inspectors will be meeting regularly.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M., February 26, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, of which special reference is made, of portions of State Highway, as follows:

Calaveras County, between 1 1/4 miles north of 1 1/4 miles south of Calaveritas Creek (X-Cal-65-B), about two and eight-tenths (2.8) miles in length, to be graded and surfaced with crushed run base and untreated crushed gravel or stone surfacing.

Proposal forms will be issued to only those Contractors who have furnished verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed

work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS.

C. H. PURCELL,

State Highway Engineer.

Dated January 29, 1930.

NOTICE TO CONTRACTORS

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California up to 2 o'clock P. M., Tuesday, March 4, 1930, thereafter on said day to be publicly opened and read for the erection and completion of the Broom Factory, Industrial Home for Adult Blind, Oakland, California, in accordance with plans and specifications therefor.

The building is a one story structure with concrete walls, concrete floor, wood roof construction and tile roof.

The floor area is approximately 107,200 square feet.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, California, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications and proposal forms may be secured by licensed General Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) Dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

Daily News Service.

Are You Satisfied With a Weekly News Service?

Would a Daily News Service Be More Beneficial?

Effective January 2, 1930, DAILY PACIFIC BUILDER, the pioneer daily construction newspaper of the Pacific Coast, will be merged with LARSEN ADVANCE CONSTRUCTION REPORTS, the daily service of BUILDING AND ENGINEERING NEWS.

Every unit of the present service offered by BUILDING AND ENGINEERING NEWS and LARSEN'S ADVANCE CONSTRUCTION REPORTS will be published each day in DAILY PACIFIC BUILDER, in addition to other important features. The subscription price will be \$1.50 per month or \$15.00 per year payable in advance.

DAILY PACIFIC BUILDER, under this consolidation of services, will bring to your desk each morning the latest developments in the construction field—Building Permits and Building Contracts, Mechanics' Liens, Completion Notices, advance construction news, covering every branch of the construction industry, building and engineering improvements, business opportunities, etc.

If you are now a subscriber to BUILDING AND ENGINEERING NEWS and desire to receive the DAILY PACIFIC BUILDER, sign the order blank below and enclose your check for the period you desire to subscribe.

S. F. CHAPTER, A. I. A. SEEKS FEDERAL WORK

"Economic interests of the Nation and of the building industry and the cause of good architecture will be best served by the employment of private firms in the localities affected as architects of all federal office buildings and post offices," according to a resolution adopted at the last regular meeting of the Northern California Chapter, American Institute of Architects, It is announced by James H. Mitchell, secretary of the chapter.

"Aside from stimulating the economic welfare of the cities, the Chapter believes that better buildings will result from having local architects, because of their familiarity with local conditions, requirements and materials of construction," Mitchell continued. The resolution is published herewith:

"BE IT RESOLVED, that the Northern California Chapter of the American Institute of Architects considers that the economic interests of the nation and of the building industry and the cause of good architecture will be best served by the employment of private firms in the localities affected as architects of all federal office buildings and post offices."

OAKLAND TO BAN PATENTED STREET PAVEMENTS

Walter N. Frickstad, new city engineer of Oakland, succeeding George N. Randle, in taking office declared that while it is yet too early to make any statement as to the policy, plans or intentions, he takes office with the intention of ruling out patent paving on Oakland's streets, which have been the cause of bitter controversies in the past.

"There will be no patent paving bought when the same object can be attained by unpatented pavements," said Frickstad. "I see no reason why the city should pay royalties for patent mixtures. There is plenty of good paving material available without having to pay royalties.

"We are starting with a definite policy in favor of open specifications for public street work, with free and open competition for all."

DEFECTIVE HEATING CAUSE FOR \$25,000 SUIT

Naming the Fidelity & Deposit Company of Maryland and the Independence Indemnity Company as defendants, the Padre Hotel Corporation of Bakersfield has filed a civil complaint in which judgment for \$25,000 is asked. The hotel corporation alleges in its complaint that it cost \$24,527.48 to remodel the heating and cooling apparatus in the hotel at Bakersfield so that it would operate satisfactorily and asks judgment on the contention that the original contractor agreed to install satisfactory equipment.

WHAT IS AN ARCHITECT ?

Just what is an architect? "The architect, as the engineer, is above all a highly educated man. He not only is that, but usually he is a highly cultured man—a man whose interests and instinctive feelings reach out to all the finer things which may grace our life and organization. He has high ideals in regard to these and the integrity, honesty of purpose and performance which should prevail in professional and business relations. He is frequently interested in music, history, literature, higher education, civic improvement and even such remote subjects as international relations and human progress generally." So says F. S. Laurence in *Class and Industrial Marketing*.

U. OF S. C. ARCHITECTURAL DISPLAY SCHEDULED

The entire second floor of the State Building in Exposition Park, Los Angeles, is to be devoted to a display of the work of students in the School of Architecture of the University of Southern California from April 2nd to June 1st.

In addition to building plans and designs, there will be freehand drawings, mural paintings, stained glass designs, watercolor sketches, statuary, bas-reliefs, sketches of interior arrangements, ornamental iron work designs, friezes, and figurines clothed by co-eds to illustrate period costumes.

The same work will constitute a campus exhibit in the Architecture Building of the University of Southern California during the Semi-Centennial celebration of the Trojan University, May 29 to June 7th. Other unique and significant exhibits to be featured in the Golden Anniversary program include scientific laboratory work, charts showing legal clinic work, a music exhibit, physical education demonstrations, and a relief map of the prospective permanent campus at S. C., as well as comparative relief maps showing the growth of the present campus since 1880, when the University of Southern California was founded.

S. B. Merry and H. H. Mylander, former manufacturing executives, have purchased a 100-acre site from the Griffin Estate in South Richmond, Contra Costa County, and propose to erect homes of factory workers. They will operate under the firm name of Community Builders of Richmond. Application has been made to the State Corporation Department to issue stock to finance the project.

STATE COMMERCE CHIEF TO AID LOCAL INDUSTRIES

Announcement was made at Sacramento by Charles C. Bowen, Chief of the State Bureau of Commerce, that he had finished writing letters to nearly 1400 commercial associations to obtain certain facts, the possession of which would enable the bureau intelligently to relay important trade tips and information that should result in profitable new markets for California's commodities.

"Inquiries and trade opportunities are being received every day from private and federal sources. We believe the number of these inquiries will increase as time goes on, and if properly followed up, new outlets will be found for our resources," says Bowen.

"The need for a directory of California commercial associations that are active in the marketing of California's resources has been expressed to us by exporters and buyers, and it is the intention of the bureau to compile and publish a directory that will show who and where these organizations are and what they have to sell. By reason of the need for this information the bureau is hopeful that there will be 100% reply to my letter by February 20.

"A controlling factor that supports the increasing demand for California products lies in the fact that basic appeal is made upon quality rather than price. This policy is fundamental to the successful development of domestic and foreign commerce, and every exporting agency should safeguard that principle."

To illustrate, Bowen told of a recent conversation with a British commercial attaché who commented favorably on the fact that he could buy better California oranges in London than he could here, which condition he declared made for a consumer's preference for our oranges.

A function of the bureau is to correlate and localize trade information that will lead to new domestic and foreign outlets. In this connection the bureau is mindful of the fact that its success will be measured largely by the extent that the bureau coordinates its efforts with the activities of the federal departments of commerce and agriculture, and other existing fact-finding agencies.

TEIGLAND, SAN JOSE BUILDER, FILES BANKRUPTCY PLEA

Christian Teigland, San Jose contractor and builder, has filed a petition for bankruptcy in the federal court in San Francisco, alleging unsecured debts totaling \$10,426 and no assets. He has 30 creditors all living in San Jose. The petition was adjudicated by Federal Judge A. F. St. Sure and Teigland ordered to appear on Feb. 20 before M. E. Wright, referee in bankruptcy, in San Jose.

SAN ANTONIO AWARDED 1931 MEET OF NATIONAL BUILDERS

By JOE ODGERS

The Nineteenth Annual Convention of the National Association of Builders' Exchanges was a success—a big success.

It was a real business convention, mingled with pleasure to relieve the pressure of thought affecting those issues which today are hampering the progress of the construction industry.

Committee reports were brief and to the point—citing the ailment and recommending the cure.

The Secretaries' Conference, which opened the convention, permitted the cogs in the wheels of the building industry to discuss ways and means for better organization. It permitted them to point out discrepancies in their respective districts and to compare such discrepancies with those in other sections. It afforded them food for thought. Remedies were suggested and attempts will be made to make them effective.

In all—the convention was a success—a big success.

With the delegates who are about ready to leave for the home grounds, the good wishes of the citizens of San Francisco go with them.

We trust they will come again and visit our city; if not for business, then for pleasure.

In business and in pleasure, we believe the local builders' exchange has established the fact safely in mind that:

"San Francisco Knows How."

William H. George, president of the San Francisco Builders' Exchange was unanimously elected president of the National Association of Builders' Exchanges at the third day session of the Nineteenth Annual Convention of that body at the Palace Hotel. George succeeds Sam Hotchkiss of St. Joseph, Missouri.

W. A. Sharp of Reading, Pa., was elected first vice-president; C. C. Choffin of Youngstown Ohio, second vice-president; J. T. Haile, Jr., of San Antonio, Texas, third vice-president; and J. A. Dahlman of Milwaukee, Wis., fourth vice-president.

Max Baumann of New York was re-elected treasurer of the association.

TUESDAY SESSION

Tuesday's session opened with an address of welcome by Jas. Rolph, Jr., on the part of the municipality.

George W. Kelham, architect, delivered the address of welcome on the part of the local construction fraternity, at the same time urging the national association to get behind the movement to eliminate the irresponsible contractor. Elimination of waste in industry was also stressed by Architect Kelham.

Will J. French, state director of industrial relations, delivered an address urging adoption of a national safety code, declaring that "the acid test of civilization is the conservation of human life."

Sam Hotchkiss, in his annual address predicted a period of prosperity throughout the country for the next five years "far beyond the expectation of the most optimistic."

Wm. H. George submitted two resolutions, one pledging the co-operation of the national association to do everything in its power to carry out the wishes of President Hoover in respect to a full building program throughout the country during the current

year. The other called upon Federal, State and Municipal governments to discontinue parceling out building work on the day labor basis and to let all projects on a competitive bidding basis.

Following adjournment of the business session the delegates were taken to Pittsburg, Contra Costa County, to inspect the plant of the H. W. Johnsonville Company and later enjoyed a dinner at the plant of the Cowell Lime and Cement Company at Cowell, Contra Costa county.

WEDNESDAY SESSION

James F. Collins, director of the California State Department of Professional and Vocational Standards, addressed the convention on the "Licensing of Contractors." He told of the purposes of the license law in California, explained what it has accomplished and the necessity for strict enforcement for the protection of the

WM. H. GEORGE, President

contractor himself, the prospective builder, the architect and the public in general.

It was at this session that officers for the ensuing year were elected.

Following the election the meeting adjourned and the delegates were taken by automobile for a trip down the Peninsula, returning by way of Princeton-by-the-Sea where a dinner was served.

THURSDAY SESSION

At the Thursday session of the convention, Perry Sawyer of the Los Angeles Builders' Exchange, delivered an address on "Loose Credits."

Reports of various committees including those on Inter-Relations, Re-forestation and Building and Housing were submitted, discussed and recommendations made as to the next procedure.

San Antonio was selected as the 1931 convention city.

At the close of the business session the delegates were taken on an excursion around San Francisco Bay, visiting the principal places of interest.

PRESIDENT'S MESSAGE

The annual message of Sam Hotchkiss, retiring president of the association, is published herewith:

"It is now my duty to inflict upon you the President's annual message. It has been a pleasure and a great honor to serve as your President during the past year.

"I wish at this time to express my appreciation to the membership as a whole, and the Board of Control.

"I would like to make special mention of the excellent support given me by Mr. William F. Chew of Baltimore and Mr. David T. Riffle of Pittsburgh.

"I also wish to mention the very efficient work of Mr. Earl F. Stokes, and Mrs. Stokes, for the very capable manner in which they have handled the work of the National Association.

"I want to thank the Secretaries for their cooperation with the National Office and their work in making the Secretaries' Conference a success; for they are the men to carry on the real work of the Builders' Exchange.

"I wish to thank Mr. William Tubeling of Milwaukee for his untiring work of carrying on the safety work of the National Association.

"This year has been rather an active year with regard to the work of Accident Prevention, Standardization and Simplified Practice, Standard Documents, Wood Utilization, and our continued work on the Hoover committee for Uniform Lien Laws.

"It might be interesting for you to know that when the question of a 1930 census of distribution was proposed and money appropriated by Congress to carry on this work that the construction industry was not included in the program and through the efforts of the Division of Building and Housing and our National Association the committee in charge of this work were made to see that a complete survey or census of distribution could not be made if the second largest industry in the country was not in the picture. After several meetings with the committee and a proposed schedule being submitted to them, a place was conceded to the construction industry and I feel that this is one of the big accomplishments during the 1929-1930 administration.

"I attended the construction conference called by Mr. Hoover in November and December of 1929 in Washington, D. C., and I feel confident that these meetings settled in the minds of the public that business was not to be worried over but that prosperity would follow, due to the interest and cooperation by the business men of the country in these conferences. I feel sure that we are going to see a period of prosperity in this country during the next five years far beyond the expectation of even the most optimistic. For the construction industry we are going to have the biggest building program that we have ever witnessed in our day.

"There will be much for the trade associations to accomplish during the next two or three years when this building boom is on, and our National Association expects to play a very prominent part in this program, and earnestly urges the united and undivided support of all active Builders' Exchanges throughout the country.

"Another subject that will require our attention and careful study during the year and one which we hope to see pushed forward as speedily as possible is the question of loose cred-

its. This subject I feel is an important one to the building industry, and should have the careful consideration of all Builders' Exchanges throughout the country and I recommend that each Exchange consider for its own personal benefit the setting up of a Builders' Exchange Credit Bureau. This to my mind, would be one of the best services that an Exchange could offer to its membership.

"Trade associations today are one of the great factors that go to move the wheels of industry and we must lend out best efforts to keep their wheels in motion.

"After guiding the affairs of this association for the last year and learning the very crying need of more finance to properly operate this, the oldest national building association in existence in the United States, the very idea of trying to run a National Association of the second largest industry on a per capita of one dollar a year is almost an impossibility; but I do not believe it is possible to raise the per capita tax any higher.

"The only way that I can see for this association to take its place in the national affairs is to have the big men of the industry come out and get their shoulders to the wheel and take out a contributing membership and raise enough funds to keep a Field Secretary out in the interest of our association.

"I made a start on this last year—I sent out about fifty personal letters to the men that I knew and I am glad to say seventeen of them came across with twenty-five dollars each for a contributing membership. Now there ought to be two hundred men in the National Association that think enough of the business that put them where they are to subscribe twenty-five dollars a year to the cause. I want to take this opportunity to thank the seventeen men that answered my call and ask any other men here that would like to help build up the association to leave their name and check with the secretary.

"Now men it is up to you—we cannot compete with other national associations and keep the building industry where it belongs on one dollar per year while our competitors collect over fifty dollars per year from about six thousand members. I hope this subject will be discussed on the floor. There are any number of live topics that need our earnest consideration and I hope they will be given full discussion.

"You all have in your hands a copy of the program of this convention and it will inform you when the different subjects come up for discussion; as the time is short we will not be able to refer back to the subject again.

"I am going to ask you to try to be in the convention room at the time designated. Some of us have traveled clear across the United States to attend this conference and to them, at least, we should try to give the benefit of our attendance."

"The San Francisco Exchange has given a lot of time and money to entertain us while here and have a lot to show us; so try to be in your places on time. I thank you."

COMMITTEES APPOINTED

Resolutions Committee—A. J. Rhodes, chairman, New York; Wm. Tubeling, Milwaukee; Raymond Sharp, Reading; George Israel, Pasadena; T. W. Dodd, St. Joseph; A. H. Wilhelm, San Francisco; Franklin O. Thomson, Houston.

Committee to Study Referendum of the United States Chamber of Commerce—Anton Hennecke, Milwaukee; A. H. Wilhelm, San Francisco; F. F. Young, New York; D. E. Bair, Santa Monica; Wm. F. O'Keefe, Stockton; Wm. Friederich Rochester; Sam Sherman, Reading.

Nominating Committee—Robert L. Reisinger, Milwaukee; R. J. H. Forbes, San Francisco; John Dahلمان, Mil-

waukee; Walter S. Faddes, New York; Grant Parsons, Omaha; Sam Sherman, Reading; Allison Honer, Santa Ana.

Auditing Committee—W. H. George, chairman, San Francisco; J. T. Haile, Jr., San Antonio; A. Hennecke, Milwaukee; H. J. Randenbush, Reading; R. J. Cochrane, Pittsburgh; Erby Smith, St. Joseph.

Committee Award Attendance Cup—Sidney Cornelius, chairman; W. H. George, San Francisco; Mano Zan, Los Angeles; H. C. Anderson, Berkeley; Chas. Hellums, St. Joseph.

BOARD OF CONTROL

The following members comprise the Board of Control of the National Association to serve for the ensuing year:

W. F. Kuchano of the Master Builders of Iowa; Wm. M. Friederich, Rochester, N. Y.; T. W. Dodd, St. Joseph, Mo.; D. T. Riffle, Pittsburgh, Pa.; H. C. Anderson, Berkeley, California; Allison Honer, Orange County, L. S. Feletz, Stockton; George Israel, Pasadena; C. A. Thanheiser, Hous-

SAMUEL HOTCHKISS
Retiring President

ton, Texas; C. G. Norman, New York City; R. E. Homann, Los Angeles.

David E. Baird, Santa Monica; Max Baumann, New York City; C. C. Choffin, Youngstown, O.; Wm. F. Chew, Baltimore, Md.; John Dahلمان, Milwaukee, Wis.; John C. Dethoff, Reading, Pa.; Jas. J. Dalzell, Youngstown, O.; W. H. George, San Francisco; E. E. Gilmore, Omaha, Neb.; J. T. Haile, Jr., San Antonio, Texas; Sam Hotchkiss, St. Joseph, Mo.; Albert D. Howell, Boston, Mass.; F. B. Kinzey, Johnstown, Pa.; A. B. Lang, Louisville, Ky.; J. H. Mulherin, Augusta, Georgia.

Alexander Orr, Jr., Miami, Fla.; Grant Parsons, Omaha, Neb.; Jim Quinn, Memphis, Tenn.; E. R. Ratzburg, Tamassua, Pa.; Robt. L. Reisinger, Milwaukee, Wis.; C. C. Schrepferman, Denver, Colo.; W. A. Sharp, Reading, Colo.; A. L. Smith, Washington, D. C.; P. W. Tibbs, Oklahoma City, Okla.; C. C. Warner, West Palm Beach, Fla.; A. H. Wilhelm, San Francisco; R. E. Williams, Buffalo, N. Y.

SECRETARIAL BUREAU

An unusual feature pertaining to the convention was the Secretarial Bureau operated by the Fidelity and Deposit Company. This Bureau has been in operation at this convention for the past eight years. Chairmen of the different committees and the delegates utilize the service in having resolutions drawn, and many papers prepared that have to do with the operation of the convention. The

bureau has three young ladies to do the stenographic work, and they also have favors consisting of cigars, cigarettes, after-dinner mints, pencils, etc. George R. Babyton, Baltimore, was in charge of the bureau.

The convention closed with a banquet staged in the Gold Room at the Palace Hotel.

Immediately preceding the banquet the delegation from Milwaukee, Wisconsin, was presented with the trophy offered by Robert L. Reisinger, past-president of the National Association and a member of the executive committee. The Reisinger trophy was awarded on the basis of the member exchange having the largest number of registered delegates at the convention. The Milwaukee delegation numbered fourteen.

Following a number of brief talks and a varied program of entertainment dancing, was enjoyed until midnight.

SANTA CRUZ SUB-CONTRACTORS PERFECT ORGANIZATION

Santa Cruz Building Trades Sub-Contractors' Association has been organized in the surf city.

The purpose of the organization is to promote mutual co-operation and financial protection of its members as well as a general clearing house for information relative to contracts.

Thos. H. Dean of the painting firm of Beckman & Dean, was elected president of the association and Frank Carroll, secretary. E. H. Brock of the Santa Cruz Tile Company was elected treasurer.

ESTIMATING WIRING JOBS AN EASY MATTER

Architects and builders are always asking for approximate figures on proposed wiring jobs. These cause the contractor much worry. At a recent meeting of the Bakersfield Electricians one member submitted the following definition of an approximate method of approximately figuring approximate wiring jobs, which ought to be approximately as good as any:

"To arrive at an approximate cost of a wiring job take the area of the entire floor plan in square feet, multiply by the height of the ceiling, divide by the number of doors and windows, subtract the number of rooms, then add profit, if any. This will give you a dependable approximate figure."

CONTRACTORS FINANCIALLY UN- ABLE TO COMPLETE ROAD JOB

Coolidge and Scott, contractors on the highway between Paradise Hill and Orovada in Humboldt county, Nevada, have advised the Nevada State Highway Commission that they are financially unable to complete the project.

The contract was taken for \$46,000 by the contractors and \$15,505 has been paid to them in progress payments. It is estimated by the department that \$22,000 worth of work has been done.

The Fidelity and Deposit Company of Maryland, bondsmen of Coolidge & Scott to the extent of \$35,140, has advised the highway department that they will send an engineer to the project and will possibly take over the contract and finish it.

Work was started last September and was suspended early in January because of bad weather.

Robert A. Henry will operate in the San Francisco Bay District under the firm name of Pacific Coast Boiler Works.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Inadequate facilities for inspection of San Francisco building operations is complained of by John B. Leonard, superintendent of the Municipal Bureau of Building Inspection. Leonard declares that the force of inspectors employed by his bureau is insufficient. Scarcely more than a score of men are entrusted with the task of seeing that from 60 to 100 buildings, the number almost always under construction in the city, are being safely and properly built, he added.

Owners of all dams in the State of California, completed prior to August 14, 1929, are required to file application with the state engineer not later than February 14th for approval of these dams. This is pointed out by State Engineer Edward Hyatt. The law, passed by the last legislature, superseded all previous legislation relative to state supervision of dams. Many applications for approval have been received, Hyatt said, but it was indicated that many owners of dams do not know they are required to apply for approval of their dams before February 14th. The law applies to dams more than 15 feet in height or with a storage capacity of ten acre feet or more. Applications should be made to the state engineer, Division of Water Resources, Sacramento, Calif.

In a formal notice to the trade that it has acquired the properties of the Columbia Steel Corporation, U. S. Steel Products Company states that products will be sold under the name U. S. Steel Products Company - Columbia Department. Offices will be maintained in San Francisco, Los Angeles, Portland, Seattle, Salt Lake City and Phoenix. Operation of the warehouses will be continued at San Francisco, Los Angeles, Portland and Seattle. It is proposed to increase the facilities of the Columbia plants recently taken over and to further diversify their products, enabling a broadening of service in the Pacific Coast territory.

Amendment of the ordinance regulating contractors so there will be no requirement except that of a license, has been presented to the Portland, Oregon, city council by City Commissioners Barbur and Pier. The amendments will eliminate the bond of \$2500 required by the ordinance which aroused a storm of protest from the industry and make it possible for those bonds to be canceled. It also will do away with the classification of contractors, as agreed by the council at a hearing with the contractors who opposed the measure.

Although practically every large utility system in the country has announced construction programs for the present year considerably in excess of 1935, actual work undertaken during the first two weeks of the year was 50 per cent below last year's total for the corresponding two weeks, according to figures compiled by the "Engineering News-Record." It is believed that many of the larger companies are awaiting a more favorable turn to the bond market before initiating work on their construction programs.

California had more building and loan associations with assets exceeding \$10,000,000, at the opening of 1936 than any other state in the nation except Ohio, according to a report released recently by the California Building-Loan League. The largest association in the west and the third in the nation, Pacific States Savings & Loan Company, with resources as of January 11th, last, of \$57,498,715, has its head office in San Francisco. Of the eighty-nine building and loan associations of the nation in the ten million dollar class, ten are located in California. The assets of these associations, as of December 31st, last, were: Fidelity Savings & Loan, Los Angeles, \$33,410,831; Mutual of Long Beach, \$22,029,074; State Mutual of Los Angeles, \$16,838,504; California Mutual of San Jose, \$15,271,122; Guaranty of San Jose, \$14,743,854; Mutual of Pomona, \$14,316,008; San Jose Building & Loan, \$13,861,023; Guaranty of Los Angeles, \$11,076,738 and Southern California of Los Angeles, \$10,311,233. The "call report" for the calendar year 1935, which will be released soon, will reveal the largest percentage growth in resources for any state in the nation. A gain of more than \$30,000,000, in combined resources of the 240 California associations is predicted by the State League, bringing the total to about \$500,000,000.

Frank C. MacDonald, general president of the State Building Trades Council of California reports having secured an increase of one dollar per day for carpenters, pile drivers, engineers, truck drivers and other building trades workmen engaged on state work. In addition to securing the wage increase, MacDonald is said to have been successful in arranging to have union men employed on state work, "and that on state construction work let by contract, he has the assurance of state officials that they will use their good offices in inducing contractors to pay the established wage scale and give preferential consideration to union workmen in the district where the work is undertaken."

The advisability of modifying the State laws relating to building-loan associations and the cost of such a program are being studied by a committee recently appointed by the California Building-Loan League, consisting of Charles H. Tucker, Long Beach; C. H. Wade and Frank A. Wright, Los Angeles. The committee expects to confer with attorneys who are well versed on the provisions of the building-loan code, the State Code Commission and a committee of the State Bar Association. A report will probably be submitted to the executive committee of the league for consideration at an early date.

Representatives of the Chamber of Commerce, City Council and Municipal Water and Power Commission of Los Angeles, have announced a \$38,-800,000 bond issue to buy water right in Mono basin and divert its water to the Owens river will be submitted to the Los Angeles electorate in May.

Prohibition of the erection of new filling stations within 250 ft. of residence dwellings was held unconstitutional by the Supreme Court of North Carolina in a contest of such an ordinance passed by the city of Fayetteville. Evidence that 23 out of 25 existing filling stations were within the prescribed distance was introduced to show that the ordinance was an unreasonable use of the police powers of the city.

Real estate market activity for December is indicated by the figure 75.2, according to the index of real estate market activity compiled monthly by the National Association of Real Estate Boards. The index is based upon official reports of the total number of deeds recorded in 64 typical cities. Real estate activity for 1936 is taken as the base year in computing the monthly figure.

President W. W. Campbell of the University of California has been selected as one of the 22 distinguished American scientists to serve on the jury of award for the newly announced \$10,000 annual scientific prize offered by the Popular Science Monthly, according to report just received from Collins P. Bliss, director of Popular Science Institute. The prize will be awarded each year beginning with the fall of 1936, to the American whose work in science is deemed of greatest potential benefit to the world. The Popular Science Monthly is establishing the award for the purpose of recognizing the work of scientific leaders at a time when such recognition is most needed.

A detailed statement on interpretation of the street improvement acts of 1911 and 1925 to guide the Alameda city council in planning future street improvements will be compiled by City Attorney Edward J. Silver. Silver has been requested by the council to translate into easily understandable language the legal phrases in the two acts under which most of the present day street paving is done. The report will include a summary of court interpretations of the law.

Pasadena, Calif., now has a plastering ordinance in effect. Plastering contractors are not required to take out a city license, but a permit must be secured, and in order to get this the applicant must produce evidence to show that he has a State license. The charge for the permit is based on the following schedule: 1/2 cent per square yard of plaster or stucco up to 1000 yards, and 3/4 cent for each additional square yard. A regular system of inspection has been established to insure proper observance of the ordinance.

On February 10 the McCloud River Lumber Co. doubled its production with the inauguration of a night shift in the new mill at McCloud, Siskiyou county. Three one-way bank saws are being operated, these producing about 400,000 feet of lumber in the two shifts daily.

Freitas Plumbing & Heating Co. of Alameda County has been incorporated. Directors are J. J. Freitas of Oakland and L. Warner of Berkeley. The company is capitalized at \$50,000.

Fifteenth Annual Convention of the American Institute of Quantity Surveyors will be held in St. Louis, Mo. April 14 to 16 inclusive, it is announced by F. E. Dischner, secretary of the organization.

ALONG THE LINE

William A. Ough, 51, Sacramento contractor, died in that city February 5, after an illness of several years' duration. He was a native of Bay Point, Contra Costa County, and a resident of Sacramento for the past eight years.

H. W. Davies, assistant engineer and assistant secretary of the port of Seattle, has resigned to become manager and engineer of the port of Port Angeles, Wash. Mr. Davies was associated with the port of Seattle organization for sixteen years. He succeeds W. J. Murphy, who has gone to Aberdeen, Wash., on Grays Harbor, to become manager of that port.

C. C. Jarman, labor leader of Fresno, has been temporarily appointed city building inspector of Fresno, due to the death of James Anton, veteran city employee of Fresno. Jarman will serve until competitive civil service examinations are held and an applicant certified to the position by the civil service board. Jarman has been financial secretary of the Carpenters' Local at Fresno for nearly ten years and also was business manager of the local. He is a member of the Board of Control of the Tri-County Labor News and was a member of the city park commission during Al Sunderland's administration as mayor.

American Association of Engineers has sent a resolution to the city council of Los Angeles protesting the proposed plan to reduce the salary of the city engineer. The resolution states that if any change is made, the city engineer's salary should be increased.

Walter L. Frickstad has been named city engineer of Oakland, succeeding George N. Randle, resigned. Frickstad is a graduate of the University of California and since 1921 has been employed as an engineer by the United States Bureau of Public Roads. He was formerly assistant city engineer of Oakland, from 1907 to 1919. Frickstad is a World War veteran and has been active in the American Legion, being a past commander of Oakland Post.

GREAT WESTERN BUYS PARDEE PLANT POWER

Contracts have been entered into between the East Bay Municipal Utility District and the Great Western Power Company for the sale and delivery to the latter company of all power generated at the Pardee plant of the district on the Mokelumne River for a period of five years, beginning next July.

Under the terms of the contract the power company agrees to take up to 9,000,000 kilowatt hours monthly, paying an average of 4 mills per kilowatt hour for the first 6,900,000 and an average of slightly less than 3 mills for all power delivered in excess of that amount.

Engineers estimate that the district will receive a gross return of between \$350,000 and \$400,000 yearly from the sale of this power. Net, after operating expenses and allowance for depreciation, will be somewhat in excess of \$250,000 a year.

The contract will terminate in September, 1935.

TRADE NOTES

D. L. McHugh, secretary-treasurer of the Geiger Iron Works of Stockton, has been appointed general manager of that company, succeeding the late Joseph Geiger. McHugh has been associated with the Geiger Iron Works since 1916.

Pacific Clay Products of Los Angeles reports net profits after all charges and federal taxes for the year ended December 31, 1929, of \$399,864, or \$4.03 a share, on 99,157 shares of no par value capital stock outstanding against \$374,331, or \$3.78 a share, for 1928.

San Jose Hardware Co., whose quarters were recently destroyed by fire, has established temporary quarters at 180 South Market St., San Jose, pending the completion of their new building.

Guardian Manufacturing Co., 100 W Chicago Ave., Chicago, Ill., desire to communicate with agents calling on architects, contractors and owners to sell the Guardian door announcer. Complete details will be sent on request.

Holladay Housing & Heating Corp., of Los Angeles, has filed articles of incorporation with the secretary of state and contemplates the construction and operation of lumber mills in addition to hydro-electric power dams on the Columbia river in Oregon. The company is capitalized for \$5,000,000.

Sterling Pump Works of Stockton has placed a night shift in operation as a result of orders from Mexico and South America for more than five carloads of Sterling pumps, valued at more than \$160,000. It is announced by Ralph M. Bacheller, president of the company.

According to word from Salt Lake City, J. R. McWane of Birmingham, Ala., president of the Pacific Coast Cast Iron Pipe Co., has purchased the 50 per cent interest held in the concern by Columbia Steel Corp. Columbia disposed of this interest to McWane prior to the transfer and sale of its own assets and property to the United States Steel Corp.

NEW MATERIAL BOTH INSULATOR AND CONDUCTOR

Discovery of a new material named thyrte, which offers better protection from lightning, was recently announced to the American Institute of Electrical Engineers by Karl B. McEachern of the General Electric Company.

Thyrte is a compound, in appearance a cross between black slate and porcelain. Its name, of Greek derivation, means gate, and for electrical current it is almost literally a gate in more senses than one.

For the ordinary currents used in the industrial and household worlds, thyrte is a good insulator, a restrainer that keeps the current from jumping out of bounds, a closed gate. But when electricity becomes too ardent, thyrte "gives it the gate."

If a tremendous overcharge comes along the wire, such as a stroke of lightning, thyrte changes from insulator into a good conductor, offering a ready and harmless pathway for the escape of the overcharge.

HERE — THERE — EVERYWHERE

Sonoma County Building Trades Council has adopted a resolution favoring the five-day week. The resolution is effective immediately. Crafts affected by the resolution will work only on Saturdays under extreme emergencies, according to A. G. Hinshaw of Petaluma, president of the council.

Three unions in Syracuse, N. Y., have signed agreements with contractors calling for the 40-hour week plan, effective January 1, 1931. The unions which will adopt the five-day working week are the carpenters, plasterers, and painters and decorators. The 1929 agreement between the carpenters and the contractors is effective during 1930, the scale being \$1.30 per hour for a 44-hour week. The new agreement, effective January 1, 1931, calls for a 40-hour week at an hourly wage of \$1.32. The plasterers' agreement with contractors in 1931 also calls for an increased wage scale to offset the half-day loss.

Porterville, Cal., city council is considering the adoption of a plumbing code as recommended by the State Association of Master Plumbers. A uniform building code is also slated for adoption.

Hillsborough, San Mateo County, town trustees are considering the adoption of an ordinance regulating electrical wiring in connection with heating units.

Sacramento Builders' Exchange and Sacramento Building Trades Council will hold a joint meeting next Monday night at the Labor Temple in the capital city, at which the proposition of introducing the five-day week in that city will be discussed.

Warm Air Heating and Ventilating Association of Portland, Ore., has been organized with M. B. Levin as president; W. I. Spencer, vice-president and Sam Ackley, secretary-treasurer. The primary purpose of the new organization is avowedly to educate the public along the lines of proper and scientific heating installation and to give a maximum amount of service.

Los Angeles Chapter, American Society for Steel Treating, will give a course in practical metallurgy of iron and steel, beginning February 17, it is announced by James H. Spade, president of the Chapter. Three hundred members are enrolled in the Chapter.

An individual giving his name as H. Griebel, operated in Walla Walla, Wash., soliciting memberships in the Associated General Contractors of America, claiming he was working on behalf of that organization. Officers of the Pacific Northwest Chapters of A. G. C. declare the man is a fake, as his method of securing members is not in use by another of the branches of the A. G. C.

MERGER DENIED

Claude Neon Electrical Products of Washington will not merge with the Delaware corporation of similar name. Paul House, president of the eastern company, is quoted as saying reports of such action were premature by at least six months.

TRADE LITERATURE

A recent publication of the Westinghouse Electric & Manufacturing Company is Arc Welding Data Number 11 on The Arc Welding of Cast Iron. This bulletin points out some of the properties of cast iron and gives a recommended procedure to be followed in arc welding. There are several illustrations which show the characteristics of cast iron which influence its weldability, the characteristics of cast iron welded by both the carbon and the metallic arc processes, the general procedure recommended for doing metallic arc welding on cast iron parts, and several interesting views of cast iron machinery parts which have been repaired by arc welding. Since the economy behind the application of arc welding to the repair or reclamation of cast iron machinery or parts is widely recognized, the welding data presented in his publication is of particular interest to users of such equipment.

THE BRICK INDUSTRY

The current monthly bulletin of the Common Brick Manufacturers' Association, reporting information as of January 2, says:

"The movement of building materials is of the lowest volume that it has been in several years. Brick shares its part of this grief. Both in the amount of brick shipped during the past thirty days and in the orders for brick on the books, there is a decline from the records of one month ago, and twelve months ago.

"There is little surprise in the industry at this condition. It was expected that the stock market crash, while the first step, perhaps, toward a better condition in the brick industry, would not immediately react favorably. The downward trend has continued rather sharply through November and December and is likely to continue with an equally sharp downward slant for the first two or three months of this year.

"Major construction starts in the offices of the architects and engineers. All reports on this phase are favorable. It is indicated that a large volume of work, probably equaling that of 1929 is contemplated. Much of the work is in actual progress on the draftsmen's boards. Just when the pick-up will come, no one in the brick industry has been able to determine. Producers are going through the slack period with patience and the rather firm hope that 1930 will end fortunately for them. A large number of plants are closed down, some for seasonal reasons and others because their kiln sheds are full of burned brick awaiting orders.

"There is very little price fluctuation, due undoubtedly to the fact that the price is already seriously depressed by the slack demand of the last half of the year past."

FOX RE-FINANCING PROPOSED

Samuel Untermyer, of New York, attorney for the Fox interests, announced at resumption of the Fox receivership hearing in the federal court Feb. 11, that a reorganization of the Fox Film Corporation, involving the issue of \$65,000,000 in new securities, was being worked out by interested parties. The hearing is on an order to show cause why a receiver should not be appointed for the corporation.

BUILDING PERMIT LISTINGS
FOR JANUARY IN P. C. CITIES

Following is a compilation of building statistics covering the Pacific Coast States for the month of January, 1930, and for comparison with those of January, 1929, as compiled by the S. W. Straus Company:

CALIFORNIA

City	No.	January 1930 Cost	January 1929
Alameda	42	\$ 24,795	\$ 240,650
Alhambra	60	170,120	181,350
Anaheim		120,870	15,940
Bakersfield	78	122,070	107,325
Berkeley	107	434,054	135,693
Beverly Hills	67	603,900	687,250
Burbank	20	58,170	90,845

400,000 NEW HOMES ANNUALLY IS U. S. NEED FOR PROPER HOUSING

Need of 400,000 new homes annually to properly house all the people of the United States is emphasized by Edward Eyre Hunt, secretary of the President's Conference on Unemployment, in "An Audit of America" his interpretive summary of the report and survey on economic conditions which was issued last Spring by the Committee on Recent Economic Changes. Mr. Hunt views the survey as a "description of the levels on which the American people live."

Mr. Hunt's discussion of housing needs is contained in a chapter summarizing the finding of Dr. John M. Gries dealing with the whole subject of construction which he refers to as the "Balance wheel of industry."

Mr. Hunt points out in his "An Audit of America," that though construction in recent years has reached an annual value of \$7,000,000,000, that sum is conservative in relation to the national income and savings when compared with the pre-war figures.

Increased Population

"The annual increase in population," writes Mr. Hunt, "has become much more nearly stabilized, and we are as a people now require an annual addition of 400,000 homes as well as other structures. The net loss of the farm population to cities and towns has resulted in an unusual demand for urban dwellings; the growth in per capita income and savings has had its effect, as well as the obsolescence of existing structures; and the supply of investment funds has greatly increased and until 1929 there was a generally lower trend of interest rates. Steady progress has also been made toward systematizing the nation's building program and toward a national pooling of part of the funds."

Analyzing the building problem that arose during the post-war era, Mr. Hunt asserts that general business conditions have exerted a marked influence on the amount of new building undertaken. This fell off strikingly in 1924 and again in 1927. Mr. Hunt notes that the abundant credits available for construction have not resulted in an inflationary building boom frequently the precursor to depression. Only once, he observes, in the Spring of 1923, new construction

was being projected so rapidly that wholesale prices of building materials began to mount. Mr. Hunt recalls that in March of that year Mr. Hoover, then Secretary of Commerce, in reply to the President, wrote suggesting that Federal building be deferred for a time.

Mr. Hunt also points out that in April 1923 the report of the Committee on Business Cycles and Unemployment of the President's Conference on Unemployment advised the deferment of public works and the construction work of large public service corporations to less active periods, and the problem was then widely discussed. The building problem was safely adjusted to the capacity of the industry, and building costs have never been so high, Mr. Hunt remarks.

More Planning

In the case of residential and commercial buildings, Mr. Hunt asserts, there is much more planning of a basic sort than before the war. City planning and zoning, has advanced, and he sees the development of the national "Federal Aid" highway system and the interconnection of electric power systems as further evidences of construction broadly planned.

Other new trends in the field of construction mentioned by Mr. Hunt are the great savings effected through careful analysis of strains and stresses, the wider use of specifications and better inspection, in increased use of non-corrosive materials, the greater utilization of labor-saving machinery and a more general rental of construction machinery and equipment which has tended to reduce overhead carrying costs and transportation charges.

"The total construction of industrial buildings," writes Mr. Hunt, "is still liable to considerable fluctuations, but since 1922 there have been no such wide swings as during the three preceding years. More general reliance upon electric power received from central stations makes for stability in the construction of generating facilities."

"Building structures represent on the whole a decreasing proportion of the total investments in industrial plants, with a growing proportion in

machinery and equipment. Improvements in manufacturing processes have frequently diminished the amount of space required, and dependable railway transportation has reduced the amount of space needed for the storage of raw materials.

"Less time is required for construction without excessive payment for speed. One case is reported of a firm of engineers who built a plant of 20 stories in 280 calendar days. Most of the structures were four stories high, of reinforced concrete, and the total cost about \$7,500,000.

Mr. Hunt comments on the post-war construction program of public works and utilities as not only notable for their magnitude but for the marked developments which they have shown in planning, financing and technique. "Instead of a spectacular reaching out into undeveloped territories, such as characterized the decades of railway building during the latter part of the nineteenth century," he continues, "these have been devoted to filling in and extending facilities for transport and communication within areas already inhabited and beyond the pioneering stage. From the point of view of business stability this charge in the character of construction is important because it is planned in order to meet needs which exist or can be readily predicted, rather than needs which must be guessed at."

Road Building

Regarding road building, Mr. Hunt states:

"Not long before the war we were generally considered backward with respect to improved highways. The development of one of the finest systems of improved roads in the world has been effected mainly since the war. More than \$1,000,000,000 annually is now spent for the construction and maintenance of rural roads, and \$400,000,000 or more is spent by cities for street improvement and maintenance. The Federal Bureau of Public Works in co-operation with State authorities has worked out a well co-ordinated network of 185,772 miles of principal roads, about one-third of which has been improved. There remains much room for better planning of highways improvements, especially in the way of cooperation between the authorities in adjoining counties and between those of cities and those of neighboring rural territory."

The survey on which the report of the Committee on Recent Economic Changes is based was conducted under the auspices of the National Bureau of Economic Research. The survey covers a wide range of economic activity pertaining particularly to the period from 1922 to 1929. Mr. Hunt has written "An Audit of America" from the standpoint of the present economic situation.

TIE VOTE KEEPS BUILDING BRICK OFF FREE LIST

The Senate on Feb. 10 declined by a tie vote to return building brick to the free list during a session on the tariff bill.

The vote on brick, the most important of the day, came on a proposal of Senator Barkley, Democrat, Kentucky, to eliminate the proposed tariff of \$1.25 per 1000 on plain and \$1.50 on glazed brick. A tie, 36 to 36, resulted and the amendment was rejected.

Unemployment conditions were brought to the fore when Senator Copeland, Democrat, New York, arguing for protection for the brick industry, asserted more workers would be thrown out of employment in the Hudson river district if a tariff were denied the brick producers.

CONDITIONS INDICATE RESUMPTION OF NORMAL ACTIVITY IN BUILDING

By Nicholas Roberts, Pres
Conditions involving the building and construction industry are, at the opening of 1930, strongly indicative of a resumption of normal activity. Demand for housing and floor space exists sufficient to justify rather optimistic expectations. Other factors point toward the coming year as a period beginning an upswing in this industry, strong enough to have a marked effect on general business conditions and national prosperity.

An enlarged program in the building industry would go far in the psychology of sustaining confidence. It would absorb much of the industrial slack and distribute enormous sums of money through its wide spread ramifications. Its influence is felt throughout the country and directly or indirectly touches every phase of society. It is a basic industry, one of the fundamental indices by which one may appraise existing or prospective national business. What, then, may we expect during 1930 from this industry?

Decline Cited

We have seen a steady decline of building activity during the past four years. This downward trend is still in progress and will continue into the new year for several months, perhaps into the early summer. But this apparently distressing feature is in reality an assurance of a generous measure of forthcoming prosperity in construction. What really has been going on since the end of 1925 has been the creation of a basis for a great new era of building activity to begin, in my opinion, in 1930.

Let us look back a few years to realize the significance of the situation of today. Following the post-war housing shortage, we had in 1922, 1924 and 1925, an era of unprecedented building. Those were the days of the so-called "building boom." The peak was reached in 1925 and since then there has been a steady decline. The year 1926 ended with a falling off of about 5% from the previous year's activities. In 1927 the volume declined 9% more while in 1928 the loss was 3%. These declines are based on the delicate index of building permits issued in the rank and file of cities and towns in every section of the United States. They apply to buildings only and do not include engineering contracts. From data now available, it is apparent that 1929 will show a falling off of 10% or perhaps a little more. For the last half of the year the loss has been 20%.

Stock Market Speculation

For three or four years prior to 1925 a very heavy building program was in progress throughout the country. During 1926 and 1927 the industry was in a natural state of reaction. With the gradual passing of this phase of the situation came the era of intense stock market speculation by the public. Funds were diverted into channels of investment other than building. Money rates increased. It became harder and harder for the small builder to obtain mortgage money. Many individuals were placing their savings and earnings in the stock market where otherwise they would have used these funds in home building. Speculative building was practically at a stand-still.

The beginning of easier money conditions early in the fall of 1929 had no opportunity to exert a stimulating effect on building. The stock market crash came before such a natural development could eventuate. What the impact of the Wall Street debacle meant in terms of deferred projects was told in the story of November

building permits which for that month, throughout the country as a whole, suffered a loss of 29% compared with November 1928 and in New York City reached the lowest point since 1921.

One must anticipate that this effect in modified form must carry through a considerable part of the winter. The losses which have been sustained by individuals, the depletion of loanable funds by savings banks and building and loan associations, the slowing

down of the business machine of the country, the withdrawal of savings from banks for the protection of margin accounts and kindred purposes, are among the factors that will continue for some little time to disarrange the plans of private building. Meanwhile, however, there are tremendous powerful forces at work which, barring unforeseen events, can not fail to bring about a complete reversal of form.

We may comfort ourselves in the belief that an area of building prosperity comparable perhaps to any we have ever seen is awaiting us somewhere just around the corner. The four year break spell in the building industry has exerted a sound and impressive readjustment. Not in years has the general building situation throughout the country been on as sound a foundation from the standpoint of supply and demand as now exists. Cities which four or five years ago were overbuilt have, by reason of this letup, reached a normal situation with vacancies absorbed and improved real estate on a substantial basis.

From now on in those places building should proceed normally in keeping with population growth, expanding industry and improved standards of living by the public. Recent surveys have shown that there is a present need for accelerated building in a large group of cities and towns. There are, of course, some cities where a surplus still exists and it will take further time for these to be absorbed.

In building we are dealing with a fundamental. No element of life is more necessary than shelter and although some superficial cause may arrest progress, as has been the case in the last two years, the inexorable law of supply and demand will eventually exert its corrective influence.

Easy Money

The industry has other great factors of strength—one is easy money. It has invariably been the case that the beginning of an area of cheap money has been followed after a brief interval with a great upswing in construction and it is probable that history in this respect will repeat itself. Funds which have been tied up in speculation have been released for other purposes and the building logically will claim an adequate portion of this money. The mortgage market will take on new life, while a corresponding improvement will ensue in the bond market. Thus, in a word, there will be ample capital available at reasonable rates to finance the country's building requirements.

The business interests of the country are making united effort toward maintenance of prosperity and this influence will soon be felt. The business genius of this powerful nation is bending its efforts to prevent any appreciable slump. Both corporate and individual operations will be pushed ahead with all possible speed. It would not be good judgment nor would it serve a useful purpose to put forward any building project unless conditions should warrant such an undertaking from a practical standpoint but throughout the country there are millions of

dollars in building projects than can to good purpose be pushed along at this time. Hence through these efforts there will be a goodly amount of construction added to the normal volume.

In attempting thus to analyze the present status of this great industry we find an anomaly. The depression which now seems distressing is but strengthening the foundations on which a new era of normal activity seems destined soon to rise. Such forces as are exerting a retarding effect on building and construction are transitory. They are the aftermath of a speculative era that has passed into history. The energizing influences will far outlast the others. They belong to an era that lies immediately ahead of us. The turning point cannot long be deferred and with it will come a great period of building prosperity which should be of sufficient magnitude to make itself felt in every phase of American business.

NEW STANDARDIZED DRIVE FOR ELEVATORS ANNOUNCED

A new standardized drive for elevators has just been announced by H. W. Caldwell & Son Company of Chicago. This drive is compact, efficient and positively quiet at all speeds. It is built to operate on centrifugal discharge, perfect discharge or continuous bucket elevators requiring 3 to 15 horsepower. The entire line is standardized and carried in stock.

The first reduction of the drive is made up of a ruggedly built fully enclosed worm gear speed reducer to which a motor is coupled. The motor and the worm reducer are accurately aligned on a welded steel base, making a compact assembly easily supported on the elevator casing or platform.

The second reduction in speed is made by a Link-Belt roller chain drive, which was selected because it furnishes a maximum of strength, durability, efficiency and quietness of operation, combined with a minimum of weight and of space required. It also acts as a flexible connection between the reducer shaft and head shaft.

A new book, No. 1086, just published, is devoted to the construction of the unit and illustrates installations. This book will be sent upon request.

EXCLUDING APARTMENT HOUSE UNDER ZONING LAW UPHELD

The application of a zoning ordinance of Toledo, Ohio, to exclude a three-story apartment house in a district reserved for churches, schools and private residences has been held by the Circuit Court of Appeals for the Sixth Circuit not an arbitrary or unreasonable restriction or a violation of the State or Federal constitutions.

In its opinion the court explains that the applicant filed a bill to restrain the enforcement of the ordinance, was the owner of property in a residential district, and applied for a permit to construct a three-story apartment building containing apartments for 18 families of four and five rooms each. The permits were refused in accordance with the ordinance and the bill was then brought.

"In passing upon ordinances of this kind," the court declared, "the courts have been unwilling to substitute their judgment for that of the legislative body charged with the duty of determining the necessity and character of the regulations; but it has been understood, of course, that a city may not act arbitrarily and unreasonably, and that the ordinance may be valid in its general aspects and at the same time be 'clearly arbitrary and unreasonable' to a particular state of facts."

SEARS-ROEBUCK TO MARKET HOMES ON PART-PAYMENT PLAN

A new and ambitious plan for building homes on part-payments has just been put to work by Sears, Roebuck & Company. Construction will be handled by 48 offices of the new building division in strategic cities located along the Atlantic Seaboard and in the Middle West.

"For many years this concern has been active in home-building but the new plan increases the percentage loaned and extends the time for payment," says The Business Week, commenting upon the new service. "Formerly 60% of the cost was carried by the company; the loan had to be wiped out in 5 years. Now Sears, Roebuck & Company puts in up to \$3 for every \$1 by the home builder. Payments, which start 4 months after the transaction is begun, can be extended over 15 years. As security for the 75% loan the company takes a mortgage on the house.

"The home-builder pays 6% for the money advanced plus a definite amount for retiring the loan. Total required per month is \$8.56 per \$1000. No special financing company has been created to take care of this paper. The company which did a \$40,000,000 business last year feels competent to carry the burden without strain. Experience shows that people are interested to pay off debts on their homes.

"Sears, Roebuck will be in friendly and constant touch with these customers for 15 years (if they take the limit of time). New homes are the greatest possible stimulant to buying. Here the company has a tremendous potential market for the 35,000 articles so enticingly listed in its famous catalogue.

"Before this new service was inaugurated the company had nothing to do with the labor used in putting up houses from materials it sold. Now it will not only sell the materials but will supervise through experts the entire construction. This will be done by hiring the labor or through contractors, according to local conditions.

"Sears, Roebuck does not sell sectional buildings (except garages). What it sells is standardized joists, studding, windows, doors, etc. These are made into houses on the owner's lot. Parts are cut by the thousand in plants with power machines. In addition to the saving in labor, there is an 18% economy in lumber. Total savings claimed in 200 houses built experimentally under the new plan run from 10% to 23%.

"The company has 100 designs from which one may select a home without having to pay for the plans. Builders may have their own plans prepared and may depart from the standardized parts but the cost is higher."

REINFORCED CONCRETE CONSTRUCTION

(By Chas. M. Gunn of Gunn, Carle and Co., San Francisco)

The following article by Mr. Gunn was prepared at the request of the California State Chamber of Commerce in an attempt to round-up all phases in the development of the Iron and Steel Industry in California. Additional articles from leaders in other fields of the industry will be published in these columns from time to time.—EDITOR.

"It is said by archeologists that in making searches in Rome, it was discovered that the Romans used iron reinforcing in a bridge over the Tiber as far back as 920 B. C.; but from all that we can learn historically, it would appear that this method of construction remained a lost art until about the end of the 19th or beginning of the 20th century.

Mr. Harvey Wiley Corbett, one of the leading architects of New York and London, who is Chairman of the Architectural Commission of the World's Fair to be held in Chicago in 1933, said when addressing the Autumn Convention of the Concrete Reinforcing Steel Institute, "Your whole industry when you come to think of it is hardly thirty years old."

On the Pacific Coast, while there were some buildings built of reinforced concrete, they were comparatively few and rather small until after the great disaster in San Francisco in 1906. In the rebuilding of the city this type of construction began to find favor and the type and sizes of the buildings increased until today it is a regular method of construction for 150 feet high, say 12 or 13 stories, in many cities on the Pacific Coast, and in the East it is not uncommon for buildings to be built of reinforced concrete construction to a height of ap-

proximately 300 feet or say 26 stories.

Being a comparatively new type of construction it was necessary that rules of design be developed. In this our structural engineers made tremendous progress so that we now have established rules and standards for columns, beams, floors and walls and (Continued on Page 2)

practically every type of construction, each having its definite ratio of steel to concrete, its proper placing of bars to take the strain of "live," or moving loads, to withstand the pressure of the wind which tall buildings are subjected to, and also designed with that combination of rigidity and flexibility necessary to absorb the shock of earthquakes.

The combined studies of the designing engineers and the Selenological Society have been so thorough that the fire underwriters have recognized the merits of reinforced concrete construction for Pacific Coast conditions, by a downward revision in rates.

Great strides have also been made in the methods of production of the reinforcing material itself. In the early beginnings of concrete reinforcement the material used was a hard grade steel bar made by the heating and rerolling of old railroad rail. After rolling, this was twisted so as to hold well in the concrete.

The next step in production was the melting of the old rails in the open hearth furnace, the rolling of new steel billets into square and round bars, the former being twisted as in the rail practice.

Today, while the steel is still made by the open hearth process, the rolls are made with depressions in them so that the bar which results from the rolling has on its surface many de-

formities or corrugations for the purpose of holding in the concrete, but eliminating the operation of twisting.

With the progress of the art the use of reinforcing steel has not been confined to buildings. The uses have become so numerous that space prohibits listing more than a few items. However, it might be worth while to mention that most of our attractive highway bridges are of this type of construction. The great dams and power houses in the mountains of the West are largely of reinforced concrete construction. Pipe lines, sewers, outfalls, culverts, retaining walls, cement and grain elevator bins, the farmer's silos, and even his fence posts, are made of reinforced concrete. For the highway, too, where the road traverses marshy ground, the road bed is almost universally reinforced with steel.

It was the practice in the early stages of the game for the mill to furnish the contractor with a number of bars of different sizes which were laboriously cut to length and bent on the job, and put in place by the contractor, but as in every other industry marked improvements have been made in these methods, and now the bars are cut to length at the warehouse, they are bent to shape on machines and delivered to the building each piece ready for its proper place as shown by the engineer's drawings. This has brought about a rapidity of construction greater than any other method.

Probably no industry make its progress without having its trials and tribulations. In this Pacific Coast industry the most disturbing factor has been the dumping of foreign steel into our market of a quality and at prices lower than American methods and labor costs will permit, yet in justice it should be said that most of our builders are good Americans and Californians and generally prefer to purchase the product of our own mills which go to support the payrolls of our State.

While the engineers have developed the standard practice for the scientifically correct placing of steel in concrete, the manufacturers and dealers have at the same time been developing standards of quality and size. In conformity with the policy of economy of the Department of Commerce, Division of Simplified Practice, and also with the co-operation of the Concrete Reinforcing Steel Institute, the number of sizes carried in stock will shortly be reduced from 23 to 11, and the number of grades of steel reduced from 3 to 1. This will mean economy to all concerned and greater rapidity of service.

Most of these accomplishments concerning the development of the uses of reinforced concrete as well as the adoption of standards have been nurtured by the activities of the California State Chamber of Commerce and their annual conference of the Iron, Steel and Allied Industries has been a clearing house of great value to the steel industry of the state. That still further improvements in the art will be developed at the Del Monte Conference this month goes without saying.

During the month of January, 1930, the Los Angeles city building department issued 2091 permits with an estimated valuation of \$9,115,846, as compared with 2559 permits with an estimated valuation of \$7,514,868 for the same month last year. During December, 1929, the department issued 2201 permits with an estimated valuation of \$3,992,450.

 tive.** Dallas, Texas. Party interested
 in representing manufacturer not al-
 ready represented in connection with
 the construction industry in north-
 east Texas, including Dallas and Fort
 Worth.

31

LANDLORD PERMITTED TO USE SUBMETER IN APARTMENTS

The right of electrical power com-
 panies to refuse to furnish electricity
 to apartment house owners has been
 denied by the Supreme Court of the
 District of Columbia where such re-
 fusal was made because the owners
 would not agree to charge tenants for
 electricity transmitted to them by the
 owners on the basis of the amount
 they used as ascertained by a meter,
 or upon engagements not to resell the
 electricity to the tenants.

Statutory provisions show the plain
 legislative intent to allow apartment
 house owners to receive electricity
 from the power company and trans-
 mit it for the use of tenants and to
 charge the tenants therefor. The
 court, it added, was unable to see
 any distinction between ascertaining
 the charge by the use of a meter so
 that each tenant might be charged
 for what he actually used, or being
 charged a lump sum by way of in-
 creased rent or without reference to
 the amount used by the particular
 tenant.

The decision was made in the case
 of Myron P. Lewis, et al. vs. the Po-
 tomas Electric Power Company.

Factory representation in the Pacific
 Northwest district by the Detroit
 Steel Products Company is announced
 with the opening of offices at Seattle
 with O. C. Hendry, formerly of the
 Oakland, Calif., office in charge.
 Hendry was in business in Seattle in
 1922, going to Oakland branch of the
 Detroit Steel Products Co. with its
 opening there in 1923.

Engineering News Section

BRIDGES

SONORA, Tuolumne Co., Cal.—Until March 4, bids will be received by county supervisors to construct reinforced concrete, slab type bridge over Curtis creek in town of Soulsbyville; one span, 22-ft. wide. Plans obtainable from County Surveyor Robert Thom at Sonora.

PLACERVILLE, El Dorado Co., Cal.—County supervisors, Arthur J. Koltzke, county clerk, reject bids received Feb. 4 to construct a reinforced concrete bridge over Weber Creek at Darlington and a concrete slab bridge over North Weber Creek on the Pleasant Valley road. Bids were: Hector Williamson, Placerville, \$3,000; E. M. Noble, Marysville, \$4,394. New bids will be considered March 4, 2:30 P. M. Plans obtainable from Henry Lahiff, county surveyor, at Placerville.

FRESNO, Fresno Co., Calif.—A. M. Jensen, county surveyor, preparing plans to repair piers of Friant bridge over the San Joaquin river, the cost of the work to be borne equally by Fresno and Madera counties.

OROVILLE, Butte Co., Cal.—Until March 3, 2 P. M., bids will be rec. by C. F. Belding, county clerk, to construct concrete bridge over Clear creek on Clark grade and for timber decking a bridge over a slough near the Lewis place. Total estimated cost \$2,400. Plans obtainable from J. A. Bumgarner, county surveyor.

STOCKTON, San Joaquin Co., Cal.—Until February 24, 11 A. M., bids will be received by Eugene D. Graham, County Clerk, to construct Durham Ferry Bridge over San Joaquin river in Road District No. 3. Certified check 10% payable to Chairman of Board of Supervisors required with bid. Plans obtainable from Julius Manthey, county surveyor.

FRESNO, Fresno Co., Cal.—Southern Pacific Railroad Co. has signed agreement with Fresno county supervisors permitting the construction of the Biola Subway on the Whites Bridge road under the Southern Pacific tracks. The cost is estimated at \$60,000. The railroad will bear the cost of construction, the county to maintain the road in connection therewith. A. M. Jensen is county surveyor.

RICHMOND, Contra Costa Co., Cal.—U. S. War Department has granted a permit to the American Toll Bridge Co., 625 Market St., San Francisco, to construct a bridge from Richmond, Contra Costa County to San Quentin, Marin county to replace ferry service between those two points. Plans provide for a fixed structure from a point 2000 ft. south of Point San Pablo. In Contra Costa county, to a point about half a mile east of the mouth of San Rafael creek in Marin county, near San Rafael. The bridge would pass just south of Brothers Islands and just north of Marin Islands. A channel west of Brothers Islands 300 ft. wide, with a vertical clearance of more than 175 ft., will be provided; and another channel, bet. Brothers Islands and Point San Pablo, with a vertical clearance of 200 ft. and horizontal clearance of 1000 ft. will allow passage be-

neath the bridge of the largest ships entering San Francisco bay. The war department's permit was granted to Oscar H. Klatt, of San Francisco, president of the American Toll Bridge Co. Plans for the structure were prepared by Chas. Derleth, dean of engineering at the University of California, Berkeley.

LONG BEACH, Cal.—Structural Engineer G. W. Firth has completed plans for a concrete double viaduct at Hill St. and Orange Ave.; will be of the concrete wall type, with earth fill and steel work over the tracks, with concrete decks, and approaches 450 ft. in length. Est. cost \$140,000. The cost of the viaduct will be shared by the Pacific Electric Ry., the county, Signal Hill, and Long Beach.

SAN JOAQUIN COUNTY, Cal.—Until March 12, 2 P. M., bids will be rec. by State Highway Commission to construct four reinforced concrete girder bridges between Lodi and Stockton; one across Calaveras river, consisting of three 34-ft. spans; one across Mosher creek, consisting of three 27-ft. spans; one across Bear creek, consisting of three 30-ft. spans and one across Live Oak creek, consisting of two 30-ft. spans. C. H. Purcell, state highway engineer.

See call for bids under official proposal section in this issue.

DREDGING, HARBOR WORKS & EXCAVATIONS

BAKERSFIELD, Kern Co., Calif.—Until February 19, 2 P. M., bids will be received by H. I. Tupman, secretary, Kern River District of Kern Co., Bank of Italy Bldg., Bakersfield, for reinforcement of levee on E side of Chester Ave. and N side of Kern river. Certified check or bidder's bond of 10% payable to district required with bid. Plans obtainable from secretary.

CORONADO, Los Angeles Co., Cal.—E. A. Ingham, superintendent of operations, has announced that the city planning commission will at its meeting February 10, consider plans for extensive dredging operations in Glorietta Bay. The work proposed consists of enlarging a present turning area of 200x200 feet to 1000x2000 feet and construction of a channel 500 ft. wide, 10 ft. deep to mean lower low water, and about one mile in length.

IRRIGATION PROJECTS

OROVILLE, Butte Co., Calif.—Financial arrangements have been completed whereby the Oroville-Wyandotte Irrigation District will complete its main lateral system at a cost of approx. \$25,000. Work is to be commenced at once.

FRESNO, Fresno Co., Cal.—I. Teilmann, Kearny and Teilmann Sts., Fresno, has submitted preliminary plans to Fresno County Farm Bureau for a concrete lined canal to bring surplus water of the Sacramento river into the San Joaquin Valley, using only one pumping plant and delivering water as far south as Shafter in Kern County. The proposed plans are a substitute for the use of the channel of the San Joaquin river as proposed by the State Department of Engineering. The Teilmann proposal involves the construction of a canal 90 miles long. Booster wheels would be utilized to make 5-ft. lifts.

CALIFORNIA—Following applications were filed during the month of January, 1930, with the State Department of Public Works, Division of Water Resources, Sacramento, for permits to appropriate water:

Permit 3421, Application 6255 (San Diego Co.) issued to Palomar Estates Ltd., Long Beach, for 1.25 c. f. s. from Nigger Creek for domestic use. Est. cost \$10,000.

Permit 3422, App. 6256 (San Diego Co.) issued to Palomar Estates Ltd., Long Beach, for 3.62 c. f. s. from Puma Creek for irrigation use on 917.5 acres. Est. cost \$115,000.

Permit 3423, App. 6427 (Siskiyou Co.) issued to Frank L. Cunningham, Happy Camp, for 3 c. f. s. from Oak Flat Creek, for power purposes. Est. cost \$5000.

Permit 3424, App. 6342 (Sierra Co.) issued to Marie E. Phelan, Sierra City, for 3 c. f. s. from Slug Canyon for mining use. Est. cost \$1000.

Permit 3425, App. 6452 (Ventura Co.) issued to Reginaldo Ruiz, Ojai, Calif., for 300 gallons per day from Two Unnamed Springs for domestic use. cost \$1000.

Permit 3426, App. 6375 (Los Angeles Co.) issued to H. H. Townsend, Beverly Hills, Calif., for 0.001 c. f. s. from Upright Spring for irrigation use on 60 acres.

Permit 3427, App. 6244 (El Dorado town, Calif., for 3 cubic feet per second from Little Otter Creek for mining use. Est. cost \$1000.

Permit 3428, App. 6466 (Inyo Co.) issued to American Potash & Chemical Corp., Trona, Calif., for 0.0544 c. f. s. from Christmas Spring for industrial and domestic use. Est. cost, \$4840.

Permit 3429, App. 6126 (Del Norte Co.) issued to Aller Placer Mines Taklima, Oregon, for 3 c. f. s. from East Fork of East Fork of Illinois River, for placer mining. Est. cost \$6000.

Permit 3430, App. 6292 (Siskiyou Co.) issued to Lomgroy Mining & Milling Co., Gottville, Calif., for 0.75 c. f. s. from Lumgroy Creek for mining and domestic purposes. Est. cost, \$500.

Permit 3431, App. 6464 (Mendocino Co.) issued to Thomas S. Van Vleet,

Turlock, Calif., for 0.45 c. f. s. from West Branch Russian River, for use for irrigation on 36.44 acres. Est. cost \$1000.

Permit 3432, App. 6379 (San Joaquin Co.) issued to Charley Jensen, Manteca, Calif., for 3.49 c. f. s. from unnamed channel for irrigation use on 279.3 acres. Est. cost \$4900.

Permit 3433, App. 6172 (Humboldt Co.) issued to Trinity Loop Mining Co., San Francisco, for 20 c. f. s. from Cedar Creek for mining use. Est. cost, \$3000.

Permit 3134, App. 6192 (Trinity Co.) issued to Trinity Loop Mining Co., San Francisco, for 10 c. f. s. from Hawkins Creek, for mining use. Est. cost \$10,000.

Permit 2435, App. 6208 (Humboldt Co.) issued to Trinity Loop Mining Co., San Francisco, for 10 c. f. s. from Grove Prairie Creek, for mining use. Est. cost \$10,000.

Permit 3436, App. 6326 (Humboldt Co.) issued to Trinity Loop Mining Co., San Francisco, for 15 c. f. s. from Horse Range Creek for mining use. Est. cost \$3000.

CALIFORNIA.—Following permits were granted during the month of January, 1930, by the State Department of Public Works, Division of Water Rights, authorizing the appropriation of waters:

Application 6521 (Ventura Co.) Geo. D. Hantgin, P. K. Hantzis and E. R. Schroff, care Sheridan, Orr, Drapeau & Gardner, attys., 1st National Bank & Gardner, attys., 1st National Bank unnamed spring, tributary to San Buenaventura river, for irrigation and domestic purposes. Est. cost \$2,500.

App. 6422 (San Joaquin Co.) Linden Irrigation District, care A. L. Cowell, Bank of America Bldg., Stockton, for 100,000 ac. ft. per annum from Calaveras river tributary to San Joaquin river, for irrigation and domestic purposes.

App. 6523 (Lassen Co.) Antone Avila, Bieber, Calif., for 4,200 ac. ft. per annum from Juniper river tributary to Pit river for irrigation purposes. Est. cost \$10,000.

App. 6524 (Humboldt Co.) F. A. Leach and F. D. Smith, Fortuna, Cal., for 0.54 c.f.s. from Zel river tributary to Pacific Ocean, for irrigation purposes. Est. cost \$200.

App. 6525 (Riverside Co.) F. Wm. Seggie, Star Route, Riverside, Calif., for 7100 g.p.d. from Butterfly Canyon Spring (underground water also to be developed) tributary to San Jacinto river, for domestic and irrigation purposes. Est. cost \$200.

App. 6526 (San Joaquin Co.) M. C. and C. A. Johnson, Rt. 1, Box 162, Escalon, San Joaquin Co., for 2 c.f.s. from Lone Tree Creek tributary to San Joaquin river, for agricultural purposes. Est. cost \$2,000.

App. 6527 (Sutter Co.) T. J. Cummins Ranch Co., care L. R. Bates, Box 148, Sacramento, for 5.98 c.f.s. from Sacramento river tributary to Suieun Bay, for irrigation purposes. Est. cost \$7,000.

App. 6528 (Mono Co.) N. M. Otis, 200 Juniper Bldg., Santa Monica, Calif.,

for 300 g.p.d. from unnamed spring, tributary to Mammoth creek and Owens river, for domestic purposes. Est. cost \$75.

App. 6529 (Placer Co.) Nevada Irrigation District, care Wm. Durbow, Mgr., Grass Valley, Calif., for 10 c.f.s. from Auburn Ravine.

App. 6530 (San Joaquin Co.) Smith-Riddell Co., Inc., Lodi, Calif., for 11.8 c.f.s. from Upland canal tributary to Sycamore slough. Est. cost \$13,500.

App. 6531 (Humboldt Co.) E. Lee Wright, 435 Buchanan St., San Francisco, Calif., 2 c.f.s. from Cinder Cap spring tributary to Buluff Creek, for power purposes. Est. cost \$1,500.

App. 6532 (Inyo Co.) H. W. White, Independence, Calif., for 1 g.p.m. from unnamed spring, for mining and domestic purposes. Est. cost \$10.

App. 6533 (Sutter Co.) A. M. Donahoe by A. H. Lydon, mgr. and agent, care Lawrence Schilling, Yuba City, for 1 c.f.s. from Feather river tributary to Sacramento river for irrigation purposes. Est. cost \$2,500.

App. 6534 (Sierra Co.) Washoe Co. Water Conservation Dist., care King & Malone, engineers and contractors, Reno, Nev., for 50,000 ac. ft. per annum from Little Truckee river tributary to Truckee river, for irrigation and domestic purposes.

App. 6536 (Lake Co.) Martin Judge Jr. & Co., Crocker 1st National Bank, San Francisco, for 175,000 ac. ft. per annum from North Fork of Cache Creek tributary to Cache Creek, for irrigation purposes. Est. cost \$1,000,000.

App. 6535 (Lake Co.) Martin Judge Jr. & Co., Crocker 1st National Bank, San Francisco, for 175,000 ac. ft. per annum from North Fork of Cache Creek tributary to Cache Creek, for industrial and domestic purposes. Est. cost \$3,000,000.

App. 6537 (Mono Co.) U. S. Inyo National Forest, Dept. of Agriculture, San Francisco, for 1000 g.p.d. from creek between Lake Mamie and Twin lakes, tributary to Mammoth creek and Owens river, for domestic purposes. Est. cost \$152.

App. 6538 (Mono Co.) U. S. Inyo National Forest, Dept. of Agriculture, San Francisco, for 8200 g.p.d. from Coldwater creek tributary to Mammoth creek and Owens river, for domestic purposes. Est. cost \$460.

App. 6539 (San Joaquin Co.) H. R. Russell, 426 Hackberry St., Modesto, for 3 c.f.s. from drainage through natural depression & drainage of waste ditch of Oakdale Irrigation District, tributary to Little John Creek, for irrigation purposes.

App. 6540 (Placer Co.) Mrs. Eva Harness and R. Langley, Loomis, Cal., for 0.26 c.f.s. from Secret Ravine tributary to Antelope Creek. Est. cost \$850.

App. 6541 (Tuolumne Co.) J. Brown, Chinese Camp, Calif., for 0.025 c.f.s. from Smarts gulch tributary to Woods creek and Tuolumne river. Est. cost \$555.

App. 6542 (Placer and Nevada Coas.) Bear River Water and Power Co., % J. L. Rolins, Colfax, Cal., for 110,020 ac. ft. per annum from Bear river and its tributaries, tributary to Feath-

er river, for power purposes. Est. cost \$2,500,000.

App. 6543 (Yuba Co.) W. J. Sanford, care Rich & Wels, attys., Hart Bldg., Marysville, for 1 c.f.s. from Dry creek tributary to Bear river, for irrigation and stock watering purposes. Est. cost \$3,500.

App. 6544 (Mendocino Co.) R. B. Flinn, care T. W. Firby, 827 Mills Bldg., San Francisco, for 0.025 c.f.s. from unnamed creek, tributary to Eel river for domestic purposes. Est. cost \$450.

App. 6545 (Tuolumne and Alpine Coas.) Emma Rose and Hobart Estates Co., operating as Utica Mining Co., care A. C. Wilson, 1508 Balfour Bldg., San Francisco, for 10,800 ac. ft. per annum from Highland Creek, tributary to N Fork of Stanislaus river, for power purposes.

App. 6546 (Yolo Co.) Karl Brehme, 1202 Hobart Bldg., San Francisco, for 200 c. f. s. and 200,000 ac. ft. per annum from Putah-Pope-Capell-Educera creeks tributary to Sacramento river.

STREET LIGHTING SYSTEMS

TRACY, San Joaquin Co., Calif.—City council declares intention (131) to install ornamental street lighting system, comprising 63 single light standards, together with underground system, in 11th St. bet. west boundary of West Park subdivision and East St. 1911 Act. Bond Act 1915. Hearing Feb. 25. George L. Frierichs, city clerk. E. T. A. Bartlett, city eng.

POMONA, Los Angeles Co., Calif.—City Engineer F. C. Froehde preparing plans for an ornamental lighting system in W 2nd St. bet. Garey Ave. and Hamilton Blvd.

SAN CLEMENTE, Los Angeles Co., Cal.—Until 7:30 P. M., March 5, bids will be received by the city council for 120 lighting poles and lighting units, the design to be furnished by the bidder. This is in connection with a 2-mile paving project on which bids are to be taken later. From these bids the city will select the design and secure a guaranteed price. The successful bidder will be required to sign a license agreement. W. A. Ayer, city engineer.

SAN FRANCISCO.—Bureau of Engineering, Department of Public Wks, 3rd floor, City Hall, completes specifications to install ornamental street lighting system in Dolores St. bet. Market and 21st Sts.; estimated cost \$18,500. Project involves: 46 ornamental reinforced granite lighting standards; 92 lighting units complete, sockets, socket supports and globe holders; 92 6,000 lumen 20 amp. Mazda street series lamps; 46 6.6 amp. to 20 amp. series transformers; 46 concrete foundations for standards; 1,200 ft. 2½-in. black iron pipe conduit; 9,400 5,000 V. Single conductor No. 8 A. W. R. and L. C. armored cable; 600 volt single conductor No. 8 A. W. R. G. and L. C. stranded conductor. M. M. O'Shaughnessy, city engineer.

FRESNO, Fresno Co., Calif.—City Electrical Engineer George Bowman preparing plans for electrolier system in Merced St. bet. L and Divisadero St. and R St. bet. Merced and Divisadero Sts., a distance of 7 blocks; est. cost, \$15,000.

MACHINERY AND EQUIPMENT

LOS ANGELES, Cal.—Flisher-Ross-MacDonald-Kahn, Inc., awarded contract by Municipal Water and Power Bureau at \$54,000 to furnish two used model B "Bucyrus" straight electric shovels of 2-yd. capacity; Adv. 1231.

ALAMEDA, Alameda Co., Cal.—City Council will call election after May 1 to vote on the proposal to establish a municipal bus system to operate in various sections of the city.

SAN ANSELMO, Marin Co., Cal.—Seagrave Co. at \$9000 awarded contract by town trustees to furnish 600-gal. pumper engine for Fire Dept.

DELANO, Kern Co., Calif.—Until March 3, 7:30 P. M., bids will be rec. by Scott G. Ladd, city clerk, to furnish motor truck for Municipal Water Dept. Alternative bids will be considered on a half-ton, one-ton and one and one-half ton truck or "pickup" complete. Further information obtainable from clerk.

ROSEVILLE, Placer Co., Cal.—Until March 4, bids will be received by county supervisors to furnish and deliver a motor grader for use on roads in Roseville-Lincoln District. Specifications obtainable from county clerk.

MADERA, Madera Co., Cal.—Until March 4, 10 A. M., bids will be rec. by L. W. Cooper, county clerk, to furnish f.o.b. Madera, three new fire truck chassis and equipment. Specifications obtainable from clerk.

SACRAMENTO, Cal.—Until Feb. 24, 5 P. M., bids will be received by Chas. C. Hughes, secretary, Board of Education, to furnish and deliver f.o.b. Sacramento, manual and vocational training equipment for School Departments. Certified check 10% payable to Board of Education required with bid. Spec. obtainable from Business Manager, Board of Education, Administration Bldg., 21st and L Sts., Sacramento.

OAKLAND, Calif.—City Port Commission rejects lone bid of Pacific Coast Engineering Co., Oakland, at \$8,498 for dredge hull and ladder pipe and new bids will be received Feb. 17, 4:30 P. M. Spec. obtainable from Port Commission, 424 Oakland Bank Bldg., Oakland.

SACRAMENTO, Cal.—See "Government Work and Supplies," this issue. Bids wanted for air driven caulking machine and air driven chipping hammer.

RAILROADS

SACRAMENTO, Calif.—Sacramento Northern Railroad, which has acquired the Sacramento Short Line and which now operates a through line of railroad from San Francisco and Oakland via Sacramento and Marysville to Colusa, Oroville and Chico, has an extensive program for improvements to road and equipment, as is indicated by the following schedule of principal items of its 1930 budget: Track improvements, \$460,000; additional track facilities, \$52,000; bridges and trestles, \$64,000; new equipment and improvement, \$103,000; station & other buildings, \$132,000; signals and safety devices, \$21,000.

STOCKTON, San Joaquin Co., Cal.—Tidewater Southern Railroad, operating from Stockton to Manteca, Escalon, Modesto, Turlock and Hilmar, will expend \$48,000 for rail renewal and ballasting; \$15,000 for other track improvements; \$1,700 for passing tracks; \$3,000 for bridges and \$5,000 for right of way fencing.

NEVADA STATE—Western Pacific Railroad, Mills Bldg., San Francisco, will expend in excess of \$1,000,000 in Nevada State during the current year. It is announced by G. I. Martin, general agent at Reno. Construction contemplated includes a \$47,000 brick

freight house at Reno and installation of a traveling crane. Bank widening and laying of heavier rails comprise the major items of expenditure. In the section bet. Winnemucca and Wells 110-lb. rail will be laid on 60 miles of track at a cost of \$612,000. Bank widening will be done on fifteen miles bet. Oroville and Las Plumas and on 137 miles bet. Reno Junction and Winnemucca in Nevada at an outlay of \$307,000, and on 93 miles bet. Wells, Nev., and Wendover, Utah, \$81,000. Rail will be renewed on 37 miles bet. Ellerbeck and Salt Lake City at a cost of \$398,000. Improvement of main line roadway and track comprises bank widening, ballasting and rail renewal. Ballasting of 47 miles of main line bet. Sacramento and Stockton, which was begun last fall, will be completed this spring at a cost of \$287,000. Ballasting will be done on 21 miles of track in the Feather River canyon at a cost of \$185,000, and also on 19 miles bet. Burnester and Delle, Utah, at a cost of \$104,000.

FIRE ALARM SYSTEMS

HILLSBOROUGH, San Mateo Co., Cal.—Town trustees will call election in April to vote bonds of \$25,000 to finance purchase of additional fire apparatus and equipment for the police department in addition to providing funds for additions to municipal structures.

SAN ANSELMO, Marin Co., Cal.—Gamewell Co. at \$6795 awarded contract by town trustees to construct extensions to fire alarm system.

FIRE EQUIPMENT

HUNTINGTON PARK, Los Angeles Co., Cal.—Until 8 P. M., Feb. 17, new bids will be received by the city council for furnishing a 1000-gallon capacity standard fire truck. All bids received January 20, were rejected.

LAKEPORT, Lake Co., Cal.—City trustees authorize Fire Chief T. V. Perron to purchase 400 ft. 2½-inch fire hose at cost of \$520, payable in installments.

MISCELLANEOUS SUPPLIES AND MATERIALS

SACRAMENTO, Cal.—Until Feb. 3, bids will be received by H. G. Denton, city clerk, to furnish city with fuel oil for the year 1930. Specifications on file in office of clerk.

ROSEVILLE, Placer Co., Cal.—City Clerk F. R. Chilton will ask bids at once to furnish city with gasoline and oil to be supplied for the year ending February 18, 1931. Further information obtainable from clerk.

RESERVOIRS AND DAMS

SAN DIEGO, Cal.—Plans and specifications for three important water projects have been presented to the city council by H. N. Savage, hydraulic engineer, with the recommendation that bids of the work be called for as soon as convenient. The three projects are as follows:

Raising the height of Morena dam and increasing capacity of the spillway. The estimated cost is \$70,000.

Enlargement of the Hodges dam spillway. The estimated cost is \$25,000.

Increasing capacity of the Lake Hodges-San Dieguito reservoir conduit. The estimated cost is \$20,000.

The Hodges spillway work was ordered by the state engineer as a safety precaution. It will be mainly rock removal and concrete replacement. The work on the conduit connecting Lake Hodges reservoir and San Dieguito reservoir is absolutely necessary, according to Savage, in order to take care of water needs next summer. This conduit originally constructed to carry 36 ft. a second but when put into actual operation was found to carry only 27 ft. a second. Repairs later further reduced the carrying capacity to 14 ft. a second.

GLENDALE, Los Angeles Co., Cal.—Orosel & Kitchen, 2143 Hyperion St., Los Angeles, submitted low bid to city council at \$35,540 to construct concrete reservoir in Brand Park, north of Mountain St. and west of Grand View Ave. extended. The proposed reservoir will have a capacity of 10,500,000 gallons, and be approximately 320x230 ft. by 30 ft. in length.

LAKEPORT, Lake Co., Cal.—City Engineer D. F. McIntire has submitted preliminary estimates to the city trustees for a new reservoir in connection with the water work system; reinforced concrete reservoir, 70 ft. dia. 12 ft. deep is contemplated; est. cost, \$2385 with concrete roof costing \$2000. Excavation work is estimated at \$600.

PIPE LINES, WELLS, ETC.

ROSEVILLE, Placer Co., Cal.—Engineer Raymond DeWitt, Chico, is preparing plans for Forest Oaks and Sierra Vista storm drain. Plans will be submitted to city council for approval shortly.

SANTA ROSA, Sonoma Co., Cal.—Pacific Gas & Electric Co. will extend gas line from Santa Rosa to Healdsburg, a distance of 16 miles, it is announced by W. W. Shuhaw, district manager for the company. It is planned to install a complete distributing system in Healdsburg, Windsor, Fulton and suburban areas. Approximately \$250,000 will be expended in the improvements.

LONG BEACH, Calif.—April 1 has been set as date for election in County Sanitation District No. 3 to vote on a \$3,400,000 bond issue for the construction of trunk lines and for the district's share in the outfall. This district includes Long Beach and Signal Hill.

ONTARIO, San Bernardino Co., Cal.—Until 8 P. M., Feb. 17, bids will be received by the city for digging a shaft, drilling a water well, setting casing, etc. Spec. on file at office of water superintendent. Cert. check or bond, 10%. D. B. Wynne, city clerk.

ONTARIO, San Bernardino Co., Cal.—Until 8 P. M., Feb. 17, bids will be received by the city to furnish double steel water well casing. Spec. on file at office of water superintendent. Cashier's check or bond, 10%. D. B. Wynne, city clerk.

SEWERS AND SEWAGE DISPOSAL PLANTS

MADERA, Madera Co., Calif.—City Engineer A. M. Acton making surveys for sewer facilities in the south section of the city not at present served, between the Southern Pacific main line tracks and the Madera Sugar Pine plant. Will involve approx. 15,000 feet of new sewer and would provide about 109 new connections.

CHICO, Butte Co., Calif.—Frank G. Veatch, state sanitary engineer, is conferring with city trustees regarding extension of city limits to include the Chapman and Chico Vecino suburbs, portions of which are badly in need of sanitation.

EL CAJON, San Diego Co., Cal.—W. D. Hall Co., El Cajon, was awarded contract by the city council at \$38,882 to construct a sewer system in the south side of Main St. through the city.

BAKERSFIELD, Kern Co., Cal.—Stroud Bros., Bakersfield, was awarded contract by city council at \$5865 to construct vitrified sewer system in rights-of-ways paralleling 30th St., 1 St., and certain alleys, involving 6-in., 8-in., 10-in., and 15-in. vitrified sewers, with manholes, wyes, etc. The system will be known as Sewer District No. 600. 1911 Act.

SANTA CLARA, Santa Clara Co., Cal.—Until February 17, 8 P. M., bids will be received by city council to construct storm sewers, manholes and catchbasins in various streets. Plans on file in office of clerk. Geo. Sullivan, city engineer.

LAS VEGAS, Nevad—Koebig & Koebig, engineers, Los Angeles, have

submitted estimated cost for a sewer system and sewage disposal plant; mains, \$126,536.40; disposal plant, \$59,000; engineering and supervision, \$15,885.28; advertising, etc., \$7,061.46. Taken under advisement.

WATER WORKS

BEVERLY HILLS, Los Angeles Co., Cal.—Until 8 P. M., Feb. 18, bids will be received by the city council to furnish 1200 ft. of water pipe. Plans obtainable from Salsburg, Bradshaw & Taylor, 745 Petroleum Securities Bldg., Los Angeles. B. J. Firminger, city clerk.

TULARE, Tulare Co., Cal.—City Engineer R. M. Berryhill preparing plans for additional well in connection with municipal water supply system in addition to replacement of mains in east section of city with larger mains.

REDWOOD CITY, San Mateo Co., Cal.—Until February 21, 7:30 P. M., bids will be received by J. D. Hedge, clerk, Sequola Union High School District, to furnish and install water softer. Certified check 10% payable to clerk required with bid. Specifications obtainable from clerk.

MANTECA, San Joaquin Co., Cal.—American Cast Iron Pipe Co., Balboa Bldg., San Francisco, at \$1516.29 awarded contract by city council to furnish 1750 ft. c. i. pipe with fittings for water extensions. Hydrotite for caulking will be furnished by the Industrial & Municipal Supply Co.

SAN ANSELMO, Marin Co., Cal.—M. Greenberg and Sons, San Francisco, awarded contract by town trustees to furnish and deliver fire hydrants; 2½-in. single outlet hydrant, \$30; 2½-in. double outlet hydrant, \$40.

ORLAND, Glenn Co., Calif.—Subdivision of a 10,000 acre tract adjoining the Orland project by the Western Development Corp., Ltd., of Los Angeles, said to be a \$5,000,000 concern, is contemplated. The land will be split into small sections and devoted largely to oranges, pecans, walnuts, alfalfa and dairying. There are a number of wells on the property and additional ones will be sunk and pumping plants installed.

GLENDAL, Los Angeles Co., Cal.—Until 10 A. M., Feb. 27, bids will be received by the city council for furnishing f. o. b. cars, Glendale, Calif.

Item 1—Synchronous supervisory equipment for the following operations: 37 breaker control units, one failure of D. C. on control bus unit, one door control unit, one alarm unit to be used with annunciator, one fire extinguisher pressure alarm unit.

Boards to be ebony asbestos, 96 in. high, lacquered black with glossy finish. Equipment to include necessary lighting arresters and cutouts. Bidders to submit bids for boards with dummy bus and arrangement, as shown on Ddg. 1359E. Alternate bids will be received on boards without dummy bus and units arranged by bidder. Bidders to submit bids for all positions specified above and state allowance if ten breaker control units (Dwg. 1359E) are omitted but space provided for future installation.

Item 1f—Remote metering equipment for two single phase voltmeters and two three-phase ammeters to be used in connection with Item 1. Bidders to submit drawings, specifications and delivery date of apparatus they propose to furnish.

Certified check, 10%. G. E. Chapman, city clerk. P. Diederich, plant superintendent.

SAN RAFAEL, Marin Co., Calif.—Directors of Marin Municipal Water District are considering plans for high level water system to supply lands of San Rafael Development Co., involving the construction of a pumping plant and pipe line to a 100,000-gal. capacity tank at an elevation of 500-ft.

LOS ANGELES, Cal.—Kimball-Krogh Pump Co. awarded contract by Los Angeles Water & Power Department at \$33,112 for eight deep well pumps and motors. Adv. 1275, provided equipment includes heavy type G. E. 6-pole, 950 R. P. M. (F T-557) motors.

OAKLAND, Cal.—Until February 19, 5:30 P. M., bids will be received by John H. Kimball, secretary, East Bay Municipal Utility District, 512 16th St., to construct and furnish 4000 lin. ft. ¼-in. thickness 20-inch diameter electric welded sheet steel pipe or 4000 lin. ft. Class B c. i. pipe and 5700 lin. ft. ¼-in. thickness 24-in. dia., electric welded steel pipe for distribution system. Specifications obtainable from above office.

See call for bids under official proposal section in this issue.

NEWHALL, Los Angeles Co., Cal.—Newhall Water Co., a corporation, has applied to the railroad commission for authority to acquire the so-called Newhall water system, operated by a copartnership consisting of A. B. and Marguerite Perkins, J. D. and Agnes K. O'Brien and to issue \$45,000 of common capital stock. It is proposed to issue \$26,000 of said stock in payment for the water properties, and to expend \$19,000 for the construction of additions and betterments.

PLAYGROUNDS & PARKS

SACRAMENTO, Calif.—H. H. Jaqueth, city planning engineer, in a report to the city council recommends the following work in connection with public park improvements: erection of a new clubhouse at McKinley Park; establishment of a neighborhood park in vicinity of 51st and J Sts.; construction of pleasure drive connecting outlying parks; erection of a clubhouse at Camp Sacramento; seek authorization of state fair officials to permit use of fair grounds for recreational purposes; install sprinkler system at Del Paso Park.

SALADA BEACH, San Mateo Co., Calif.—Education, Parks and Play-ground Committees of the San Francisco Board of Supervisors has recommended construction of a new municipal golf course in Sharp's Park, Salada Beach, as petitioned for by the

Municipal Golfers' Association. The cost of the project is estimated at \$150,000.

SACRAMENTO, Cal.—Until Feb. 26, 10 A. M., bids will be received by Harry W. Hall, county clerk, to furnish and install shrubbery and plants fronting county hospital buildings. Certified check 10% payable to Chairman of Board of Supervisors required with bid. Spec. on file in office of County Engineer Chas. Deterding, Jr., Courthouse, Sacramento.

BERKELEY, Alameda Co., Calif.—Until Feb. 24, 11 A. M., bids will be received by Regents of the University of California, for (a) central heating plant building; (b) utility tunnel connection; and (c) combined proposals on items "a" and "b" on the University Campus. Plans obtainable from Cashier at California Hall, Berkeley, on deposit of \$100, on proposition A and \$25 deposit for plans on proposition B, both returnable.

See call for bids under official proposal section in this issue.

STREETS AND HIGHWAYS

SACRAMENTO, Calif.—City council declares intention (2296) to improve alley between W and X, Alhambra Blvd. and 32nd St., involving c. 1. drains; vit. pipe sewers; 1-in. water main connections; grading; hyd. concrete pavement. 1915 Bond Act, Hearing Feb. 27. H. G. Denton, city clerk. B. C. Clark, city engineer.

OAKLAND, Cal.—Until Feb. 17, 4:30 P. M., bids will be received by City Port Commission for paving in rear of 14th Street Wharf. Alternate bids will be taken for oil macadam paving, waterbound macadam paving and asphaltic concrete paving. Plans obtainable from above office.

SACRAMENTO, Cal.—City council contemplates opening and improvement of Y St., bet. Alhambra and Stockton Bldvs.; estimated cost, \$74,000 of which the city would pay \$18,000. Funds will probably be provided in the 1931 budget. B. C. Clark is city engineer.

SAN RAFAEL, Marin Co., Cal.—City Manager H. K. Brainerd preparing plans to pave with asphaltic concrete G street for its entire length and West End Ave. from G St. to Ida St. and Ida St. from West End Ave. to Fourth St.; also C street from Third St. to Wolfe Ave. and such side streets as the city engineer may determine with hydraulic concrete.

SANTA CRUZ, Santa Cruz Co., Cal.—Until February 17, 2:45 P. M., bids will be received by S. A. Evans, city clerk, (454-C) to improve portion of Main street involving cement concrete pavement, walks, curbs. 1911 Act. Certified check 10% payable to city required with bid. Plans on file in office of clerk. Roy Fowler, city engineer.

MILL VALLEY, Marin Co., Cal.—Until February 13, bids will be received by Will Falley, town clerk, to pave with hydraulic concrete approx. 14,000 sq. ft. of Circle avenue and Erato street; estimated cost \$4800. Certified check 10% payable to town required with bid. Plans obtainable from office of clerk. F. H. Lacy, town engineer.

OROVILLE, Butte Co., Cal.—County Surveyor A. Bunsamer preparing plans to surface with oil macadam the Lott and Mesa roads. Fifty-eight residents in the Durham district petitioned for the work.

HUMBOLDT COUNTY, Cal.—Until March 5, 2 P. M., bids will be received by State Highway Commission to grade and surface with untreated crushed gravel or stone, .4 miles between south boundary and Richardsson's Grove.

See call for bids under official proposal section in this issue.

SAN JOSE, Santa Clara Co., Cal.—Until February 17, 8 P. M., bids will be received by John J. Lynch, city clerk, (4741) to improve portions of north one-half of William St. bet. Coyote River bridge and 24th St., involving: grade; 3-in. asph. conc. base, 1½-in. asph. conc. surface pave; 4-in. vit. pipe house sewer laterals; cem. conc. walks; conc. curb and gutter; hyd. cem. culvert. 1911 Act.

Certified check 10% payable to city required with bid. Plans on file in office of clerk. Wm. Popp, city eng.

SAN JOSE, Santa Clara Co., Cal.—Until February 17, 8 P. M., bids will be received by John J. Lynch, city clerk, (4802) to imp. Third St. bet. Keyes & Humboldt Sts., involving: grade; 1½-in. asph. conc. surface pave. on 3-in. asph. conc. base; cem. concrete curbs, gutters, walks; vit. pipe house sewers; conc. driveways. 1911 Act.

Certified check 10% payable to city required with bid. Plans on file in office of clerk. Wm. Popp, city eng.

SAN LUIS OBISPO, San Luis Obispo Co., Cal.—Proceedings have been started by the county supervisors for imp. in Assessment District No. 18, comprising streets in the Atascadero Colony, involving grading, paving, sidewalks, culverts, fire hydrants, etc. Chas. E. Watt is engineer for the work.

HAYWARD, Alameda Co., Cal.—County supervisors reject petition seeking closing of county road leading to Mission Peak, above Mission San Jose. Funds will be provided shortly to improve the roadway. Geo. Posey is county surveyor.

OROVILLE, Butte Co., Cal.—Western Roads Co., 1305 28th St., Oakland, at \$10,984.50 only bidder, awarded contract by city (499) to widen and improve Downer St. under Acq. and Imp. Dist. No. 4, involving re-grading; hyd. cem. conc. walls, curbs, gutters, retaining walls; c. l. drains; Warrenite-Bit. asph. conc. pave.

OROVILLE, Butte Co., Cal.—C. W. Wood, Stockton, at \$41,602.50 submitted low bid to city council to improve Sts. in Acq. and Imp. Dist. No. 3, including Washington Ave. bet. Yard St. and Oro Ave., etc., involving: (prices quoted are engineer's estimate) 13,300 cu. yds. grading-excavation, \$1 cu. yd.; 3000 cu. yds. grading-sewer excavation, \$1.25 cu. yd.; 132,000 sq. ft. 4-in. oil macadam pave, \$1.10 sq. ft.; 36,550 sq. ft. hyd. conc. sidewalks, \$.20 sq. ft.; 7260 lin. ft. hyd. conc. curb, \$.70 lin. ft.; 7000 lin. ft. hyd. conc. gutter, \$.60 lin. ft.; 3550 lin. ft. 6-in. conc. sewer pipe, \$.50 lin. ft.; 20 lin. ft. 12-in. do, \$.75 lin. ft.; 795 lin. ft. 16-in. do, \$.150 lin. ft.; 15 sewer manholes, \$100 each; 2 sewer lampholes, \$25 each; 13 c. l. sewer drains, \$18 each; 700 lin. ft. 8-in. corrugated iron culvert pipe, \$.25 lin. ft. A Teichert and Son, Sacramento, only other bidder at \$47,871. Bids under advisement until Friday Feb. 7.

SAN FRANCISCO.—Bureau of Engineering, Department of Public Wks., completes plans to improve Vernon Ave. bet. Randolph and Sargeant Sts., involving 225 lin. ft. armored concrete curbs; 90 lin. ft. 6-in. ironstone pipe side sewers; 3,375 sq. ft. conc. pave. Est. cost \$2,500.

SAN FRANCISCO.—Bureau of Engineering, Department of Public Wks., completes plans to improve crossing of Ralston Ave. and Shields St., involving 200 cu. yds. cut; 83 lin. ft. armored concrete curb; 30 lin. ft. 8-in. and 24 lin. ft. 12-in. V.C.P. sewers; 50 lin. ft. 10-in. V.C.P. culvert; 474 sq. ft. 1-course concrete sidewalks; one brick manhole; 2 brick catch-basins; 2,426 sq. ft. asph. conc. pave, 6-in. class F conc. base with 2-inch asph. conc. surf. Est. cost \$2,500.

COMPTON, Los Angeles Co., Cal.—Until 8 P. M., Feb. 18, bids will be received by the city council to pave streets west of Compton Ave. between Compton Ave. and the west city limits, Kemp St., Palmer St., Brazil St. and other streets, involving: 400,000 sq. ft. grading; 301,144 sq. ft. 5-in. conc. paving; 6215 ft. 6-in. cast iron water mains; 3510 ft. 4-in. cast iron water mains; 4890 ft. 1-in. copper services; 36 manholes to be lowered; 48 ft. curb 25 sq. ft. walk, 1911 Act. Glen Rood is city engineer.

SAN FRANCISCO.—Until February 19, 2:30 P. M., bids will be received by Board of Public Works to improve Clayton St. at Market St.; estimated cost, \$8,000. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from the Bureau of Engineers, 3rd floor, City Hall.

HERCULES, Contra Costa Co., Cal.—Peres and Gatto, Richmond, at approximately \$12,000 awarded contract by Hercules Power Co. for approx. 120,000 sq. ft. oil macadam pavement in connection with the company's plant.

SAN JOSE, Santa Clara Co., Cal.—City declares intention to improve Eighteenth St., between Jackson and Taylor Sts., involving grading; 1½-in. asph. conc. surface on 3-in. asphalt concrete base pavement; 4-in. vit. pipe house sewer laterals; cem. conc. sidewalks. 1911 Act, Bond Act 1915. Hearing February 24. Wm. Popp, city engineer. John J. Lynch, city clerk.

SAN JOSE, Santa Clara Co., Cal.—Until February 24, 8 P. M., bids will be received by John J. Lynch, city clerk, (4956) to improve 19th Street, between St. James and Washington Sts., involving 1½-in. asphalt concrete surface paving on 3-inch asphaltic concrete base; cem. conc. curbs and gutters, walks; vit. pipe house lateral sewers; 3 cem. conc. storm water inlets. 1911 Act. Certified check 10% payable to city required with bid. Plans on file in office of clerk. Wm. Popp, city engineer.

PACIFIC GROVE, Monterey Co., Cal.—Clark & Henery Construction Co., Chancery Bldg., San Francisco, awarded contract by city council to improve 19th St., between Lighthouse Ave. and Junipero Ave., involving grading; cement concrete curbs and gutters; asphalt concrete pave; storm drains; vitrified clay sanitary lateral sewers.

TRACY, San Joaquin Co., Cal.—City council declares intention (130) to improve streets between East and West Sts. and the Southern Pacific R. R. and Eleventh St., involving grading; 4-in. cementing gravel pave on earth sub-grade with 3-in. asph. conc. base; concrete curbs, gutters; 4-in. vit. clay sewer pipe; ¾-in. galv. water service; cem. concrete sidewalks. 1911 Act. Bond Act 1915. Hearing Feb. 25. George L. Ferlichs, city clerk. E. T. A. Bartlett, city engineer.

SAN LUIS OBISPO, San Luis Obispo Co., Cal.—County supervisors declare intention to improve portions of Bajada, Dalzura, Oledema, Tunitas, Juanita, San Jacinto, Rosario Ave., etc., under Assessment District No. 18, involving grading; Bitumulus surface pavement on waterbound macadam base; gravel shoulders; corr. iron pipe culverts; cem. concrete headwalls, and appurtenances welded iron water pipe, fittings and hydrants. Work under Improvement Bond Act of 1915. Hearing February 24. J. G. Driscoll, county clerk. Chas. E. Watt, engineer.

REDDING, Shasta Co., Cal.—County Surveyor Carl A. Mau is making surveys for a mile of new road in the vicinity of Pittville and McArthur on the north side of the Pit River.

SAN GABRIEL, Los Angeles Co., Cal.—March 4 has been set as protest date on the proposed \$100,000 Mission Drive widening and improvement project. The proposed work extends from Las Tunas Drive to the Southern Pacific tracks. Plans have been prepared by C. N. Wright, city engineer.

SANTA CRUZ, Santa Cruz Co., Calif.—County Surveyor Lloyd Bowman making survey for 6,300 ft. of new roadway, 40-ft. wide, from Carleton toward Watsonville, property owners having petitioned for the work.

SANTA BARBARA, Cal.—Western Motors Transfer Co., 116 State St., awarded contract by the city council at \$24,620.85 to improve Los Olivos St. bet. State St. and 12 ft. north of Santa Barbara St., etc., involving: asph. conc. pave., comb. curb and gutter, curb, conc. driveways, conc. curtain wall, vit. pipe sewer house connections, manholes, etc. 1911 Act.

PACIFIC GROVE, Monterey Co., Calif.—City Council declares intention (3162) to improve Gibson Ave. bet. Fountain Ave. and East City Limits, involving grading; cem. conc. curbs, gutters; 2½-in. asphaltic concrete pavement with 1½-in. asph. conc. surface; conc. catchbasin; storm drain. 1911 Act. Bond Act 1915. Hearing March 6. W. G. Stubbs, City Clerk.

FRESNO, Fresno Co., Calif.—Thompson Bros., Fresno, awarded contract by City Council to improve Inez St. bet. Huntington Blvd. and Ventura Ave., involving cem. conc. walks, \$16 sq. ft.; cem. conc. curbs, \$48 lin. ft.; 5-in. cem. conc. driveway approaches, \$.22 sq. ft.

SONORA, Tuolumne Co., Cal.—Until March 4, bids will be received by county supervisors to construct 1½-miles of road along Fuller-Longway road between Longway Ranch and Sonora-Mono road. The sum of \$5,000 is available in the budget for this work. Plans obtainable from County Surveyor Robt. Thom at Sonora.

SACRAMENTO, Cal.—Until Feb. 20, 5 P. M., bids will be received by H. G. Denton, city clerk, (2293) to improve alley bet. U and V, 25th and 26th Sts., involving c. i. drains with vit. sewer connections, construct vit. sewers; reconstruct manhole; grade; 1-in. water main connections; hyd. concrete paving. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk. B. C. Clark, city engineer.

PACIFIC GROVE, Monterey Co., Calif.—City Council declares intention (3159) to improve Fountain Ave. bet. Lighthouse and Sinex Aves., involving grading; cem. conc. curbs, gutters; 2½-in. asph. conc. base, 1½-in. asph. conc. surface pavement; storm drains; 4-in. vit. clay pipe lateral sewers conc. catchbasin. 1911 Act. Bond Act 1915. Hearing March 6. W. G. Stubbs, City Clerk.

VENTURA, Ventura Co., Cal.—Until 11 A. M., March 4, bids will be received by the county supervisors to improve Grimes Canyon Road, about 3.2 miles. Cash Contract No. 659, involving: 27,000 cu. yds. excav.; 5000 cu. yds. class A conc. paving; 80 cu. yds. class A structural concrete; 338 expansion joints; 8200 lbs. dowels; 14 ft. 18-in. corr. iron pipe; 126 ft. 24-in. corr. iron pipe; 16 ft. 30-in. corr. iron pipe; 150 ft. 24-in. corrugated ½ round; 23,600 lbs. reinf. steel; 500 ft. E. M. rough redwood; 80 ft. guard rail, type B; 250 ft. relaying 18-in. and 24-in. corrugated pipe and flume. Plans obtainable from county surveyor, Chas. W. Pettit. Cert. check, 10%. L. E. Hallowell, county clerk.

SANTA ROSA, Sonoma Co., Cal.—J. V. Galbraith, P. O. Box 51, Petaluma, at \$12,910.20 awarded contract by county supervisors to grade 2½-miles of Hilton-Healdsburg highway.

SANTA ROSA, Sonoma Co., Cal.—J. V. Galbraith, P. O. Box 51, Petaluma, at \$31,608 awarded contract by county supervisors to pave Petaluma-Point Reyes Road, Section A, from Station 30+00 to county line in 2nd Supervisorial District, involving 2800 cu. yds. class A concrete paving; 5000 cu. yds. unclassified excavation; haul and place 100 ft. 12-in. and 100 ft. 15-in. corrugated pipe.

CARSON CITY, Nevada.—Coolidge and Scott, contractors on the highway from Paradise Hill to Orovida on the I. O. N. cut-off in Humboldt County, have advised the State Highway Commission that they are financially unable to continue the project. The contract was taken for \$46,000 and \$15,505 has already been advanced in progressive payments. Approximately \$22,000 worth of work is yet to be completed. The Fidelity and Deposit Co. of Maryland, bondsmen for the contractors to the extent of \$35,140, has advised the state highway department that they will provide an engineer to complete the contract.

HOLLISTER, San Benito Co., cal.—County Surveyor A. M. McCray preparing plans for permanent highway from Berger Place to the Stone Ranch on the road to the New Idria Mines.

OAKLAND, Cal.—J. H. Fitzmaurice, 354 Hobart St., Oakland, at \$0.157 sq. ft. awarded contract by city council to construct cement sidewalks in portions of 35th Ave., etc.

SUNNYVALE, Santa Clara Co., Calif.—City Council declares intention (304) to improve portions of McKinley Ave., Carroll St., Iowa Ave., etc., involving grading; 2-in. Warrenite-Bit surface pavement on 3-in. asph. conc. base; cem. conc. curbs, gutters, driveways; 4-in. cem. conc. pipe house sewer laterals; ¾-in. galv. water main service connections. 1911 Act. Bond Act 1915. Hearing Feb. 24. Ida Trub-schenck, City Clerk.

OFFICIAL PROPOSALS

ADVERTISEMENT FOR BIDS

Subject to conditions prescribed by the undersigned, sealed bids are invited for (a) The Central Heating Plant Building; (b) The Utility Tunnel Connection, and (c) combined proposals on items (a) and (b), on the campus of the University of California, Berkeley, California. No bids will be received after 11:00 A. M., Monday, February 24, 1930; the right to reject any and all bids is reserved. For full information apply at Cashier's Window, California Hall, University of California, Berkeley. A deposit of \$100.00 is required for each set of Drawings and Specifications for item (a), a deposit of \$25.00 is required for each set of Drawings and Specifications for item (b). THE REGENTS OF THE UNIVERSITY OF CALIFORNIA

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on March 12, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

San Joaquin County (X-S-J-4-C), four reinforced concrete girder bridges between Lodi and Stockton, as follows:

Across Calaveras river, a bridge consisting of three 34-ft. spans.

Across Mosher creek, a bridge consisting of three 27-ft. spans.

Across Bear creek, a bridge consisting of three 30-ft. spans.

Across Live Oak creek, a bridge consisting of two 30-ft. spans.

San Joaquin County between Cherokee Station and Harney Lane (X-S-J-4-C), about six and nine-tenths (6.9) miles in length, to be graded and paved with Portland cement concrete.

Proposals forms will be issued to only those Contractors who have furnished verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed in-

formation concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

SAFEGUARDS AGAINST REDUCED WAGES IN NATIONAL BUILDING PROGRAM IS URGED BY STEWART

(By Ethelbert Stewart, U. S. Commissioner of Labor Statistics)

A nationwide building program is in the offing for 1930. Much of this will be public building, or construction work of various types, by Federal, State, county and municipal governments. It is being projected to provide work for the unemployed, or at least to take up the slack that has come or is feared as a result of our late Wall Street unpleasantness.

Meantime, let us see to it that public construction plans to relieve unemployment be not used to break down wage rates in the construction industry nor in any of its branches. A most dangerous situation arises at this time out of a general rule, held to be obligatory, that public contracts must be let to the lowest bidder. It is conceivable that this may render a needed and immediate remedy; really, and in the long run, a permanent injury.

When the lowest bid is such by reason of lower wages intended to be paid, then, socially, commercially and industrially, it may be the most expensive bid. If legislation is necessary to cure this evil we should have it and have it quickly. But is it absolutely necessary? Is it not practicable and legal to require that all bids shall state the rates of wages and hours of labor by occupations upon which the bid is predicated?

Then, if the lowest bid is so by reason of proposed low wages, it may be eliminated as an unsocial bid, contrary to the best public policy. The wage rates and labor conditions specified in the bid of the successful bidder would then be written into and made a part of the contract. This does not mean that wage rates would be uniform throughout the country. The bidder would be required to state the rates he intended to pay on the specific project and in the locality of the proposed project.

This would prevent in the future, and in the present unemployment uneasiness, the practices complained of before the House Committee on Labor at the last session, where it was shown that contracts to build Government structures in New York were let to firms that brought with them their labor from other States where the wage rate was much lower. It also was shown that these workers were brought from States having no workmen's compensation laws and did not know that in case of accidents arising out of and in course of their employment they were entitled to compensation benefits. The contractor took out no compensation insurance in the State of New York where the work was being performed.

It is easy to see what this alone would mean in the matter of bidding on work, since in structural steel erection, for instance, the premium rate in New York is 25 per cent of the pay roll, which means that with a wage rate of \$12 per day the insurance premium rate is \$3 per man per day. A contractor who did not intend to carry compensation insurance because he hired his men in noncompensator States could therefore very easily undercut a New York contractor who intended to abide by the law of the State.

An agreement to abide by the compensation law of the State in which the work is to be performed might well be made a part of the advertisement for bids and written into the

contract. This would not involve any hardship upon bidders, because of the diversity of wage rates in the various parts of the country. Any contractor desiring to bid on a job anywhere can secure without cost from the United States Bureau of Labor Statistics the local wage rates both for common labor and for the building trades in any State and for the principal cities in any State. He can secure from the same source the compensation provisions of any State having such legislation.

Precedents are at hand. This is the law in Spain, enacted in April, 1929. All public contracts must contain an agreement to pay the specific wage rates as published by the government as prevailing in given localities and by specified industries. The Argentine republic has passed such a law applying to the City and State of Buenos Aires. The State of Oregon provides that section 6718 of its code shall be written into all State contracts. This section while not covering wages nevertheless writes labor conditions into its contracts.

We need, perhaps, some legislation on the question of power to accept the best rather than necessarily the lowest bid. As matters now stand the Comptroller has ruled that the lowest bid must be accepted unless the bidder is known to be irresponsible. Unfortunately, it is not always true that the lowest and worst bidder is irresponsible, nor is it always true that the lowest bid is lowest because of the rates of wages intended to be paid.

It is evident, however, that what the governments of Federal, State, county, municipal—should stand for is the best bid from a broad social point of view, from the viewpoint of true public policy. The lowest bid theory puts the Government in the position of being a potent influence for the constant lowering of wages. The purpose and the practice of governmental bodies should be to forward the welfare and prosperity of the country—not, necessarily, to build a post office in Podunk for the least possible money.

If the present unemployment situation is used by our public building program, or any other agency or agencies, to break wage rates and reduce the earning power and hence the purchasing power of our workers then prosperity will not be restored, and an injury will be done to the workers which it will take years of strikes and labor conflicts to overcome. In fact, in the long run our building program will have done more harm than good.

President Hoover secured a promise from the leading industrial employers not to reduce wages as a result of the present situation; and yet under the compulsion to accept the lowest bid, it is entirely possible to make the Government itself the agency for smashing wage rates under the plea of giving work.

STEEL TONNAGE INCREASES

Unfilled tonnage of the United States Steel Corporation on January 31 amounted to 4,468,710 tons, an increase of 51,517 tons during the month. On December 31 the corporation's unfilled orders amounted to 4,417,195 tons, and on January 31, 1929, it was 4,109,487 tons.

CERTIFICATES GRANTED

J. Lloyd Conrich, 630 Lake St., San Francisco and Sigvald L. Berg, 917 Curtis St., Berkeley, have been granted provisional certificates by the California State Board of Architecture Examiners, Northern District, to practice architecture in this state. It announced by Albert J. Evers, secretary of the state board. The certificates were granted at the regular meeting of the state board on Jan. 28.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

STEEL REINFORCING BARS

Dependability of materials used is a prime requisite to the success of construction.

For twenty years Gunn, Carle & Co. has been able to guarantee STEEL REINFORCING installation service, without error—without complaint.

We shall be pleased to consult you, without obligation, regarding the construction problems in the field of Iron and Steel on jobs of any size.

Gunn, Carle & Co.

444 Market St., S. F.

Tel. SUTter 2720

Steam-heating and water-heating installation at 595 Twentieth Avenue, San Francisco
—by Thos. Brodie, Plumbing and Heating Contractor.

Modernized with GAS

Better, of course, to have your heating contractor make a *complete* gas installation during construction. Owners and tenants want gas. Modern gas appliances help to sell homes and hold good tenants.*

*Why not make your next job a BLUE STAR building? BLUE STAR means: "Completely equipped with modern gas appliances approved by testing laboratories of the American Gas Association."

But *this* owner had his gas heating plant installed some time after the building was completed. It serves four flats—two of four rooms and two of five rooms each.

The boiler (310 sq. ft. of steam radiation) is regulated by time-clock control. Thermostat is in the owner's apartment. Although the boiler is on the owner's meter, water heaters are on tenants' meters,

together with their gas ranges.

Such *flexibility, adaptability* and *ease of control*—plus unequalled *cleanliness* and *dependability*—place gas beyond competition for every heat requirement.

Your gas company's engineers will gladly work with you in planning modern installations . . . Call them when you need them. No charge or obligation.

STEEL INTERESTS ELECT AND ADOPT RESOLUTIONS

J. E. Webster of Los Angeles was unanimously re-elected chairman of the California Iron, Steel & Allied Industries Conference at the closing session in the Hotel Del Monte and dates for the opening of the next conference at Del Monte set for February 12, 13 and 14, 1931.

R. M. Alford, San Francisco, and Charles S. Knight, Los Angeles, were re-elected vice chairman and secretary, respectively. H. W. Force of Berkeley and A. C. Denman of Los Angeles were re-appointed chairman and vice-chairman, respectively, of the golf committee for the tournament in connection with the 1931 conference.

All resolutions were passed by the conference at the final session by unanimous vote. These provide:

Commendation of the California State Chamber of Commerce for its activities in stimulating closer co-operation of steel industry groups;

Support in extending simplified practice and elimination of waste to all iron and steel groups in California;

Extension of marketing territory in Western states;

Development of markets for domestic products;

Continued co-operations with California purchasing agents;

Co-operation with technical groups of architects, engineers and contractors, and the invitation to them to be represented at the iron and steel executive committee meetings, aiming toward the development of a definite affiliation.

Group chairman chosen by the Conference for 1930 are: Northern California, manufacturers, H. L. Philips, San Francisco; Southern California, George J. Kuhrts, Los Angeles.

Reinforcing steel dealers, Lon White, San Francisco; Roy A. Badt, Los Angeles.

Merchant steel dealers, Stephen S. Barrows, San Francisco; E. Jungquist, Los Angeles.

Steel mills: U. S. Steel Products Co., Columbia department, S. F.; Pacific Coast Steel Corporation, Los Angeles.

Structural steel: C. H. Ramdden, Oakland; R. P. Miller, Los Angeles.

Foundries: Charles Hoehn, San Francisco; Carol A. Stilson, Los Angeles.

Traffic: T. A. L. Loretz, Los Angeles.

An exposition is to be held at the Hotel Stevens, Chicago, April 7-12, in connection with the seventh annual convention of the American Oil Burner Association. Sixty-eight exhibitors had taken space up to February 12. They include not only manufacturers of burners and accessories of every kind, but also oil companies. This will be the first exposition held by the association in which oil companies have been represented.

CONTRACTING PROGRESS DURING 1929 IS CITED

Contracting activities were large in 1929, corresponding to the nine-billion-dollar construction program, but prosperity among contractors has not been commensurate with this great activity, says Engineering News-Record, in an editorial survey of the 1929 construction program. Prices were generally low. Within the organized contracting industry has made progress in stabilizing its relation to other elements of the construction industry. It has improved practice in surety-bond writing by setting up with the surety companies a bureau of contract information which is fast putting on file the verified business and performance record of every general contractor. During the year distinct advance has been made in requiring the prequalification of contractors bidding on public works. Adoption of the practice has been most general in state highway construction, but a number of cities have taken it up and legislation permitting its general use is being urged in several states and has been enacted in one. Concurrent with prequalification there has been a tightening up by public works officials in after-the-bid investigation of the low bidder.

Credit stabilization has made progress, chiefly through the allied industries committee of the Associated General Contractors and a dozen specialized contractors' associations. While directed toward sounder credit and trade practices, this work had the secondary effect of improving the relations of general contractors and subcontractors, particularly in building construction. In the same line of harmonizing working relations, contracting associations are getting into closer touch with organized labor in agreements concerning jurisdictional strikes.

Association work, though one of the brightest elements of contracting, has not the wide support in membership and money that its importance warrants. Contractors' associations have been regarded more highly by other elements of the construction industry than by contractors. This condition is just now beginning to mend.

ORDERS FOR ELECTRICAL GOODS

New orders booked during the fourth quarter of 1929, as reported to the U. S. Department of Commerce by eighty-one manufacturers of electrical goods, were \$283,736,209, as compared with \$338,169,678 for the third quarter of 1929 and \$282,226,449 for the fourth quarter of 1928. Total bookings for 1929 amounted to \$1,230,133,618, an increase of 25 per cent over the \$1,029,721,508 of orders booked in the previous year.

CITY PLANNING FOUND TO AID CONSTRUCTION

Nearly 700 municipalities in this country now have city planning commissions, and the number shows growing interest in the movement and its widespread development throughout the United States, according to a statement by the Department of Commerce, based on a survey by its division of building and housing. The Department's statement follows in full text:

A tabulation made from returns to questionnaires sent to vari ous cities, towns and villages in the United States shows that at least 691 of these municipalities have official planning boards or commissions. Of this number, 208 are cities having in 1929 a population of over 25,000, comprising more than two-thirds of all the cities in that population group. The other 483 vary in size down to villages of less than 1000, and several of the smallest of these have less than 500 inhabitants.

The large number of municipalities of all sizes which at this time have planning commissions, and the fact that the interest in planning activity is not confined to any one region of the country, indicate a general appreciation of the need for modern city planning, according to the Department.

"Cities having planning commissions are believed to be more apt than others to exercise foresight and true economy in controlling the laying out and improvement of streets, the location of parks, playgrounds and public works, the development of transit and transportation, provision for street traffic, and in the equitable regulation of private use of land through zoning ordinances," the Department said.

The tabulation, in addition to summarizing the total number of planning commissions now in existence, groups them according to States, presents data as to the number of members of each commission, the number appointed and the number serving as exofficio members, the terms of office and the titles of the executive officers. It also indicates which of these cities have zoning ordinances in effect.

W. R. FAIT, WOODLAND CONTRACTOR, PASSES

William R. Fait, 52, general contractor of Woodland, who has been a patient at the Letterman General Hospital, San Francisco, for the past several months, died Feb. 18.

Fait was a Spanish-American War veteran and served several years in the Philippines. He was a native of Kentucky and entered the contracting business in Woodland about seventeen years ago.

Surviving are his widow, Mrs. Katherine Fait, and a daughter, Miss Eleanor Fait, a student at Mills College in Oakland. Several brothers and sisters in Washington also survive.

ARCHITECT URGES BETTER RELATIONS WITH CONTRACTOR

(By C. HERRICK HAMMOND, President, American Institute of Architects)

Following are excerpts from an address on "Industrial Relations Between the Architect and Contractor," delivered by Mr. Hammond at the annual convention of the Associated General Contractors of America at New Orleans, January 20-23, 1930.

When Mr. Walbridge invited me to appear before you to speak on industrial relations between contractors and architects, I accepted the invitation immediately, not because I like to make a speech—I do not—and I consider myself a poor speaker, indeed. I accepted because I felt that it was high time for some one to make an effort to bring into closer contact these two fundamental elements of the construction industry, to clear away the mist and fog from the atmosphere and sweep out the dust and cobwebs of doubt and misunderstanding that seem to prevail in the minds of some of the members of our great industry. Nothing short of ignorance of the functions, the aims and ideals of the architects of this country can account for the misunderstandings that prevent us from going ahead together as we should in the closest, most free and efficient manner to carry out the general construction activities of our nation.

I am here as the representative of the 65 active chapters of the American Institute of Architects and am expressing not only my own views, but the ideas of many of the leaders of the profession. I feel that I am safe in saying that I speak for the profession.

Educational Work of A. I. A. —
The institute was organized in 1857 and has through all the years of its existence endeavored to improve the practice of architecture in this country. I am sure it has done so. The educational work of the institute has been far-reaching in developing a fine type of graduate from our schools of architecture and in creating an interest and an appreciation of the fine arts on the part of the public. Its efforts have also been directed toward those elements of the building industry which tend toward greater efficiency and better business methods.

The institute through its members has developed many instruments useful to the entire profession—for example, the "Handbook of Architectural Practice," which was largely the work of Frank Miles Day of Philadelphia, whose contribution to this phase of architecture is of immense value to the industry. A study of this handbook will be enlightening to many.

The documents of the institute, such as the "Functions of the Architect" and "The Principles of Practice," clearly define the architect's place and attitude towards the other elements of the industry. The contract documents of the institute, the result of collaboration with engineers, contractors, subcontractors and lawyers, was largely the result of the leadership of the architectural profession. The documents, including the "General Conditions of the Contract" and the "Form of Bond," are used extensively throughout the entire country and are the standards adopted by your association.

I want you to realize that the architect of today is a business and professional man of ideals, who plans his structure from the foundation to the top, according to the best and most

efficient practice in collaboration with engineers—both structural and mechanical—without losing sight of the fact that along with beauty must go good planning, efficiency and economy, together with fair dealing between contractor, subcontractor and owner.

Architect of Today

The American architect of today has fallen heir to a great heritage, as the student of our history will appreciate in the names of Richardson, Hunt, McKim, Burnham, Bacon, Goodhue, Hastings, Jenney, May, and many others who are no longer with us, but whose names will stand as symbols of an enduring influence in our civilization. All over this country today worthy successors of these men are carrying on the principles for which they stood.

The standards of architectural practice today are higher than ever before. The graduates of architectural schools are better trained. Many are post-graduates, and before entering the practice of their chosen profession spend years in architects' offices to fit themselves for their life's work. Traveling scholarships have been established throughout the country, many of them operating under the auspices of the institute, which offer the deserving students of architecture opportunity for foreign and domestic travel to better fit them for service in their profession. Twenty-seven states have registration laws setting minimum standards of professional practice.

Industrial Relations of Groups

Industrial relations between two such fundamental groups as contractors and architects to be of benefit in the interest of better construction methods and of lasting service to the community must, of necessity, be formed on the basis of complete understanding of the functions of both and their willingness to co-operate for the good of the industry.

Success lies in whole-hearted co-operation of all elements of the industry toward doing away with its difficulties, injustices and misunderstandings.

In many cities throughout the land there is real co-operation and where such co-operation exists there are few misunderstandings as to the functions of each. There is clearer understanding that there is a place for the contractor and for the competent subcontractor, and that there is a place and a need for competent architects. There is also a realization that the two functions cannot be mixed, and that neither can replace the other, nor can either get along without the other.

It is also more clearly realized that there is no place—and should be no place—for the bad contractor or the bad architect. The really capable, intelligent contractors are wholeheartedly working with the architects—a condition which should prevail throughout the country.

When judgment is passed upon either a business or profession, it should be based on the performance of the best and finest of its practitioners. Through co-operative effort those high accomplishments and fine performances should be held up to public esteem. The weight of public opinion of a united building industry should be brought to bear in criticism of those members of our industry who fail to make at least an effort to reach that high standard. There are many

difficulties in the industry that are the result of the system evolved thru many years that cannot be laid at the door of any one element of the industry.

Competitive Bidding

The prevailing system in this country of selecting a contractor by competitive bidding often fails to accomplish the very result for which such competitions are held; namely, to secure the best contractor to do the work. When competitive bids are taken on an important building, general contractors are selected to bid, and as far as the architect is concerned an effort is made to select men as nearly equal in standing and qualifications as possible, but other contractors, not invited, bring about all the pressure and influence that they can organize to secure an opportunity to bid, thereby increasing the number beyond the desires of the architect and beyond the number which would give each bidder a reasonable chance to win, and worst of all, injecting into the list men who may not be properly qualified to do the work if they do get the job. Unrestrained competition in the building industry is an evil. Many evils of the industry are the result of the unfair competition that comes about through the necessity of accepting bids from contractors of unequal standing and ability; this is a problem that must be solved by the contractors.

It is obvious that in the construction world the products sold in competition are made after they are sold. When a merchant sells a pair of shoes in competition, the buyer sees the shoes and can choose just as good or as bad a make of shoes as he will stand for or pay for. When the owner buys the construction of a building in competition, the competition is all over when the sale is made; thereafter, the buyer, having bought blindly, has a promise or on a reputation, receives in return an article which is no better than he or the architect will accept, or the craft pride and good faith of the builder will produce.

Would Select Contractor

It is that essential failure of ordinary competition, when applied to building construction, that must be taught to the people who pay for the building, the owners, and it has to be taught to them by competent architects and competent contractors working together with a fine spirit of co-operation.

I believe, and most architects, I am sure, would agree with me, that the ideal way to build a building is to select a contractor who—by his experience, his ability as a builder, his organization, his equipment and his financial standing—is best qualified. The building operation is thus put in the hands of the architect and contractor, both working in a professional capacity for the best interests of the owner.

In this case, the builder, the architect and the owner may all join in the effort to secure a standard of work, a speed of construction and an economy of cost which is rarely possible when the general contractor is secured by competitive bidding and the award made to the lowest bidder.

At one time in Chicago a survey and estimate was made as to just how much competitive bidding cost the building industry. This estimate resulted in showing that an average 3 per cent was the cost of this system

of securing estimates and selecting a general contractor. Last year the total cost of building erected in the Chicago district was over \$300,000,000, multiplied by 3 per cent makes the enormous sum of approximately \$10,000,000 as the cost of estimating in Chicago for that year.

Waste in Estimating
As each contractor only secures a small proportion of the contracts on which he makes estimates, a great portion of this expense is wasted, but at the same time is added to the overhead expense of each concern involved. This overhead expense is paid for by every owner in the city who erects a building. This lays a heavy tax on the owner.

A large portion of this waste may be eliminated if an agreement can be reached between architects and contractors to use the quantity survey system in cities large enough to warrant the establishment of such survey bureaus, in accordance with report and recommendation on quantity surveying by the joint committee of the American Institute of Architects, Associated General Contractors of America, American Engineering Council of the Federated Engineering Society.

The Bureau of Contract Information, Inc., formed through the co-operative effort of the Associated General Contractors and Surety Companies, a non-profit organization, should be given the hearty co-operation of the entire industry—contractor and architect alike.

The movement started in many parts of the country on the part of contractors' associations and associations of material dealers toward the formation of credit bureaus, should be fostered.

The November issue of The Octagon, the official publication of the American Institute of Architects, contained a statement to the effect that now is the time for various elements of the industry to get together to iron out, if possible, through co-operative effort, the difficulties besetting the construction industry.

Definite steps to bring about some workable basis for such co-operation have already been initiated by the institute. The speaker had a talk with Mr. Daniel A. Garber, the daddy and first president of your organization, on the desire of such action and received a promise of full support, when I had the pleasure of meeting him in Memphis shortly before his untimely death. His passing was a great loss to the industry for which he had done so much.

Architect a Business Man
The architect has unfairly been the butt of the magazine humorist and is usually depicted as a long-haired artist whose interests have always removed him from the practical realities of life. As a matter of fact, a modest size architect's office of to-day will handle with care the businesslike expenditure of \$2,000,000 of its clients' money and see that every dollar is accounted for and that value has been received for every dollar spent. A so-called business concern, expending this volume in a year would have an important standing in business and financial circles, and its owners would be recognized as leaders in the business world. This unjust opinion of the architect has probably been caused because of the architect's inherent desire to bring beauty into all the work he produces.

Formerly those with a weakness for esuety were tempted to conceal it and they were suspected of unfitness to have a place in this practical, hard-headed, efficient world. However, we now are on record, without apology, in attaching the greatest value to the appreciation of art and beauty to the most utilitarian objects, and we seek to educate the contractor and the lay-

(Continued on page 25)

GENERAL CONTRACT FOR SAN JOSE SCHOOL WORK PROPOSED

Fifty general contractors, sub-contractors and material dealers, at a meeting of the San Jose Board of Education last Tuesday evening, spoke for and against the segregated bid plan and the general contract system in letting contracts in connection with the extensive school building program about to be undertaken in that city.

After hearing the various crafts, the members of the board of education, retired to a private meeting room to determine a policy in asking bids on future projects.

Following the private session, it was indicated that the board would continue to follow the same policy in advertising for bids as it has in the past—that is, the policy of advertising for a single bid by a general or major contractor. The only exception is the steam-heating contracts, which the board has made a practice of awarding separately.

Representatives of the master painters complained of the board's practice of specifying labor only on painting, in general specifications. The school department, in short, supplies the paint, the painters the labor. In answer to this it was explained the department can purchase paint at a lower figure.

Several craft representatives declared that their crafts would stand a better chance of landing a contract under the segregated bid plan, for the reason that the general contractor who is awarded the general contract often refuses to award his sub-con-

tracts to the lowest bidder for personal reasons.

Under the segregated plan, on the other hand, it was said, sub-contractors would bid to the board of education instead of the general contractor.

Among those who spoke in favor of segregation were the following: Fred Doerr, electrician; William Ehlert, plumber; George Lenzen, painter and decorator.

The following spoke in favor of the general contractor plan: W. H. McGinley and C. D. Scarper, painters, and Earl Hepple, plasterer.

F. T. Edmans, general contractor, declared segregating bids was inefficient and more costly. His views were seconded by Robert O. Summers general contractor.

W. J. Ochs of Fresno, who was recently awarded the contract for completion of the M. R. Trace school, told the meeting he had let all his sub-contracts locally, and employed local workmen, with the exception of two outside superintendents.

Architects who were heard on the subject of segregated bids, after the larger meeting, included the following: Ralph Wyckoff of San Jose; Warren Skillings, San Jose, who is designing the \$5000 kindergarten at Gardner school; Martin and West William; John Donovan of Oakland, who is designing the new junior high at Second and Rosa, and W. H. Weeks, who is completing Theodore Roosevelt school and designing a new junior high for Park and Naglee.

CRANE COMPANY TO MARKET GOODS ON INSTALMENT PLAN

An unusual program to assist homeowners in the Northwest—and eventually throughout the nation—is projected by the First Bank Stock Corporation, one of the Northwest's two huge bank chains, says the Business Week. Through its operation, homeowners will be able to buy plumbing and heating fixtures and insurance on the instalment plan and can make special arrangements for financing the purchase of building materials. Other types of financing will be added to the services of the group later on in line with the growing tendency of American banks to extend their services far beyond the original limits of the "bank loan."

This expansion into the national field of financing by the large Northwest group is itself an important development in American banking. Recently, the First Bank Stock Corporation, having \$70,000,000 in resources and about 90 affiliated banks, purchased the Lumberman's Acceptance Corporation of Chicago. Head offices of the acceptance institution were moved to St. Paul, headquarters for the bank chain, and its name became the First Bancredit Corporation. Although planned primarily for the purpose of financing the purchase of building materials through acceptances, the step had a broader significance in its development of the use of acceptances for private financing.

Now heating and plumbing purchases will be financed by the group on the instalment plan. Through First Bancredit Corporation, a contract has been closed to handle this financing in cooperation with the Crane Company under the Crane budget plan. Purchases of Crane heating and plumbing equipment will be paid for

in monthly instalments. Crane will sell through plumbing and heating contractors and will turn over the credit paper to First Bancredit Corporation, which will supply the cash. Thus the Crane Company's capital will not be tied up.

The contract also marks the first entrance of the Crane Co. into the instalment field. Crane is one of the largest manufacturers and distributors of heating and plumbing equipment in the world. It operates 161 branches in the United States and Canada and markets its products in many foreign countries.

The First Bancredit Corporation also finances on the instalment plan practically all forms of insurance, excepting life insurance. The time of payment is usually about 10 months.

In connection with its expansion program, the corporation will soon open offices in New York, San Francisco and Dallas. The bank group of which it is a subsidiary has also increased its paid-in capital by \$500,000 to a total of \$1,100,000. Resources come to about \$3,000,000.

In the early stages of development, the new business will probably be limited to making financing arrangements for national accounts on a nationwide basis. Later on, will come divisional financing plans for selected areas. In the Northwest the First Bank Stock Corporation's own 90 affiliated banks are immediately available as agents.

S. Rasor, general contractor, formerly located at 270 Tehama Street announces the removal of his offices to Room 614, Call Bldg. Phone KEarny 3537.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Trade-unions show a loss in their aggregate membership of 112,272, comparing 1929 with 1926, it is pointed out in a statement just released by the Bureau of Labor Statistics, Department of Labor, the figures being 4,444,523 in 1926 and 4,331,259 in 1929. Unions in the American Federation of Labor, however, report an increase of 126,430 over 1926, due largely to the renewed affiliation of the large Brotherhood of Railway and Steamship Clerks.

The Bureau's latest survey shows 146 organizations having national entity and significance in 1929, with 96 of them members of the federation. In 1926 there were 156 unions, 107 of them being affiliated with the federation.

Ten national organizations have passed out of existence since 1926, most of them small dual groups which have been absorbed by larger bodies, it was stated. During the same period, three new dual organizations have developed in different fields. The greatest increases in membership are reported in the construction industry and in public service, according to the statement.

Membership growth is especially marked in the hod carriers' organization, for which an increase of 30,000 is reported. Only a small part of this increase can be credited to the absorption of the tunnel workers, who numbered only 4600 in 1926. The plasterers have added 11,000 and the bricklayers over 26,000 to their membership since 1926. The only union reporting loss of members is the fathers, but several organizations give the same membership figures for both years.

A study into the costs of the plumbing business is to be undertaken by the Research Bureau of the School of Business Administration of the Oregon Agricultural College at Eugene, according to a recent announcement. A. L. Williamson, plumber and former mayor of Eugene, was the originator of the idea. The research is to be started in Eugene and extended to Marshfield, Cottage Grove, Roseburg, Albany and Corvallis.

Cooperation between builders and architects to stimulate building activity in Fresno and to raise the standards of construction were promised at a joint meeting of a group of architects and the General Contractors' Association at the Fresno Builders' Exchange. A canvas of the situation, it was said showed building to be on the increase with improved prospects for the Spring season. It was the consensus of opinion, according to spokesmen for both groups, that neither group would invade the field of the other.

August 26 is the date set by the San Francisco Board of Supervisors to vote bonds of \$60,000,000 to finance the purchase of the local distributing plants and systems of the Pacific Gas and Electric Company and Great Western Power Company to be used in the distribution of the city's power developed at the Moccasin Creek plant of the Hetch Hetchy system.

The state of California may order Alameda county to raze its courthouse! This became a possibility when C. H. Fry, superintendent of the state industrial accident commission, advised the board of supervisors that the board will make an immediate survey to determine if the courthouse is safe. If it isn't, Fry said, the commission has power to force it to be torn down or repaired so it will be safe. The move came as a result of a petition filed by Richard Liebman, Oakland attorney, whose attempt to abate the 59-year-old building recently was repulsed by the courts.

Denial of published reports that merger negotiations were under way involving 80 per cent of the Pacific Northwest lumber resources is made by James Tyson, president of the Charles Nelson Lumber Co., previously reported to have been a party to the negotiations. R. A. Long, chairman of the board of the Long Bell Lumber Company, said "there is nothing of importance to report" relative to rumors of pending negotiations for a gigantic lumber merger in the Pacific Northwest.

Representatives of various labor organizations are protesting against expansion of convict labor in California as proposed by a joint legislative committee appointed to study the prison labor problem and make recommendations to the Legislature at the next session. Frank C. McDonald, representing California Labor Council, brands as unfair the plan of the committee as outlined by its chairman, Assemblyman Chester Cline of Riverside, to provide employment for all convict labor. McDonald declares that men who have violated the laws of the state and forfeited their right to citizenship should not be allowed to compete with legitimate labor.

The formation of a \$100,000,000 investment trust to bring in new capital for California real estate investments is announced by Harry H. Culver, who has just retired as president of the National Association of Real Estate Boards. The investment trust will be known as The Harry H. Culver diversified Trust No. 1010. According to Culver, the purpose of the trust will be to gather millions of dollars in capital and idle funds thru-out the United States by disposing of whole Beneficial Interests Units in the new investment trust, bring that capital to California and invest it wisely under able management, to the end that many thousands of investors who are unable to come to California personally may send their funds to share in its prosperity and future.

Z. O. Field and Roy S. Field, San Jose contractors, operating a co-partnership under the name of Z. O. Field and Son, have filed petitions of voluntary bankruptcy in the Federal Court in San Francisco. Z. O. Field listed liabilities totaling \$15,545, of which \$12,538 was said to be unsecured. The petition of Roy S. Field alleged liabilities of \$11,883, all of which he said was unsecured. The firm was adjudicated bankrupt by Federal Judge F. H. Kerrigan and ordered to appear before M. E. Wright in San Jose February 25.

MEETINGS SCHEDULED TO TALK MONOLITHIC CONCRETE

The first opportunity for concrete contractors who do monolithic concrete work, except those specializing exclusively in the construction of concrete roads and large buildings to get together and talk over ways of increasing business will be afforded by the meetings planned by the Portland Cement Association in the following cities:

San Francisco, March 5, Palace Hotel, Parlor A, 7:30 P. M.
Oakland, March 7, Builders' Exchange, 7:30 P. M.

Sacramento, March 11, Hotel Sacramento, Gold Room, 7:30 P. M.

These meetings are to be informal presentations of material gathered from 1,000 leading contractors which shows how they are solving their local problems, developing new markets and increasing business.

One of the men who made this extensive survey will lead the discussions which will be well illustrated.

This is a fine opportunity for concrete contractors to get together in the way other contracting groups have been doing for a long time. These meetings should be well worth while.—Editor.

ANDREW M. JENSEN, FRESNO CITY ENGINEER, RESIGNS

Andrew M. Jensen, city commissioner of public works of Fresno, for the past five years, has resigned to enter private practice. Jensen will maintain headquarters in San Francisco and will specialize in municipal engineering.

During his term of office, Jensen fathered the move for the municipal purchase of the Fresno system of the California Water Service Company following purported threats by the water company to install meters and raise water rates.

Jensen is a native of Fresno and a graduate of Fresno schools and the University of California. In addition to his local public office, including a term as deputy city engineer in 1913, Jensen served as city engineer of Clovis and Fowler from 1919 to 1925.

After graduating from the University of California in 1917, he entered private engineering practice here. He was a member of a special engineering commission to report on the Fresno City sewage disposal problems in 1922, making the minority report which was adopted by the city.

Jensen was first elected commissioner of public works in April, 1923 and re-elected again in April, 1929.

LUMBER CHIEF PASSES

Chas. A. Weyerhaeuser, 66, millionaire lumberman and controller of the nation's greatest soft timber resource died Feb. 15 in Bombay, India, according to word received at his office at St. Paul, Minn.

The Weyerhaeuser Timber Company, which was founded by Charles A. Weyerhaeuser, is one of the greatest in the United States, with extensive holdings in Minnesota, Washington, Idaho and Oregon. In addition, the Weyerhaeuser Company is the third largest timber owner in Modoc County, being exceeded by the Pickering and Red River Lumber Companies.—Editor.

A new electrical ordinance, similar to that in effect in Burlington, N. C., providing for the installation of conduit in business and apartment buildings instead of loom tubing, is being considered by the San Mateo city council.

ALONG THE LINE

Draper Fowler, 86, former architect of Fresno, died in that city February 7. He was a native of England.

Donald K. Lippincott, formerly associated with Chas. S. Evans, patent attorney of San Francisco, has gone into business for himself as a patent attorney and consulting engineer with offices in the Mechanics Institute Building, 57 Post St., San Francisco.

George J. Rorter has opened offices in the Cunard Building, San Francisco, offering a construction engineering service for highway and bridge contractors, making preliminary reports and furnishing material lists on work which has been advertised for bids.

California Sewage Works Association will meet in Chico April 21 to inspect that city's sewage disposal plant. The inspection of the Chico plant is in connection with a trip being made to Davis farm, Lodi and other points.

Robert B. Chandler, county surveyor of Santa Clara county, has been named a member of the Santa Clara County Planning Commission. Eight other businessmen of the Santa Clara Valley make up the commission.

Frank J. Mellor, building inspector of Pittsburg, Calif., has submitted his resignation to the city council. He will accept the position of traffic manager for the Coos Bay Lumber Company at Bay Point. Robert L. Heck, superintendent of the Pittsburg Municipal Water Department, will take over the office of building inspector.

J. G. McMillan has been elected president of the Santa Clara County Society of Civil Engineers and Surveyors. Mark Thomas was elected vice-president and Earl Telfer, secretary. The outgoing officers are R. E. Hackley, president; Ray Fisher, vice-president, and Percy McMillan, secretary.

H. D. Severance, city engineer of Monterey, has been released by order of the court as a defendant in the suit for \$132,000 brought against the city engineer, the city of Monterey, R. M. Dorton, city manager of Monterey, and the Pacific Gas & Electric Company by Lawrence Leslie. Severance prepared the plans for the back stop which Leslie was helping erect when it came in contact with a high voltage electric circuit. He was charged with contributory negligence. The court held that Leslie had insufficient grounds for action.

J. E. Mackie, former secretary of the Pacific Coast Building Officials Conference, and at present on the Trade Extension staff of the National Lumber Manufacturers' Association, is delivering a series of lectures to approximately 65 of the leading colleges of the United States on the uses of lumber.

Hotel Senator has been selected by the American Society of Civil Engineers as the headquarters for the state convention of that body at Sacramento. The convention will open April 23 and will continue for three days.

TRADE NOTES

Burton Y. Gibson, formerly associated with Wesix, Inc., has joined the sales staff of Listenwaller & Gough, Inc., distributors of electric supplies and equipment.

Robinson Electric Co. announces the opening of new and larger quarters at 136 North Van Ness Ave., Fresno.

Ramsay Manufacturing Co., manufacturers of weather strips and door seals, has opened quarters at 451 Seabright Ave., Santa Cruz. S. R. Ramsay is president of the company.

Pfeiffer Electric Co. has opened shop and office quarters at 1165 Lincoln Ave., San Jose, and will engage in a general electrical business. The company is operated by V. V. Pfeiffer.

Wm. C. Fischer and Otto Freeborn, operating as Fischer & Freeborn, painters and decorators, with headquarters at Mountain View, Calif., announce dissolution of their partnership by mutual consent.

Skeels and Graham Co., Auburn, Calif., has been incorporated with a capital stock of \$200,000. Directors are E. B. Skeels of Auburn, R. J. Graham of Los Angeles, and A. I. Diepenbrock of Sacramento.

T. H. Pugh, for 19 years manager of the Woodlake, Calif., branch of the Spaulding Lumber Co., will retire from business within 30 days, according to word from Woodlake.

Norton-Phelps Lumber Co., of Santa Cruz, has been appointed a distributor of Johns-Manville asbestos roofing. The jobber for the same product in Santa Cruz is the Wood Bros. Company.

H. M. Schaur, manager of the Tracy Lumber Co., at Tracy, has submitted his resignation, effective about March 1. Schaur, according to reports, plans to retire from the lumber business. He will be succeeded at Tracy by Roy E. Burnett, for the past few years manager of the Cash Lumber Company at Tracy.

Incorporation of Herberts Machinery Company, Ltd., with headquarters in Los Angeles, has been filed with the secretary of state. The company, capitalized at \$2,000,000, was formed to engage in manufacturing, merchandising and contracting work. The directors include C. A. Herberts, Los Angeles; S. W. Clawson, Beverly Hills, and Richard A. Turner, South Pasadena.

Transportation problems of the lumber industry of the Pacific Northwest were discussed at a conference of railroad presidents at the Palace Hotel last Wednesday. At the meeting were Ralph Budd, president of the Great Northern Railway; Carl R. Gray, president of the Union Pacific; Charles Donnelly, president of the Northern Pacific, and R. A. Long, chairman of the board, Long View, Portland and Northern railway. Budd said the conference was not prearranged, but held following the coincidence of the different members of the group happening to be in this city.

HERE—THERE—
EVERYWHERE

Standard Gypsum Company of California which was recently reincorporated under Nevada laws, has been authorized by the California State Corporation Department to distribute 21,903 common shares of the Nevada Company to preferred stock holders of the California Company in payment of accrued dividends on preferred stock. It is also authorized to transfer 63,427½ shares of common stock of the Nevada Company to preferred stock holders of the California Company and 46,123 common shares of the Nevada Company to common stock holders of the California Company. The stock of the Nevada Company has a reported value of \$2,776,565.

At the annual California conference of iron, steel and allied interests at Del Monte, Calif., federal restriction on Mexican immigration was mentioned by Frederick J. Koster, vice-president and chairman of the Industrial Committee, as the only weak spot in California's present industrial situation.

Contractors have condemned the practice of engineers and awarding bodies in asking for new sets of bids after figures have been once received. They should be equally vigorous, according to the State Highway Chapter of the A. G. C. in refusing to consider a new set of quotations from manufacturers after all have had one opportunity to bid on any specific order or volume. The buyer should let it be firmly understood that the first price must be the best price.

Contractors have been notified by the San Francisco Board of Public Works that in future San Francisco-made material must be given preference in all municipal construction. This ruling was made in response to a local manufacturer's complaint that Seattle-made bricks costing \$8000 were going to be used in specific order of Alameda boulevard, although an equally good San Francisco product could be supplied at the same price. "All things being equal, there is no reason why contractors should go out of San Francisco for materials," was the Board's decree.

Thirteenth annual convention of the State Building Trades Council of California will be held in Sacramento during the week beginning Monday, March 17. The convention will be held in the Sacramento Labor Temple and will be attended by more than 300 delegates from every section of the state. Among topics slated for discussion are: Immigration, stimulating the building industry, constructive legislation, vocational education, standardizing working conditions and wage scales, organizing.

The American Association of Engineers has started a drive to rid the nation of what members of the group term "fake technical, trade and correspondence schools which are operating flagrantly in all parts of the country." H. A. Wagner, president of the association, announced that the organization hoped "to expose and rid the nation of these flourishing educational crooks, especially those operating in the technical and engineering field."

PROPERTY SUBJECT TO LIEN

By HARRY C. WESTOVER, Attorney-at-Law

This is the fifth of a series of articles on the California Mechanics' Lien Law as prepared by Harry C. Westover, attorney of Santa Ana, Calif. Other articles will appear from time to time.—EDITOR.

Section 1183 of the Code of Civil Procedure provides that "all persons performing labor upon or bestowing skill or furnishing materials to be used or consumed in or contributing to the construction, alteration, addition to or repair either in whole or in part of any building, wharf, bridge, ditch, flume, aqueduct, well, tunnel, fence, machinery, railroad, wagon road, or other structure or other work of improvement shall have a lien upon the property on which they have bestowed labor or furnished materials for the value of such labor done and materials furnished," and that "included within the meaning of the word 'improvement' shall be any seeding, sodding, or planting for landscape purposes or the demolition of buildings thereon or the removal of buildings therefrom made or done on such real property," shall have a lien upon the property upon which such labor or materials were used or furnished.

From the above it would seem that liens could be attached to any property on which such work had been done or materials furnished. Like other sections of the Mechanics Lien Law the section is too broad and although labor may be done and materials may be furnished, nevertheless liens cannot attach on all property.

Property is divided into two classes: Public and private property. Public property is property owned by the Government, State, County, School district, or other public sub-divisions. Private property is property owned by private individuals or private corporations or associations. Public property cannot be subjected to liens. Public debts can be paid in only one way; that is by taxation. Revenues obtained by taxation are divided into public funds and one furnishing labor or materials to a public body becomes a creditor of a specific fund and has no rights except with reference to such funds. Consequently a lien cannot be filed against public property.

Although public property cannot be subjected to liens the Mechanics Lien Law has nevertheless provided a way to reach money due on public work to the contractor. This is done by filing with the proper authorities a notice to withhold or what is commonly known as a "stop notice." The notice to withhold or stop notice will be discussed fully at a future date.

Liens may be filed on all kinds of private property, including homesteads. According to Section 1241 of the Civil Code, property set aside under the homestead law is subject to debts "secured by mechanics' contractors, sub-contractors, artisans, architects, builders, laborers of every class material men or vendors liens upon the property."

Section 1185 of the Code of Civil Procedure provides that the land upon which any building, improvement, well or structure is constructed together with a convenient space about the same, or so much as may be required for the convenient use and occupation thereof to be determined by the court on rendering judgment is also subject to a lien. Section 1191 specifically provides for a lien for the grading or improvement for any lot or tract of land and for the construction of streets, sidewalks, etc.

From the very beginning of the Mechanics Lien Law in California there has been considerable discussion as to what was the meaning of the word, structure. Under the Lien Law liens have been allowed on wells, ditches, etc., on the theory that they were structures within the meaning of the Mechanics' Lien Law. The Courts have held that a power line is a structure within the meaning of the Lien Law. In the case of the Western Electric Company vs. Cooley 79 Calif. Appellate 770 the Court stated "the term of other structure as used in the Code of Civil Procedure 1183 is not limited in its meaning to objects which are in kind similar either to a house, wharf, bridge, or wagon road, but includes all objects built upon the soil and in some instances extending beneath the surface of the soil which partakes of the nature of permanency."

Mechanics' Liens are not allowed for plowing and preparing land for crops but are allowed for the leveling and grading of a tract of land where the leveling and grading improves the land. In the case of Thomas vs. Gismegian 66 Cal. Dec. 84 the court held that a party was entitled to a lien for the grading and leveling of a tract of land where the work done so changed the surface of the ground so that it could be irrigated and was a permanent improvement on the land for which it was intended, namely farming by irrigation.

If a lien attaches to private property the question immediately arises as to what amount of private property the lien attach besides the actual ground on which the building or structure is located. Is it possible to lien a ten acre ranch for a house built on one corner of the ranch or must the lien claimant designate that portion of the ranch occupied by the house? In the case of Western Well Works vs. California Forms Co. 214 Pac. 491 the Court stated "In determining the amount of land necessary for the convenient use of an irrigation well, consideration should be given to the amount of land to be improved or benefited." In this case it was held that the limitation of a lien for work in constructing an irrigation well having when completed a capacity of 2,000 gallons per minute, to a circle of ground one hundred feet in diameter around the well was too narrow. "In determining the extent of a lien under 1185 C. C. P., the use for which the improvement was constructed, and not the use to which the land adjoining the improvement was to be put is the determining factor. The market value of improved land is not an element which the court is required to take in consideration and determining the extent of the lien."—Gregg vs. H. & M. Drilling Company—56 Cal. Appl. Dec. 510.

The land which is included in the term "convenient space or so much as may be required for the convenient use and occupation" is wholly a question of fact and varies in every case. The court must determine at the time of the trial the extent of the land covered by the terms convenient space and convenient use and occupation.

The land necessary for the convenient use and occupation of a dwelling house does not include a surrounding tract of several acres used for agricultural purposes although it is in one body; neither the productiveness of the soil nor the profits derived from its cultivation being material elements in determining the amount of land necessary for convenient use and

occupation. Gowan vs. Griffith 41 Pac. 42.

The use to which a building may be put may determine the land necessary to its convenient use and occupation. But this does not include adjacent area or structures necessary merely to create business or custom or furnishing supplies for the enterprise conducted in the building. The term "convenient use and occupation" means such space or area of land as is necessary to the enjoyment of the building for the purpose in view of its construction and the uses to which it is to be put, must manifestly many times determine the quantity of land necessary to the convenient use and occupation thereof." Tunis vs. Lakeport Assoc.—33 P-63.

TRADE LITERATURE

The Division of Simplified Practice of the Bureau of Standards, Department of Commerce, has just announced the availability of the printed booklet on the revised simplified practice recommendation for Lumber. A noteworthy feature of the present edition of this recommendation, copies of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., for 30 cents each, is the addition of approximately 200 illustrations, in perspective, of American Standard Moldings. These illustrations show true cross-sections drawn to actual scale and have imposed upon them the correct size and serial number. Hence, they can be used directly for design in both the manufacture and the specifications of moldings.

GROWTH OF LOS ANGELES HELD NEED FOR SKYSCRAPERS

Los Angeles must grow upward if it is to grow outward.

Skyscrapers in its commercial area are a necessity if its objective of becoming the largest city in the world in 50 years is to be realized. Charles F. Abbott, executive director of the American Institute of Steel Construction of New York, told delegates to the annual California conference of iron, steel and allied interests at Del Monte, Feb. 14.

In answer to an address given by William A. Simpson of the Los Angeles Chamber of Commerce, Abbott said that the steel industry would not profit by a loftier skyline in Los Angeles, because lighter steel is used in the upper stories than nearer the base. Steel sold in Los Angeles at present, he said, is "sprawled all over the county" instead of concentrated in the mid-town sector.

The institute he represents recently completed a survey showing that 65 stories was the correct economic height of a building located on land worth \$200 a square foot, Abbott said, adding that Los Angeles contains much downtown property valued at \$175 to \$250.

"If Los Angeles' building restrictions may be abrogated in favor of municipal buildings," Abbott asked, "why is it not fair to revise them to save the individual taxpayer and the public large losses inevitable under the present system?"

An open competitive examination for the position of assistant county architect, salary \$350 to \$400 a month, is announced by the Los Angeles County Civil Service Commission. Applications must be filed not later than February 28, March 7 is that date for the examination.

Building News Section

APARTMENTS

Plans Being Completed.
APARTMENTS Cost, \$75,000
SAN FRANCISCO. Cervantes & Scott Streets.
Three-story and basement frame and stucco apartments with tile roof (18 2- and 4-room apts.)
Owner and Builder—Ben. Liebman, Scott and Prado Sts.
Architect—Irvine & Ebbets, Call Bldg.
Sub-bids will be taken in about two weeks. Will contain all modern conveniences, including steam heat, hot water system, etc.

CARMEL, Monterey Co., Cal.—Hugh W. Comstock, Carmel, has purchased a site at Dolores and Seventh Ave. and will have plans prepared for a modern structure to contain stores on the ground floor with apartments above. The site is 80 by 100 ft. Will be of Spanish type of architecture. The site purchase and building will involve an expenditure of \$100,000.

Contract Awarded.
APARTMENTS Cost, \$375,000
LOS ANGELES, Cal. No. 625 S. Coronado Street.
Thirteen-story Class A reinforced concrete apartments (70x121 ft).
Owner—Tower Investment Syndicate.
Contractor—E. Leo Callahan.
Engineer—A. P. Callahan, 518 S. Carondelet St., Los Angeles.

Completing Plans.
APARTMENTS Cost, \$330,000
LOS ANGELES, Cal. SE Hobart Blvd and Sixth Street.
Nine-story, basement and sub-basement Class A reinforced concrete apartments (63x150 feet).
Owner—A. H. Kornblum.
Architect—Arthur I. Rouda, Lissner Bldg., Los Angeles.

Preparing Sketches.
APARTMENTS Cost approx. \$100,000
BERKELEY, Alameda Co., Cal. Location withheld.
Three-story frame and stucco apts.
Owner—Name Withheld.
Architect—E. L. Snyder, 2101 Shattuck Ave., Berkeley.

Contract Awarded.
APARTMENTS Cost, \$150,000
SEATTLE, Wash. 519 W Roy St.
Three-story, basement and sub-basement concrete and brick (54) apts. 126x104-ft.
Owner—Eastern Realty & Inv. Corp. Designer and Builder—Michael Leder, 701 McDowell Bldg., Seattle.

Plans Being Prepared.
APARTMENTS Cost, \$650,000
SAN FRANCISCO. California and Joyce Sts.
Sixteen-story class A steel frame and reinforced concrete apt. bldg. (399 rooms).
Owner and Builder—Marian Realty Co., 110 Sutter St.
Architect—H. C. Baumann, 251 Kearny Street.

To Be Done By Day's Work.
APARTMENTS Cost, \$60,000
SAN FRANCISCO. NE 11th Ave. and Kirkham St.
Three-story frame and stucco (30) apartments.

Owner & Builders—Ocean Const. Co., care Mortgage Agency Co., Russ Bldg.
Architect—None.

Plans Being Prepared.
APARTMENTS Cost, \$73,000
ALAMEDA, Alameda Co., Cal. NW Santa Clara Ave. and Caroline St.
Three-story and basement frame and stucco apartment (six 2-room, six 3-room and six 4-room apts.; all modern conveniences).
Owner—Blaine & Co., 369 Pine Street, San Francisco.

Plans by Owner.
City Planning Commission is meeting Feb. 26 to consider re-zoning district in which this structure will be located. If favorable consideration is given, bids will be called for.

Segregated Fluges Being Taken.
APARTMENTS Cost, \$210,000
OAKLAND, Alameda Co., Cal. 29th and Summit.
Six-story class C steel frame and concrete apartment building (144 rooms; garage for 30 cars).
Owner—Wm. Richardson, 506 15th St., Oakland.
Architect—W. Doctor, 506 15th Street, Oakland.
Owner taking segregated bids.

Sub-Contracts Awarded.
APARTMENTS Cost, \$150,000
SAN FRANCISCO. Ellis Street west of Larkin St.
Six-story class C steel frame and concrete apartments (40 two-room apts.)
Owner and Builder—J. G. Kincannon, 1706 Geary St.

Architect—H. C. Baumann, 251 Kearny Street.
Concrete—Bay Concrete Company, 365 Ocean Ave.
Structural Steel—Golden Gate Iron Works, 1541 Howard St.
Reinforcing Steel—W. C. Hauck Co., 61 Bluxome St.
Lumber—Smith Lumber Co., Fourth and Channel Sts.

BONDS

JAMESTOWN, Tuolumne Co., Cal.—Jamestown School District defeats proposal to issue bonds of \$17,243 to finance erection of a new school to replace structure destroyed by fire last year. The vote was 91 in favor and 74 against, a two-thirds majority being required to carry.

A Demonstration of the SKILSAW PORTABLE ELECTRIC HAND SAW

Will solve your cutting problems.
(Four Models, 1/2 to 1 h. p.)

ELECTRIC HAMMERS
ELECTRIC DRILLS
GRINDERS, BUFFERS

PETER H. NELSON

Labor Saving Portable Electric Tools.

1222 Mission St. Underhill
San Francisco 1267

FORTUNA, Humboldt Co., Cal.—Election will be held March 7 in Fortuna Elementary School District to vote bonds of \$35,000 to finance erection of a new school. Trustees of the district are: Mary M. Morgan, P. A. Hugo and Francis M. Bruner.

SACRAMENTO, Cal.—Election will be held March 4 in Lisbon School District to vote bonds of \$15,000 to finance erection of a new school. Trustees of the district are: Manuel Enos, Joseph Lewis and Mrs. Mary C. Nevils.

BURLINGAME, San Mateo Co., Cal.—City council sets April 14 as date to vote bonds of \$65,000 to finance erection of a new library and equipment for same.

RED BLUFF, Tehama Co., Cal.—Election will be held April 14 to vote bonds of \$28,000 to finance remodeling of city hall.

ROSEVILLE, Placer Co., Cal.—Second election held in Roseville School District to vote bonds of \$80,000 to finance erection of a new school was defeated Feb. 27. The total vote was 453 of which 347 votes were against the issue.

RED BLUFF, Tehama Co., Cal.—City council sets April 14 as date to vote bonds of \$1,500 to finance improvements at Bidwell Airport.

CHURCHES

Preparing Working Drawings.
CHURCH Cost, \$700,000
SAN FRANCISCO. NE Ellis St. and Taylor St.
Six-story class A church and hotel-apt. building (girls' dormitory, stores, publishing house, etc.)
Owner—Glede Foundation (Mrs. L. H. Glede), 162 Uplands Ave., Berkeley.
Architect—James Plachek, Mercantile Bank Bldg., Berkeley.
Rev. R. W. Rollins will be pastor.
Plans will be ready for bids in about 60 days.

Plans Being Figured.
CHURCH Cost, \$10,000
FRESNO, Fresno Co., Cal.
Church.
Owner—Trinity Lutheran Church, Fresno.
Architect—Butner & Stranahan, Cory Bldg., Fresno and Glikbarg Bldg., Salinas.

Plans Being Figured—Bids Close Mar. 1st, 3 P. M.
CHURCH Cost, \$26,000
WATSONVILLE, Santa Cruz Co., Cal.
Two-story reinforced concrete church building with tile roof.
Owner—Japanese Presbyterian Church.
Architect—Rollin S. Tuttle, Box C, Los Gatos.

Will contain church auditorium, social hall and Sunday school. Plans are on file in architect's office, and Mr. H. K. Sakata, 233 1st St., Watsonville, chairman of building committee.
Bids are being taken for a general contract with separate bids for warm air heating system.

Plans Being Figured.
CHURCH Cost, \$80,000
POMONA, Los Angeles Co., Cal. Glibba and Center Street.
 Three-story frame and stucco church.
 Owner—First Presbyterian Church of Pomona.

Architect—Marsh, Smith & Powell, Architects Bldg., Los Angeles.
Foundation—Campbell Constr. Co., Ontario.

Preliminary Plans Being Prepared.
CHURCH Cost, \$40,000
WATSONVILLE, Santa Cruz Co., Cal. One and two-story frame and stucco church.

Owner—First Methodist Episcopal Church (Rev. David Ralston, Pastor).
 Architect—Rollin S. Tuttle, Box C Los Gatos.

Campaign is now under way to finance construction.

EUREKA, Humboldt Co., Cal.—Methodist Church congregation has called a special meeting to consider proposals to sell the present church site at Third and H streets and apply the proceeds of the sale together with other monies toward the erection of a modern edifice on a new site.

Plans To Be Prepared.
CHURCH Cost, \$—
WILLOW GLEN, Santa Clara Co., Calif. W Lincoln Ave. near Nevada St.

Two-story Spanish type church to seat 180.
 Owner—First Christian Church.
 Architect—Blinder & Curtis, 35 W San Carlos St., San Jose.

FACTORIES AND WAREHOUSES

SALINAS, Monterey Co., Cal.—Fred McCrary, Salinas, at \$1219 awarded contract by city council to construct storeroom at the rear of the firehouse. F. C. Carlson or by other bidder at \$1425.

Plans Completed.
BOTTLING PLANT Cost, \$50,000
BURLINGAME, San Mateo Co., Cal. Two-story reinforced concrete bottling and pasteurizing plant.
 Owner—Withheld.
 Architect—Wm. H. Toepke, 71 New Montgomery St., San Francisco.
 Bids will be called for shortly.

RICHMOND, Contra Costa Co., Cal.—B. R. Brown, in charge of buildings and construction for the Ford Motor Co., 3674 Schaefer Road, Dearborn, Mich., advises Daily Pacific Builder that plans in connection with the proposed Ford plant at Richmond are at present only in the preliminary stage. No contract for the structure has been let. It is the company's intention, according to Brown, to send out drawings and specifications and receive competitive figures on all branches of the work.

Architect—None.

MENDOCINO COUNTY, Cal.—Until February 27, 2 P. M., bids will be received by F. W. Hazelwood, District Engineer, District No. 1, Eureka, to construct rubble masonry retaining walls on approximately 2.5 miles north of Bridges Creek.

OAKLAND, Cal.—San Leandro Rock Co., at \$90 cu. yd. awarded contract by City Port Commission to furnish at Municipal Airport, 5,000 cu. yds. quarry waste. Central Coast Co., at \$1.04 cu. yd. awarded contract to furnish 5,000 cu. yds. crushed rock, same delivery point.

REDWOOD CITY, San Mateo Co., Cal.—County Surveyor G. A. Kneese preparing plans for swimming "dam" at County Memorial Park.

SAN FRANCISCO—Bids will be asked shortly by Board of Public Works, S. J. Hester, Secretary, for installing approximately 60,000 pedestrian lane markers, 1000 traffic turning buttons, removing and installing 500 traffic turning buttons, installing 1000 plain safety zone buttons, installing 200 reflector type safety zone buttons, replacing approximately 400 reflector type safety zone buttons with buttons containing whole reflectors, hauling buttons to Corporation Yard, and replacing broken reflectors with new ones. Further mention will be made of this work when date for bid opening is officially set.

Bids Wanted—To Be Opened Feb. 27, 12 Noon.

STATION Cost, \$—
SAN FRANCISCO. Children's Playground, Golden Gate Park. One-story convenience station. Owner—City and County of San Francisco (Park Commission).

Architect—None.

Separate bids are being taken for roofing, tile, wall tile, terrazzo flooring, toilet partitions, hardware, and plastering. Plans obtainable from office of Park Commission, Park Lodge, Golden Gate Park.

SAN FRANCISCO—Until February 26, 2:30 P. M., bids will be received by Board of Public Works to furnish and deliver a portable gravel plant for the Coast Range Division of the Hetchy

Hetchy Water Supply System, under Contract No. 121. Bond in the sum of one-half the amount of the contract price required of the successful bidder. Certified check 10% payable to clerk of the Board of Supervisors required with bid. Spec. obtainable from the Bureau of Engineering, 3rd floor, City Hall, on deposit of \$5, returnable.

RID BLUFF, Tehama Co., Cal.—E. E. Stevens, superintendent of the Municipal Water Department, directed to arrange for painting the new 250,000-gal. water tank and the two old 125,000-gal. tanks. Graphite and aluminum paint will be used.

RICHMOND, Contra Costa Co., Cal.—Richmond Tennis Club has petitioned the city council to construct additional courts in various sections of the city. Referred to City Manager J. A. McVittie for report.

SAN FRANCISCO—Board of Public Works has extended the time for opening bids to rehabilitate the Stockton Street Tunnel to March 5, 2:30 P. M. Bids were originally scheduled to be opened Feb. 19. Under the first original bid call J. W. Cobby submitted the low bid at \$21,973. This was rejected. The project involves waterproofing, lighting and general repairs. Plans are obtainable from the Bureau of Engineering, 3rd floor, City Hall.

SUB-CONTRACTOR IS WORTHY OF CONSIDERATION

When it comes to a building or construction project, the sub-contractor is just as important a cog in the general scheme of things as the architect or the general contractor, and yet he is the one usually given the least consideration and most abuse.

As to the importance of the sub-contractor none will dispute the fact that he is largely instrumental in landing a contract for the general contractor. Collectively, the sub-contractors furnish the general contractor the basic figures for his ultimate bid on a project. If the sub-contractor figures are high, it stands to reason the general figure will also be high. On the other hand, if the sub-trade bids are low, the general will also be low, undoubtedly resulting in a contract award.

When a sub-contractor has furnished his best figure and through it the general contractor has been able to land a contract, the "poor" sub-contractor feels that he is entitled to his share of the spoils without further bid revision or delay. As matters stand at the present, there are a number of general contractors who keep sub-contractors calling week after week and month after month to see if they will get their share of the work.

Now, if the sub-contractor invests his time, experience, knowledge, and money for the general contractor before the contract is awarded, certainly he should not be forced to waste his time after the award. He should be told openly just where his bid stood and not asked to wait until new bids are obtained elsewhere. Procrastination of this sort inflicts a handicap on the plumber, the painter, the electrician, the plasterer and a host of others making up the legion of sub-contractors.

Someday, the bid-peddling, procrastinating general contractor will find himself in a serious predicament, when the sub-contractors have banded together and have refused to figure a job. And, it will come to that.—(Journal of Commerce, Los Angeles).

Engineering News Section

BRIDGES

CHICO, Butte Co., Cal.—City Manager Harry H. Hume is preparing estimates of cost to widen Broadway bridge over Little Chico Creek, declared "a traffic hazard."

SISKIYOU COUNTY, Cal.—Following three low bids received Feb. 13, by State Highway Commission to construct a reinforced concrete bridge at Station 296+75.25, about 5½ miles north of Yreka, consisting of one 200 ft. open spandrel arch span and three 40 ft. girder approach spans:

Jacobs & Pattiani, 337 17th St., Oakland \$71,548
H. E. Doering, Portland, Ore..... 71,990
Fred J. Maurer & Son, Eureka 74,985

SAN JOAQUIN CO., Cal.—As previously reported, bids will be received by State Highway Commission March 12, to construct a reinforced concrete girder bridges between Lodi and Stockton, one across Calaveras river, consisting of three 34-ft. spans; a second across Mosher creek, consisting of three 27-ft. spans; a third across Bear creek, consisting of three 30-ft. spans; and another across Live Oak creek, consisting of two 30-ft. spans. Project involves 1750 cu. yds. rdwy. excav. (detours); 2515 cu. yds. strucc. excav.; detour bridges, complete; remove existing bridges; 275 tons crushed gravel or stone (detour surfacing); 1468 cu. yds. class A cem. conc.; 31 cu. yds. class E cem. conc.; 240,000 lbs. reinf. steel; 1540 pounds phosphor bronze expan. plates; 1 lot miscellaneous items of work.

VALLEJO, Solano Co., Cal.—Louis Tagnon, Vallejo, at \$2654 awarded contract by city to construct a reinforced concrete culvert with wood pile foundation on Sonoma street extension near the northwestern line of the Southern Pacific R. R. right-of-way.

OROVILLE, Butte Co., Cal.—Until March 3, 2 P. M., bids will be received by C. F. Belding, county clerk, to construct concrete bridge over Clear Creek near the Lewis place on Clark road. Certified check of 10% required with bid. Plans obtainable from clerk and from County Road Engineer J. A. Baumgarner.

OROVILLE, Butte Co., Cal.—Until March 3, 2 P. M., bids will be received by C. F. Belding, county clerk, to construct small concrete bridge over a slough near Lewis place on Clark rd. Certified check of 10% required with bid. Plans obtainable from county clerk and County Road Engineer J. A. Baumgarner.

INDIO, Riverside Co., Cal.—Southern Pacific Co. engineers are replacing the old wooden bridges east of Thermal and west of Indio with new steel structures, each consisting of six 80-ft. spans. L. U. Morris, superintendent, is supervising the work.

STOCKTON, San Joaquin Co., Cal.—Ralph Hunter, at \$7200 awarded contract by county supervisors to re-flood the Old River Bridge on the Borden Highway. Other bids were: E. R. Stokes, \$7339; M. E. McGowan, \$8187. Bid of Carl Nelson at \$7155 was not considered due to his failure to

file bids with the supervisors of both San Joaquin and Contra Costa Counties, who will finance the work.

VALLEJO, Solano Co., Cal.—San Francisco, Napa and Calistoga Railroad Co. has informed the city council that the company is willing to pay one-half the expense of renewing the Sacramento street bridge north of Vallejo, provided the cost does not exceed \$13,000. The railroad company has advised the council that an estimate of \$12,275 has been made in addition to \$525 for paving. The matter has been referred to Frank Brew, city commissioner of public works for report.

STOCKTON, San Joaquin Co., Cal.—State Railroad Commission has authorized Southern Pacific R. R. to construct a subway on the Lower Sacramento Road near Woodbridge to be known as the "Forest Lake Underpass." It is tentatively understood that the county and r. r. will share the cost of construction equally.

WOODLAND, Yolo Co., Cal.—Bids will be asked about March 3 by the county supervisors to construct a bridge over Adams Canal of the Clear Lake Water Company at the intersection of the road near Capay. The structure will cost \$2000.

SANTA CRUZ, Santa Cruz Co., Cal.—County Surveyor Lloyd Bowman making surveys for underpass at Southern Pacific Chittenden railroad crossing, to be financed jointly by the county and the Southern Pacific Railroad.

HUMBOLDT CO., Calif.—Following bids received Jan. 19 by State Highway Commission to construct under-grade crossing under tracks of Northwestern Pacific Railroad at Loleta, consisting of a 60-ft. deck plate girder span on concrete piers with pile foundations:

F. J. Maurer & Son, Eureka.....\$10,880
Smith Bros. Co., Eureka..... 11,586

DREDGING, HARBOR WORKS & EXCAVATIONS

PEARL HARBOR, T. H.—See "Government Work and Supplies," this issue. Bids wanted by Bureau of Yards and Docks, Navy Department, for reinforced concrete pier, quays and bulkheads, including piping and electrical work at Pearl Harbor.

Hard Boiled Hats

protect the head from falling tools, rivets, etc.

BULLARD-DAVIS, Inc.

SAN FRANCISCO LOS ANGELES
275 8th St. 800 W. 11th St.
Market 2322 Westmore 4179

MARTINEZ, Contra Costa Co., Cal.—Chamber of Commerce has submitted proposal to city council to construct a yacht harbor to accommodate fishing craft, the Chamber to repay the city the sum of \$8,000 for the improvement within a period of 11 years.

CORONADO, San Diego Co., Cal.—The city planning commission has adopted plans for a \$250,000 harbor improvement project as planned by E. A. Ingham, superintendent of operation. Under this plan, the turning basin in Glorietta Bay will be enlarged from a 200 ft. radius to 1000x2000 ft., with extensive dredging to provide a depth of 10 ft. or more over the entire bay, with bulkheads, parking areas, etc. The project and plans will probably be placed before the city council in the near future.

IRRIGATION PROJECTS

TURLOCK, Stanislaus Co., Calif.—J. E. Auldred, Turlock, at \$6136.18, awarded contract by Turlock Irrigation District for cement lining of canals in Improvement District No. 5, under Schedules Nos. 1 and 2. Ed. Erickson, Turlock, next low at \$6363.13

TURLOCK, Stanislaus Co., Calif.—Until March 10, 1:30 P. M., bids will be received by Anna M. Sorenson, secretary, Turlock Irrigation District, for canal lining and miscellaneous improvements in Improvement Districts Nos. 13, 23, 30 and 40. Plans on file in office of secretary.

TURLOCK, Stanislaus Co., Cal.—Until March 10, 2 P. M., bids will be received by Anna M. Sorenson, Secretary, Turlock Irrigation District, for construction in Improvement District No. 13, involving under:

Schedule No. 1
Section 1—74,888 sq. ft. 2-in. concrete canal lining;
Section 2—33,147 sq. ft. 2-in. concrete canal lining.

Schedule No. 2
Construct approximately 100 concrete structures, involving a total of 107.6 cu. yds. concrete. (Will be paid for in cash by property owners benefited).

Bond of one-half of the contract price required of successful bidder. Certified check 5% payable to district required with bid. Specifications obtainable from secretary.

TURLOCK, Stanislaus Co., Calif.—Until March 10, 2:30 P. M., bids will be received by Anna M. Sorenson, secretary, Turlock Irrigation District, for construction in Improvement District No. 40, involving under:

Schedule No. 1
Section 1—48,088 sq. ft. 2-in. concrete canal lining;
Section 2—14,850 do;
Section 3—1,860 do;
Section 4—14,350 do;
Section 5—14,680 do.

Schedule No. 2
Construct 253 lin. ft. concrete canal lining to be raised approx. 6 inches.

Schedule No. 3
Construct 971 lin. ft. 24-in. diameter concrete pipe.

Schedule No. 4
Construct 23 concrete structures, involving 24.36 cu. yds. concrete, (this

work will be paid for by property owners benefited.)

Bond of one-half of the contract price required of successful bidder. Certified check 5% payable to district required with bid. Spec. obtainable from secretary.

TURLOCK, Stanislaus Co., Calif.—Until March 10, 2:30 P. M., bids will be received by Anna M. Sorensen, secretary, Turlock Irrigation District, for construction in Improvement Dist. No. 28, involving under:

Schedule No. 1

Section 1—10,572.00 sq. ft. 2-in. conc. canal lining.

Section 2—13,478.00 do;

Section 3—5,751.84 do;

Section 4—7,176.00 do.

Schedule No. 2

Construct approximately 12 concrete structures, involving 13.55 cu. yds. concrete. (Work will be paid for in cash by property owners benefited.)

Schedule No. 3

Construct one wooden bridge, involving 832 B.F.M. (This work will be paid for in cash by property owners benefited.)

Bond of one-half of the contract price required of successful bidder. Certified check 5% payable to district required with bid. Spec. obtainable from secretary.

TIA JUANA, Mex.—Governor Jose Maria Tapia has announced that about \$2,500,000 will be expended on irrigation works in the Tia Juana valley following the completion of the Rodriguez Dam across the Tia Juana river. The government plans to organize a colony of 3000 Mexicans and to install American methods and farm machinery. It is probable that an agricultural school will be built.

STREET LIGHTING SYSTEMS

FRESNO, Fresno Co., Cal.—Proceedings have been started by the city council to install 46 electroliters in Fresno and North Fresno Sts., between O and Belmont Aves., and an unestimated number in Stanislaus St. from Van Ness Ave. to Blackstone Ave., and in Blackstone Ave. from Stanislaus to Olive Ave. As previously reported, proceedings are under way for similar installations in R and Merced Sts. Property owners, in each instance, have petitioned for the work. Andrew M. Jensen is city engineer.

NEVADA CITY, Nevada Co., Cal.—City trustees are conferring with Pacific Gas & Electric Co. in connection with proposed new street lighting system.

REDWOOD CITY, San Mateo Co., Cal.—City council has started proceedings for ornamental lighting system in Broadway, Brewster and Hopkins Aves., west of El Camino Real to Jeter St. Will be one-light standard. C. L. Dimmitt, is city engineer.

MODESTO, Stanislaus Co., Calif.—City Engineer Frank Rossi preparing estimates of cost for ornamental street lighting system in H St. bet. 9th and 12th Sts., property owners having petitioned for the work.

LOS ANGELES, Cal.—Underground Const. Co., 2210 Hyperion St., submitted low bid to the county supervisors at \$83,864 to construct lighting system in Las Tunas Drive and other streets, Tract 6561 in C. I. No. 903, involving 306 Union Metal standards.

LOS ANGELES, Cal.—Underground Const. Co., 2210 Hyperion St., awarded contract by county supervisors at

\$83,864 for lighting system in Las Tunas Drive and other streets. Tract 6561, in C. I. No. 903, involving 306 Union Metal standards.

LOS ANGELES, Cal.—D. S. McEwan, 3018 Lincoln Blvd., Ocean Park, submitted low bid to Board of Public Works at \$22,129 for ornamental light system in La Brea Ave., bet. Franklin and Fountain Aves., involving Union Metal pressed steel posts.

SAN BERNARDINO, Cal.—City Engineer A. H. Lowe, has prepared estimate of cost of proposed lighting system for Base Line St. bet. Waterman Ave. and Mt. Vernon Ave. The cost would be \$52,995.53 and will involve 153 ornamental Marbelite posts.

MODESTO, Stanislaus Co., Calif.—City Council, on petition of property owners, has postponed action indefinitely on the proposal to install an electroliter system in Eleventh St., bet. M. S. and Needham Ave.

SACRAMENTO, Cal.—City Council declares intention (2297) to install ornamental street lighting system in J St., bet. 9th and 10th Sts., consisting of 8 metal electroliters together with underground system. 1911 Act. Bond Act 1915. Hearing March 6. H. G. Denton, city clerk. B. C. Clark, city engineer.

MACHINERY AND EQUIPMENT

HAWTHORNE, Nevada.—Bureau of Yards and Docks, Navy Department, Washington, D. C., is completing Specification No. 6110, for scales for the Naval Ammunition Depot at Hawthorne. The work consists of one 100 ton (200,000-lb.) railroad track scale, one 15-ton (30,000-lb.) motor truck scale and the services of an expert erector to supervise and assist in the installation, all complete. When available, plans and specifications may be obtained from the District Public Works Officer, Room 513, 100 Harrison St., San Francisco, Calif., upon deposit of \$10.00 check or money order payable to the Chief of the Bureau of Yards and Docks.

MADERA, Madera Co., Calif.—Until February 25, 8 P. M., bids will be received by John Page, clerk, Ripperdan School Dist., Route 3, Box 146, Madera, to furnish and deliver one Model AA new Ford 1 1/2 ton truck chassis equipped with Fab Extension frame No. 60, overload springs, dual tires rear, size 32x8, single tire front, size 32x6, one spare tire and one Patchetts and Carstensen school coach body No. 197 C. G. Certified check 10% required with bid. Further information obtainable from clerk.

RIVERBANK, Stanislaus Co., Calif.—City council has approved a \$500 to finance purchase of light motor truck, equipped with a pump for drawing water from mains. Bids will be asked at once by G. C. Staley, city clerk.

OAKLAND, Cal.—Until February 26, 8 P. M., bids will be received by John H. Kimball, Secretary, East Bay Municipal Utility District, 512 16th St., to furnish and deliver one 1 1/2-ton truck chassis. Turn-in allowance on Dodge Commercial motor No. 814225 will be considered. Specifications obtainable from secretary.

OAKLAND, Cal.—Pacific Coast Engineering Co., foot of 14th St., Oakland, at \$8,468 submitted low bid to City Port Commission to furnish dredge hull and ladder pipe. General Engineering and Drydock Co., Oakland, at \$9,120 only other bidder.

STOCKTON, San Joaquin Co., Cal.—County Supervisors authorize the purchase of a scarifier with 10 ft. blades. Julius Manthey is county surveyor.

FRESNO, Fresno Co., Cal.—Until February 20, 2 P. M., bids will be received by R. J. Carlisle, superintendent of equipment, Department of Public Works, Division of Highways, 645 West Olive Ave., Fresno, for the purchase of the following used equipment, no longer required by the Fresno Division:

2—Liberty 3 1/2 Yard Dump Trucks

CHC No. 1851 and 1852.

1—2 Ton Highway Trailer with 500

gallon water tank CHC No. 38.

1—2 Ton Budd Trailer with 2 - 250

Gal. U. S. Signal Corp. tanks,

CHC No. 179.

1—Detroit Mower Attachment for

Fordson Tractor, CHC No. 34.

1—2 Ton Stationary Power Unit Frames.

1—2 Ton Caterpillar Tractor, CHC

No. 266.

1—McCormick Deering 10-20 Tractor

Runby Tired with an Austin 8'

Leaning wheel grader attachment,

CHC No. 105.

1—Fordson Tractor CHC No. 93.

1—BCR 430 Ingersoll Rand Jack-

hammer CHC No. 121.

Successful bidder to take delivery

of equipment upon receipt of notification

from the State Equipment Engineer.

Equipment may be inspected on any

working day at Shop 6 of the High-

way Division, 645 West Olive Ave.,

Fresno.

BERKLEY, Alameda Co., Cal.—Until February 25, 10 A. M., bids will be received by Florence E. Turner, City Clerk, to furnish one five-ton dump truck for use of Street Department. Certified check 10% required with bid. Specifications on file in office of clerk.

SAN FRANCISCO.—Until February 26, 2:30 P. M., bids will be received by Board of Public Works to furnish and deliver a portable gravel plant for the Coast Range Division of the Hatch Hetchy Water Supply System, under Contract No. 121. Bond in the sum of one-half the amount of the contract price required of the successful bidder. Certified check 10% payable to clerk of the Board of Supervisors required with bid. Spec. obtainable from the Bureau of Engineering, 3rd floor, City Hall, on deposit of \$5, returnable.

HEALDSBURG, Sonoma Co., Cal.—Basalt Rock Co. of Napa plans immediate construction of a \$150,000 gravel plant on the Russian river near Healdsburg. Other developments are proposed in construction of the plant, bringing the ultimate expenditure to \$250,000.

RAILROADS

OAKLAND, Cal.—U. S. Steel Products Co., Rialto Bldg., San Francisco, at \$30,926 awarded contract by City Port Commission to furnish track material involved in the construction of the 9th Ave. pier.

SAN BERNARDINO, Cal.—The local offices of the Santa Fe Ry. have announced that work will be started within a month on the double tracking of the Santa Fe Ry. bet. Riverside Junction and Highgrove. Est. cost, \$226,000. The company plans to expend about \$2,000,000 for double track between Winslow and Joseph City, Ariz., about 22 miles. Other work proposed to be started within the next few months is laying of heavy

ler rails between Victorville and Summit.

SAN FRANCISCO—The Western Pacific Ry. has announced that the company will spend \$1,548,000 during 1930 for improvements in California. Approximately \$214,000 will be used for improvements at the San Francisco bay terminals; \$177,000 for new 3-story freight terminal on 7th St. near Brannan; \$37,000 for rail changes, track improvements, and safety devices in Oakland, and the remainder for general betterments and rail improvements.

GILROY, Santa Clara Co., Cal.—Engineering Department of Southern Pacific R. R., is making survey for a double track from Watsonville Junction to Logan, starting at the north city limits of Gilroy, for a distance of approximately 14 miles. A double track from Pomar south to Coyote, a distance of 3½ miles is also proposed.

FIRE ALARM SYSTEMS

SAN MATEO, San Mateo Co., Cal.—Bids will be asked at once by F. W. Foster, city clerk, to install fire alarm system involving 14 boxes in the business section and extending to the Lawrence School; estimated cost \$2700. Specifications on file in office of city clerk.

PITTSBURG, Contra Costa Co., Cal.—City Manager Roy A. Watkins preparing estimates of cost to repair present fire alarm system and for proposed extension of the system into the outlying and the present unprotected districts.

SALINAS, Monterey Co., Cal.—City Engineer Howard Cozens preparing plans for installation of traffic devices at Main and San Luis, Main, Market and El Sausal Sts., and N Main St.

FIRE EQUIPMENT

BURLINGAME, San Mateo Co., Cal.—City Purchasing Agent Frank A. Bloom instructed to call bids to furnish and deliver a "metropolitan type" hook and ladder truck for the fire department; estimated cost \$10,500.

CARMEL, Monterey Co., Cal.—City council will call election shortly to vote bonds of \$15,000 to finance purchase of motor fire fighting truck for volunteer fire department.

SONORA, Tuolumne Co., Cal.—Lions Club and American Legion will request the county supervisors to purchase a fire truck to combat farm and forest fires. The cost of the equipment is estimated at \$4,000.

SAN JOSE, Santa Clara Co., Cal.—City council rejects bids to furnish 2500 ft. 2½-in. high pressure fire hose and the material will be purchased in the open market. John J. Lynch, city clerk.

SAN JOSE, Santa Clara Co., Cal.—City council takes under advisement bids received to furnish four six cylinder truck chassis, as follows: "A" One 1½-ton chassis to replace Chemical No. 1; "B" One 1½-ton chassis to replace Chemical No. 6; "C" One 2-ton chassis to replace Chemical No. 4; "D" One 2-ton chassis to replace Chemical No. 5. Chassis furnished for "A" and "B" to be equipped with cab seats. All chassis shall be equipped with full length running boards and rear fenders. Bids were submitted by San Jose Knight Sales, Garden City Chevrolet Co., George P. Peterson Motor Sales, Osen Motor Co., San Jose Buick Co., Picchetti Bros. & Co., and Henry C. Artana, Inc.

MISCELLANEOUS SUPPLIES AND MATERIALS

MARTINEZ, Contra Costa Co., Cal.—Associated Oil Co. at 4c gal. less than tank wagon prices, awarded contract by county supervisors to furnish and deliver gasoline required for county during the next year. Union Oil Co. awarded contract to furnish oils and greases.

SACRAMENTO, Cal.—City Commission contemplates installation of "stop" signs along H St., between 12th and 31st Sts., and in 12th St., bet. H St. and north city limits. B. C. Clark is city engineer and H. G. Denton, city clerk.

BERKELEY, Alameda Co., Cal.—Until February 25, 10 A. M., bids will be received by Florence E. Turner, city clerk, to furnish and deliver street name signs. Certified check 10% required with bid. Specifications on file in the office of the city clerk.

RESERVOIRS AND DAMS

AVALON, Los Angeles Co., Cal.—William Wrigley Jr. has announced that work will start in the near future on construction of the new Cottonwood Canyon Dam, to be located 0.75 mile from the ocean, above Cottonwood bridge on the highway from Avalon to the Isthmus. The type of dam has not been determined as extensive tests are being made on the formations. Construction will be of either concrete or earth fill. Mr. Kerr with J. B. Lippincott, Los Angeles, who is preparing a preliminary survey, has recommended a medium height dam. The proposed reservoir would have a capacity of 500,000,000 gals. The proposed work involves a pipe line from Cottonwood Dam to the Thompson Dam, about 11,700 ft. in length. Of this 4200 lin. ft. will be pressure pipe, the balance 7½ in. gravity. D. M. Renton, general manager of the Wrigley interests, is in charge of this work.

ANTIOCH, Contra Costa Co., Cal.—City council has acquired the neces-

sary lands for enlargement of smaller dams in connection with the municipal water system to provide an additional 22-million gallons. The main dam will not be raised at this time. E. L. O'Hara, city engineer, will commence plans at once.

BAKERSFIELD, Kern Co., Cal.—Robinson-Roberts Co., Rives-Strong Bldg., Los Angeles, has been awarded the contract by the Petroleum Securities Corp., to construct a reservoir at the Kern River Oil Filed five miles northwest of Bakersfield. The reservoir will be of the earth type with concrete lining and have a capacity of 1,000,000 bbls. The work involves certain pipe lines and the necessary appurtenances.

SOLANO-CONTRA COSTA COUNTIES, Cal.—Martin Judge Jr. & Co., San Francisco seeks authorization of the State Department of Public Works, Division of Water Rights, to build at \$3,000,000 dam and divert water from the north fork of Cache Creek in Lake County for industrial, domestic and irrigation purposes in Solano and Contra Costa counties. The company proposes in its application to divert 175,000 acre feet of water between October 15th and April 15th into a storage reservoir in Indian Valley, which is to have a surface area of 6000 acres and 150,000 acre feet capacity. The dam to retain the water would be 600 feet long and 160 feet high. The district also would be served with power from the project.

PIPE LINES, WELLS, ETC.

HANFORD, Kings Co., Cal.—Felix Oil Co. has announced that it will build a pipe line from the Kettleman Hills to Fresno and Kings County to provide natural gas for operation of pumping plants, boosting water wells and other ranch purposes. The announcement was made by A. F. Nunes, president.

BAKERSFIELD, Kern Co., Calif.—See "Reservoirs and Dams," this issue. Twelve-mile oil pipe line planned in connection with reservoir project.

PALO ALTO, Santa Clara Co., Cal.—Until February 24, 4 P. M., bids will be received by E. L. Beach, city clerk, to construct gravel envelope wall. Spec. obtainable from J. F. Byxbee, Jr., city engineer.

BAKERSFIELD, Kern Co., Cal.—Until March 1 (to be opened March 3, 7 P. M.) bids will be received by W. S. Buchner, secretary, Oldalde Mutual Water Co., to drill 16-in. well a minimum of 300 feet with privilege of stopping between 300 and 500 ft. Further information obtainable from secretary.

SEWERS AND SEWAGE DISPOSAL PLANTS

LOS ANGELES, Cal.—The date for the proposed \$3,400,000 sewer bond issue of County Sanitation District No. 3 has been postponed from April 1. The new date has not been set.

LOS ANGELES, Cal.—Chutuk, Kordich & Vukojevich, 3518 Percy Street, awarded contract by the board of public works at \$145,535.53 to construct sanitary sewers in 13th St. and Lealand St. Sewer District.

SANTA CLARA, Santa Clara Co., Calif.—DeGolyer and Bruce, Federal Telegraph Bldg., Oakland, at \$2,875 awarded contract by city to construct

Member Insurance Brokers' Exchange

1930 FEB 22

SAN FRANCISCO—Louis J. Cohn, 117 Montgomery St., at \$59,334, awarded contract by Board of Public Works to construct 15th St. sewer, Section A from Harrison St. to Howard St. Funds will be provided from the Sewer Bond Issue. Project will involve approx. 940 ft. 6-ft. 6-in. by 8-ft. 6-in. reinf. conc. sewer; 230 ft. 6-ft. reinf. conc. circular sewer; 28,000 sq. ft. wood piling.

LOS ANGELES, Cal.—Until 2 P. M., March 10, bids will be received by the county supervisors for constructing sewers in Eastmont Ave., Brady Ave., Alston St., Flint St. et al. C. I. No. 557, for vitrified sewer system, 9.16 miles in length, estimated to cost \$113,216. The quantities are: 34,550 ft. 8-in. vit. sewer; 7040 ft. 8-in. sewer with concr. cradle; 2900 ft. 10-in. vit. sewer with concrete cradle; 1540 ft. 12-in. vit. sewer; 2330 ft. 12-in. vit. sewer with concrete cradle; 25,100 ft. 6-in. vit. house sewers; 62 flushing manholes; 79 manholes; 17 drop manholes; chambers; 540 ft. 6-in. vit. chimney pipe; 3960 ft. 3/4-in. galv. iron pipe extension to water mains; 2, remove existing inlets in junction chambers of an existing sewer of the county and Tract 5445 trunk sewer of San. Dist. No. 2 and form new channels in bases.

MADERA, Madera Co., Cal.—City council will call election in April to vote bonds of \$20,000 to finance extensions to the sewer system on the north side of the Fresno river, in the southern section of the city and other sections not now served.

REDWOOD CITY, San Mateo Co., Cal.—County supervisors postpone action on proceedings for formation of the proposed \$175,000 North Fair Oaks Sewer District. Further consideration will be given to the proposed project on March 3.

LOS ANGELES, Cal.—Contratto Bros., 2955 Cudahy St., Walnut Park, submitted low bid to the county supervisors at \$136,615 for the construction of sewers in Belvedere Unit No. 2, Blanchard St., Brannick St., Capistrano Way and other streets, C. I. No. 662, involving in the main: 40,430 ft. 8-in. cement sewer; 14,000 lin. ft. 8-in. cement sewer with concrete cradle; 2530 ft. 8-in. cement sewer encased with concrete; 140 ft. 8-in. class B or class 150 DeLavaud cast iron pipe; 620 ft. 12-in. cement pipe sewer with standard concrete cradle; 20 ft. 12-in. cement sewer encased; 2840 ft. 15-in. cement sewer with concrete cradle; 120 ft. 15-in. cement sewer encased; 26,100 ft. 6-in. cement house connections; 20 ft. 6in. cast iron pipe house connections; 76 flushing manholes; 4 double flushing manholes; 133 standard manholes; 40 drop manholes; 9 double drop manholes; 45 junction chambers, etc.

HEALDSBURG, Sonoma Co., Calif.—Until March 3, bids will be received by City Trustees to construct sewers in Mason, Hudson and Front Sts. and in the Ward Addition estimated cost, \$7,000. Plans obtainable from City Engineer A. B. Stuart.

SAN JACINTO, Riverside Co., Cal.—Culjak & Zelko, 2137 City View St., Los Angeles, submitted low bid to the city council at \$71,000 to construct sewage collection system and a sewage disposal system. Koebig & Koehlg, consulting engineers, 821 Rowan Bldg., Los Angeles. The work is to be done under A. & L. No. 1. The approximate quantities are: 40,434 ft. 8-in., 5437 ft. 10-in., and 6620 ft. 12-in.

vit. sewer; 1800 ft. 2-in. galv. iron pipe; 84 10-in. wyres; 256 12-in. wyres; 139 manholes; 18 flush tanks; 1052 8-in. wyres. Disposal plant consisting of pipe, fittings, Imhoff tank, pumping plant, sludge beds, filter beds, industrial filter beds, walks, etc.

BERKELEY, Alameda Co., Calif.—City Attorney Earl J. Sinclair is preparing to fight the application of residents of North Berkeley who seek an injunction to void the contract with J. C. Hickey for the construction of the \$221,000 sewer project. The suit was filed in the court of Superior Judge T. W. Harris court in Oakland by Frank W. Cornish, attorney representing the property owners. Hearing has been set for February 20. The property owners contend the sewer will benefit only two-thirds of the area assessed.

GRASS VALLEY, Nevada Co., Cal.—City trustees contemplate construction of storm drain in the Alta Hill section.

SALINAS, Monterey Co., Cal.—Granite Construction Co., Watsonville, at \$2253.28 awarded contract by city council to construct sewer extension in Summer St. Cogo & Rados only other bidders at \$4406.80.

FRESNO, Fresno Co., Cal.—Until February 27, 10:30 A. M., bids will be received by H. S. Foster, city clerk, (100-D) to construct 6-in. vitrified clay pipe sewer in alleys in Roedings Addition including 3 concrete manholes; 4-in. on 6-in. wyres. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk. A. M. Jensen, city engineer.

SAN JACINTO, Riverside Co., Cal.—Culjak & Zelko, 2137 City View St., Los Angeles, awarded contract by the city at \$71,000 to construct sewage collection system and a sewage disposal system, involving 40,434 ft. 8-in. vit. sewer; 5437 ft. 10-in. vit. sewer; 6620 ft. 12-in. vit. sewer; 1800 ft. 2-in. galv. iron pipe; 84 10-in. wyres 256 12-in. wyres; 139 manholes; 18 flush tanks; 1052 8-in. wyres. Disposal plant consisting of pipe, fittings, Imhoff tank, pumping plant, sludge beds, filter beds, industrial filter beds, walks, etc.

MISCELLANEOUS CONSTRUCTION

LOS ANGELES, Cal.—Until 10 A. M., March 19, bids will be received by the Board of Public Works for the construction of three tunnels and appurtenant work in connection with the Figueroa Street Extension, in accordance with plans prepared by Merrill

Butler, chief bridge engineer, City Hall. The work involves construction of three concrete and tile lined tunnels through Elysian Park, the tunnel to be approximately 46.5 ft. in width by 23 ft. high, of semi-circular shape, of an aggregate length of 995 ft. There will be one 5 ft. walk with a 1 1/2-ft. curb on the opposite side. In addition to the tunnels, the job will include storm drain estimated at about \$30,000, retaining wall, and necessary walks and cement concrete paving. The cost is roughly estimated between \$700,000 and \$800,000.

TORO POINT, San Luis Obispo Co., Cal.—Clearing of the site and construction has been started on a tank farm at Toro Point for the Standard Oil Co. Twelve new storage tanks will be constructed for the storage of oil from the Kettleman Hills district. The tanks will have capacity of from 50,000 to 85,000 barrels.

WATER WORKS

SAN MATEO, San Mateo Co., Cal.—Bids will be asked at once by E. W. Foster, city clerk, to grade and install water pipes in East San Mateo Park district. Plans on file in office of city clerk.

STRATFORD, Kings Co., Cal.—Public Utilities District was formed at a recent election and proceedings will be started at once for an election to vote bonds to finance construction of a water distributing system.

STRATHMORE, Tulare Co., Cal.—Until March 3, 7 P. M., bids will be received by H. B. Kober, Clerk, Strathmore Public Utility District, to construct pumping plant. Specifications on file at W. D. Browning Hardware Store at Strathmore.

STOCKTON, San Joaquin Co., Cal.—City Manager Walter B. Hogan authorized by city council to purchase 20 fire hydrants in the open market, for installation in various sections of the city.

STRATFORD, Kings Co., Cal.—Stratford Utility District was organized at a recent election and proceedings will now be started to vote bonds of \$30,000 to finance construction of wells and erection of tower and water tank for a water supply system.

MERCED, Merced Co., Cal.—Party at Post Office Box 754, Merced, is in the market for a 6-inch centrifugal pump with direct connected motor or deep well turbine; also for a 10-hp. motor. Must be in first class condition.

SAN FRANCISCO

FRESNO, Fresno Co., Cal.—Forkner-Giffen Fig Garden Districts Nos. 1 and 2 have voted to form a water district to construct a domestic supply system. The election carried with it an authority to issue bonds of \$67,000 to finance replacement of wooden water mains with a modern piping system.

CENTERVILLE, Alameda Co., Cal.—Election will be held March 25 in the Alameda County Water District to vote bonds of \$250,000 to finance the purchase of the pumping rights at Alvarado from the East Bay Municipal Utilities District. The bonds would run for a period of 30 years from 1936 with \$10,000 being paid off each year. Chris. Runkel is secretary of the district.

SAN DIEGO, Cal.—Until 10 A. M., March 17, bids will be received by the city council to enlarge the Morena dam and spillway to provide an increased reservoir capacity of 1,000,000 gallons additional. Est. cost \$70,000. Plans were prepared by the city hydraulic engineer, H. N. Savage. Allen H. Wright is city clerk.

WATSONVILLE, Santa Cruz Co., Calif.—Until March 11, bids will be received by City Council to construct water works improvements and extensions under the recently voted \$125,000 bond issue. Further mention will be made of this work. Plans are obtainable from City Engineer H. B. Kitchen.

HANFORD, Kings Co., Cal.—Fairbanks-Morse Co., at \$1,161.85 submitted low bid to city council to furnish and install, complete, motor driven deep well pressure pump, together with motor, tank, switchboard and other accessories. Other bids, all taken under advisement, were: Byron-Jackson Co., San Francisco, \$1,263; Horlock-Clow Co., Hanford, \$1,300; Sterling Pump Works, Stockton, \$1,309.

MOUNTAIN VIEW, Santa Clara Co., Cal.—Dudley DeVellis, 354 Hobart St., Oakland, at \$10,249 awarded contract by city council to construct water reservoir and pump house and install pressure pump and deep well pump with necessary piping to connect to reservoir and existing distributing system.

SAN GABRIEL, Los Angeles Co., Cal.—Until 5 P. M., Feb. 25, bids will be received at the office of the San Gabriel County Water District, 106 N. San Gabriel Blvd. for special O. D. lapweld black pipe asphaltum dipped with plain beveled ends for welding as follows: 2000 ft. 8-in., weight 13.233 per ft.; 8800 ft. 6-in., weight 8.

762 per ft.; 8000 ft. 4-in., weight 5.293 per ft.; two 8-in. hub end gate valves with operating nut; five 8-in. std. screw gates with operating nut; 12 6-in. std. screw gates with operating nut; 15 4-in. std. screw gates with operating nut. Prices are asked for mill shipment, delivered trenchside. Delivery date to be stated.

MONTEREY PARK, Los Angeles Co., Cal.—City Water Superintendent Goe. H. Pash has been authorized by the city council to replace the present 25-hp. motor at the Garvey Ave. well with a 30-hp. motor.

PHOENIX, Ariz.—The \$3,453,000 water and sewer bond issue was defeated at the election Feb. 11.

MONTECITO, Calif.—March 25 has been named as tentative date for a \$200,000 bond election in the Montecito County Water District.

FRESNO, Fresno Co., Cal.—Election will be held today (Tuesday) in Fig Garden Tract to vote on the formation of a water district and the issuance of bonds of \$67,000 to finance construction of a water distributing system.

WHITTIER, Los Angeles Co., Cal.—Until 7:30 P. M., Feb. 24, bids will be received by the city council for copper service pipe as follows: 4000 ft. 3-in., 20 ft.; 2000 ft. 3-in. 18 ft.; 2,000 ft. 3-in. 16 ft.; 1000 ft. 1-in., 20 ft.; 500 ft. 1-in., 18 ft.; 500 ft. 1-in., 16 ft. Pipe is to be new tubing, cold drawn to size and shall be furnished with proper bending temper, free from cracks, seams, slivers, scale, grooves, scratches and other imperfections. Tubing shall have purity of 99.9% copper. Debbie E. Allen, city clerk.

MODESTO, Stanislaus Co., Calif.—William Osterberg awarded contract by city to drill well in S 10th St. with an estimated capacity of from 1,500 to 2,000 gals. per min. American C. I. Pipe Co. at \$2,529.30 awarded contract to furnish pipe in connection with extensions.

BEVERLY HILLS, Los Angeles Co., Cal.—Until 8 P. M., March 4, bids will be received by the city council to install approx. 3400 ft. of 8-in. O. D. casing pipe line for the water department, Salisbury, Bradshaw & Taylor, 745 Petroleum Securities Bldg., Los Angeles. B. J. Firminger, city clerk.

PLAYGROUNDS & PARKS

SANTA CRUZ, Santa Cruz Co., Cal.—Stockholders of the Santa Cruz Hospital have voted to provide funds for landscape improvements in connection with the hospital grounds on

the Soquel avenue hill at the junction of Soquel and Ocean Aves.

VENTURA, Ventura Co., Cal.—Recommendations have been made to the park commission that civic organizations and clubs raise the necessary funds for planting in the Ventura city beach park. The plan proposes to divide the area into sections and have each section planted by some organization. Howard & Smith, of Los Angeles, prepared the plans.

RICHMOND, Contra Costa Co., Cal.—Richmond Tennis Club has petitioned the city council to construct additional courts in various sections of the city. Referred to city Manager J. A. McVittie for report.

STREETS AND HIGHWAYS

DOUGLAS CO., Nev.—Until March 5, 2 P. M., bids will be received by State Highway Commission to reconstruct 3.44 miles of highway between Minden and 3.45 miles north, involving grading, structures and gravel surface. Approximate quantity of materials are: 23,300 cu. yds. excavation unclassified; 48,532 yds. sta. overhaul; 3.44-mi. prepare subgrade and shoulders; 8,000 cu. yds. select borrow excavation in place; 8,500 cu. yds. rock or crushed gravel in place; 100 cu. yds. rock or crushed gravel in stockpile; 205 cu. yds. A. S. concrete; 3 cu. yds. B. conc.; 74 lin. ft. 10-in., 635 lin. ft. 18-in., 82 lin. ft. 24-in. corr. metal pipe to be installed; remove 74 lin. ft. 10-in., 132 lin. ft. 15-in., and 17 lin. ft. 18-in. corr. metal pipe; 671 M ft. B.M. timber in place; remove and reconstruct 13,020 lin. ft. fence; demolish 3 reinf. conc. box culverts. State will furnish corr. metal pipe culverts, f.o.b. cars, Minden, Nevada. Certified check 5% required with bid.

See call for bids under official proposal section in this issue.

SAN FRANCISCO.—P. J. McHugh, 466 36th Ave., at \$6,710.75 submitted low bid to Board of Public Works to improve Clayton St. at Market St. Other bids: E. J. Treacy, \$7,067.65; A. G. Raich, \$7,495.

SANTA CRUZ, Santa Cruz Co., Cal.—W. E. Miller, Santa Cruz, at \$3,339 awarded contract by city council to improve portion of Main St., involving cement concrete pavement, walks, curbs. Thompson Bros., Santa Cruz, bid \$3,420.

SANTA CRUZ, Santa Cruz Co., Cal.—Until March 3, 2:45 P. M., bids will be received by S. E. Evans, city clerk, (435-C) to improve Walnut Ave. bet. Chestnut and Pacific Aves., involving cement concrete paving; conc. curbs, walks, driveway approaches, catch-basins, pipe drains, storm water manhole; br. manhole; vit. clay pipe sewer laterals; 20 2-light Marbelite electrolier standards with underground system. 1911 Act. Estimated cost \$18,000. Certified check 10% payable to city required with bid. Plans on file in office of clerk. Roy Fowler, city engineer.

WILLOW GLEN, Santa Clara Co., Cal.—Sam Sciarrino, 498 Park St., San Jose, awarded contract by town trustees to improve portions of Cherry Ave., involving 3 1/2-in. cem. concrete sidewalks, \$18 sq. ft.; 6-in. cem. conc. driveways, \$22 sq. ft.; cem. concrete curbs, \$55 lin. ft.

BERKELEY, Alameda Co., Cal.—Until February 25, 10 A. M., bids will be received by Florence E. Turner, city clerk, to pave parking area on Shaftuck Ave. just north of Vine St. Certified check 10% payable to city required with bid. Plans obtainable from office of clerk.

BUSINESS OPPORTUNITIES

SAN FRANCISCO.—Names and addresses of the individuals or firms concerned in these opportunities will be furnished on request to the Business Opportunity Department of Daily Pacific Builder, 545-547 Mission Street, phone KEarny 1252:

D-3392—Equity in Business Desired. San Francisco, Cal. Local citizen has three-story building, good condition, with total of 45,000 sq. ft. which he desires to contribute as his equity in a business, preferably manufacturing, which would occupy the building, and with which the owner could be actively associated.

D-3393—Distributor. Chicago, Ill. Firm interested in securing connections in San Francisco to represent them as a sales agent selling their products to firms in this territory.

D-3394—Brass Goods. San Francisco, Cal. Party interested in disposing of machine shop equipped for turning out brass goods.

D-3395—Agent. Aurora, Ill. Firm desires firm or individual in this city, who can act as agent to sell a high temperature heat insulating cement and a high temperature insulating fiber block.

18035—Foreign Service Bureau. New York, N. Y. Organization offers services to those who are at a loss as to how to meet some problem requiring action abroad. They handle foreign trade extension, foreign advertising, documentation, protection of patents, purchase or sale abroad of merchandise, etc.

18038—Representation. Marseille, France. Party wants to represent on a commission basis local exporters and manufacturers wishing to extend their trade in France and North Africa.

18040—Buying and Selling Agency. Singapore, Straits Settlement. Company desires to act as buying and selling agent for firms dealing with the Straits Settlement. Proposed contract on file, also detail circular letter.

18044—California Tanning Oak. Dyerville, Calif. Party is desirous of getting in touch with firms handling "Cal. tan oak" for the Oriental trade.

Is opening up a new territory and will start shipments about July 15.

18047—Hotel Supplies and Auto Parts. Los Angeles, Calif. Company is interested in handling a line of hotel supplies and replacement auto parts for the west coast of Mexico and Central America.

18049—Representation. Cristobal, C. Z. Firm covering all classes of trade in Colon and Panama City and the Canal Zone is in a position to represent any class of merchandise.

18050—Fish Canning Machinery. San Francisco, Calif. Party is inquiring regarding equipment for the installation of a fish packing house.

18051—Representation in Brazil. San Francisco, Calif. Native of Brazil who is planning to return there desires to take with him a line of manufactured goods that does not require technical knowledge on the part of the salesman. He is particularly anxious to handle paints, prefers to work in the territory covering Sao Paulo and Rio de Janeiro. Speaks several languages and can give local references.

ARCHITECT URGES BETTER RELATIONS WITH CONTRACTOR

(Continued from page 3)

man to a realization that beauty enhances the value of every commodity with which the public comes in contact; and that the public is more and more demanding beauty with our utility, beauty with our amusement, and beauty in the things with which we live.

Architect as a Leader

It is significant that an American architect, Albert Kahn, Inc., of Detroit, has recently been commissioned by the Soviet government of Russia to become consulting architects in a five-year industrialization program, calling for an expenditure of \$1,900,000,000; thereby recognizing that the architectural profession in America includes men with executive ability, capable of directing such a huge construction program. Mr. Kahn will be called upon to select and direct an organization including 4500 architectural and engineering designers.

It is our job to improve the construction industry further on the human, social and economic side thru constructive criticism and co-operative effort. The American Institute of Architects, which I have the honor to represent, desires to collaborate with all elements of our great industry to the end that no differences of aim or method on the part of our construction enterprises shall be allowed to obstruct our progress toward a civilization in which material values and spiritual values shall receive the recognition which is their due.

ELECTRICAL LEAGUE ELECTS

Ernest Ingold has been elected president of the San Francisco Electrical Development League. Other officers are W. A. Seer, secretary-treasurer, and George C. Tenney, Chas. L. Huyck and William R. Marshall, directors.

STONE AND WEBSTER IN BIG MERGER DEAL

Stone & Webster, Inc., proposes to acquire Engineers Public Service Company, which owns several utility concerns in the South and West, by exchanging six shares of Stone & Webster stock for each ten of Engineers, according to word from New York. Directors of both have approved the plan. Stone & Webster, Inc., now has a 10 per cent interest in the Engineers Company, which it was instrumental in organizing five years ago. Completion of the proposed merger would bring under one ownership a property with total assets of more than \$420,000.

Subsidiaries of Engineers Public Service Company include Eastern Texas Electric Company, El Paso Electric Company, Gulf States Utilities Company, Western Public Service Company and Puget Sound Power & Light Company.

Directors of Stone & Webster, Inc., have placed the common stock on a \$4 annual basis through the declaration of a quarterly payment of \$1, payable April 15 to stock of record March 14. Three months ago the company paid an initial dividend of \$2 a share.

Insulating Products Co. (Attention Carl H. Schuttler), Aurora, Ill., desires to secure a firm or an individual in the San Francisco Bay district, who can act as agent to sell a high temperature heat insulating cement and a high temperature insulating fiber block.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

STEEL REINFORCING BARS

Dependability of materials used is a prime requisite to the success of construction.

For twenty years Gunn, Carle & Co. has been able to guarantee STEEL REINFORCING installation service, without error—without complaint.

We shall be pleased to consult you, without obligation, regarding the construction problems in the field of Iron and Steel on jobs of any size.

Gunn, Carle & Co.

Tel. SUTter 2720

Steam-heating and water-heating installation at 595 Twentieth Avenue, San Francisco —by Thos. Brodie, Plumbing and Heating Contractor.

Modernized with GAS

Better, of course, to have your heating contractor make a *complete* gas installation during construction. Owners and tenants want gas. Modern gas appliances help to sell homes and hold good tenants.*

*Why not make your next job a BLUE STAR building? BLUE STAR means: "Completely equipped with modern gas appliances approved by testing laboratories of the American Gas Association."

But *this* owner had his gas heating plant installed some time after the building was completed. It serves four flats—two of four rooms and two of five rooms each.

The boiler (310 sq. ft. of steam radiation) is regulated by time-clock control. Thermostat is in the owner's apartment. Although the boiler is on the owner's meter, water heaters are on tenants' meters,

together with their gas ranges.

Such *flexibility, adaptability* and *ease of control*—plus unequalled *cleanliness* and *dependability*—place gas beyond competition for every heat requirement.

Your gas company's engineers will gladly work with you in planning modern installations . . . Call them when you need them. No charge or obligation.

BILL PROVIDES FEDERAL AID FOR HOME BUILDING

A bill providing for the creation of a federal building loan board in the Department of the Treasury to supply funds for the building of homes has been introduced in the House by Representatives by Representative Hudleston of Alabama.

Under the provisions of the bill the board would consist of three members, one of them the secretary of the Treasury, the other two appointed by the President. The United States would be divided into 12 districts known as building loan districts with a building loan bank in each which would be authorized to issue bonds and would be obligated to become liable for them. These banks must have a capital of not less than \$300,000 and borrowers from them would be compelled to subscribe to stock in them in the sum of five dollars for each \$100 borrowed, this stock to be held as collateral security.

Loans could be obtained to purchase a building site or to provide buildings for the occupation of the owner and to liquidate the indebtedness of such owner. No borrower could obtain more than \$10,000 with interest not to exceed five per cent exclusive of amortization charge. The loans would be repaid on an amortization plan by fixed annual or semi-annual installments sufficient to cover an interest charge not to exceed the interest on the last series of building loan bonds, and an administration profit of not more than one per cent. The loans would be repaid in not less than five nor more than 40 years.

DIRECTORY OF CALIFORNIA ARCHITECTS ISSUED

Considered one of the most complete books of its kind, the revised pocket edition of The Architects' Directory of California, has just been issued by Cornell T. Malone, of the Los Angeles Builders' Exchange, A-65 Chamber of Commerce Arcade, Los Angeles, and 741 Pacific Building, San Francisco. The new edition is now ready for distribution.

Mr. Malone, the publisher, extends an invitation to any firm or individual engaged in the Engineering profession in California, to prepare and forward information stating class of engineering work specialized in. Such information will be carefully edited, and inserted in the Engineering Section, together with firm name, address and telephone number free of charge.

The Directory also publishes the Architects' Licensing Law, and names the officers and addresses of all architectural clubs in the State. There is also given a complete roster of active members of The Associated General Contractors in California.

The publication has received the endorsement of all architectural associations in the State and many public officials.

S. F. ENGINEER LOSES SUIT AGAINST CITY

Although C. C. Kennedy, San Francisco engineer, got a judgment against the city of Gustine, Merced County, for \$1120.85 for services supervising street improvement work, he cannot force the city to pay him by means of a tax levy, the third district court of appeals at Sacramento has ruled.

After Kennedy had obtained the judgment in the Merced county superior court and had it affirmed on appeal, he sued for a writ of mandate to compel the city to pay him by levying a tax. He lost the suit, and the appellate court affirmed the decision.

It was stipulated at the lower court trial that the amount of the judgment was more than the city's income for 1920, the year the debt was incurred.

U. OF C. ENGINEERS' DAY SET FOR MARCH 14

Plans are now well under way for the bi-annual Engineers' Day to be held by the college of engineering on the campus of the University of California, March 14.

The events for the day will open at noon with a barbecue in Mechanics' Hollow. During the afternoon open house will be held in all the engineering colleges. Laboratories and special stunts will be in operation all afternoon mine rescue, high voltage demonstrations, liquid air show, talking movies, under water cutting of steel, and a wood burning truck are a few of the events of the afternoon. The houses will be open to the public without charge and all demonstrations will be explained and discussed.

The day will end with the dance in Hearst Memorial gymnasium.

Engineers' Day, having been held for several years, is designed to give the public a chance to see what the engineers on the campus are doing. As far as possible the actual laboratory experiments will be carried out and, according to those in charge, there will also be enough spectacular events to make the afternoon interesting. Equipment worth several thousand dollars will be in running condition, allowing the public to see how much of the engineering development is carried out in practice, it is announced.

WHOLESALE PRICES OF PLUMBING FIXTURES

January wholesale prices of standard plumbing fixtures for a six-room house, as collected by the Department of Commerce from reports of twelve representative manufacturers and wholesalers, were \$100.55 as compared with \$100.58 in December and \$106.30 in January, 1929.

L. A. SEEKS TO ELIMINATE UNLICENSED CONTRACTORS

The following excerpt from a resolution passed by the board of building and safety commissioners of Los Angeles, shows the desire of the board to co-operate in enforcing the California State Contractor's License law:

"NOW, THEREFORE, BE IT RESOLVED, That this board request the Honorable City Council to promptly so amend existing city ordinances so that this department may be authorized to refuse the issuance of permits or licenses to contractors, as defined by that state law, in the absence of proper showing that any such contractor is possessed of a state license in full force and effect, so that it will be unlawful for any such unlicensed contractor to participate in any permitted construction project or for him to be allowed or suffered to so participate, and so that any permit or license may be revoked by this Board should any such violation come to its attention."

TWENTY-FT. BRICKS ANNOUNCED BY CERAMIC SOCIETY

The secret of making twenty-foot bricks and molded sides of small houses was laid before the American Ceramic Society meeting in Toronto, Ontario, Feb. 18.

It is a new process, in which bricks are made much like steel, of molten raw material. While the clay is white-hot, at about 2,000 degrees Fahrenheit, it is shaped and pressed, and it is claimed bricks can thus be made enormously larger than anything hitherto practicable. Always heretofore bricks have been shaped before baking, and the old process limits size.

Professor Joseph E. Shaw, the head of the department of ceramics of Pennsylvania State College, inventor of the method, said the new bricks can be rolled like steel. They can be made reinforced with steel laid in the molten clay. The process dips into another of the practical buildings arts by making brick veneer. One brick can be impressed upon another to form a single structure. They are annealed like metal.

So far as he has been able to discover, Shaw said, clay products never have been made before by this method, which "introduces a new field of marked possibilities."

"The articles so shaped," he went on, "will resemble structural steel and concrete structures in size. Sea walls, piling, heavy beams, foundations, building walls and similar articles, of large dimensions, which cannot be manufactured economically under present practice, are the type for which this process seems ideal."

An announcement from Penn State said that the process will roll sides of houses and sections of roads. The research was undertaken to produce new paving material.

\$16,170 WASTE ELIMINATED ON ONE PROJECT ALONE BY USE OF THE QUANTITY SURVEY METHOD

(By C. T. Burman, Treasurer, American Institute of Quantity Surveyors)

In presenting facts and figures on one project, the Chicago Union Station, the saving in eliminating duplication of takeoffs alone, due to a proficient quantity survey prepared for the bidders on marble and travertine stone, amounted to \$16,170. This was on a \$812,000 marble contract, or a saving of over 1 3/4 per cent on one project.

Copies of quantity surveys were furnished to twelve bidders on the first set of plans. With constant revision the number of competitors decreased to four, making the average number of bidders eight. Naturally a job of this size necessitated several revisions and taking of new figures on revised plans. The total time consumed by the Burman Quantity Bureau in making surveys on original and revised plans on the marble was 154 days, spreading over a period of three and one-half years. However, had each firm taken off its own quantities, the total time would have been 1232 days. Deducting 154 from 1232, there is a saving of 1078 days' labor for one man. At the rate of \$15 per day, the average salary paid to a senior quantity surveyor, or "estimator," as he is called in the trade, there is a total saving of \$16,170 for the marble industry alone in eliminating duplicate takeoffs.

However, the above amount is not the only saving made as quantities were taken off by senior and experienced man and thoroughly checked. Therefore a greater degree of accuracy was obtained than would have been possible with less experienced men. This alone reverts to a further saving for the industry amounting to from 5 to 10 per cent, according to their own practice of allowing for errors that may creep in, which allowance may be considerably reduced when using a professional Quantity Survey.

Saving in Plans

In addition to this, there naturally was the saving in the number of plans necessary or there might have been a saving to the general contractor in eliminating the public estimating rooms which are maintained by a general contractor for the sub-trades. When one considers the public estimating rooms that are provided in the larger cities for the sub-contractors to occupy, in order to take off their quantities, it will be seen there is considerable money being spent by them for wasted space that could be put to better use. Many of these public estimating rooms are not where they should be. In some instances they are overcrowded with men, fumbling over one another for plans.

There is also a further saving in eliminating undesirable construction which causes considerable waste but adds nothing to the durability or beauty of the job. The architect's attention is called to these ambiguities and nine times out of ten addenda or changes are made to conform with the suggestions made by quantity surveyors who are skilled not only in taking off quantities, but also in details and construction in the various branches they take off. How much money has been saved the owners and how many jobs would have failed to mature had these savings not been called to the architect's attention, it

is, of course, difficult to determine.

Service To Architect

Another instance to prove that a valuable service is rendered to the architect is that of a terminal building in the East, where fifty-six addenda were put out by the architect, due to surveyors taking up questionable details or ambiguities with him. Just recently a long distance telephone call made to an architect in the East caused a change in the construction of stone cladding of piers in a building which netted a saving of over \$18,000.

I am not quoting names of architects or buildings, due to the fact that this might be construed as a reflection on their service. Such is not the case, however. The fact is there are no plans and specifications 100 per cent perfect. Consequently, there is no objection on the part of the architects in having their plans examined by proficient quantity surveyors who have spent their lifetime in that particular branch which they follow. Neither will the quantity surveyor make the job 100 per cent perfect, but a large percentage of the ambiguous errors are being rectified before damage is done.

\$18,000 might have caused the job to be abandoned or a new set of plans or figures taken. Too much care cannot be exercised and the fee paid to a quantity surveyor is negligible when one considers the saving.

There is a further saving in eliminating extras, "bickering" and time lost due to misunderstandings on the job. When the project mentioned alone shows a definite sum of 1 3/4 per cent saving, one can readily visualize items that multiply this percentage of saving several times. The saving will revert to the owners, general contractors, material men, and all coming in contact with a building project.

There are now enough facts compiled by the members of the American Institute of Quantity Surveyors to prove to the building industry and to the building public as a whole that a quantity survey by professional quantity surveyors eliminates waste and increases efficiency, thus resulting in more economical building and greater prosperity for all concerned than under the old method of individual estimating by the various trades and general contractors. It is no longer considered a theory by well-respected contractors, engineers or architects—but a proven fact.

Ignorant of Cost

Contractors and the building public are ignorant of the actual cost of estimating proposed building projects. Ten contractors may figure a job, but only one gets the contract when the job finally goes ahead. This item of overhead of general contractors and sub-contractors runs into millions of dollars every year. They have no way of collecting individually on this item of overhead, hence the cost must actually fall back on the man who builds. When one considers the enormous amount of time and money wasted by the building industry on projects which do not mature and which someone has to be paid for, it seems rather amazing that the building public will stand for such practices. However, no one individually is responsible for this prac-

tice. It is not just to place the blame on either the architect or contractor. It is an old custom which the building industry has fallen heir to. The old adage that habits die hard is no less true when applied to the present-day estimating methods.

Institute Organized

In 1928 the pioneer quantity surveyors of this country met in Chicago and organized the American Institute of Quantity Surveyors. The object of this organization shall be to unite professional quantity surveyors and their associates with the construction industry in fellowship to improve upon the science of quantity surveying, applied to construction for the promotion of:

(a) The social and individual economic welfare of mankind.

(b) A higher standard of business ethics and progress in the construction industry.

(c) Conditions and opportunities to render service on equal plane with other advanced professions.

During each succeeding year the A. I. Q. S. has held a convention in principal cities where quantity surveying has been discussed and studied from all angles. The Institute has found that the biggest objection in adopting the system is the standard method of measurements in the various branches entering into a building project. That this in time will be ironed out is inevitable, though it will require time. It took the British quantity surveyors scores of years to form and promote the standard methods of measurements. It naturally will require as much if not more time to formulate the standard practices for this country, when one considers the size and the advancement made in the various branches of the building industry of this country.

The American Institute of Quantity Surveyors have passed resolutions calling the attention of the Federal Trade Commission to the enormous waste and have requested the entire building industry to co-operate with them in standardization or a uniform method of measurements. Through this method all associations, no matter how large or how small, local or national, will be given an opportunity to present their method of measurements which will eventually be brought together and a standard system will be set up that will meet the requirements of the country as a whole. The present confusion of speaking in terms and quantities of different units or denominations will be eliminated.

ELIMINATION OF FIRE TRAPS IS AIM OF ORDINANCE

An ordinance which it is claimed will eventually eliminate San Francisco's firetraps is recommended to the Board of Supervisors by the Junior Chamber of Commerce.

The board sent the proposed law to the fire committee for consideration. The new ordinance gives the city's fire prevention bureau authority to enforce existing safety measures.

Heretofore, according to representatives of the junior organization, no one particular city bureau has had the right to insist on obedience of the laws.

MONEY FAVORS BUILDING; VOTERS DO NOT, SURVEY SHOWS

The prospects of financing any large increase in building this year are still somewhat cloudy, says a Business Week. The National Building Survey Conference, one of the organized activities set up by President Hoover through the United States Chamber of Commerce, is paying particular attention to means of improving facilities for financing smaller types of construction work, and it sees some light ahead in this field. According to its latest report, there has been a slightly greater flow of money into the mortgage market during the past 40 days, though funds are still being placed on a rather conservative basis. The survey indicates that building mortgage conditions on the West Coast are now more favorable, money being available in sufficient quantities for loans on residential and remodeling projects at rates varying from $\frac{5}{8}$ % to 7% on the basis of 60% valuation. In the districts surrounding Cincinnati, Cleveland, St. Louis and St. Paul a pickup in the mortgage market is reported but there has so far been less improvement in the New England region.

The indications are not so good for increased borrowing for public construction. The Daily Bond Buyer figures show that the amount of new municipal bond issues authorized in January was only \$11,620,346, the smallest for the first month of any

year since 1926. More significant is the fact that municipal bond issues aggregating nearly \$3,000,000, proposed by 36 municipalities in 17 states, were rejected by voters in January—a somewhat larger exhibition of thumbs-down on new borrowings than has been seen in the most comparable months of recent years.

Apparently some of the recent difficulties in municipal finance have made voters wary. A more important reason is the fact that state and municipal borrowing during 1929 was exceptionally heavy in spite of the fact that public building for the year showed only a slight increase over the preceding year. The final figures of The Bond Buyer, covering 1929, show a total of state and municipal bond issues sold amounting to \$1,453,148,438, which was the largest amount of such securities marketed in a single year except in 1927. Since 1928 was a very large building year one inference from these facts might be that the heavy borrowing during 1929 may reflect itself in larger public construction during 1930, even though local taxpayers might hesitate to continue to go further into debt this year. In other words, if public building expanded greatly this year on the basis of last year's borrowings, while new borrowings this year fell off, we might expect a somewhat slack year for public construction in 1931.

BUSINESS ON THE UP-GRADE SAYS CONFERENCE CHAIRMAN

Julius H. Barnes, chairman of the National Business Survey Conference, issued the following statement today on the business situation after a study of reports reaching the headquarters of the Conference at Washington, D. C.—Editor.

Detailed reports on the business situation reaching the headquarters of the National Business Survey Conference continue encouraging. Business on the upgrade and we are rapidly approaching the time for the ordinary revival of outdoor work, which will further accelerate progress.

The shock of the deflation in security prices has largely been absorbed in three months. The danger of a long depression appears fairly over; with every evidence of early renewal of the normal onward march of living standards and business progress.

We do not need to detail the reassuring factors that became manifest even two months ago, because today business reviews, economists and business leaders are speaking with confidence and on a growing record of business recovery.

This improvement became possible because of the collective common sense, the courage and enterprise of all kinds of Americans, in business and in life. We do, however, need to continue to apply these qualities, especially for the next few weeks. Careful planning and cooperation can improve buying power still further and can help to relieve individual hardship. Three months is a short period in the evolution of business, but a long time to the worker out of a job, even if he has accumulated savings.

Large business units are doing their part daily to help. The railroads,

the public utilities, the steel industry and others have increased and speeded up their construction plans. Reports coming in from business establishments disclose also that they generally are following through the suggestion of the Business Survey Conference that until outdoor construction generally can get under way they can assist by advancing within prudent judgment all necessary repairs, improvements, betterments, etc. of both normal and emergency character. Homeowners, too, can help by doing needed work now, so that men temporarily idle can be carried over until larger programs can be started.

American business is carrying out its pledge to make every effort to create and maintain employment until business momentum is fully regained and the emergency is over. Wage scales, too, are being maintained to sustain buying power. One of the most encouraging factors at the present time is found in the fact that at least 44 million persons are gainfully employed, which is ten million more than were at work in 1921. This in itself helps to explain the checking of this business recession in so short a time, because these ten million additional workers, earning higher income than was possible in earlier years, themselves furnish a buying power which keeps fellow workers employed and factories running to serve their needs.

Any wide unemployment immediately reacts on business, and the modern business man, knowing this, is as anxious as the worker himself to keep unemployment at a minimum.

Norris Sacramento Plumbing Co. and Golden West Heating Co. have filed applications seeking membership in the Sacramento Builders' Exchange.

UNIFORM GOVERNMENT CONTRACTS PROPOSED IN BILL

The passage of the Cramton Bill by Congress, establishing uniform requirements to be met by the government departments in their contracts is expected this season. All the government departments are in favor of the proposed legislation as well as the Bureau of the Budget. The Associated General Contractors along with other organized contractors have long favored a measure of this kind which would simplify the procedure and remove many of the difficulties involved in estimating and securing payment. There are many inconsistencies in the operations of the different departments because of the statutes passed at various times. The Interdepartmental Board of Contracts and Adjustments of the Bureau of the Budget in attempting to coordinate the statutes concerning the letting of contracts in the departments found that there were 224 separate statutes regulating government contracts.

A committee was appointed to draw up a proposed bill which was finally presented as the Cramton Bill. Major Cushing, counsel of the Bureau of the Budget, in discussing the provisions of the bill states that there has been considerable discussion over certain points connected with the bill which may cause some delays. One of the most important sections concerns the award of contracts. The Comptroller General has raised an objection to the clause of this bill which gives the head of the department authority to make the final decision in case of doubt as to which bid is most advantageous to the government.

The Comptroller General argues that this clause takes away the authority which he now exercises in disallowing awards that have been made to a higher bidder if, in his judgment, the lowest bidder should have been awarded the contract. Major Cushing

ROMANIAN HOUSING PROJECT UNDER AMERICAN SUPERVISION

Announcement has been made by David M. Oltarsch, New York City, of the signing of a contract whereby he, in association with Maurice Blumenthal and the German concern Basalt Attiengesellschaft, will supervise the construction of approximately 15,000 buildings over a period of fifteen to twenty years in several cities in Rumania. Included in the construction is a new capitol in Bucharest. It is stated that work on the first section of the contract, involving \$16,000,000, will be started in March, and that by the end of 1930 approximately \$5,000,000 in construction will be completed.

Most of the new housing is intended to benefit government officials. The work will be financed through a special government bank to be set up by the Rumanian government, which will have the assistance of German, French and Swiss bankers. The homes will have an average cost of about \$2,000.

LUMBER EXECUTIVE KILLED

Frank E. Walker, assistant secretary and manager of the Clover Lumber Company, was instantly killed during a snow storm at Loyalton, Cal. Feb. 20, when a train, consisting of an engine and five cars, operated by his company, passed over his body.

Walker is survived by his widow, his parents, in Arizona, and a son, Elbert, a student at the University of Nevada.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Los Angeles with a total of \$9,115,846 was second among the cities of the United States in building for January, 1930. New York took the lead with a total of \$29,591,500. Chicago was third with \$5,484,500; Seattle was fourth with \$5,249,425. San Francisco ranked thirteenth with a total of \$1,431,983. Only seventeen cities reported \$1,000,000 worth of building or more for January, 1930, there being listed as follows:

New York City	\$29,591,500
Los Angeles	9,115,846
Chicago	5,484,500
Seattle, Wash.	5,249,425
Washington, D. C.	4,540,100
Detroit	3,993,800
Cleveland, Ohio	3,021,200
Cincinnati, Ohio	2,922,400
Boston, Mass.	2,836,500
Philadelphia	2,719,900
Baltimore, Md.	2,596,800
Buffalo, N. Y.	1,509,700
San Francisco	1,431,983
Milwaukee, Wis.	1,121,200
Newark, N. J.	1,107,400
Houston, Texas	1,096,400
Richmond, Va.	1,069,300

"The product of Oriental labor is coming into the United States in increasing volume, and the lumber industry in the State of Oregon is greatly in need of tariff protection, according to Governor A. W. Norblad in a telegram to President Hoover made public by the governor. Oregon is the most heavily timbered state in the Union," the governor's message said, "and our general prosperity is based very largely upon the lumber industry, which produces 60 cents of every dollar coming into the state. During the last eight months we have had much unemployment in the logging camps and mills due to the inability of our people to meet the competition from Canadian and Russian mills that operate under conditions not comparable to those of our mills who must employ American labor and pay wages which will permit laborers to live up to American ideals."

Electrical utility companies are planning to launch extensive customer-ownership programs, says the Business Week. Such financing, expected to exceed \$200,000,000 this year, is regarded as the most important single factor in counteracting public ownership propaganda. A total of \$2,000,000,000 in customer-owned preferred stock is now outstanding in the power and light field.

By order of the Los Angeles Building and Safety Commission the blank for architect's name on applications for building permits cannot be filled in unless the name is that of a certified architect or licensed engineer under the state act. A note to this effect printed in red ink appears on the application blanks now being used by the building department.

W. P. Jackson, for 22 years master mechanic and superintendent of equipment for the Key System Transit Company at Oakland, has been appointed to the safety engineering forces of the California State Railroad Commission.

"Listen In" was the gist of a recent "Postalgram" mailed to every architect, engineer, building contractor and manufacturers on the Pacific Coast of the Pacific Portland Cement Company of San Francisco "and everywhere on the Coast." It was a reminder-invitation of the Cement Half Hour over the National Radio broadcasting network, originating in New York City under the auspices of the Westinghouse Electric & Manufacturing Company, and dedicated to the Cement Industry on February 18, at 7 P. M. It included, among symphonic selections, a 4 minute address by Mr. Frank H. Smith of the Portland Cement Association about its aims and ideals. The broadcasting of this occasion of the Pacific Portland Cement Company is another indication that it is not enough to do worthwhile things, they must be kept before the public in this speed age, when event after event crowds in on already over-crowded minds.

Various components of building construction have reached definitely lower price levels in the past two months of business recession and while all declines have not been alike in degree they make possible in the aggregate a substantial saving in total construction costs, according to A. J. Eken, vice president of Starrett Bros., Inc., New York. "No reduction in labor costs have materialized and none is to be anticipated at the moment," Mr. Eken said, "but labor in the building industry has become more efficient and this greater efficiency tends to offset the high labor cost. Some savings may develop in sub-contracting as recent contracts show a willingness to take work at lower figures. Materials costs, on the other hand, are definitely lower and now make possible substantial savings."

James F. Collins, state director of professional and vocational standards, warns contractors that state licenses obtained under a partnership agreement are void when the partnership is dissolved. Collins has received a number of complaints in such cases wherein one of the partners appropriated to his own use the contractor's license issued in the name of the partnership. When a partnership is dissolved new individual licenses must be secured. Under the law enacted by the last legislature all contractors must be licensed by the state where contracting work in excess of \$200 is done.

Trade Practices Conference Rules adopted by the structural steel fabricating industry at a conference held Nov. 11, 1929, at Biloxi, Miss., have been acted upon by the Federal Trade Commission. Eight rules were affirmatively approved and eight others accepted as expressions of the trade. No action was taken on six definitions formulated at the conference, nor upon two resolutions providing for the creation of committees to draft standard proposal and contract forms and to investigate whether the rules are being observed throughout the industry.

Trade - union membership was a somewhat smaller in 1929 than in 1926 according to a summary of the latest edition of the Handbook of American Trade-Unions published by the Bureau of Labor Statistics. Unions in the American Federation of Labor, however, report an increase of 126,450 over the figure for 1926. The aggregate membership of all trade-unions, both within and without the American Federation of Labor, in 1929 was 4,331,251. Since 1926 ten national organizations have passed out of existence but most of these were small dual organizations which have been absorbed by larger bodies, and during the same period three new dual organizations have developed in different fields. The greatest increases in membership are reported in the construction industry and in public service.

The Department of Commerce report that unemployment has increased 3.3 per cent does not include the building trades. In these, in January, 33 per cent of the union membership was unemployed, the largest in three years. The condition is particularly severe in Oakland, Portland (Ore.), Minneapolis, St. Paul, Milwaukee, Chicago, St. Louis, Detroit, Jersey City, New York, Philadelphia and Washington.

A central finance holding corporation to supply funds to home owners who desire to make immediate repairs and improvements to their dwellings will be formed by the National Building Survey Conference as a means to assist in taking up the slack in building trade employment, according to a statement by Fenton B. Turck, New York, vice-president of the American Radiator Company.

In the recent bidding for the general contract on the Veterans' Hospital at Lexington, Kentucky, one of the contractors used the long distance telephone for submitting his figure to the Bureau in Washington, says the American Contractor. On being awarded the contract and seeing his published estimate total, he discovered that an error had been made in recording his telephone bid in Washington and requested permission to withdraw his figure on the ground that the mistake was not his. Attorney General McCarl has ruled that the tender is binding and that the contract must be executed at the award figure. Without regard for the legal merits of the Attorney General's decision, the publication says, the predicament of the unfortunate low bidder, who through the error must do the work at a figure nearly ten per cent lower than that of the next nearest bidder affords a lesson in the necessity of exercising extreme caution in submitting tenders.

Seventy cities have adopted the Uniform Building Code prepared by the Pacific Coast Building Officials' Conference. During the month of January five cities reported adoption of the code, these being Sebastopol and La Habra, Calif.; Helena, Montana; Olympia, Wash., and Albuquerque, N. M.

Beresford Park Development Association will petition the San Mateo County Supervisors to co-operate with the San Francisco Supervisors in a survey of Peninsula industrial possibilities. The plan is to seek co-operation on the proposed survey for which the San Francisco Supervisors have been asked to appropriate \$5000.

ALONG THE LINE

Andrew M. Jensen, city engineer of Fresno who recently submitted his resignation to the city council to enter private practice, will open offices at 615-616 Foxcroft Bldg., 65 Post St., San Francisco. Mr. Jensen leaves the office of city engineer of Fresno on March 1.

Nathaniel P. Williams, 63, general contractor, formerly operating at Willows, Calif., and more recently of Chico, died in the latter city Feb. 20, at the home of his son, Harold Williams.

Richard Retzlaff, for eight years electrical engineer for the Engels Copper Mining Company at Taylorsville, Calif., died Feb. 13. The widow and two daughters survive.

Major Clarence M. Foster, 63, for the past ten years Pacific Coast manager of an asphalt concern, died in San Francisco Feb. 13. He was a member of the American Society of Civil Engineers. The body was sent to Indianapolis for burial.

Sam Hart and Allan J. Wagner, former city engineers of Sacramento, are reported to be favored for the appointment of city engineer of Sacramento by James S. Dean, new city manager. Chas. S. Blood, now assistant city engineer is also said to be favorably considered for the position which pays \$6000 a year. B. C. Clark is at present filling the position.

Aberdeen, Wash., city council has appointed a committee to compile a building code. Members on the committee are: City Councilman R. T. Babcock, chairman; Eric Shaw, also a councilman; Clarence George and Chas. A. Haynes, architects; W. R. McDonald, and E. J. Richards, labor unions, and Hebert Horrocks and Alex Praeger, contractors.

TRADE LITERATURE

"Isolation," is a quarterly publication devoted to scientific, practical and economical application and study of materials and methods of deadening and eliminating vibration and noise, published by the Korfud Co., inc., 235 East 42nd St., New York City. Copies will be furnished on request.

Melrose Steel Co. has leased quarries at 1200 Forty-seventh Ave., Oakland, and will engage in structural steel fabrication, specializing in service station work. The manufacture of several steel products is contemplated. R. Coney, William Jaeger and E. Balwick are co-partners in the enterprise.

The Common Brick Manufacturers' Association of America announces the first volume of a series to be produced on brick engineering—92-page booklet divided into two parts, namely, brick and brick masonry. The booklet deals with the physical and chemical properties of the unit brick and contains a number of data tables and graphs charts showing the strength of brick walls laid up in different bonds and mortars.

TRADE NOTES

Federal Engineering Co., of San Francisco, has filed articles of incorporation in Oakland. The company is capitalized for \$25,000. Directors are: Gordon Johnson of Berkeley, Clare W. Chapman and Paul S. Marrin of Oakland.

Paraffine Companies, Inc., plans to set up fire-brick kilns near Lompoc, Calif., for the production of fire-resistant brick and other products.

Western Export Lumber Co. has opened offices at 1475 Dexter-Horton Bldg., Seattle, where it will specialize in the shipment of lumber, logs and piling to the Orient, the United Kingdom and the Continent. At first, the company's activities will be confined to Japanese business. Fred Springer is president.

Arco Company of Cleveland, Ohio, manufacturers of paints, varnishes and lacquers, plans to erect at \$200,000 plant at Los Angeles, which will have a \$2,000,000 output the first year of operation.

Parker Electric Manufacturing Corp. of Alameda has been incorporated with a capital stock of \$50,000. Incorporators are: Peter and Michael D. Bernardi and C. Park, all of San Francisco.

Basalt Rock Co. of Napa plans an immediate expenditure of \$150,000 and the ultimate investment of \$250,000 in the construction of a gravel plant on the Russian River near Healdsburg.

Cork Insulation Co., Inc., makers of corkboard at Wilmington, Del., has opened a branch office at 354 Pine St., San Francisco.

NAMED SALES REPRESENTATIVE

The Byers Machine Company, Ravenna, O., announces the appointment of Edward R. Bacon as its sales representative in San Francisco and Northern California. The Bacon Company will handle the entire Byers line, including 1-yard, 1/2-yard and 1 1/4-yard shovels, cranes, draglines trenchers and skimmers. Unusual interest attaches to this announcement, as the Bacon organization was previously the distributor in Northern California for the Byers line, comprising a continuous connection broken only during the past two or three years.

Al A. Nelson has been elected president of the Seattle Chapter, Northwest Master Painters Association. Robert Grant was elected vice-president. J. W. Sorenson was named secretary and George Erickson, treasurer.

FABRICATED STRUCTURAL STEEL

New orders of fabricated structural steel in January, as reported to the U. S. Department of Commerce by the principal manufacturers, were 63 per cent of capacity, based on total orders of 196,368 tons reported by fabricators with a capacity of 290,145 tons per month, as compared with orders of 83 per cent of capacity in December, 1929 and 71 per cent a year ago. Shipments of fabricated structural steel in January represented 67 per cent of firms reporting this item as against 72 per cent in December, 1929, and 73 per cent a year ago.

HERE — THERE — EVERYWHERE

A campaign of education carried on by the Allied Construction Industries of Saginaw, Michigan, has resulted in the co-operation of over fifty firms of that city in the movement to curtail loose credit practices. The officers of the Saginaw organization have been at work selling the idea of credit stabilization to every group and they believe that all the merchants and contractors who have joined are thoroughly convinced of its value.

Of interest to every dealer in building materials and every worker on buildings is a news item which comes from the Northwest. Portland newspapers recently announced the organization by seven local mortgage firms of the Mortgage Bankers' Association of Portland, "to aid in stabilization of home purchase financing," by providing mortgage loan machinery which will give the borrower an economical loan, unencumbered by avoidable charges. The new Association is affiliated with the Mortgage Bankers' Association of America.

F. E. Miner was elected president of the Imperial Valley Lumbermen's Club at the first annual meeting held recently at El Centro. O. S. Reid was chosen vice-president and W. W. Wheatley, secretary-treasurer.

Earl H. Strange, newly elected chairman of the United States Inter-coastal Lumber Conference, announces the opening of a branch office at 203 Columbia St., Seattle, under the management of A. S. Nichols, as well as the opening of a Net Verification Bureau at Seattle, under R. G. Chittenden.

The Northwest Concrete Products Association, meeting in Seattle, Washington, elected the following officers to serve for the ensuing year: President, Hans Alumm, Everett; Vice-presidents, Clyde Brutte, Portland, Ore., Carl Warren, Spokane, and E. L. Warner, Tacoma; Secretary-treasurer, W. M. Hews. The meeting was attended by 38 cement and concrete representatives from Washington, Oregon and Idaho. The mid-summer convention will be held in Bellingham during the month of July.

More forest, brush and grass fires occurred in California during the notably long, dry season of 1929 than in any previous year since organized fire protection has been in force in the State, according to the combined report of the United States Forest Service and the Division of Forestry, State Department of Natural Resources. A total of 4,803 fires which burned over 1,153,462 acres and caused damage amounting to \$2,773,245 was the past year's fire record. Adding to these damage figures the money spent by State, Federal, county and private forestry agencies in preventing and suppressing fire, the loss is estimated at over 5 1/2 million dollars, not including the 1 1/4 million dollars of property destroyed by the Mill Valley fire which started within the city limits on the brush slopes of Mt. Tamalpais. Compared with 1928, the past year's record shows an increase of 632 fires, but the area burned was smaller by 400,000 acres than in the previous year and the total damage was \$100,000 less.

RECOMMENDED ELECTRICAL LAW IS PUBLISHED

The Pacific Coast Building Officials Conference, at its 1929 annual meeting in Portland, Ore., voted to recommend the "Standard Electrical Ordinance" for adoption along with the Uniform Building Code.

This ordinance, as passed upon at Portland, is now ready for distribution and a supply is on hand at Conference headquarters at Long Beach.

The following quotation from the booklet gives a brief outline of the source of this ordinance:

"The Standard Electrical Ordinance was published by the Board of Fire Underwriters of the Pacific in 1927 after it had the consideration of the California Association of Electrical Inspectors at their meeting in Oakland, March, 1927.

"It is an adaptation of the Uniform Electrical Ordinance as originally recommended by the Law Committee of the Electrical Manufacturers' Council for general use.

"The California Association of Electrical Inspectors is now the Southwest Section of the International Association of Electrical Inspectors. The Electrical Manufacturers' Council is now the National Electrical Manufacturers' Association.

"This edition modifies the 1927 edition so as to comply with recent decisions by the Supreme Court of California."

This booklet is published and furnished by the Society for Electrical Development, Inc., 420 Lexington Ave., New York City, and the Board of Fire Underwriters of the Pacific, San Francisco, Calif.

PAVING BRICK SIMPLIFICATION

It has just been announced by the Division of Simplified Practice, of the Bureau of Standards, Department of Commerce, that the printed booklet on Simplified Practice Recommendation No. 1—Paving Brick (Seventh Edition) is now available. An examination of this booklet, copies of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., for 10 cents a copy, discloses that the simplification program for this product has effected a reduction of variety from 66 sizes and types to 5 or approximately 32 per cent.

BUILDING ATTAIN COLOSSAL DIMENSIONS

A continued trend toward taller buildings is reaching into the range of the colossal, says Engineering-News Record in an editorial survey of 1929 construction. Basically resulting from high land values, this trend has been given impetus by the advertising urge or vanity of individuals and corporations. Continued development in the tall-building field is in sight. The trend is shown by the past year's achievements.

In New York City the 792-ft. height of the Woolworth Building was exceeded twice, by completion of the Chrysler Building, 70 stories, 1044 ft., and the Bank of Manhattan, 70 stories, 925 ft. The Empire State Building, 85 stories, 1050 ft., is being started. High buildings announced for construction are: City Bank-Farmers Trust Co., 71 stories, 925 ft.; 42nd St. and Fifth Avenue, 58 stories; Hippodrome Building, 83 stories; Columbus Circle, 65 stories. In Pittsburgh the Gulf Refining Co. has announced a building 575 ft. high. The

United Shoe Machinery Co. has completed a 27-story building in Boston. In Chicago the 45-story office building housing the new Civic Opera auditorium, the 26-story Daily News Building—the city's first large air-rights office building—the Palmolive Building and the Carbon & Carbide Building are notable. Detroit built the 40-story Union Trust Building, its second tallest. Three tall buildings of reinforced concrete were completed: the 26-story 310-ft. Victory Building in Toronto, the 23-story 277-ft. Exchange Building in Seattle, the 19-story 264-ft. Medical Arts Building in Minneapolis.

Sizes as measured in volume are also growing to huge dimensions. The Chicago Merchandise Mart, inclosing 53,000,000 cu. ft. within its eighteen stories, nearing completion, will be the world's largest. The 85-story Empire State Building in New York is a close rival, its base dimensions being 200x425 ft. An airship dock in Akron, 325x1200 ft., with arch trusses 200 ft. high, is notable.

Welding of building frames is advancing. Work is started on a twelve-story structure for the Southern California Edison Co. in Los Angeles, with lateral bracing arc-welded. A 300-ton gas-welded mill-type building was erected in Niagara Falls, New York.

U. S. ENGINEERS ADOPT GRADE POINT SYSTEM OF MARKING

The grade point system of rating student scholarship which has been in effect during recent years in all the academic colleges of the University of California except the College of Engineering, was extended to include these divisions of the institution at the February meeting of the academic senate. It is announced by Recorder of the Faculties T. B. Steel.

The new rules provide that to receive the Bachelor of Science degree in the Colleges of Civil Engineering, Mechanics, or Mining, in May, 1931, or thereafter, a student must obtain as many grade points as there are units in the credit value of all courses undertaken by him in the university, beginning with January, 1930. Grade points are assigned at the end of the semester on the basis of three grade points for each unit of grade A; two for each unit of grade B; one for each unit of grade C; none for each unit of grade D, and a negative grade point for each unit of E or F.

Heretofore students in the College of Mining have been able to receive the Bachelor's degree with an average record of less than "C." Under the new regulations students will be required to present, in order to be eligible for graduation, a "C" average or better on all work undertaken in the university beginning with January, 1930.

The academic senate also approved the adoption for the Colleges of Engineering of new rules regarding the probation and dismissal of students for unsatisfactory scholarship. The new rules are identical with those in effect in other academic colleges in the university namely, a student is placed on probation if at the close of any regular semester his grade point deficiency is 10 points or more; a student is dismissed if, while on probation in any semester, he fails to maintain a "C" average; any student, whether on probation or not, will be dismissed if in any semester he fails to maintain at least an average grade of "D."

Recorder Steel points out that the new rules adopted for students in the engineering colleges do not effect the records made by students prior to January, 1930. Grade points for students in the College of Engineering will be computed by the recorder of faculties for the first time in May 1930, upon records made by the students during the semester, January to May, 1930.

FILM TELLS STORY OF MONEI METAL

A two-real motion picture telling the story of Monei Metal has been released by the Rothacker Film Corporation of Chicago. The film shows the preparation of the metal in its various commercial forms at Huntington West Virginia, and traces its various uses in more than a score of different industries. Also shown in the film is the tapping of an eleven ton furnace with the molten metal being poured at a temperature of 3000 degrees Fahrenheit. This is the largest non-ferrous electric furnace in the world. The picture is being offered to schools, societies, commercial organizations, and the like without charge and is available in 35mm and 16mm widths.

N. Y. PLANS MODEL HOSPITAL TO COST \$4,250,000

The folks who live on Park Avenue New York, and travel in high society are soon to have a hospital where they can be sick in the manner I which they are accustomed to live when well.

The Doctors' Hospital, housed in a \$4,250,000 structure overlooking the East River at Eighty-seventh street will open its doors next week. But its clientele will be quite restricted. There will be no charity ward, no white enamel bed, and prunes will be taboo.

Each of its 264 private rooms will have rugs on the floors, chintz at the windows and individual baths and lock boxes. Rooms will rent from \$8 to \$45 a day. There also will be 32 room on one of its 14 floors operated as hotel for the convenience of relative and friends of patients who wish to be with them during treatment. Also there will be a restaurant, preside over by a French chef, a barber shop, tailor, telegraph office, news stand and what not.

Stockholders include 400 social re-sterites. On its medical board will be 182 physicians and surgeons—and not an intern will be allowed.

CIRCULAR ON CARBON CIRCUIT BREAKERS

The Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa., has published a new, illustrated, twenty-page circular on Type CL Carbon Circuit Breakers. The booklet includes several installation photographs showing the breakers installed in coast guard cutter, in a steelmill, or in office buildings. Several other photographs show construction details of the breakers. These photographs and the text present a clear description of the CL line, emphasizing the new and improved features of the breakers. The Foreword of the publication contains a brief history of the development of carbon circuit breakers, and tells of the rapid strides made recently in designing this equipment. The booklet may be obtained from any office of the Westinghouse Electric & Manufacturing Company by requesting Circular 1705-B.

ELECTRICAL INDUSTRY TO SPEND HUGE SUM IN 1930

Expenditures for new construction during 1930 aggregating \$400,000,000 and equipment and materials orders totaling \$465,000,000 will be made by the electrical industry, according to telegraphic reports submitted to the National Business Survey Conference and made public Feb. 15. The National Business Survey Conference was called at the direction of President Hoover.

Expenditures for new construction in the first quarter of the year will be \$193,000,000, or 10 per cent in excess of similar expenditures for the first quarter of 1929. Orders for equipment and materials for the first quarter of 1930 will total \$180,000,000, also an increase for the period, the conference announced.

Reports from the National Electric Light Association to the conference indicate that power companies in large industrial centers during January and the first week in February show an increase of 3 to 4 per cent over the same period of last year.

GOVERNMENT POSITIONS OPEN

Civil Service positions in the engineering field to be filled in the near future, with salaries paid, include the following: hydraulic engineer, \$3,800-\$4,400; associate hydraulic engineer, \$2,800-\$3,700; assistant hydraulic engineer, \$2,600-\$3,100; associate engineer, \$3,200-\$3,700; assistant engineer \$2,600-\$3,100; engineering draftsman, \$1,800-\$2,800; assistant geologist, \$2,600; junior geologist, \$2,000; junior technologist, \$2,000; junior physicist, \$2,000; junior engineer and deck officer, \$2,000; senior computer, \$2,000; junior computer, \$1,440; engineering aid, \$1,200. The closing dates for applications vary, the earliest being March 1. Further information can be obtained from the U. S. Civil Service Commission, Washington, D. C., or at the post office or custom house in any city.

STATE COURT UPHOLDS PLATTING LAW

The provision of various New York state enabling acts giving cities, towns and villages the right to require municipal approval of subdivision plots before they can be legally filed with county clerks was upheld by the State Court of Appeals in December 3, 1929 (Village of Lynbrook vs. George J. Cadoo et al.). The court ordered the county clerk to cancel the map in question, even though an official map of the village had not been adopted and filed. In the course of its opinion the court said: "Town planning is a new field of legislation, comparable with the recent development of zoning laws and regulations. Its purpose is to preserve through a governmental agency a uniform and harmonious development of the growth of a village and to prevent the individual owner from laying out streets according to his own whim without official approval."

FOREMEN'S ASSOCIATION ADOPTS CODE OF ETHICS

The following code of ethics for foremen has just been formulated by The National Association of Foremen. The code recognizes the individual's responsibility for his own development, his opportunity for service both within his organization and in society and offers a worthy goal for every foreman—the man holding the most strategic position in industry, direct liaison between management and workers.

The provisions of the code follow:

1. The foreman should recognize that every man above, beside or below, has an inherent desire to do good work and to be a useful and respected citizen. He should not assume that any man wants to do anything less than his best until he has considered every other possible motive.
2. The foreman should keep an open mind on all subjects, striving to maintain a broad and balanced outlook and being always willing to recognize merit in another's ideas.
3. The foreman should deal fairly with the management, the men and other foremen, assuming responsibility for his own mistakes and refraining from shifting blame to others.
4. The foremen should strive to understand the principles of business which make for success or failure of industry. He should pass at least some of the fundamentals of business principles along to his men, so they can see their own relation to the general scheme.
5. The foreman should keep informed as to the latest developments in equipment and processes. He should recommend or put into effect such methods as will produce improved quality, lower costs for the product and better working conditions.
6. The foreman should regard his profession as a field of social service offering an opportunity to help working people obtain maximum satisfaction from life.
7. The foreman should endeavor to be candid and carefully guard a reputation for good moral character, good citizenship and common honesty and to support and promote the uplifting influences of the community.

SALE OF PAINT, VARNISH AND LACQUER GAINS \$17,000,000

Sales of paint, varnish, and lacquer products during 1929 gained more than \$17,000,000 over the preceding year, according to information made available by the Bureau of the Census, Department of Commerce. These figures are for trade sales, industrial sales, and those not classified, of all three of these products, it was stated.

Trade sales include shipments to dealers, jobbers, painters, and consumers, while industrial sales are those to manufacturers, railroads, and Government, marine, and all other similar users, it was pointed out. The largest increase was in the industrial sales, though gains were reported in all three divisions.

The total sales of these paint, varnish, and lacquer products last year amounted to \$353,340,237 compared to \$371,024,043 for 1928. The trade sales increased from \$133,677,027 to \$144,246,746 and the industrial sales from \$123,917,333 to \$133,004,935 for last year. The sales of these commodities not classified under either of the above listings increased from \$108,429,633 to \$11,088,546, it was shown.

These figures are a summary and may be subject to revision as reports are received from additional concerns.

LAMONT VIEWS CONSTRUCTION OUTLOOK AS HOPEFUL

Pointing to the improved situation in the steel industry which is now operating at about 80 per cent capacity, the Secretary of Commerce, Robert P. Lamont, stated that "there is nothing to be disturbed about" in the business outlook of the Nation.

Employment is increasing from the low points of November and December but is not as high as last year at this time, the Secretary stated, but last

year was a high year, he said, January and February being exceptional months with record production in many lines, notably automobiles, while, as a rule, January and February are low months.

The Secretary emphasized the importance of the unemployment statistics to be collected this year in connection with the coming decennial census and expressed his opinion that the complete returns on a national basis will eliminate speculation as to the employment situation and will provide the basis for remedial action should it be necessary.

The construction outlook is good, he said, and cited the favorable conditions in fabricated steel plants which are filled up with new orders for months to come.

"MODERN HOME" COURSE OF U. OF C. EXTENSION

Increased building activity in the San Francisco bay region is responsible for the inauguration of a course in "The Modern Home," which will be given by the University of California Extension Division beginning March 12.

The course will be under the direction of William C. Hayes, who besides being Professor of Architecture at the University, is well known for his architectural work throughout the Pacific Coast.

Prof. Hayes will speak on house plans, the site and the relation of the house to it, equipment, arrangement, interior and exterior design, styles of homes, what constituted a good house, some consideration of the investment and value to be considered when purchasing a house. The class will be held at the Extension Building at 540 Powell St., San Francisco.

SAND AND GRAVEL MEETING FAVORS STANDARDIZATION

Steps leading toward the elimination of two outstanding problems of the sand and gravel industry were inaugurated at the convention of the National Sand and Gravel Association at Memphis, Tenn. Reduction in the number of sizes of gravel from 50 or more in every locality to six was suggested in a report of the committee on standard specifications, which will be submitted to the membership of the association for approval. Should these specifications prove satisfactory, they will be submitted to the bureau of simplified practice of the U. S. Department of Commerce, for adoption throughout the industry.

The convention adopted the suggestion of the trade relations committee that it hold a trade practice conference with the Federal Trade Commission in the near future for the purpose of establishing a code of ethics. Rules for the guidance of the industry will be prepared along the lines of those already adopted under the auspices of the Federal Trade Commission by many other industrial groups.

NORTHWEST BRANCH OF A. G. C. ELECTS OFFICERS

O. J. Amberg was re-elected president of the Northwest Branch of the Associated General Contractors of America at the two-day convention held in Portland, Ore., last week. James Murdoch of Seattle was re-elected first vice-president; W. T. Jacobson of Portland, and Geo. Lyon of Spokane, second and third vice-presidents, respectively. Henry George was elected treasurer and Dan Hannah, executive secretary.

MODERN PIERS ADVOCATED FOR SAN FRANCISCO HARBOR

San Francisco's water-borne commerce has increased 100 per cent since the World war started, and Major Charles Tilden, president of the Board of State Harbor Commissioners, predicts the business will double again in the next 16 years.

Addressing the harbor committee of the Junior Chamber of Commerce, Tilden advocated that a part of the \$10,000,000 bond issue to be voted upon by the people of California be used to develop modern piers north of the Ferry building especially for passenger travel.

"Passengers should not be required to go a mile or two south of the Ferry building to get to and from their ships," he said. "North of Market street is the proper section of the water front for passenger terminals. The wharves directly north of the ferry are small, old-fashioned and rotting away. All the old docks are now too small. They used to accommodate two vessels on a side, now they can hold only one of the big modern steamers."

"While the marine commerce of the city and the docking space have doubled in the last 16 or 17 years, the wharf facilities are still too small. One of the watch-words of San Francisco harbor is to keep the dockage charges down so as to induce steamship companies to come here."

"The rent is sixteenths of a cent per square foot monthly, a low enough rate and below that of many other ports. That the people of the city may become better acquainted with the importance of foreign trade, I suggest another Harbor day previous to the bond election."

BUILDING ACTIVITIES DECLINE IN JANUARY

The volume of construction performed during January, 1930, declined 38 points from the level of construction job activities in December according to a statistical study just completed by the Associated General Contractors of America. This decline is seen as a logical result of the previous declines in contract awards which became manifest during the summer of 1929.

The outlook for the future is exceptionally bright, however, since the same statistical study reveals that the volume of state and municipal bond issues sold in December represents an increase of 320 per cent over those of November and is equal to the largest volume of such bonds sold in any month since December, 1921, when a similar large sale of bonds ushered in the boom construction years of 1922 and thereafter. The proceeds from state and municipal bonds are generally used in public works construction hence the contractors' association looks forward to a steady increase in construction activity in this field beginning with next spring.

A further development that indicates an increase in construction activity is seen in the passage of the Federal Aid Appropriations Bill by Congress which provides an increase in federal funds to be used in conjunction with the funds of the various states on the improvement of highways. The new act provides for \$125,000,000 per year for each of the fiscal years 1931, 1932 and 1933.

Since the fiscal year 1931 begins on July 1, 1930, this increase in appropriations is taken to mean that the volume of highway construction during the coming season will be increased by at least \$100,000,000 over the volume that would otherwise be

undertaken. States that match their funds against federal aid may let contracts early this spring and by carrying the light early payments required by such early starting of operations can utilize the full volume of federal funds in the summer months when expenditures are heavy and progress in construction is more rapid.

Consequently, although the index figures showing the volume of construction performed during January, as indicated by shipments of basic construction materials, are lower than during January of any recent year this decline is taken by organized contractors to be a lull preceding a period of great activity, especially in the public works and highway construction fields.

RESULTS OF TEST ON SEWAGE TREATMENT

Bulletin No. 198 of the Engineering Experiment Station of the University of Illinois contains the results of tests on sewage treatment which were conducted at the experimental sewage testing plant of the University of Illinois.

Six series of investigations were made, the objects of which were as follows: (1) to study the practicability of sludge digestion in shallow Imhoff tanks with a view toward reducing the expense and difficulties met in the construction of deeper tanks; (2) to determine the effectiveness of placing roofs on sludge drying beds to hasten the drying of the sludge; (3) to determine whether or not it is feasible or advantageous to draw sludge into the drying beds in cold weather, as it was generally supposed that the freezing of sludge prevents its drying; (4) to derive an expression for the relation between the factors affecting sedimentation, i. e., the period of retention, the velocity of flow, the concentration of the particles, the depth of flow, and the temperature, and the per cent reduction of suspended particles in the sewage; (5) to determine the practicability of heating the sludge compartment of an Imhoff tank to increase the quantity of gas produced; and (6) to determine the quantity and quality of gas formed, the effect of heating the sludge, and the effect of circulating the tank liquor in preventing scum formation, with the use of a separate sludge digestion tank.

Copies of Bulletin No. 198 may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

LUMBER MANUFACTURERS AWARD CONTEST PRIZES

The National Lumber Manufacturers Association announces the awarding of prizes \$100 to R. F. Buckley, edge-man and beltman, employed by the J. J. Newman Lumber Co., Sumrall, Miss., and A. Brattle steam and electrical engineer for the Snoqualmie Falls Lumber Co., Snoqualmie Falls, Wash., for devices which they submitted in the 1928-1929 National Waste Prevention Contest.

Twenty-six entries were received in the contest. The two mentioned above were, in the majority opinion of the members of the Utilization and Waste Prevention Committee of the National Lumber Manufacturers Association, original, practical, met fully the conditions of the contest, and worthy of prize awards. Mr. Buckley's entry is an Edger Safety Guard intended to prevent kickbacks. Mr. Brattle's entry is a Sawmill Carriage Block Cleaning device.

SAN JOSE ENGINEERS ELECT OFFICERS FOR 1930

John W. Ford, engineer of the San Jose Water Works, was installed president of the Engineers' Club of San Jose at the annual banquet meeting of the club at the Commercial Club. Ford succeeded Stanley Chapman who officiated as the installing officer.

Other officers elected and installed were Samuel P. Lavery, vice-president; Mark Thomas, secretary-treasurer, and William D. Lotz and Michael H. Antonacci, directors.

The new officers were submitted as the candidates by the nominating committee, W. H. Ball, R. V. Lotz and B. H. Skillings.

Ford announced the appointment of the following members to new committees:

Membership committee, Chairman Stanley Chapman, Frank Herman, Michael H. Antonacci and Harold Flannery; entertainment committee, W. L. Popp, chairman; Harold Tustin, Lylo Ohlson, Clarence Kerr and George Grene; auditing committee, Sam Lavery, chairman, W. MacLean, Lowell West; publicity committee, Michael H. Antonacci, chairman, W. L. Popp, Mark Thomas, Bruce Bolwell and Stanley Chapman, and sports committee, Russell Brady, chairman, Harold Tustin and Mark Thomas.

Following the banquet, which was attended by 26 members, Roy Emerson and Roy Topham entertained the club with humorous readings.

BLUE PRINTING INDUSTRY REPORTS LOSSES

Small orders and free delivery is making serious drains on the blueprinting business; wastage of paper because of odd shapes of prints amounts to a large though reduced loss.

According to figures reported by the Department of Commerce all blueprint orders of less than 75 cents show loss. Few orders under \$1 pay. Apparently, if free delivery service is to be maintained, the minimum charge should be \$1. Other possibilities would be to charge for delivery on all orders of less than \$1, or to refuse delivery service entirely for such orders.

Few users of blueprints would object to a \$1 minimum after a sufficient recognition of the unprofitableness of smaller orders, provided most of the industry adopts \$1 as the low end on the schedule including complimentary service.

The facts regarding photocopy orders are similar to those of the blueprints. Figures on the sale of accessories show very inefficient merchandising. The stock turnover average of concerns in 8 import cities is reported to be 2.2 times ranging from 1 1/2 to 8 1/2. Returns merchandise range from a net loss 3.91% to a net profit of 25%.

GLADDING, McBEAN EARNING

Although 1929 income statement Gladding, McBean & Co. will not be published until after the annual meeting in April, the balance sheet as December 31 reveals progress made during the year. Net gain in surplus was \$262,272, cash dividends paid totaled \$564,565, and stock dividends 8641 shares were equivalent of \$24,249. The aggregate of these amounts therefore, would indicate net-earnings of \$1,106,086, equivalent to \$5.07 share on an average of 218,188 shares outstanding during the year.

Building News Section

APARTMENTS

Plans Being Prepared.
APARTMENTS Cost, \$45,000
OAKLAND, Alameda Co., Cal. Near Lake Merritt.
 Three-story frame and stucco apartment building (2 and 3-rooms).
 Owner—Withheld.
 Architect—Chester Treichel, American Bank Bldg., Oakland.

Preliminary Plans To Be Prepared.
APARTMENTS Cost, \$30,000
SAN FRANCISCO, Marina District.
 Three-story and basement frame and stucco apartment building.
 Owner—Thomas Quistad, 2100 North Point St.
 Architect—Irvine & Ebbets, Call Bldg.

Plans Being Figured.
APARTMENTS Cost, \$50,000
BURLINGAME, San Mateo Co., Cal. Carmelita St.
 Three-story and basement frame and stucco apartment building (12 4- and 5-room apts.).
 Owner—A. J. Mullin.
 Architect—Russell Coleman, 1404 Broadway, Burlingame.

Plans Being Completed.
APARTMENTS Cost approx. \$250,000
SAN FRANCISCO, N Jackson St. 80 W Laguna St.
 Ten-story steel and reinforced concrete apartments (30 3, 4 and 6-room apts.).
 Owner and Builder—A. Penziner, 750 Taylor St., San Francisco.
 Plans By Owner.
 Plans will be ready for figures in two or three weeks.

Plans Being Completed.
APARTMENTS Cost, \$17,000
BURLINGAME, San Mateo Co., Cal.
 Two-story reinforced concrete apartment and store building (4 2-room apts. and 2 stores).
 Owner—Carl Turrello, 1145 Drake St., Burlingame.
 Architect—E. L. Norberg, 580 Market St., San Francisco.
 Bids will be taken in about one week.

Contract Awarded—Sub-Bids Being Taken.
APARTMENTS Cost, \$144,000
AKLAND, Alameda Co., Cal. N. Beacon St., 100' E. Lakeshore Blvd.
 Even-story rein. concrete apts. (35 two and 3-room apts.).
 Owner—Golden State Income Properties Development Co., Inc.
 Architect—P. C. Williams, Oakland.
 Contractor—Chas. S. Mabrey Co., Inc. 1001 45th St., Sacramento, and Oakland.

Working Drawings Being Prepared.
APARTMENTS Cost, \$120,000
LONG BEACH, Los Angeles Co., Cal. Cedar Avenue.
 Three-story & basement Class C brick apartment (70x147 ft.).
 Owner—Monarch Constr. Co., Long Beach.
 Architect—Piper & Kahrs, 441 E. First St., Long Beach.

Working Bllder.
APARTMENTS Cont. price, \$16,522
SAN JOSE, Santa Clara Co., Cal. 1st and Oak Sts.

Two-story reinforced concrete and frame apt. and stores (four three-room apts. and two stores).
 Owner—Mike Sasa, San Jose.
 Architect—Chas. McKenzie, Bank of San Jose Bldg., San Jose.
 Low Bidder—Joseph Santi, San Jose.
 Next low bid was submitted by C. V. Brown, San Jose, at \$18,296. There were 12 bids submitted.

Plans Being Prepared.
ALTERATIONS Cost, \$40,000
SAN FRANCISCO, NW Bush and Polk Streets.
 Alter present apartments.
 Owner—Estate Louis Freidman.
 Architect—S. Heiman, 605 Market St., San Francisco.
 Work involves painting, electric wiring, plumbing, frigidaire. Plans will be ready for bids in about two weeks.

February 24, 1930
 Plumbing & Heating Contract Awarded.
APARTMENTS Cost, \$200,000
SAN FRANCISCO, SE O'Farrell and Franklin Sts.
 Six-story steel frame and reinforced concrete class C apartment building (42 2- and 3-room apts.).
 Owner and Builder—C. S. Hoffman, 1541 Howard St., San Francisco.
 Plumbing and Heating—J. Gibbs Sons, 1706 Geary St.

BONDS

SUNNYVALE, Santa Clara Co., Cal.—Sunnyvale School District defeats proposal to issue bonds of \$25,000 to finance additions to present school. Of the 265 votes cast, 150 favored the issue and 115 voted against it. A two-thirds majority was required.

BAKERSFIELD, Kern Co., Cal.—Bakersfield City School District has called election for March 25 to vote a direct tax for \$50,000 to finance erection of a new school on the Horace Mann School site. Will contain 6 or 8 classrooms and administrative offices.

FORTUNA, Humboldt Co., Cal.—Election will be held March 7 in Fortuna Elementary School District to vote bonds of \$35,000 to finance erection of a new school. Trustees of the district are: Mary M. Morgan, P. A. Hugo and Francis M. Bruner. Norman Coulter, 46 Kearny St., San Francisco, architect.

SAN JOSE, Santa Clara Co., Cal.—Election will be held March 17 in Franklin School District to vote bonds of \$45,000 to finance erection of a new school building. Trustees of the district are: H. H. Titcomb, A. B. Anderson and Catherine L. Wool. W. H. Weeks, Hunter-Dubin Bldg., San Francisco; 1736 Franklin St., Oakland, and Bank of Italy Bldg., San Jose, architect.

JANESTOWN, Tuolumne Co., Cal.—Voters in the Jamestown School District will shortly select a site on which to erect a new grammar school. Two bond elections calling for an expenditure of \$17,000 to finance the new school have been defeated, but, it is thought, to failure of the voters to favor the site.

KETTLEMAN CITY, Kings Co., Calif.—Second election will be held shortly in Sunset School District to vote bonds of \$15,000 to finance erection of a new school building. Previous election carried but was declared illegal. Plans for the structure have been completed by Architect E. W. Petersen, Mason Bldg., Fresno.

VALLEJO, Solano Co., Cal.—Andrew P. Hill, chief of the state division of schoolhouse planning, in a report to the Board of Education, recommends the construction of a new junior high school building as a solution to the over-crowded conditions in local schools. A structure costing \$230,000 on a 10-acre tract in the eastern section of the city is proposed. Bonds

would be voted to finance construction.
